A MESSAGE FROM THE PRESIDENT

Dear Shareholders:

Thank you for investing in Hartford Mutual Funds. The following is the Funds' Annual Report covering the period from November 1, 2020 through October 31, 2021.

Market Review

During the 12 months ended October 31, 2021, U.S. stocks, as measured by the S&P 500 Index,¹ gained 42.9%, a number that reflects one of the most remarkable market rebounds in recent memory, particularly when measured against the March 2020 sell-off at the start of the coronavirus (COVID-19) pandemic.

That said, the market's extraordinary performance occurred against a backdrop of uncertain and sometimes contradictory economic signals: inflation fears; global supply-chain bottlenecks; tightened labor markets; political gridlock; a stubbornly persistent pandemic and a U.S. Federal Reserve (Fed) methodically signaling its intention to cut back on the monetary stimulus that helped fuel the recovery.

A year ago, markets had already bounced back from their March 2020 lows, yet the economy still faced considerable turbulence from a fiercely divisive U.S. presidential election and a resurgence of COVID-19 infections. Once the election was settled in November 2020, the emergence of safe and effective vaccines provided a significant lift to equity markets, as did a major \$900 billion economic relief package passed by the U.S. Congress in late December 2020.

In March 2021, the U.S. Congress fast-tracked approval of the Biden administration's \$1.9 trillion economic stimulus package. In August 2021, a \$1.2 trillion proposal for an infrastructure spending package received U.S. Senate approval. However, by the period's end, the outcome for the administration's \$1.75 trillion "Build Back Better" proposal, focused on social-safety-net improvements and climate-change mitigation, remained uncertain.

Inflation headlines dominated the spring and summer of 2021. In July 2021, the Fed's preferred measure of inflation had risen to levels not seen since 1991.² The supply-chain disruptions spawned in part by the economic recovery helped drive up prices for gasoline, used cars, airfare tickets, durable goods, and a host of other items toward the end of the period. The Fed's previous assurances that inflation would be mostly transitory were being sorely tested.

Throughout the period, the Fed continued to maintain its ongoing policy of near-zero interest rates in support of the recovery. However, in September 2021, Fed Chairman Jerome Powell rattled markets when he announced preparations for having the Fed gradually cut back the \$120 billion in bonds it had been purchasing each month since the start of the pandemic. By period's end, markets had recovered.

As of the end of the period, the economic recovery appears durable. Yet, inflation remains a wildcard and market volatility may persist. Nowadays, it's more important than ever to maintain a strong relationship with your financial professional.

Thank you again for investing in Hartford Mutual Funds. For the most up-to-date information on our funds, please take advantage of all the resources available at hartfordfunds.com.

PERFORMANCE DATA QUOTED REPRESENTS PAST PERFORMANCE AND DOES NOT GUARANTEE FUTURE RESULTS. The investment return and principal value of the investment will fluctuate so that investors' shares, when redeemed, may be worth more or less than their original cost. The chart and table do not reflect the deductions of taxes that a shareholder would pay on Fund distributions or the redemption of Fund shares. Current performance may be lower or higher than the performance data quoted. To obtain performance data current to the most recent month-end, please visit our website hartfordfunds.com.

Total returns presented above were calculated using the applicable class' net asset value available to shareholders for sale or redemption of Fund shares on 10/31/2021, which may exclude investment transactions as of this date. All share class returns assume the reinvestment of all distributions at net asset value and the deduction of all

fund expenses. The total returns presented in the Financial Highlights section of the report are calculated in the same manner, but also take into account certain adjustments that are necessary under generally accepted accounting principles. As a result, the total returns in the Financial Highlights section may differ from the total returns presented above.

Class F shares commenced operations on 02/28/2017. Performance prior to that date is that of the Fund's Class I shares.

To the extent a share class has adopted the prior performance of another share class that had different operating expenses, such performance has not been adjusted to reflect the different operating expenses. If the performance were adjusted, it may have been higher or lower.

Prior to 11/08/2019, the Fund pursued a modified strategy and Wellington Management served as the Fund's only sub-adviser.

You cannot invest directly in an index.

