INVESTMENT OBJECTIVE AND STRATEGY

The fund seeks long-term capital appreciation.

Invests in a variety of developed and emerging market equity funds, and from time to time, a money market fund.

BENEFITS AND RISKS

Professionally managed allocation of assets among a broad range of stock funds, which, in turn, have holdings in many different foreign countries, industrialized as well as emerging markets, and in both large and small companies.

Subject to general stock market risks.

Funds that invest overseas generally carry more risk than funds that invest strictly in U.S. assets.

Risks include currency risk, the effects of negative currency exchange rates.

To the extent the fund has investments in emerging market countries, it will be more subject to abrupt and severe price declines.

CUMULATIVE RETURNS
