

WHY INVEST

- ✓ Highly concentrated portfolio of approximately 20 exceptional investment ideas, conviction weighted with 60-80% of assets in the top 10
- ✓ In-depth, rigorous research process developed by a management team who has worked together for nearly two decades
- ✓ Expectation to hold companies five to 10 years or longer, leading to low portfolio turnover

Performance data quoted represents past performance; past performance does not guarantee future results. The investment return and principal value of an investment will fluctuate so that an investor's shares, when redeemed, may be worth more or less than their original cost. Current performance of the Fund may be lower or higher than the performance quoted. Performance data current to the most recent month end may be obtained by visiting hennessyfunds.com.

¹ Represents the performance of the Institutional Class shares after 5/30/08 (inception of the share class) and Investor Class for periods prior to that date.

The performance for periods prior to 10/26/12 is that of the predecessor FBR Fund.

Must be preceded or accompanied by a current prospectus.

Mutual fund investing involves risk; Principal loss is possible. A non-diversified fund, one that may concentrate its assets in fewer holdings than a diversified fund, is more exposed to individual stock volatility than a diversified fund. The Fund invests in small and medium capitalized companies, which involves additional risks such as limited liquidity and greater volatility. Investments in foreign securities involve greater volatility and political, economic and currency risk and differences in accounting method. Funds concentrated in one or more industry sectors may be subject to a higher degree of risk.

Each Morningstar category average represents a universe of funds with similar objectives.

The Russell 3000® Index is an unmanaged index commonly used to measure the performance of U.S. stocks. The Russell Midcap® Growth Index is an unmanaged index commonly used to measure the performance of U.S. medium-capitalization growth stocks. One cannot invest directly in an index.

Fund holdings and sector weightings are subject to change and should not be considered a recommendation to buy or sell any security.

Alpha measures the fund's excess return relative to the return of the benchmark. Beta measures the volatility of the fund compared to that of the benchmark. The beta of the benchmark is 1.00. Capture ratios measure the fund's overall performance in up markets (positive return periods) and down markets (negative return periods). Price/Earnings measures a stock's price per share compared to earnings. Price/Book measures a stock's price per share to book value. Active Share is a measure of the percentage of stock holdings in a portfolio that differ from the benchmark index.

The Hennessy Funds are distributed by Quasar Distributors, LLC.
