¹ Returns for less than one year are not annualized.

² Includes maximum 5.75% front-end sales charge.

The performance quoted represents past performance and does not guarantee future results. Investment return and principal value of an investment will fluctuate so that shares, when redeemed, may be worth more or less than their original cost. Current performance may be lower or higher than the performance quoted.

Performance data for all share classes current to the

most recent month end may be obtained by calling 800 523-1918 or visiting delawarefunds.com/performance.

Total returns may reflect waivers and/or expense reimbursements by the manager and/or distributor for some or all periods shown. Performance would have been lower without such waivers and reimbursements.

Performance at NAV assumes that no front-end sales charge applied or the investment was not redeemed. Performance at offer assumes that a front-end sales charge applied to the extent applicable.

³ Source: FactSet ⁴ P/E ratio is a valuation ratio of a company's current share price compared to its earnings per share (EPS). P/E CY1 is calculated using consensus forecasted EPS for the current calendar year. P/E CY2 uses forecasted EPS for the next calendar year. ⁵ Beta measures the security's volatility in relation to its benchmark index. ⁶ Annualized standard deviation measures historical volatility of returns. ⁷ Active share refers to the percentage of a fund's portfolio that differs from its benchmark, and is measured on a scale from 0% to 100%. The higher the active share measurement, the lower the portfolio overlap with its benchmark.

Delaware Select Growth Fund

Growth of \$10,000 (Institutional Class shares) **\$40,254 (current value)**

Past performance is not a guarantee of future results. The “Growth of a \$10,000 investment” graph assumes \$10,000 invested in Institutional Class shares of the Fund on September 30, 2011. Performance assumes reinvestment of all distributions and does not account for taxes. Expense limitations were in effect for some or all of the periods shown. Performance would have been lower had expense limitations not been in effect.

Significant Fund event

*On May 20, 2020, the Board of Trustees approved the replacement of the Fund's current sub-advisor with the US Small-Mid Cap Growth Equity team of the Fund's investment manager, Delaware Management Company. In connection with this determination, the Board approved certain changes to the Fund's investment strategies. These portfolio management and strategy changes were effective July 31, 2020. The investment strategy changes may result in higher portfolio turnover in the near term, as the new portfolio management team purchases and sells securities to accommodate the investment strategy changes. A higher portfolio turnover is likely to cause the Fund to realize capital gains and incur transaction costs. You should consult your financial advisor about the changes that will result from the investment strategy changes.

8 Total may not equal 100% due to rounding. Values in excess of 100% and negative values may appear as the result of certain assets and liabilities. See the Fund's prospectus for securities in which the Fund would typically invest.

Carefully consider the Fund's investment objectives, risk factors, charges, and expenses before investing. This and other information can be found in the Fund's prospectus and summary prospectus, which may be obtained by visiting delawarefunds.com/literature or calling 800 523-1918. Investors should read the prospectus and summary prospectus carefully before investing.

Investing involves risk, including the possible loss of principal. • Investments in small and/or medium-sized companies typically exhibit greater risk and higher volatility than larger, more established companies. • The disruptions caused by natural disasters, pandemics, or similar events could prevent the Fund from executing advantageous investment decisions in a timely manner and could negatively impact the Fund's ability to achieve its investment objective and the value of the Fund's investments.

Index performance returns do not reflect any management fees, transaction costs, or expenses. Indices are unmanaged and one cannot invest directly in an index. The **Russell 3000 Growth Index** measures the performance of the broad growth segment of the US equity universe. It includes those Russell 3000 companies with higher price-to-book ratios and higher forecasted growth values. The **Morningstar Large Growth Category** compares funds that invest primarily in big US companies that are projected to grow faster than other large-cap stocks. Growth is defined based on fast growth (high growth rates for earnings, sales, book value, and cash flow) and high valuations (high price ratios and low dividend yields).
