

Parnassus Core Equity Fund

Fourth Quarter 2021

Strategy

The Parnassus Core Equity Fund invests with low turnover and high conviction in approximately 40 holdings. The Fund focuses on identifying high-quality companies with:

- Wide moats or strong competitive advantages that protect market share and profitability
- Relevancy over the long term, which provides a compounding growth component
- Quality management teams that will act in the best interests of shareholders
- Favorable three-year investment horizon

The Fund strives to outperform the S&P 500 Index on a risk-adjusted basis with a high active share. The Fund attempts to mitigate risk from losses during bear markets, while offering the potential for significant upside participation during bull markets.

Total Returns (%)¹

As of 12/31/21	3M	YTD	1Y	3Y	5Y	10Y
PRBLX	10.74	27.55	27.55	26.41	18.64	16.41
PRILX	10.79	27.81	27.81	26.69	18.90	16.64
S&P 500 Index	11.03	28.71	28.71	26.07	18.47	16.55

Annual Returns (%)

● PRBLX ● PRILX ● S&P 500 Index

¹All returns greater than one year are annualized.

Performance data quoted represent past performance and are no guarantee of future returns. Current performance may be lower or higher than the performance data quoted, and most recent month-end and quarter-end performance is available on the Parnassus website, www.parnassus.com. Investment return and principal will fluctuate, so that an investor's shares, when redeemed, may be worth more or less than their original principal cost.

As of 12/31/21, the Parnassus Core Equity Fund was rated against the following numbers of Large Blend Funds based on risk-adjusted returns over the following time periods: 1,244 funds in the last three years, 1,109 funds in the last five years and 822 funds in the last 10 years. With respect to these Large Blend funds, the Parnassus Core Equity Fund – Investor Share class received a Morningstar Rating of 5, 5 and 5 stars for the 3-, 5- and 10-year periods, respectively. The Parnassus Core Equity Fund – Institutional Share Class received a Morningstar rating of 5, 5 and 5 stars for the 3-, 5- and 10-year periods, respectively based on risk-adjusted returns.

Risks: The Fund's share price may change daily based on the value of its security holdings. Stock markets can be volatile, and stock values fluctuate in response to the asset levels of individual companies and in response to general U.S. and international market and economic conditions. In addition to large cap companies, the Fund may invest in small and/or mid cap companies, which can be more volatile than large cap firms. Security holdings in the fund can vary significantly from broad market indexes.

ENVIRONMENTAL, SOCIAL, AND GOVERNANCE GUIDELINES: The Fund evaluates financially material ESG factors as part of the investment decision-making process, considering a range of impacts they may have on future revenues, expenses, assets, liabilities and overall risk. The Fund also utilizes active ownership to encourage more sustainable business policies and practices and greater ESG transparency. Active ownership strategies include proxy voting, dialogue with company management and sponsorship of shareholder resolutions, and public policy advocacy. There is no guarantee that the ESG strategy will be successful.

Morningstar Ratings™

PRBLX Overall Star Rating™★ ★★★★★★

PRILX Overall Star Rating™★ ★★★★★★

Analyst Rating™ ★ Gold

Sustainability Rating™★★ ★★★★★★

*Overall rating based on risk-adjusted returns out of 1,244 Large Blend funds as of 12/31/21. **Sustainability Rating as of 11/30/21 out of 3,355 US Equity Large Cap Blend funds. The Morningstar Rating is calculated based on a Morningstar Risk-Adjusted Return measure that accounts for variation in a managed product's monthly excess performance, placing more emphasis on downward variations and rewarding consistent performance.

Parnassus Overview

At Parnassus Investments, we invest responsibly to build wealth for our clients. We select businesses that we believe have increasingly relevant products or services, sustainable competitive advantages and quality management teams for our high-conviction portfolios. Every investment we make must meet rigorous fundamental and environmental, social and governance (ESG) criteria.

Andrew Choi was named a portfolio manager of the Core Equity Fund as of January 3, 2022.

²Percent based on total net assets as of 12/31/21.

Upside Capture: A measure of managers' performance in up markets relative to the market itself. An up market is one in which the market's monthly return is greater than or equal to zero. The higher the manager's up-market capture ratio, the better the manager capitalized on a rising market. **Downside Capture:** A measure of managers' performance in down markets relative to the market itself. A down market is one in which the market's monthly return is less than zero. The lower the manager's down-market capture ratio, the better the manager protected capital during a market decline. **Average Weighted Market Cap** is the average capitalization of all stocks in the portfolio, weighted by each holding's size in the portfolio. **Price/Earnings (P/E) Ratio** is a ratio of a stock's current price to its per-share earnings over the past 12 months. **Price/Book (P/B) Ratio** is the ratio of a stock's latest closing price divided by its book value per share. **Alpha** is a measure of performance on a risk-adjusted basis. Alpha takes the volatility (price risk) of a mutual fund and compares its risk-adjusted performance to a benchmark index. The excess return of the fund relative to the return of the benchmark index is a fund's alpha. **Beta** is a measure of the volatility, or systematic risk, of a security or a portfolio in comparison to the market as a whole. A beta over 1.00 suggests that the share price will typically be more volatile than the market. **R-Squared** is a measurement of how closely the portfolio's performance correlates with the performance of a benchmark index such as the S&P 500 Index. **Standard Deviation** is a calculation used to measure the variability (risk) of a portfolio's performance. **Sharpe Ratio** is a ratio used to measure risk-adjusted performance. It is calculated by subtracting the risk-free rate from the rate of return for a portfolio and dividing the result by the standard deviation of the portfolio returns. **Active Share** measures the percentage amount your portfolio differs from a passive benchmark.

