

Loomis Sayles Growth Fund*

Fund Highlights¹

- Active management with a long-term, private equity approach to investing; bottom-up stock selection drives excess returns
- Seven-step research framework focuses on quality, growth and valuation; team must view growth as sustainable and profitable
- High-conviction portfolio of typically 30 to 40 stocks; high active share
- Looks to identify high-quality companies those with difficult-to-replicate business models
- Seeks to create a margin of safety by investing only when company is selling meaningfully below the team's estimate of intrinsic value

| Net Expense Ratios (Y/A) ² | 0.65%/0.90% |

Performance data shown represents past performance and is no guarantee of, and not necessarily indicative of, future results. Total return and value will vary, and you may have a gain or loss when shares are sold. Current performance may be lower or higher than quoted. For most recent month-end performance, visit im.natixis.com. Performance for other share classes will be greater or less than shown based on differences in fees and sales charges. You may not invest directly in an index. †Performance for periods less than one year is cumulative, not annualized. Returns reflect changes in share price and reinvestment of dividends and capital gains, if any.

1 Active share indicates the proportion of a portfolio's holdings that are different from the benchmark. A higher active share indicates a larger difference between the benchmark and the portfolio. 2 As of the most recent prospectus, the investment advisor has contractually agreed to waive fees and/or reimburse expenses (with certain exceptions) once the expense limitation of the fund has been exceeded. This arrangement is set to expire on 01/31/2022. When an expense limitation has not been exceeded, the gross and net expense ratios and/or yields may be the same. 3 This chart tracks the hypothetical growth of a \$10,000 investment in Class Y shares. Investment returns would be lower for Class A share investments, which are subject to higher fees and may also include sales charges.

Not all share classes are available for purchase by all investors. Class Y shares are available to institutional investors with a minimum initial investment of \$100,000 and through certain wrap-fee programs, retirement plans and investment advisory accounts with no minimum. See the prospectus for more details.

For each fund with at least a three-year history, Morningstar calculates a Morningstar Rating™ used to rank the fund against other funds in the same category. It is calculated based on a Morningstar Risk-Adjusted Return measure that accounts for variation in a fund's monthly excess performance, without any adjustments for loads (frontend, deferred, or redemption fees), placing more emphasis on downward variations and rewarding consistent performance. Exchange-traded funds and open-ended mutual funds are considered a single population for comparative purposes. The lop 10% of funds in each category receive 5 stars, the next 22.5% receive 3 stars, the next 22.5% receive 2 stars and the bottom 10% receive 1 star (each share class is counted as a fraction of one fund within this scale and rated separately, which may cause slight variations in the distribution percentages). Past performance is no guarantee of future results. ©2022 Morningstar, Inc. All Rights Reserved. Risks

Equity securities are volatile and can decline significantly in response to broad market and economic conditions. Foreign and emerging market securities may be subject to greater political, economic, environmental, credit, currency and information risks. Foreign securities may be subject to higher volatility than US securities, due to varying degrees of regulation and limited liquidity. These risks are magnified in emerging markets. Investments in small and midsize companies can be more volatile than those of larger companies. Growth stocks may be more sensitive to market conditions than other equities, as their prices strongly reflect future expectations. Currency exchange rates between the US dollar and foreign currencies may cause the value of the Fund's investments to decline.

4 Russell 1000® Growth Index is an unmanaged index that measures the performance of the large-cap growth segment of the U.S. equity universe. It includes those Russell 1000® companies with higher price-to-book ratios and higher forecasted growth values. 5 Source: GICS Sectors via FactSet Research Systems Inc. Cash and Unassigned allocations are not included. 6 Beta is calculated for the three-year period and represents the risk associated with the fund relative to market risks. For example, the market has a beta of 1.00, so if a fund has a beta of 0.85, it can be expected to be 15% less volatile than the overall market. Conversely, if a fund has a beta of 1.08, it can be expected to be 8% more volatile than the overall market. 7 R-squared is calculated for the three-year period and represents the percentage of the fund's movements that can be explained by the movements of the market. For example, index funds will tend to have R-squared values very close to 100. 8 Standard deviation measures the risk of a portfolio or market. Beta, R-squared and standard deviation are calculated on a monthly basis for the three-year annualized period as of the most recent quarter-end. 9 Active share indicates the proportion of a portfolio's holdings that are different from the benchmark. A higher active share indicates a larger difference between the benchmark and the portfolio. 10 P/E (Trailing) Ratio is the weighted harmonic average of the price-to-earnings (P/E) ratios of all the stocks in the portfolio. P/E ratio is the ratio of a stock's price to its earnings per share for the trailing twelve months. Does not include options. This excludes negative earnings. 11 P/B Ratio is the weighted harmonic average of the price-to-book (P/B) ratios of all the stocks in the portfolio. P/E ratio is the ratio of a stock's price to its book value per share. This excludes negative earnings. 12 Median market cap provides a measure of the market cap trailialization value of all the stocks in the portfolio. Market capitalization reflects the t

Before investing, consider the fund's investment objectives, risks, charges, and expenses. Visit im.natixis.com or call 800-225-5478 for a prospectus or a summary prospectus containing this and other information. Read it carefully.
