 Category

OVERALL RATING (as of 12/31/21)
Class S ★ ★ ★ ★

Overall Morningstar ratings 4 stars; 1116 funds. Three year rating 4 stars; 1116 funds. Five year rating 3 stars; 1012 funds. Ten year rating 4 stars; 768 funds. Morningstar ratings are based on risk-adjusted performance. Source: Morningstar, Inc. Ratings are historical and do not guarantee future results. Ratings for other share classes may vary.

Objective

The fund seeks to provide long-term growth of capital.

Strategy

The DWS Capital Growth Fund invests primarily in large cap U.S. companies with superior growth attributes. The investment process focuses on identifying businesses with a long-term path of strong potential growth driven by competitive advantage, strengthening fundamentals and secular tailwinds. The goal is to create a diversified portfolio across sector and industry as well as the various stages of growth (early, core, and established).

EXPENSE RATIO (as of latest prospectus)

Class	Net	Gross	Contractual Waiver
A	0.92%	0.92%	--
C	1.75%	1.75%	--
S	0.67%	0.67%	--
INST	0.69%	0.70%	01/31/2022
R	1.34%	1.34%	--
R6	0.61%	0.61%	--

Without a waiver, returns would have been lower and any rankings/ratings might have been less favorable.

Performance is historical and does not guarantee future results. Investment returns and principal fluctuate so your shares may be worth more or less when redeemed. Current performance may differ from the data shown. Please visit www.dws.com for the fund's most recent month-end performance. Performance includes reinvestment of all distributions. Index returns assume reinvestment of all distributions and do not reflect fees or expenses. It is not possible to invest directly in an index. Not all share classes are available to all investors. A minimum investment of \$1 million is required to open an account for Institutional shares.

* This fund began operations on 12/4/84 with Class AARP Shares. Returns prior to inception reflect the original share class performance, adjusted for higher operating expenses and/or the maximum sales charge.

The information contained herein: (1) is proprietary to Morningstar and/or its content providers; (2) may not be copied or distributed; and (3) is not warranted to be accurate, complete or timely. Neither Morningstar nor its content providers are responsible for any damages or losses arising from any use of this information. Past performance is no guarantee of future results. The Morningstar Rating™ for funds, or 'star rating', is calculated for managed products (including mutual funds, variable annuity and variable life subaccounts, exchange-traded funds, closed end funds, and separate accounts) with at least a three-year history. Exchange-traded funds and open-ended mutual funds are considered a single population for comparative purposes. It is calculated based on a Morningstar Risk-Adjusted Return measure that accounts for variation in a managed product's monthly excess performance, placing more emphasis on downward variations and rewarding consistent performance. The Morningstar Rating does not include any adjustment for sales loads. The top 10% of products in each product category receive 5 stars, the next 22.5% receive 4 stars, the next 35% receive 3 stars the next 22.5% receive 2 stars, and the bottom 10% receive 1 star. The Overall Morningstar Rating for a managed product is derived from a weighted average of the performance figures associated with its three-, five-, and 10 year (if applicable) Morningstar Rating metrics. The weights are 100% three-year rating for 36-59 months of total returns, 60% five-year rating/40% three-year rating for 60-119 months of total returns, and 50% 10-year rating/30% five-year rating/20% three-year rating for 120 or more months of total returns. While the 10-year overall rating formula seems to give the most weight to the 10-year period, the most recent three-year period actually has the greatest impact because it is included in all three rating periods.

³ Price-to-earnings ratio (P/E) is a stock's current price divided by the company's trailing 12-month earnings per share from continuous operations. Average market capitalization measures the size of the companies in which the fund invests. **Turnover rate** is the rate of trading activity in a fund's portfolio of investments, equal to the lesser of purchases or sales, for a year, divided by average total assets for that year. ⁵Source: Morningstar, Inc. as of 11/30/2021.

War, terrorism, economic uncertainty, trade disputes, public health crises (including the recent pandemic spread of the novel coronavirus) and related geopolitical events could lead to increased market volatility, disruption to U.S. and world economies and markets and may have significant adverse effects on the fund and its investments.

Fund risk: Stocks may decline in value. Fund management could be wrong in its analysis of industries, companies, economic trends and favor a security that underperforms the market. The fund may lend securities to approved institutions. Please read the prospectus for details.

Consider the investment objective, risks, charges and expenses carefully before investing. For a summary prospectus, or prospectus that contains this and other information, download one from www.dws.com or talk to your financial representative. Read the prospectus carefully before investing.
