

## KraneShares MSCI One Belt One Road ETF

### Investment Strategy:

The KraneShares MSCI One Belt One Road ETF (ticker: OBOR) seeks to provide investment results that track the price and yield performance of the MSCI Global China Infrastructure Exposure Index. The Index aims to identify potential beneficiaries of the One Belt One Road initiative based on how their geography, revenue, and sector attributes align with the broad theme. OBOR seeks to capture the economic growth and monetize the potential upside for the companies involved in China's One Belt One Road initiative.

### OBOR Initiative Facts:

- The One Belt One Road (OBOR) initiative, established by President Xi Jinping of China, is an extensive long-term infrastructure initiative modernizing the original Silk Road trading routes by land and by sea.
- China has signed cooperation agreements with over 140 countries and international organizations<sup>1</sup>, which, including China, represent roughly 80% of the global population and 40% of global GDP<sup>2</sup>.
- The OBOR initiative could see upwards of \$6 trillion in investment in the coming years and is poised to reshape global trade<sup>3</sup>.

### OBOR ETF Highlights:

- Includes countries who may benefit from the OBOR initiative, such as China, Russia, Singapore, Malaysia, Israel, and others.
- Includes sectors of primary focus to the OBOR initiative, such as industrials, utilities, materials, financials, and energy.
- Benchmarked to MSCI, a global leader in international indexing.

**Carefully consider the Funds' investment objectives, risk factors, charges and expenses before investing. This and additional information can be found in the Funds' full and summary prospectus, which may be obtained by visiting [www.kraneshares.com](http://www.kraneshares.com). Read the prospectus carefully before investing.**

**Risk Disclosures:**

Investing involves risk, including possible loss of principal. There can be no assurance that a Fund will achieve its stated objectives. The Funds are subject to political, social or economic instability within China which may cause decline in value. Fluctuations in currency of foreign countries may have an adverse effect to domestic currency values. Emerging markets involve heightened risk related to the same factors as well as increase volatility and lower trading volume.

Narrowly focused investments typically exhibit higher volatility. The ability of the KraneShares MSCI One Belt One Road ETF to achieve its investment objective is dependent, in part, on the continuous availability of A Shares and the ability to obtain, if necessary, additional A Shares quota. The fund may invest in derivatives, which are often more volatile than other investments and may magnify the Fund's gains or losses. The fund is non-diversified.

Fund shares are bought and sold on an exchange at market price (not NAV) and are not individually redeemed from the Fund. However, shares may be redeemed at NAV directly by certain authorized broker-dealers (Authorized Participants) in very large creation/redemption units. The returns shown do not represent the returns you would receive if you traded shares at other times. Shares may trade at a premium or discount to their NAV in the secondary market. Brokerage commissions will reduce returns. Beginning 12/23/2020, market price returns are based on the official closing price of an ETF share or, if the official closing price isn't available, the midpoint between the national best bid and national best offer ("NBBO") as of the time the ETF calculates the current NAV per share. Prior to that date, market price returns were based on the midpoint between the Bid and Ask price. NAVs are calculated using prices as of 4:00 PM Eastern Time.