See "Benchmark Glossary" for benchmark descriptions.

Performance information may reflect expense waivers/reimbursements without which performance would have been lower. For information on current expense waivers/reimbursements, please see the prospectus.

Fund Overview – (continued) October 31, 2021 (Unaudited)

| Operating Expenses* | Gross | Net |

Manager Discussion

How did the Fund perform during the period?

The Class A shares of the Hartford Climate Opportunities Fund returned 40.65%, before sales charges, for the twelve-month period ended October 31, 2021, outperforming the Fund's benchmark, the MSCI ACWI Index (Net), which returned 37.28% for the same period. For the same period, the Class A shares of the Fund, before sales charges, outperformed the 38.78% average return of the Lipper Global Multi-Cap Value group, a group of funds with investment strategies similar to those of the Fund in terms of market cap distribution and value and growth style characteristics, but not necessarily similar in terms of investment focus.

Why did the Fund perform this way?

For the twelve-month period ended October 31, 2021, global equities rose as measured by the MSCI ACWI Index (Net). Towards the end of 2020, global equities rebounded sharply after two COVID-19 vaccines demonstrated high efficacy rates in Phase 3 trials, fueling optimism

that the pandemic could be alleviated in the near term. Despite this favorable development, the logistical challenges of distributing and administering the vaccines were significant, and high COVID-19 case counts threatened to undermine the global economic recovery.

In the first quarter of 2021, global markets continued to advance amid the accelerating global rollout of coronavirus vaccines, a favorable outlook for global economic growth, and substantial support from governments and central banks. Massive stimulus measures combined with pent-up savings and significant supply-chain disruptions throughout the global economy fueled expectations for higher inflation. As a result, there were increased concerns that central banks would have to tighten monetary policy to an extent that could potentially impair equity markets.

In the second quarter of 2021, global equities were bolstered by improving global economic data, fiscal and monetary stimulus, strong corporate earnings, and higher vaccination rates. A combination of surging commodity prices, pent-up demand, global supply-chain

Fund Overview – (continued) October 31, 2021 (Unaudited)

disruptions, and stimulus-powered economic growth continued to drive inflation expectations higher, prompting some central banks to raise interest rates or consider tightening monetary policy.

In the third quarter of 2021, global markets contended with pandemic uncertainty, moderating economic growth, the imminent prospect of reduced quantitative easing and policy tightening, and persistent supply-chain dislocations that have amplified the risk of more sustained inflation. In Asia, the spread of the COVID-19 Delta variant shuttered factories and snarled traffic at several major ports, exacerbating supply-chain disruptions and driving shipping costs and goods prices even higher.

In the final month of the period, global equities rebounded strongly, as risk sentiment was bolstered by strong corporate earnings, robust global equity inflows, and improving COVID-19 trends and vaccine coverage. However, persistent supply-chain disruptions and uncertainty about the inflation outlook triggered anxiety about the global economic recovery.

From a climate change perspective, after an extraordinary performance in 2020 which resulted in high valuations across the renewable energy, hydrogen, storage and electric vehicles related sectors, there has been an inevitable retracement in 2021. The most notable factor behind this was the weakness of renewable energy stocks and renewable-focused utilities, as the market rotated away from higher multiple, longer duration "green growth" stocks into more cyclical stocks geared to the near-term reopening of the economy following the COVID-19 pandemic shutdowns. Inflationary pressures and logistical challenges continued to weigh on the renewables sector and other industries with global supply chains. Although these pressures are unlikely to abate over the near term, they do not undermine the fundamental competitiveness of renewables versus fossil fuel technologies, nor undermine what is expected to be a multi-decade transition to the low carbon economy. Corporate and government commitment to decarbonizing remains strong, led by the European Union with very ambitious targets to reduce emissions by 2030, and the EU Green Deal channeling at least a quarter of the €750 billion (US\$847 billion) recovery package towards decarbonization initiatives.

All eleven sectors in the MSCI ACWI Index (Net) posted positive returns during the period. The Energy (+87%) and Financials (+60%) sectors had the largest gains, while the Utilities (+14%) and Consumer Staples (+19%) sectors had the smallest gains during the period.