Prior to March 31, 1998, the Parnassus Core Equity Fund was a balanced fund. Returns shown for the fund do not reflect the declaration of taxes a shareholder would pay on the fund distributions or the redemption of fund shares. The Standard & Poor's 500 Composite Stock Price Index (the S&P 500 Index) and the Russell 1000 Index are widely recognized indexes of common stock prices. An individual cannot invest directly in an index. An index reflects no deductions for fees, expenses or taxes. The **S&P 500 Index** is a product of S&P Dow Jones Indices LLC and/or its affiliates and has been licensed for use by Parnassus Investments. The **Morningstar Rating™** for funds, or "star rating," is calculated for managed products (including mutual funds, variable annuity and variable life subaccounts, exchange-traded funds, closed-end funds, and separate accounts) with at least a three-year history. Exchange-traded funds and open-ended mutual funds are considered a single population for comparative purposes. The top 10% of products in each product category receive 5 stars, the next 22.5% receive 4 stars, the next 35% receive 3 stars, the next 22.5% receive 2 stars, and the bottom 10% receive 1 star. The Overall Morningstar Rating for a managed product is derived from a weighted average of the performance figures associated with its three-, five-, and 10-year (if applicable) Morningstar Rating metrics. The weights are: 100% three-year rating for 36-59 months of total returns, 60% five-year rating/40% three-year rating for 60-119 months of total returns, and 50% 10-year rating/30% five-year rating/20% three-year rating for 120 or more months of total returns. While the 10-year overall star rating formula seems to give the most weight to the 10-year period, the most recent three-year period actually has the greatest impact because it is included in all three rating periods. The **Morningstar® Sustainability Rating** is a measure of how well the portfolio holdings are managing their ESG Risk relative to the portfolio's Global Category peer group. The Morningstar Historical Sustainability Score is a weighted average of the trailing 12 months of Morningstar Portfolio Sustainability Scores. More-recent portfolios are weighted more heavily than older portfolios. Based on their Morningstar Historical Sustainability Score, funds are assigned absolute category and percent ranks within their Morningstar Global Categories. Higher ratings are better and indicate that a fund has, on average, more of its assets invested in companies that have lower ESG risk as characterized by Sustainability. The Morningstar Sustainability Rating is depicted by globe icons where High equals 5 globes and Low equals 1 globe. Morningstar updates its Sustainability Ratings monthly and uses Sustainability's ESG scores from the same month as the portfolio as-of date. Visit <http://corporate1.morningstar.com/SustainableInvesting/> for more detailed information about the methodology and calculation frequency. The **Morningstar Analyst Rating™** is not a credit or risk rating. It is a subjective evaluation performed by Morningstar's manager research group, which consists of various Morningstar, Inc. subsidiaries ("Manager Research Group"). In the United States, that subsidiary is Morningstar Research Services LLC, which is registered with and governed by the U.S. Securities and Exchange Commission. The Manager Research Group evaluates funds based on five key pillars, which are process, performance, people, parent, and price. The Manager Research Group uses this five pillar evaluation to determine how they believe funds are likely to perform relative to a benchmark, or in the case of exchange-traded funds and index mutual funds, a relevant peer group, over the long term on a risk-adjusted basis. They consider quantitative and qualitative factors in their research, and the weight of each pillar may vary. The Analyst Rating scale is Gold, Silver, Bronze, Neutral, and Negative. A Morningstar Analyst Rating of Gold, Silver, or Bronze reflects the Manager Research Group's conviction in a fund's prospects for outperformance. Analyst Ratings ultimately reflect the Manager Research Group's overall assessment, are overseen by an Analyst Rating Committee, and are continuously monitored and reevaluated at least every 14 months. For more detailed information about Morningstar's Analyst Rating, including its methodology, please go to global.morningstar.com/managerdisclosures/. The Morningstar Analyst Rating (i) should not be used as the sole basis in evaluating a fund, (ii) involves unknown risks and uncertainties which may cause Analyst expectations not to occur or to differ significantly from what they expected, and (iii) should not be considered an offer or solicitation to buy or sell the fund. © 2022 Morningstar.
