Important Risks: Investing involves risk, including the possible loss of principal. Security prices fluctuate in value depending on general market and economic conditions and the prospects of individual companies. • Small- and mid-cap securities can have greater risks and volatility than large-cap securities. • Foreign investments may be more volatile and less liquid than U.S. investments and are subject to the risk of currency fluctuations and adverse political, economic and regulatory developments. These risks may be greater, and include additional risks, for investments in emerging markets. • Investing in companies that seek to address major social and environmental challenges may cause the Fund to forego certain investment opportunities and underperform funds that do not have a similar focus. The exclusion of certain issuers for reasons other than performance may negatively impact the Fund's performance.
