

KraneShares Emerging Markets Consumer Technology ETF

Investment Strategy:

KEMQ seeks to track the Solactive Emerging Markets Consumer Technology Index. The Index selects companies from 26 eligible countries within emerging markets whose primary business or businesses are internet retail, internet software/services, purchase, payment processing, or software for internet and E-Commerce transactions.

Emerging Markets Consumer Technology Highlights:

- Internet adoption is expanding rapidly within emerging markets at the same time that domestic consumption and retail sales are steadily increasing and frequently taking place online
- According to a study from the Brookings Institution, middle class consumption could reach 50% of total global consumption by the year 2030, more than doubling from 2015¹
- We believe the growth of internet adoption within emerging markets is a long term secular theme that may continue to play out over the course of decades

KEMQ features:

- Access to emerging market internet companies that provide similar services as Google, Facebook, PayPal, Amazon, etc.
- Exposure to companies that stand to benefit from increasing domestic consumption by emerging markets' growing middle class
- Exposure to emerging market companies facilitating mobile E-Commerce sales

Carefully consider the Funds' investment objectives, risk factors, charges and expenses before investing. This and additional information can be found in the Funds' full and summary prospectus, which may be obtained by visiting www.kraneshares.com. Read the prospectus carefully before investing.

Risk Disclosures:

Investing involves risk, including possible loss of principal. There can be no assurance that a Fund will achieve its stated objectives. The Funds are subject to political, social or economic instability within China which may cause decline in value. Fluctuations in currency of foreign countries may have an adverse effect to domestic currency values. Emerging markets involve heightened risk related to the same factors as well as increase volatility and lower trading volume. In addition to the normal risks associated with investing, investments in smaller companies typically exhibit higher volatility.

Narrowly focused investments typically exhibit higher volatility. The ability of the KraneShares Emerging Markets Consumer Technology Index ETF to achieve its investment objective is dependent, in part, on the continuous availability of A Shares and the ability to obtain, if necessary, additional A Shares quota. The fund may invest in derivatives, which are often more volatile than other investments and may magnify the Fund's gains or losses. Internet companies are subject to rapid changes in technology, worldwide competition, rapid obsolescence of products and services, loss of patent protections, evolving industry standards and frequent new product productions. Such changes may have an adverse impact on performance. The Fund may engage in securities lending. The Fund is non-diversified.

Fund shares are bought and sold on an exchange at market price (not NAV) and are not individually redeemed from the Fund. However, shares may be redeemed at NAV directly by certain authorized broker-dealers (Authorized Participants) in very large creation/redemption units. The returns shown do not represent the returns you would receive if you traded shares at other times. Shares may trade at a premium or discount to their NAV in the secondary market. Brokerage commissions will reduce returns. Beginning 12/23/2020, market price returns are based on the official closing price of an ETF share or, if the official closing price isn't available, the midpoint between the national best bid and national best offer ("NBBO") as of the time the ETF calculates the current NAV per share. Prior to that date, market price returns were based on the midpoint between the Bid and Ask price. NAVs are calculated using prices as of 4:00 PM Eastern Time.
