

# Invesco FTSE International Low Beta Equal Weight ETF

### **Fund description**

The Invesco FTSE International Low Beta Equal Weight ETF (Fund) is based on the FTSE Developed ex-U.S. Low Beta Equal Weight Index (Index). The Fund generally will invest at least 90% of its total assets in common stocks that comprise the Index. The Index tracks the performance of stocks in the FTSE Developed ex US Index that exhibit low beta characteristics. The Index is computed using the net return, which withholds applicable taxes for non-resident investors. The Fund and Index are reconstituted and rebalanced twice a year on the third Fridays of March and September.

Benchmark <sup>1</sup>	7.59	22.49	-14.09	24.21	2.75	-	-	-	-	-

Returns less than one year are cumulative. Performance data quoted represents past performance. Past performance is not a guarantee of future results; current performance may be higher or lower than performance quoted. Investment returns and principal value will fluctuate and Shares, when redeemed, may be worth more or less than their original cost. See invesco.com to find the most recent month-end performance numbers. Market returns are based on the midpoint of the bid/ask spread at 4 p.m. ET and do not represent the returns an investor would receive if shares were traded at other times. Fund performance reflects fee waivers, absent which, performance data quoted would have been lower.

### Fund inception: November 05, 2015

Not a Deposit Not FDIC Insured Not Guaranteed by the Bank May Lose Value Not Insured by any Federal Government Agency

Shares are not individually redeemable and owners of the Shares may acquire those Shares from the Fund and tender those Shares for redemption to the Fund in Creation Unit aggregations only, typically consisting of 50,000 Shares.

Index returns do not represent Fund returns. An investor cannot invest directly in an index. Neither the underlying Index nor the benchmark indexes charge management fees or brokerage expenses, and no such fees or expenses were deducted from the performance shown; nor do any of the indexes lend securities, and no revenues from securities lending were added to the performance shown. In addition, the results actual investors might have achieved would have differed from those shown because of differences in the timing, amounts of their investments, and fees and expenses associated with an investment in the Fund. <sup>1</sup>MSCI World ex US Index is an unmanaged index considered representative of stocks of developed countries excluding the United States. The Index is computed using the net return, which withholds applicable taxes for non-resident investors.

#### Investment risk

There are risks involved with investing in ETFs, including possible loss of money. Shares are not actively managed and are subject to risks similar to those of stocks, including those regarding short selling and margin maintenance requirements. Ordinary brokerage commissions apply. The Fund's return may not match the return of the Underlying Index. The Fund is subject to certain other risks. Please see the current prospectus for more information regarding the risk associated with an investment in the Fund.

Stocks of medium-sized companies tend to be more vulnerable to adverse developments, may be more volatile, and may be illiquid or restricted as to resale.

Investments focused in a particular industry or sector are subject to greater risk, and are more greatly impacted by market volatility, than more diversified investments.

The performance of an investment concentrated in issuers of a certain region or country, such as the Japan, is expected to be closely tied to conditions within that region and to be more volatile than more geographically diversified investments.

The risks of investing in securities of foreign issuers, including emerging market issuers, can include fluctuations in foreign currencies, political and economic instability, and foreign taxation issues.

#### Important information

Typically, security classifications used in calculating allocation tables are as of the last trading day of the previous month.

The Global Industry Classification Standards was developed by and is the exclusive property and a service mark of MSCI, Inc. and Standard & Poor's.

#### Glossarv

**30 Day SEC Unsubsidized Yield** reflects the 30-day yield if the investment adviser were not waiving all or part of its fee or reimbursing the fund for part of its expenses. Total return would have also been lower in the absence of these temporary reimbursements or waivers.

**30 Day SEC Yield** is based on a 30-day period and is computed by dividing the net investment income per share earned during the period by the maximum offering price per share on the last day of the period.

**Intraday NAV** is a symbol representing estimated fair value based on the most recent intraday price of underlying assets.

**Weighted Harmonic Average Stock Price-to-Book-Value Ratio (P/B Ratio)** is the ratio of a stock's market price to a company's net asset value.

**Weighted Harmonic Average Stock Price-to-Earnings Ratio (P/E Ratio)** is the share price divided by earnings per share. It is measured on a 12-month trailing basis.

Weighted Average Return on Equity is net income divided by net worth.

Weighted Market Capitalization is the sum of each underlying securities market value.
