

Atlanta Capital SMID-Cap Fund

A quality discipline applied to small- and midcap investing.

The Fund

A fundamental approach to investing in small- to midcap stocks, the Fund seeks companies that are in strong financial condition and that management believes are attractively valued relative to earnings and cash flow per share.

The Approach

Fund invests in companies with a demonstrated history of consistent, sustainable earnings growth, strong cash flow and high returns on capital determined by rigorous fundamental analysis of a company's financial trends, products and services, and other factors.

The Features

By investing in quality small- to mid-sized stocks management believes to be undervalued, the Fund has historically provided competitive long-term returns with less volatility than its benchmark of small-and midcap companies, the Russell 2500™ Index.

EISMX vs. Russell 2500™ Index during rising quarters, declining quarters and all quarters (01/01/2007-12/31/2021).
We seek to participate in rising markets, protect capital during declining markets and outperform over the long term.¹

Benchmark: Russell 2500™ Index³

Past performance is no guarantee of future results. Investment return and principal value will fluctuate so that shares, when redeemed, may be worth more or less than their original cost. Performance is for the stated time period only; due to market volatility, the Fund's current performance may be lower or higher than quoted. For the Fund's performance as of the most recent month-end, please refer to eatonvance.com. Returns are historical and are calculated by determining the percentage change in net asset value (NAV) with all distributions reinvested. Returns for other classes of shares offered by the Fund are different. Performance less than or equal to one year is cumulative. The minimum investment is \$1,000 for A Shares and \$250,000 for I Shares. Minimums may be waived in certain situations. Please see the prospectus for additional information.

¹Sources: Zephyr, Morningstar and Eaton Vance. For illustrative purposes only. Total return prior to commencement of I Shares reflects the total return of another class. The chart above illustrates the average (annualized) return of Atlanta Capital SMID-Cap I Shares during both rising and declining markets since 2007. Rising markets are defined as quarters where the return of the Russell 2500™ Index was positive. Declining markets are defined as quarters where the return of the Russell 2500™ Index was negative. These positive and negative quarters are separated out from the intervening quarters, cumulated across the period and annualized. On January 1, 2007, the Fund changed its name and strategy so it could invest in both small and mid cap equities — becoming Atlanta Capital SMID-Cap Fund. At this time, its benchmark was also changed to the Russell 2500™ Index. Prior to 2007, the Fund had been a portfolio that only invested in small cap equities, benchmarking to the Russell 2000® Index. ²Source: Fund prospectus. ³Russell 2500™ Index is an unmanaged index of approximately 2,500 small- and midcap U.S. stocks. Unless otherwise stated, index returns do not reflect the effect of any applicable sales charges, commissions, expenses, taxes or leverage, as applicable. It is not possible to invest directly in an index. Historical performance of the index illustrates market trends and does not represent the past or future performance of the fund.

About Risk: The value of investments held by the Fund may increase or decrease in response to economic, and financial events (whether real, expected or perceived) in the U.S. and global markets. The value of equity securities is sensitive to stock market volatility. Smaller companies are generally subject to greater price fluctuations, limited liquidity, higher transaction costs and higher investment risk than larger, more established companies. The Fund is exposed to liquidity risk when trading volume, lack of a market maker or trading partner, large position size, market conditions, or legal restrictions impair its ability to sell particular investments or to sell them at advantageous market prices. The impact of the coronavirus on global markets could last for an extended period and could adversely affect the Fund's performance. No fund is a complete investment program and you may lose money investing in a fund. The Fund may engage in other investment practices that may involve additional risks and you should review the Fund prospectus for a complete description.

⁴Percent of total net assets. Top 10 Holdings excludes cash and equivalents. Portfolio profile subject to change due to active management. Percentages may not total 100% due to rounding. ⁵Source: Zephyr. Alpha measures risk-adjusted performance, showing excess return delivered at the same risk level as the benchmark. Beta measures the volatility of a fund relative to the overall market. R-Squared represents the percentage of the portfolio's movement that can be explained by the general movement of the market. Standard deviation measures the historic volatility of a fund. Sharpe Ratio uses standard deviation and excess return to determine reward per unit of risk.

Before investing, investors should consider carefully the investment objectives, risks, charges and expenses of a mutual fund. This and other important information is contained in the prospectus and summary prospectus, which can be obtained from a financial advisor. Prospective investors should read the prospectus carefully before investing.
