Performance data shown represents past performance. Investment returns and principal value will fluctuate, so that fund shares, when redeemed, may be worth more or less than the original cost. Past performance does not guarantee future results and current performance may be lower or higher than the performance data shown. Visit [madisonfunds.com](http://madisonfunds.com) or call 800.877.6089 to obtain performance data current to the most recent month-end.

## Annual Distribution History Breakdown - Class Y, per share

	Year-end NAV	Total Distribution	30-Day SEC Yield <sup>3</sup>	Distribution Yield <sup>4</sup>
2020	\$8.80	\$0.56	0.66%	6.51%
2019	\$8.40	\$0.59	0.70%	7.28%
2018	\$7.80	\$0.77	1.93%	9.12%
2017	\$9.08	\$0.69	1.29%	7.59%
2016	\$9.10	\$0.61	0.46%	6.74%

<sup>1</sup> Growth of \$10,000 is calculated at NAV and assumes all dividends and capital gain distributions were reinvested. It does not take into account sales charges (see Note 2) or the effect of taxes.

<sup>2</sup> Average annual total returns and calendar year returns assume all distributions are reinvested and reflect applicable fees and expenses. Class A share returns without sales charge would be lower if sales charge were included. Class A share returns with sales charge reflect the deduction of the maximum applicable sales charge of 5.75%. Class C shares do not have an up-front sales charge, however, C shares are subject to a 1% CDSC on shares redeemed within 12 months of purchase. Class Y shares and Class R6 shares do not impose an up-front sales charge or a CDSC. Indices are unmanaged. An investor cannot invest directly in an index. They are shown for illustrative purposes only, and do not represent the performance of any specific investment. Index returns do not include any expenses, fees or sales charges, which would lower performance.

<sup>3</sup> SEC Yield equals Net Investment Income (Gross Investment Income less Operating Expenses) divided by average asset value (average shares outstanding less net asset value).

<sup>4</sup> Distribution Yield equals the Total Distribution amount divided by the average of the beginning and end of year Net Asset Value (NAV). Distribution yield includes net investment income plus both short- and long-term capital gain distributions.

Indices are unmanaged. An investor cannot invest directly in an index. They are shown for illustrative purposes only, and do not represent the performance of any specific investment. Index returns do not include any expenses, fees or sales charges, which would lower performance.

## Experienced Management

Ray DiBernardo, CFA  
Portfolio Manager  
Industry since 1987

Drew Justman, CFA  
Portfolio Manager  
Industry since 2001

## Fund Features

- ▶ Fund seeks total return with high level of income
- ▶ Focus on large and mid cap stocks
- ▶ Generates income from selling covered call options on stocks held and from dividends
- ▶ Premiums from call options help offset potential market losses

Class	Ticker	Inception Date	Exp. Ratio
A	MENAX	10/31/09	1.30%
C	MENCX	7/31/12	2.05%
Y	MENYX	10/31/09	1.05%
R6	MENRX	7/31/12	0.92%

*Expense ratios are based on the fund's most recent prospectus.*

## Distribution Frequency - Quarterly

## 30-Day SEC Yields

Class	30-Day SEC Yield
A	-0.11%
C	-0.87%
Y	0.14%
R6	0.27%

## Sector Allocation (%)

Shareholder Services  
 Madison Funds  
 P.O. Box 219083  
 Kansas City, MO 64121-9083  
 800.877.6089

Consultant and  
 Advisor Services

Madison Asset Management, LLC does not provide investment advice directly to shareholders of the Madison Funds. Materials on this document are informational only and should not be taken as investment recommendation or advice of any kind whatsoever (whether impartial or otherwise).

Standard Deviation: a statistical measurement of dispersion about an average, which, for a portfolio, depicts how widely the returns varied over a certain period of time. Investors may use the standard deviation of historical performance to understand the range of returns for a portfolio. When a portfolio has a higher standard deviation than its benchmark, it implies higher relative volatility. Standard deviation has been calculated using the trailing monthly total returns for the appropriate time period. The standard deviation values are annualized. Downside Capture Ratio measures a fund's performance in down markets relative to its benchmark. It is calculated by taking the security's downside capture return and dividing it by the benchmark's downside capture return over the time period. TTM P/E (Price-to-Earnings Ratio) measures how expensive a stock is. It is calculated by the weighted average of a stock's current price divided by the company's trailing 12-month (TTM) earnings per share of the stocks in a fund's portfolio. P/B (Price-to-Book Ratio) measures a company's stock price in relation to its book value (the total amount a company would be worth if it liquidated its assets and paid back all its liabilities). ROE (Return on Equity) is a profitability ratio that measures the amount of net income returned as a percentage of shareholders equity. Dividend Yield: the portfolio's weighted average of the underlying fund holdings and not the yield of the fund. R-squared (R<sup>2</sup>) is generally interpreted as the percentage of a fund's movements that can be explained by movements in a benchmark index. Active Share is defined as the percentage of a portfolio that differs from its benchmark index. Active Share can range from 0% for an index fund that perfectly mirrors its benchmark to 100% for a portfolio with no overlap with an index. 30-day SEC Yield (Class Y) is a standardized formula designed to approximate the Fund's annualized hypothetical current income from securities less expenses for the 30 day-period ended 12/31/20 and that date's maximum offering price. Wtd. Avg. Market Cap measures the size of the companies in which the fund invests. Market capitalization is calculated by multiplying the number of a company's shares outstanding by its price per share.

The S&P 500® is an unmanaged index of large companies, and is widely regarded as a standard for measuring large-cap and mid-cap U.S. stock-market performance. Results assume the reinvestment of all capital gain and dividend distributions. An investment cannot be made directly into an index. The CBOE S&P 500 BuyWrite

(ticker: BXM) Index is the passive representation of a covered call strategy. The BXM Index is an unmanaged (passive) total return index based on buying the S&P 500® stock index portfolio and "writing" (or selling) the near term S&P 500® Index "covered" call option (SPX) every month with an exercise price just above the prevailing index level (i.e., slightly out of the money). Source: CBOE

An investment in the fund is subject to risk and there can be no assurance that the fund will achieve its investment objective. The risks associated with an investment in the fund can increase during times of significant market volatility. The principal risks of investing in the fund include: equity risk, mid-cap company risk, option risk, tax risk, concentration risk and foreign security and emerging market risk. More detailed information regarding these risks can be found in the fund's prospectus.

As a writer of a covered call option, the fund forgoes, during the option's life, the opportunity to profit from increases in the market value of the security covering the call option above the sum of the premium and the strike price of the call, but has retained the risk of loss should the price of the underlying security decline. In addition to its covered call strategy, the fund may pursue an option strategy that includes the writing of both put options and call options on certain of the common stocks in the fund's portfolio.

Madison Funds are distributed by MFD Distributor, LLC, member FINRA and may be purchased directly from the fund or through your investment professional. Portfolio data is as of the date of this piece unless otherwise noted and holdings are subject to change.

"Madison" and/or "Madison Investments" is the unifying tradename of Madison Investment Holdings, Inc., Madison Asset Management, LLC ("MAM"), and Madison Investment Advisors, LLC ("MIA"), which also includes the Madison Scottsdale office.
