

SA U.S. SMALL COMPANY FUND

Investor

As of 12/31/2021

The Fund's goal is to achieve long-term capital appreciation. The Fund pursues its goal by generally investing in a broad and diverse group of readily marketable equity securities of small cap companies listed on a securities exchange in the United States that is deemed appropriate by the Sub-Adviser. The Sub-Adviser generally considers small cap companies to be companies whose market capitalizations generally are either in the lowest 12.5% of total market capitalization or companies whose market capitalizations are smaller than the 1,000th largest U.S. company, whichever results in the higher market capitalization threshold. Under the Sub-Adviser's market capitalization guidelines described above, based on market capitalization data as of August 31, 2021, the market capitalization of an eligible company would be approximately \$13.1 billion or below. This dollar amount will vary due to market conditions. The Fund has a non-fundamental investment policy that, under normal circumstances, it will invest at least 80% of its net assets in securities of U.S. small cap companies.

Investing involves risk, principal loss is possible. Small company stocks may be subject to a higher degree of market risk than the securities of more established companies because they tend to be more volatile and less liquid.

The Russell 2000 Index (Russell 2000 TR USD) measures the performance of the small-cap segment of the U.S. equity universe. The Russell 2000 Index is a subset of the Russell 3000 Index representing approximately 10% of the total market capitalization of that index.
