\$7,325,673

### Fund Highlights and Applications

- Invests in a diversified portfolio of small-sized U.S. companies.
- Selects securities of small companies that appear undervalued by the overall market relative to assets, earnings, growth potential or cash flows.
- Applies a valuation-focused stock selection process that combines fundamental research with a proprietary quantitative screening process to identify companies we believe have the potential to outperform.

### Growth of \$10,000 12.31.2011 – 12.31.2021

The hypothetical \$10,000 investment assumes an investment on 12.31.2011 is plotted monthly, includes changes in share price and reinvestment of dividends and capital gains and does not include the effects of the maximum 4.75% sales charge. If sales charges were included, performance would have been lower. There is no direct correlation between a hypothetical investment and the anticipated performance of the fund.

*Performance displayed represents past performance, which is no guarantee of future results. Investment return and principal value will fluctuate so that when shares are redeemed, they may be worth more or less than original cost. Current performance may be lower or higher than the performance data quoted. For up-to-date fund performance, including performance current to the most recent month end, please visit our website at [GuggenheimInvestments.com](http://GuggenheimInvestments.com). Load performance reflects maximum sales charges or contingent deferred sales charges (CDSC) as applicable. A Class shares have a maximum sales charge of 4.75%. Effective 2.22.2011, the A Class maximum front-end sales charge was changed from 5.75% to 4.75%. For performance periods that begin prior to 2.22.2011, a 5.75% load was used and for performance periods that begin after 2.22.2011, a 4.75% load was used. C Class shares have a maximum CDSC of 1% for shares redeemed within 12 months of purchase.*

Unless otherwise noted, data is as of 12.31.2021. Data is subject to change on a daily basis. Partial year returns are cumulative, not annualized. Returns reflect the reinvestment of dividends. **Risk Considerations:** This fund may not be suitable for all investors. Investing in mutual funds involves risk and does not assure a profit. • An investment in the fund will fluctuate and is subject to investment risks, which means investors could lose money. • The intrinsic value of the underlying stocks may never be realized or the stocks may decline in value. • Investments in small- and/or mid-sized company securities may present additional risks such as less predictable earnings, higher volatility and less liquidity than larger, more established companies. • Shares of mutual funds are not deposits of, or guaranteed or endorsed by, any financial institution; are not insured by the Federal Deposit Insurance Corporation (FDIC), the Federal Reserve Board or any other agency; and involve risk, including the possible loss of the principal amount invested. See the prospectus for details on the specific risks of each Guggenheim Investments fund. • Please read the prospectus for more detailed information regarding these and other risks.

**Index and Risk Definitions:** The Russell 2000® Value Index measures the performance for the small-cap value segment of the U.S. equity universe. It includes those Russell 2000 Index companies with lower price-to-book ratios and lower forecasted growth values. The trailing P/E ratio is the weighted average of each individual

stock's P/E ratio. The P/E ratio of a stock is calculated by dividing the current price of the stock by its trailing 12-month's earnings per share. The Price/Book ratio is the market price of a stock divided by the book value per share. Return on equity is net income divided by net worth. The three-year EPS growth rate is a weighted average of each stock holding's growth rate in earnings per share (EPS). EPS is total earnings divided by the number of shares outstanding. This measure is not a forecast of the fund's performance.
