Fourth Quarter 2021

FLEXIBLE EQUITY

WHY INVEST IN BROWN ADVISORY FLEXIBLE EQUITY?

A flexible approach to finding quality businesses.

The manager scours the entire U.S. equity universe, from large-cap to small-cap and from growth to value, seeking compelling long-term investments. We believe that a strategy that casts a wide net for strong businesses with shareholder-oriented management teams that allocate capital well has the potential to outperform more constrained strategies.

A keen eye for “bargain moments.”

The manager strives to invest in firms that are built to last, but look for low entry prices that may arise from short-term investor sentiment or temporary challenges for a company or industry. This sort of price recovery potential is an important component of the manager’s stock selection process.

A shared culture of thoughtful investing.

Brown Advisory’s investment team is made up of independent thinkers who nonetheless share a common philosophy. We invest for the long term in what we consider to be exceptional businesses, and we keep our portfolios focused on a relatively small number of our best investment ideas. We believe that this sort of active management is the best way to generate long-term outperformance vs. our benchmarks.

Portfolio Manager: Maneesh Bajaj, CFA

- Independent since 1998
- Founded in 1993
- 100% of colleagues collectively own approximately 70% of the firm's equity

Before investing you should carefully consider the Fund's investment objectives, risks, charges, and expenses. This and other information is in the summary or statutory prospectus, a copy of which may be obtained by calling 1-800-540-6807 or visiting the Fund's website, www.brownadvisoryfunds.com. Please read the prospectus carefully before you invest.

The Flexible Equity Fund may invest in securities of foreign issuers. Investments in such securities entail certain risks not associated with investments in domestic securities, such as volatility of currency exchange rates, and in some cases, political and economic instability and relatively illiquid markets. The value of the Fund's investments in REITs may change in response to changes in the real estate market such as declines in the value of real estate, lack of available capital or financing opportunities, and increases in property taxes or operating costs. The Fund may invest in ETFs, which may trade at a discount to the aggregate value of the underlying securities and although expense ratios for ETFs are generally low, frequent trading of ETFs by the Fund can generate brokerage expenses. Investments in smaller companies generally carry greater risk than is customarily associated with larger companies for various reasons such as narrower markets, limited financial resources and less liquid stock. Investments in debt securities typically decrease in value when interest rates rise. This risk is usually greater for longer-term debt securities. Investments in small and medium capitalization companies generally carry greater risk than is customarily associated with larger companies for various reasons such as narrower markets, limited financial resources and less liquid stock. Investments in lower rated and non-rated securities present a great risk of loss to principal and interest than higher rated securities. The recent growth rate in the stock market has helped to produce short-term returns for some asset classes that are not typical and may not continue in the future. Because of ongoing market volatility, fund performance may be subject to substantial short-term changes. Diversification does not assure a profit, nor does it protect against a loss in a declining market.

The Fund is the successor to the investment performance of the Predecessor Fund as a result of the reorganization of the Predecessor Fund into the Fund on October 19, 2012. Accordingly, the performance information shown for periods prior to October 19, 2012 is that of the Predecessor Fund. Investor Shares commenced operations on November 30, 2006 as part of the Predecessor Fund and Advisor Shares commenced operations on January 24, 2007 as part of the Predecessor Fund. Performance shown prior to inception of the Advisor Shares is based on the performance of Investor Shares, adjusted for the higher expenses applicable to Advisor Shares. Prior to July 1, 2011, the Advisor Shares were known as A Shares. Institutional Shares commenced operations on October 19, 2012. Prior to October 19, 2012, Investor Shares were known as Institutional Shares.

The S&P 500® Index represents the large-cap segment of the U.S. equity markets and consists of approximately 500 leading companies in leading industries of the U.S. economy. Criteria evaluated include: market capitalization, financial viability, liquidity, public float, sector representation, and corporate structure. An index constituent must also be considered a U.S. company. S&P® and S&P 500® are registered trademarks of Standard & Poor's Financial Services LLC. It is not possible to invest directly in an index.

Past performance is no guarantee of future results.

Terms and Definitions

The **Weighted Average Market Capitalization** of a portfolio equals the average of each holding's market cap, weighted by its relative position size in the portfolio (in such a weighting scheme, larger positions have a greater influence on the calculation). The **Weighted Median Market Capitalization** is the median market capitalization of a fund's equity portfolio gives you a measure of the size of the companies in which an equity fund invests. It is the trimmed mean of the market capitalizations of the stocks in the fund's portfolio. **Price-Earnings Ratio (P/E Ratio)** is the ratio of the share of a company's stock compared to its per-share earnings. The Fund's Investor Class is used to calculate beta, a measure of the magnitude of a fund's past share price fluctuations in relation to the fluctuations in the stock market (as represented by the fund's benchmark). While not predictive of the future, funds with a beta greater than 1 have in the past been more volatile than the benchmark. **Earnings growth rate** is the amount of increase that a specific variable has gained within a specific period and context and is based on consensus estimates derived from FactSet as of 12/31/2021 for the 3-5 year period, and is not a measure of the Fund's future performance. **Earnings Growth 3-5 Year Est.** is the forecasted growth rate of a company's earnings per share. Estimated EPS Growth Rate is not a measure of the Fund's future performance. The Fund's Investor Class is used to calculate **beta**, a measure of the magnitude of a fund's past share price fluctuations in relation to the fluctuations in the stock market (as represented by the fund's benchmark). While not predictive of the future, funds with a beta greater than 1 have in the past been more volatile than the benchmark.
