Why invest in the Evermore Global Value Fund?

- The Fund employs an opportunistic, special situations-focused investment approach that is difficult to replicate in the Mutual Fund industry.
- The Fund's opportunity set is different; Evermore seeks to own a concentrated portfolio of individual businesses undergoing strategic change. We call these changes catalysts, and believe catalysts are vital to long term shareholder value creation.
- Catalysts drive security selection and provide the Fund with the flexibility to invest in most market caps, sectors, and developed geographic regions.
- The capacity constrained Fund is typically concentrated in 30 to 40 core positions. The Fund typically has an Active Share of near 100, indicating very little portfolio overlap with its benchmark. The Fund is a complementary addition for those seeking non-benchmark exposures.
- Evermore investors are using the Fund to fill their Global, International, European or Alternative allocation needs, and to supplement low-cost passive ETF portfolios.

*Inception to Date. All periods over one year are average annualized total returns. The current gross expense ratios for the Investor class and Institutional class shares are 1.55% and 1.29% respectively.

Total return figures include reinvestment, if any, of all dividend and capital gain distributions. Investment performance reflects expense limitations in effect. In the absence of such expense limitations, total return would be reduced. The Fund imposes a 2% redemption fee on shares redeemed within 90 days. Performance data quoted does not reflect the redemption fee. If reflected, total returns would be reduced. The performance data quoted represents past performance and is no guarantee of future results. Current performance may be lower or higher than the performance data quoted. Investment return and principal value will fluctuate so that an investor's shares, when redeemed, may be worth more or less than their original cost. Performance data current to the most recent month end may be obtained by calling 866-EVERMORE or (866-383-7667).

Mutual fund investing involves risk. Principal loss is possible. The Fund invests in foreign securities which involve greater volatility and political, economic and currency risks and differences in accounting methods. These risks are greater for emerging markets. Investing in small and mid-sized companies involves additional risks such as limited liquidity and greater volatility. The Fund may make short sales of securities, which involves the risk that losses may exceed the original amount invested. Investments in debt securities typically decrease in value when interest rates rise. This risk is usually greater for longer-term debt securities. Investment in lower-rated, non-rated and distressed securities presents a greater risk of loss to principal and interest than higher-rated securities. Due to the focused portfolio, the fund may have more volatility and more risk than a fund that invests in a greater number of securities. Additional special risks relevant to our Fund involve derivatives and special situations. Please refer to the prospectus for further details.

Investments are not FDIC-insured, nor are they deposits or guaranteed by a bank or other entity.

Investors should carefully consider the investment objectives, risks, charges and expenses of the Fund before investing. This and other important information is contained in the Evermore Funds' statutory and summary prospectuses, which may be obtained by contacting your financial advisor, by calling Evermore Global Advisors at 866-EVERMORE or (866-383-7667) or on our website at www.evermoreglobal.com. Please read it carefully before investing.

While the Institutional Class is no-load, management and other expenses still apply. Please refer to the prospectus for further details.
