Morgan Stanley Capital International All Countries World Index ex USA Net captures large and mid cap elements across 22 of 23 Developed Markets countries (excluding the US) and 26 Emerging Markets countries, covering approximately 85% of the global equity opportunity set outside the US. These indexes are calculated in US dollars and in local currency, without dividends, with net dividends or with gross dividends reinvested.

The illustration is based on a hypothetical $10,000 investment in A Class shares. All results shown assume reinvestment of dividends and capital gains. The maximum sales load on Class A shares is 5.5%; the maximum CDSC on Class C shares is 1%; Class I shares are no load shares which are available exclusively through registered investment advisors or for institutional accounts.

Fund Sub-Advisor

Eagle Global Advisors ("Eagle") is owned by its employees. Eagle uses a team approach for the management of the International Fund, with each member of the team assuming responsibility for a geographic area of the globe and specific market sectors within that geographic area.

Objective

The investment objective of this Fund is to provide you with long-term growth of capital.

Strategy

- The Fund seeks to achieve its investment objectives by normally investing at least 80% of the Fund's total assets in the securities of foreign companies (companies domiciled in countries other than the United States), without regard to market capitalizations.
- The Fund invests its assets in companies which the Fund's Investment Manager believes show a high probability for superior growth. Companies that meet or exceed specific criteria established by the Manager in the selection process are purchased. Securities are sold when they reach internally determined pricing targets or no longer qualify under the Manager's investment criteria.
- The Fund allocates investments across countries and regions at the Manager's discretion. International funds, compared to domestic funds, have added risk from currency fluctuations, more rapid and extreme changes in value due to smaller market sizes, or from possible adverse political activities.
