

Thrivent Low Volatility Equity Fund

Inception Date Feb. 28, 2017 **Ticker** TLVOX **Total Fund Assets** \$27.80 million **Expense Ratio** Gross: 1.44% Net: 0.95%*

Fund Description

This fund seeks to provide investors with returns similar to the global equity markets with lower volatility over a full market cycle. The Fund is globally diversified with an approximate allocation of 60% U.S. and 40% non-U.S. stocks and may invest in securities of any market capitalization. The Fund employs investment management techniques to identify securities that exhibit low volatility returns. Therefore it is expected that the Fund will generally underperform the global equity markets during periods of strong market performance.

Investment Strategy/Process

The portfolio management team uses active quantitative management techniques to forecast investment returns and to identify relationships between securities. The process uses factor models and also strives to identify groups of stocks that are less correlated to each other. The team constructs a risk-optimized portfolio with a focus on low-volatility securities. The Fund is expected to be well-diversified with global securities. As a part of the risk management process, sector, country, and individual security weights will be constrained.

Growth of \$10,000 and Calendar Year Performance (%)

- ☐ Calendar Year Total Returns (CYTR) - without charges, fees, or expenses
- Total Market Value (reflects reinvestment of all dividends and capital gains) - \$14,794
- Current Value of Reinvested Dividends and Capital Gains - \$1,194

All data represents past performance. Past performance does not guarantee future results. The investment return and principal value of the investment will fluctuate so that an investor's shares, when redeemed, may be worth more or less than the original cost. Current performance may be lower or higher than the performance data quoted. Call 800-847-4836 or visit thriventfunds.com for performance results current to the most recent month-end.

Performance shown assumes the reinvestment of all dividends and capital gains. Other share class performance may vary due to differences in fees and expenses.

*The Adviser has contractually agreed, for a period of one year from the date of the most recent prospectus, to waive certain fees and/or reimburse certain expenses associated with the Fund. Refer to the Fees & Expenses table in the Fund's prospectus.

**Source: Lipper. The Lipper median represents the median annualized total return for all reported funds in the classification. Lipper medians do not include sales charges/fees. If included, returns would have been lower.

Investment Objective

Thrivent Low Volatility Equity Fund seeks long-term capital appreciation with lower volatility relative to the global equity markets.

Minimum Investment

Non-retirement: \$2,000; IRA or tax-deferred: \$1,000; Subsequent: \$50

Benchmark(s)

Risks: The Fund seeks lower volatility than the global equity markets, however it will experience some volatility. The Fund's value is influenced by a number of factors, including the performance of the broader market, and risks specific to the Fund's asset classes, investment styles, and issuers. Markets may also be impacted by domestic or global events, including public health threats, terrorism, natural disasters or similar events. The use of quantitative investing techniques and derivatives such as futures also involve risks. Foreign investments involve additional risks, such as currency fluctuations and political, economic and market instability, which may be magnified for investments in emerging markets. These and other risks are described in the prospectus.

Turnover Ratio (last 12-months) [†]	73%

Risk/Volatility Measures

Beta (3-year vs. S&P 500[®] Index): A measure of the volatility, or market risk, of an investment compared to the broad U.S. large-cap stock market.

Standard Deviation: Measures risk by showing how much a fund fluctuates relative to its average return over a period of time.

	Fund	S&P 500 [®] Index ^{§§}
3 Year	13.67	18.81
5 Year	N/A	15.20
10 Year	N/A	13.26

Equity Characteristics

Market Capitalization is a measure of the size of the companies held in the portfolio, calculated by multiplying a company's total outstanding shares by the stock price.

	Fund	S&P 500 [®] §§
Median Mkt Cap	\$30.2 B	\$30.6 B
Weighted Avg Mkt Cap	\$134.1 B	\$563.6 B

Price to Earnings (P/E) Ratio: A valuation ratio of a company's current share price compared to its earnings per-share, calculated by dividing the market value per share by its trailing 12-month earnings.

	Fund	S&P 500 [®] §§
P/E Ratio	23.2	24.3

Return on Equity (ROE): A measure of corporate profitability that shows how much net income the companies in the portfolio have generated as a percentage of shareholder equity.

	Fund	S&P 500 [®] §§
ROE	22.9%	23.3%

[†]Turnover Ratio: 12-month rolling as of Aug 31 2021. A measure of a Fund's trading activity calculated by dividing the lesser of long-term purchases/sales by average long-term market value.
