

>> Fund Objective

This exchange-traded fund seeks investment results that correspond generally to the price and yield (before the fund's fees and expenses) of an equity index called the NIFTY 50 Equal Weight Index.

>> Fund Facts

Fund Ticker	NFTY
CUSIP	33737J802
Intraday NAV	NFTYIV
Fund Inception Date	2/14/12
Expense Ratio	0.80%
Rebalance Frequency	Quarterly
Primary Listing	Nasdaq

>> Index Facts

Index Ticker	NSE50EWT
Index Inception Date	4/13/17

>> Index Description

- >> The NIFTY 50 Equal Weight Index is an equally weighted index that consists of the same companies as the NIFTY 50 Index, an index that tracks the performance of the 50 largest and most liquid Indian securities listed on the National Stock Exchange of India.
- >> The NIFTY 50 Equal Weight Index gives equal exposure to all 50 constituents. The same weight, or importance, is given to each stock in the index, allowing for the performance of smaller companies to contribute as much as the larger companies within the index.
- >> To maintain the equal weight focus, the index is rebalanced quarterly and reconstituted semi-annually.

>> Performance Summary (%)¹

	3 Month	YTD	1 Year	3 Year	5 Year	10 Year	Since Fund Inception
Fund Performance*							
Net Asset Value (NAV)	-0.87	26.22	26.22	12.17	10.97	—	6.99

Performance data quoted represents past performance. Past performance is not a guarantee of future results and current performance may be higher or lower than performance quoted. Investment returns and principal value will fluctuate and shares when sold or redeemed, may be worth more or less than their original cost. You can obtain performance information which is current through the most recent month-end by visiting www.ftportfolios.com.

¹On April 17, 2018, the fund's underlying index changed from the NASDAQ AlphaDEX® Taiwan Index to the NIFTY 50 Equal Weight Index. On July 14, 2015, the fund's underlying index changed from the Defined Taiwan Index to the NASDAQ AlphaDEX® Taiwan Index. Therefore, the fund's performance and historical returns shown for the periods prior to these dates are not necessarily indicative of the performance that the fund, based on its current index, would have generated.

*NAV returns are based on the fund's net asset value which represents the fund's net assets (assets less liabilities) divided by the fund's outstanding shares. **After Tax Held** returns represent return after taxes on distributions. Assumes shares have not been sold. **After Tax Sold** returns represent the return after taxes on distributions and the sale of fund shares. Returns do not represent the returns you would receive if you traded shares at other times. **Market Price** returns are determined by using the midpoint of the national best bid offer price ("NBBO") as of the time that the fund's NAV is calculated. Returns are average annualized total returns, except those for periods of less than one year, which are cumulative. After-tax returns are calculated using the historical highest individual federal marginal income tax rates and do not reflect the impact of state and local taxes. Actual after-tax returns depend on the investor's tax situation and may differ from those shown. The after-tax returns shown are not relevant to investors who hold their fund shares through tax-deferred arrangements such as 401(k) plans or individual retirement accounts.

**Performance information for the NIFTY 50 Equal Weight Index is for illustrative purposes only and does not represent actual fund performance. Indexes do not charge management fees or brokerage expenses, and no such fees or expenses were deducted from the performance shown. Indexes are unmanaged and an investor cannot invest directly in an index.

You should consider the fund's investment objectives, risks, and charges and expenses carefully before investing. Contact First Trust Portfolios L.P. at 1-800-621-1675 or visit www.ftportfolios.com to obtain a prospectus or summary prospectus which contains this and other information about the fund. The prospectus or summary prospectus should be read carefully before investing.

Risk Considerations

A fund's return may not match the return of its underlying index. A fund invests in securities included in the index regardless of investment merit and the securities held by a fund will generally not be bought or sold in response to market fluctuations.

Investors buying or selling fund shares on the secondary market may incur customary brokerage commissions. Market prices may differ to some degree from the net asset value of the shares. Investors who sell fund shares may receive less than the share's net asset value. Shares may be sold throughout the day on the exchange through any brokerage account. However, unlike mutual funds, shares may only be redeemed directly from a fund by authorized participants in very large creation/redemption units. If a fund's authorized participants are unable to proceed with creation/redemption orders and no other authorized participant is able to step forward to create or redeem, fund shares may trade at a discount to a fund's net asset value and possibly face delisting. A fund's shares will change in value, and you could lose money by investing in a fund. One of the principal risks of investing in a fund is market risk. Market risk is the risk that a particular stock owned by a fund, fund shares or stocks in general may fall in value. There can be no assurance that a fund's investment objective will be achieved. The outbreak of the respiratory disease designated as COVID-19 in December 2019 has caused significant volatility and declines in global financial markets, which have caused losses for investors. While the development of vaccines has slowed the spread of the virus and allowed for the resumption of "reasonably" normal business activity in the United States, many countries continue to impose lockdown measures in an attempt to slow the spread. Additionally, there is no guarantee that vaccines will be effective against emerging variants of the disease.

A fund that effects all or a portion of its creations and redemptions for cash rather than in-kind may be less tax-efficient.

Changes in currency exchange rates and the relative value of non-U.S. currencies may affect the value of a fund's investments and the value of a fund's shares.

As the use of Internet technology has become more prevalent in the course of business, funds have become more susceptible to potential operational risks through breaches in cyber security.

A fund may be a constituent of one or more indices or models which could greatly affect a fund's trading activity, size and volatility.

There is no assurance that the index provider or its agents will compile or maintain the index accurately.

Indian companies are subject to certain risks, including greater price volatility, substantially less liquidity and significantly smaller market capitalization of securities markets, more substantial governmental involvement in the economy, higher rates of inflation, and greater political, economic and social uncertainty. Government controls have been reduced on imports and foreign investment, and privatization of domestic output has proceeded slowly. Rapid economic growth has put heavy stress on India's infrastructural facilities. Furthermore, businesses still have to deal with an inefficient and sometimes slow-moving bureaucracy.

NFTY is registered in India as a Foreign Portfolio Investor ("FPI") with the Securities and Exchange Board of India. Only while maintaining a FPI registration would a fund be able to buy, sell or deal in Indian securities. Investment by FPIs in Indian securities are subject to certain limits and restrictions under the applicable law, and the applications of such limits and restrictions could adversely impact the ability of a fund to make investments in India.

Securities of non-U.S. issuers are subject to additional risks, including currency fluctuations, political risks, withholding, the lack of adequate financial information, and exchange control restrictions impacting non-U.S. issuers. These risks may be heightened for securities of companies located in, or with significant operations in, emerging market countries.

A fund and a fund's advisor may seek to reduce various operational risks through controls and procedures, but it is not possible to completely protect against such risks.

High portfolio turnover may result in higher levels of transaction costs and may generate greater tax liabilities for shareholders.

A fund with significant exposure to a single asset class, country, region, industry, or sector may be more affected by an adverse economic or political development than a broadly diversified fund.

Securities of small- and mid-capitalization companies may experience greater price volatility and be less liquid than larger, more established companies.

A fund will be subject to tax in India on the purchase and sale of Indian securities held by a fund, which will reduce a fund's returns.

Trading on the exchange may be halted due to market conditions or other reasons. There can be no assurance that the requirements to maintain the listing of a fund on the exchange will continue to be met or be unchanged.
