What Are the Risks?

All investments involve risks, including possible loss of principal. Special risks are associated with foreign investing, including currency fluctuations, economic instability and political developments; investments in developing markets involve heightened risks related to the same factors. Currency rates may fluctuate significantly over short periods of time, and can reduce returns. Because the Fund may invest its assets in companies in a specific region, including Europe, it is subject to greater risks of adverse developments in that region and/or the surrounding regions than a fund that is more broadly diversified geographically. Current political uncertainty concerning the economic consequences of the departure of the United Kingdom from the European Union may increase market volatility. Derivatives, including currency management strategies, involve costs and can create economic leverage in the portfolio which may result in significant volatility and cause the fund to participate in losses (as well as enable gains) on an amount that exceeds the fund's initial investment. The fund may not achieve the anticipated benefits, and may realize losses when a counterparty fails to perform as promised. The fund's risk considerations are discussed in the prospectus.

Glossary

Beta: A measure of the fund's volatility relative to the market, as represented by the stated Index. A beta greater than 1.00 indicates volatility greater than the market.

Standard Deviation: A measure of the degree to which a fund's return varies from the average of its previous returns. The larger the standard deviation, the greater the likelihood (and risk) that a fund's performance will fluctuate from the average return.

Important Information

Investors should carefully consider a fund's investment goals, risks, charges and expenses before investing. To obtain a summary prospectus and/or prospectus, which contains this and other information, talk to your financial professional, call us at (800) DIAL BEN/342-5236 or visit franklintempleton.com. Please carefully read a prospectus before you invest or send money.

Performance: The fund offers other share classes subject to different fees and expenses, which will affect their performance.

Effective 6/30/2016, the fund's benchmark changed to MSCI AC World (USD Hedged) Index-NR from MSCI World Index due to a strategy change whereby the fund will seek to hedge substantially all of the non-U.S. dollar exposure.

Linked MSCI ACWI Hedged/ACWI-NR reflects performance of the MSCI World Index from fund inception through 12/31/1987, MSCI All Country World Index (gross return) through 12/31/2000, MSCI All Country World Index-NR through 6/29/2016 (provided for comparative purposes only, not fund's benchmark during this time) and the MSCI AC World (USD Hedged) Index-NR thereafter.

Class A: Prior to 9/10/18, these shares were offered at a higher initial sales charge of 5.75%; thus actual returns would have differed. Total returns with sales charges have been restated to reflect the current maximum initial sales charge of 5.50%. On 1/1/93, a plan of distribution was implemented for these shares under Rule 12b-1, which affects subsequent performance.

Top Ten Holdings: The portfolio manager for the fund reserves the right to withhold release of information with respect to holdings that would otherwise be included.

Composition of Fund: Percentage may not equal 100% due to rounding.
