

DFA U.S. Large Cap Value Portfolio

Domestic stock fund | Institutional Class

Fund facts

†Risk Level Low ← → High					Total net assets	‡Gross expense as of 02/28/21	§Net expense as of 02/28/21	Ticker symbol	Turnover rate	Inception date	Fund number
1	2	3	4	5	\$25,465 MM	0.32%	0.22%	DFLVX	15.00%	02/19/93	2186

Investment objective

The investment seeks long-term capital appreciation.

Investment strategy

The fund is a Feeder Portfolio and pursues its objective by investing substantially all of its assets in its corresponding master fund, the U.S. Large Cap Value Series (the "U.S. Large Cap Value Series") of the DFA Investment Trust Company (the "Trust"), which has the same investment objective and policies as the U.S. Large Cap Value Portfolio. As a non-fundamental policy, under normal circumstances, the U.S. Large Cap Value Series will invest at least 80% of its net assets in securities of large cap U.S. companies.

General note

An additional recordkeeping or administrative fee may be charged to participants investing plan assets in the fund. The recordkeeping fee will be deducted directly from participants' accounts. Please log on to your employer plans at Vanguard.com, or contact Participant Services at 1-800-523-1188, prior to investing, for additional fee information.

Annual returns

Total returns

	Periods ended December 31, 2021					
	Quarter	Year to date	One year	Three years	Five years	Ten years
Fund	7.69%	28.07%	28.07%	16.89%	10.91%	13.76%
Benchmark	7.77%	25.16%	25.16%	17.64%	11.16%	12.97%

The performance data shown represent past performance, which is not a guarantee of future results. Investment returns and principal value will fluctuate, so investors' shares, when sold, may be worth more or less than their original cost. Current performance may be lower or higher than the performance data cited. For performance data current to the most recent month-end, visit our website at vanguard.com/performance.

Figures for periods of less than one year are cumulative returns. All other figures represent average annual returns. Performance figures include the reinvestment of all dividends and any capital gains distributions. All returns are net of expenses.

†Morningstar Risk evaluates a mutual fund's downside volatility relative to that of other funds in its Morningstar Category. It is an assessment of the variations in a fund's monthly returns, with an emphasis on downside variations, in comparison with the mutual funds in its Morningstar Category. In each Morningstar Category, the 10% of funds with the lowest measured risk are described as Low Risk (LOW), the next 22.5% Below Average (-AVG), the middle 35% Average (AVG), the next 22.5% Above Average (+AVG), and the top 10% High (HIGH). Morningstar Risk is measured for up to three time periods (three-, five-, and 10 years). These separate measures are then weighted and averaged to produce an overall measure for the mutual fund. Funds with less than three years of performance history are not rated.

‡Gross expense ratio – The gross expense ratio is the fund's annual operating expenses as a percentage of average net assets. The gross expense ratio does not reflect any fee waivers or reimbursements that may be in effect.

§Net expense ratio – The net expense ratio reflects the expenses you pay as a participant being charged by the fund after taking into account any applicable waivers or reimbursements, without which performance would have been less. The difference between net and gross fees includes all applicable fee waivers and expense reimbursements.

Risk terms

Lending: Investing in loans creates risk for the borrower, lender, and any other participants. A borrower may fail to make payments of principal, interest, and other amounts in connection with loans of cash or securities or fail to return a borrowed security in a timely manner, which may lead to impairment of the collateral provided by the borrower. Investments in loan participations may be subject to increased credit, pricing, and liquidity risks, with these risks intensified for below investment-grade loans.

Not FDIC Insured: The investment is not a deposit or obligation of, or guaranteed or endorsed by, any bank and is not insured by the Federal Deposit Insurance Corporation, the Federal Reserve Board, or any other U.S. governmental agency.

Market/Market Volatility: The market value of the portfolio's securities may fall rapidly or unpredictably because of changing economic, political, or market conditions, which may reduce the value of the portfolio.

Other: The investment's performance may be impacted by its concentration in a certain type of security, adherence to a particular investing strategy, or a unique aspect of its structure and costs.

Management: Performance is subject to the risk that the advisor's asset allocation and investment strategies do not perform as expected, which may cause the portfolio to underperform its benchmark, other investments with similar objectives, or the market in general. The investment is subject to the risk of loss of income and capital invested, and the advisor does not guarantee its value, performance, or any particular rate of return.

Loss of Money: Because the investment's market value may fluctuate up and down, an investor may lose money, including part of the principal, when he or she buys or sells the investment.

Value Investing: Value securities may be subject to the risk that these securities cannot overcome the adverse factors the advisor believes are responsible for their low price or that the market may not recognize their fundamental value as the advisor predicted. Value securities are not expected to experience significant earnings growth and may underperform growth stocks in certain markets.

Equity Securities: The value of equity securities, which include common, preferred, and convertible preferred stocks, will fluctuate based on changes in their issuers' financial conditions, as well as overall market and economic conditions, and can decline in the event of deteriorating issuer, market, or economic conditions.

Derivatives: Investments in derivatives may be subject to the risk that the advisor does not correctly predict the movement of the underlying security, interest rate, market index, or other financial asset, or that the value of the derivative does not correlate perfectly with either the overall market or the underlying asset from which the derivative's value is derived. Because derivatives usually involve a small investment relative to the magnitude of liquidity and other risks assumed, the resulting gain or loss from the transaction will be disproportionately magnified. These investments may result in a loss if the counterparty to the transaction does not perform as promised.

Note on frequent trading restrictions

Frequent trading policies may apply to those funds offered as investment options within your plan. Please log on to [vanguard.com](https://www.vanguard.com) for your employer plans or contact Participant Services at 800-523-1188 for additional information.