Security selection was the primary driver of the Fund's outperformance relative to the MSCI ACWI Index (Net) over the trailing twelve-month period ended October 31, 2021. Selection was strongest within the Utilities, Industrials, and Consumer Discretionary sectors, which was slightly offset by weaker selection within the Financials sector. On a regional basis, security selection in Europe and North America contributed most to relative performance. This was partially offset by selection in Japan, which detracted from performance. Sector allocation, a result of bottom-up stock selection of climate-related companies, also detracted from relative performance over the period. Due to the Fund's focus on companies that address environmental challenges, relative to the MSCI ACWI Index (Net), the Fund has a natural overweight to the Industrials and Utilities sectors

and underweights to the Financials, Healthcare, and Communication Services sectors. During the period, the Fund's overweight to the Utilities sector and an underweight to the Financials sector were the primary detractors from performance. Conversely, the Fund's underweight to the Consumer Discretionary sector and an overweight to the Industrials sector was additive to performance during the period.

The top contributors to relative returns over the period included China Longyuan Power (Utilities), Sunnova Energy (Utilities), and Samsung SDI (Information Technology). Shares of China Longyuan Power, the largest renewable power producer in China, rose over the period after the company announced earnings for the first half of 2021 that beat consensus expectations, with net profit up 38% year-over-year versus expectations of a 15% increase. Increasing revenues from wind power and tariffs drove results. Management also announced the addition of 30 gigawatts (GW) of production capacity by 2025. Shares of renewable energy solutions company Sunnova Energy rose over the period. The company reported strong third-quarter revenue and customer growth with initial fiscal year 2023 (FY2023) guidance well above consensus expectations. Samsung SDI, which manufactures lithium-ion batteries, has seen orders for electric vehicle (EV) batteries hold up much better than expected despite the global supply chain issues amidst a strengthening of European environmental laws, which has helped to accelerate EV growth.

The top detractors from relative performance during the period included FMC (Materials), Eversource Energy (Utilities), and Alstom (Industrials). Shares of FMC, a chemical manufacturing company, fell sharply in August 2021. Despite reporting strong second-quarter results, FMC lowered its fiscal year 2021 guidance for earnings before interest, taxes, depreciation, and amortization (EBITDA) and for earnings per share (EPS). This was attributable to higher raw materials, packaging and logistics costs. Shares of Eversource Energy, a utility company that engages in the generation, transmission, and distribution of natural gas and electricity, were volatile over the period but ended the period lower. Shares were pressured by a rising interest rate and inflationary environment, as well as by the Biden administration discussing plans for reaching carbon-free power generation by 2035 and net-zero greenhouse gas emissions by 2050. French multinational rolling stock manufacturer Alstom detracted from the Fund's performance as a diplomatic disagreement between Paris and Australia over a canceled submarine deal weakened investor sentiment towards the stock. Sentiment was further weakened by concerns about slowing global economic growth. fears about a potential spillover of the debt crisis at Chinese property company Evergrande, and the prospect of tighter monetary policy due to tapering of asset purchases by the U.S. Federal Reserve (Fed).

Derivatives were not used in a significant manner in the Fund during the period and did not have a material impact on performance during the period.

What is the outlook as of the end of the period?

As of the end of the period, Wellington Management believes that, given the backdrop of a potential Fed tightening cycle, year-over-year waning of fiscal stimulus globally, and optically rich valuations, their preferences remain to find inexpensive ways to find growth and upside surprise. In that order Wellington Management expects economic

Fund Overview – (continued) October 31, 2021 (Unaudited)

growth to pick up, so future investments for this portion of the Fund may tilt in those areas. Thematically, sustainable transport remains attractive given reasonable valuations and a replacement cycle that has been delayed by the ongoing coronavirus pandemic, in the view of Wellington Management. Additionally, Wellington Management believes there will be an eventual end to current supply chain woes as well, although the timing is not yet clear. Wellington Management suspects it will be a 2022 event, and that the market will discount this well before it becomes obvious. If so, this is another argument in favor of transport and service-oriented investments at the relative expense of capital goods-oriented investments, in Wellington Management's view.

