## INVESTMENT APPROACH

Matthews Asia believes in the long-term growth of Asia, one of the world's fastest-growing regions. Since 1991, we have focused our efforts and expertise in these countries, investing through a variety of market environments. Matthews Asia is the largest dedicated Asia-only investment specialist in the United States. With \$28.7 billion in assets under management as of September 30, 2021 Matthews Asia employs a bottom-up, fundamental investment philosophy with a focus on long-term investment performance.

## Investment Objective

Long-term capital appreciation.

## Strategy

Under normal circumstances, the Matthews Asia ESG Fund seeks to achieve its investment objective by investing at least 80% of its net assets, which include borrowings for investment purposes, in the common and preferred stocks of companies of any market capitalization located in Asia that Matthews believes satisfy one or more of its environmental, social and governance ("ESG") standards. The Fund seeks to invest in companies across the market capitalization spectrum that Matthews believes to be undervalued but of high quality and run by management teams with good operating and governance track records. In addition, the Fund seeks to invest in those Asian companies that have the potential to profit from the long-term opportunities presented by global environmental and social challenges as well as those Asian companies that proactively manage long-term risks presented by these challenges.

## Risks

*Matthews Asia ESG Fund's consideration of ESG factors in making its investment decisions may impact the Fund's relative investment performance positively or negatively. Investments in Asian securities may involve risks such as social and political instability, market illiquidity, exchange-rate fluctuations, a high level of volatility and limited regulation. Investing in emerging and frontier markets involves different and greater risks, as these countries are substantially smaller, less liquid and more volatile than securities markets in more developed markets.*
