## Investment Approach

Bottom Up, Fundamental

## Investment Goal

The Hodges Small Cap Fund focuses on specific growth and value opportunities within the small cap segment (generally market caps up to \$4 billion) of the market. We seek companies that are poised to benefit from recent industry consolidation, exhibit pricing power, have high barriers to entry, have strong brand awareness, and undervalued earnings prospects. The Fund has a history of better risk adjusted returns than its benchmark since inception.

Performance data quoted represents past performance and does not guarantee future results. The investment return and principal value of an investment will fluctuate so that an investor's shares, when redeemed, may be worth more or less than their original cost. Current performance of the fund may be lower or higher than the performance quoted. Performance data current to the most recent month end may be obtained by calling (866) 811 0224, or visiting [www.hodgesfunds.com](http://www.hodgesfunds.com) for quarterly performance. The fund imposes a 1.00% redemption fee on retail class shares held less than 30 days and 60 days for institutional class shares. Performance data does not reflect the redemption fee. If reflected, total return would be reduced. Gross performance doesn't reflect fees or expenses; if reflected, returns would be reduced.

The fund's investment objectives, risks, charges and expenses must be considered carefully before investing. The prospectus contains this and other important information about the Small Cap Fund, and it may be obtained by calling (866) 811 0224, or visiting [www.hodgesfunds.com](http://www.hodgesfunds.com). Read it carefully before investing.

Mutual fund investing involves risk. Principal loss is possible. The fund invests in smaller companies, which involves additional risks such as limited liquidity and greater volatility. The Fund invests in foreign securities which involves greater volatility and political, economic and currency risks and differences in accounting methods. The fund may also make short sales of securities, which involves the risk that losses may exceed the original amount invested. Options and future contracts have the risks of unlimited losses of the underlying holdings due to unanticipated market movements and failure to correctly predict the direction of securities prices, interest rates and currency exchange rates. These risks may be greater than risks associated with more traditional investments.

Shareholders should refer to the summary prospectus dated July 29, 2020, as supplemented, September 8, 2020, for specific details related to the reduction of fees.

Past performance is no guarantee of future results.

The Russell 2000 is a subset of the Russell 3000 Index. It represents the bottom 2000 companies by market capitalization. It is not possible to invest directly in an index.
