

# Vanguard Small-Cap Value Index Fund

Domestic stock fund | Institutional Shares

### **Fund facts**

| Risk level | ,         | Total net  | Expense ratio  | Ticker | Turnover | Inception | Fund   |
|------------|-----------|------------|----------------|--------|----------|-----------|--------|
| Low ←      | ──── High | assets     | as of 04/29/21 | symbol | rate     | date      | number |
| 1 2        | 3 4 5     | \$4,733 MM | 0.06%          | VSIIX  | 8.4%     | 12/07/99  | 0865   |

### Investment objective

Vanguard Small-Cap Value Index Fund seeks to track the performance of a benchmark index that measures the investment return of small-capitalization value stocks.

### Investment strategy

The fund employs an indexing investment approach designed to track the performance of the the CRSP US Small Cap Value Index, a broadly diversified index of value stocks of smaller U.S. companies. The fund attempts to replicate the target index by investing all, or substantially all, of its assets in the stocks that make up the index, holding each stock in approximately the same proportion as its weighting in the index.

Periods ended December 31, 2021

|           | Quarter | Year to date | One year | Three years | Five years | Ten years |
|-----------|---------|--------------|----------|-------------|------------|-----------|
| Fund      | 6.40%   | 28.11%       | 28.11%   | 18.54%      | 10.32%     | 13.31%    |
| Benchmark | 6.40%   | 28.15%       | 28.15%   | 18.49%      | 10.30%     | 13.31%    |

The performance data shown represent past performance, which is not a guarantee of future results. Investment returns and principal value will fluctuate, so investors' shares, when sold, may be worth more or less than their original cost. Current performance may be lower or higher than the performance data cited. For performance data current to the most recent month-end, visit our website at vanguard.com/performance. The performance of an index is not an exact representation of any particular investment, as you cannot invest directly in an index. Figures for periods of less than one year are cumulative returns. All other figures represent average annual returns. Performance figures include the reinvestment of all dividends and any capital gains distributions. All returns are net of expenses.

### Plain talk about risk

An investment in the fund could lose money over short or even long periods. You should expect the fund's share price and total return to fluctuate within a wide range, like the fluctuations of the overall stock market. The fund's performance could be hurt by:

**Stock market risk:** The chance that stock prices overall will decline. Stock markets tend to move in cycles, with periods of rising stock prices and periods of falling stock prices. The fund's target index may, at times, become focused in stocks of a particular sector, category, or group of companies. Because the fund seeks to track its target index, the fund may underperform the overall stock market.

**Investment style risk:** The chance that returns from small-capitalization value stocks will trail returns from the overall stock market. Historically, small-cap stocks have been more volatile in price than the large-cap stocks that dominate the overall market, and they often perform quite differently.

### Note on frequent trading restrictions
