

Investment Philosophy

We believe a portfolio of select large cap stocks may achieve above-benchmark long-term performance through capital appreciation, and by limiting downside risk.

Investment Strategy

- Invests in large cap companies we believe have favorable ratings on environmental issues, social responsibility and corporate governance (ESG).
- Uses proprietary, multi-factor, sector-specific models to rank stocks in each sector.
- Initial equal weight positions.
- Optimizes the portfolio to provide broad diversification across sectors, industries and individual companies, while controlling turnover.
- Uses proprietary risk screens seeking to eliminate stocks we believe are likely to underperform.

Product Highlights

- Quantitatively-based investment process with stringent risk controls.
- Integrates fundamental factors into proprietary quantitative models.
- Focuses on underperformance risk as much as outperformance opportunity.
- May well be suited for investors seeking broad ESG impact and to leverage the full ESG spectrum

The Responsible ESG U.S. Equity Composite objective is to achieve attractive long-term performance through an equally weighted portfolio of large-cap stocks, constructed with a disciplined blend of proprietary multi factor models and potential downside risk screens. The Portfolio invests at least 80% of the value of its net assets (including borrowings for investment purposes) in equity securities, such as common stocks, of U.S. large cap companies that meet the Portfolio's environmental, social and governance ("ESG") criteria.

The Russell 1000 Index is an unmanaged, market value weighted index, which measures performance of the largest 1,000 companies in the market. One cannot invest directly in an index.
