

Principal® International Emerging Markets Fund as of 09/30/2021

A Shares: **PRIAX** C Shares: **PMKCX**

Investment Strategy

The investment seeks long-term growth of capital. The fund normally invests at least 80% of its net assets, plus any borrowings for investment purposes, in equity securities of emerging market companies at the time of purchase. "Emerging market" means any market which is considered to be an emerging market by the international financial community (including the MSCI Emerging Markets Index or Bloomberg Barclays Emerging Markets USD Aggregate Bond Index). It invests in equity securities regardless of market capitalization (small, medium or large) and style (growth or value).

Including Sales Charge	-0.86%	17.34%	6.76%	7.18%	4.43%	7.60%

Investment results shown represent historical performance and do not guarantee future results. Your investment's returns and principal values will fluctuate with changes in interest rates and other market conditions so the value, when redeemed, may be worth more or less than original costs. Current performance may be lower or higher than the performance shown. For more information, including the most recent month-end performance, visit principalfunds.com, call your financial professional, or call 800-222-5852. A sales charge may apply as follows: Class A shares: maximum up-front sales charge of 5.50% and Class C shares: contingent deferred sales charge of 1% on redemptions made during the first 12 months. See the prospectus for details. Performance listed with sales charge reflects the maximum sales charge.

Morningstar percentile rankings are based on total returns and do not reflect the inclusion of sales charges. If sales charges were reflected, rankings could be lower.

Returns shown for less than one year are not annualized.

Gross Expense Ratio is the current maximum expense ratio, as a percentage of assets that can be applied to this investment option. Net Expense Ratio represents the gross expense ratio less any fee waivers, reimbursements or caps, if applicable. The expense ratio, as a percentage of net assets, includes operating expenses, management fees, including 12b-1 fees, and administrative fees. When gross and net expense ratios differ, the investment adviser may have agreed to waive certain expenses that would normally be payable by the fund (through the noted dates) or contractually agreed to limit the investment option's expenses.

Operations

Total Net Assets (mil.)	\$292.63
Class A Inception Date	06/28/2005
Class C Inception Date	01/16/2007
Extended Performance Inception Date	12/06/2000

Total Investment Expense

	Gross Expense Ratio	Net Expense Ratio	Expiration Date	
			Contractual Cap	Waiver
Class A	1.67%	1.55%	02/28/2022	N/A
Class C	2.73%	2.51%	02/28/2022	N/A

	2011	2012	2013	2014	2015	2016	2017	2018	2019	2020
Annual Total Returns ^{1, 2} (Calendar Year)	-18.04%	20.05%	-5.15%	-4.25%	-14.10%	8.36%	40.73%	-21.12%	17.21%	19.33%

¹ Performance assumes reinvestment of all dividends and capital gains. Extended performance is calculated based on the historical performance of the fund's oldest share class, adjusted for the fees and expenses of the share class shown. Periods of less than one year are not annualized. Morningstar percentile rankings are based on total returns and do not reflect the inclusion of sales charges. If sales charges were reflected, rankings could be lower.

² The annual total returns shown above represent performance for Class A shares (not adjusted for sales charge) and any extended annual performance is based on the fund's oldest share class (not adjusted for sales charge). Annual total returns for other share classes will differ.

The full name of this investment option is Principal International Emerging Markets Fund.

The Composition depicts a breakdown of the investment option's portfolio holdings, as of the date listed, into general investment classes. The x-axis represents the percentage each investment group holds, with the y-axis representing a zero value. Values to the right of the y-axis represent long security positions, while values to the left of the y-axis represent short security positions. The table to the right of the bar chart sums these two values to present the net emphasis of each investment group. Due to rounding, the total net position may not equal 100%. Long positions involve buying a security and selling it later, with the hope that the security price rises over time. In contrast, short positions are taken to benefit from anticipated price declines. Portfolio holdings are subject to change and companies referenced in this report may not currently be held. Information is current as of the creation of this piece. Keep in mind that portfolio holdings are subject to risk. For a complete list of the most recent publicly available holdings visit principalfunds.com.

International and global investment options are subject to additional risk due to fluctuating exchange rates, foreign accounting and financial policies, and other economic and political environments.

Instances of high double-digit returns were achieved primarily during favorable market conditions and may not be sustainable over time.

MSCI Emerging Markets NR Index measures equity market performance in the global emerging markets. It consists of 26 emerging market countries in Europe, Latin America and the Pacific Basin.

Alpha: The difference between an investment's actual returns and its expected performance, given its level of risk (as measured by beta). **Beta:** An investment's sensitivity to market movements. **R-Squared:** Ranges from 0 to 100 and reveals how closely an investment's returns track those of a benchmark index. **Standard Deviation:** Measures how much an investment's returns are likely to fluctuate.