As of the end of the period, Schroders expects rapid adoption of renewable energy practices worldwide, particularly in solar but also in wind, where technological gains are helping make installation more affordable. The build-out of a green hydrogen industry to decarbonize heavy industry and transport will also require very significant additional renewable energy capacity additions, in Schroders' view. The portion of the Fund sub-advised by Schroders has significant exposure to higher-quality investments in these areas as of the end of the period, particularly the wind industry where consolidation has led to sufficient pricing power for companies to have good return potential, in Schroders' view.

Important Risks

Investing involves risk, including the possible loss of principal. Security prices fluctuate in value depending on general market and economic conditions and the prospects of individual companies. • The Fund's performance depends on the ability of the Investment Manager in selecting, overseeing, and allocating Fund assets to the sub-advisers. The sub-advisers' investment styles may not be complementary. Small- and mid-cap securities can have greater risks and volatility than large-cap securities. • Foreign investments may be more volatile and less liquid than U.S. investments and are subject to the risk of currency fluctuations and adverse political, economic and regulatory developments. These risks may be greater, and include additional risks, for investments in emerging markets or if the Fund focuses in a particular geographic region or country. • Focusing on investments that involve climate change opportunities or sustainable and environmental initiatives may result in foregoing certain investments and underperformance comparative to funds that do not have a similar focus. • The exclusion of certain issuers for reasons other than performance may negatively impact the Fund's performance. • There are risks of focusing investments in securities of companies in the utilities and industrials sectors which may cause the Fund's performance to be sensitive to developments in those sectors.

Composition by Sector⁽¹⁾ as of 10/31/2021

Manager Discussion

How did the Fund perform during the period?

The Class A shares of the Hartford Emerging Markets Equity Fund returned 21.18%, before sales charges, for the twelve-month period ended October 31, 2021, outperforming the Fund's benchmark, the MSCI Emerging Markets Index (Net), which returned 16.96% for the same period. For the same period, the Class A shares of the Fund, before sales charges, underperformed the 22.66% average return of the Lipper Emerging Markets Equity Funds peer group, a group of funds with investment strategies similar to those of the Fund.

Why did the Fund perform this way?

Emerging market (EM) equities, as measured by the MSCI Emerging Markets Index (Net), performed strongly at the end of 2020 into 2021. Investor sentiment improved amid positive coronavirus vaccine news, higher commodity prices, and the potential for additional liquidity support globally. Despite a surge in coronavirus cases in emerging countries as well as in many other areas of the world, favorable vaccine developments strengthened the prospects for a faster global economic recovery.

In Asia, India and Taiwan led the region with higher returns within the MSCI Emerging Markets Index (Net). Markets focused on India's favorable long-term growth potential and economic activity, which began to revive in June 2021 after a devastating wave of coronavirus cases. Taiwan and South Korea advanced amid ongoing strength in technology exports, while Thailand benefited from optimism about a

recovery in tourism. In China, the government's regulatory crackdown on technology and gaming companies spooked investors, and a high-profile financial crisis at the country's second-largest property developer, Evergrande, rippled through global markets, sparking widespread fears of a systemic crisis in China's Real Estate sector.

Latin American equities produced positive results during the period, aided by a rebound in commodity prices and progress with the rollout of coronavirus vaccines. Despite Argentina's severe coronavirus situation, markets gained comfort from indications that the International Monetary Fund (IMF) would continue to work with the country on a program that aims to provide economic stability and sustainable growth. Brazil and Mexico benefited from higher oil prices, with the rollout of coronavirus vaccines fueling prospects for stronger economic growth and greater demand for oil.

Within Europe, the Middle East, and Africa (EMEA), Central European countries such as the Czech Republic, Hungary, and Poland produced strong returns. Thanks to easing coronavirus restrictions, these countries benefited from a faster-than-expected rebound in Europe's economic growth. Russia's economic rebound was resilient despite a wave of coronavirus cases, as surging energy prices and higher oil output provided a boost for the economy.

Fund Overview – (continued) October 31, 2021 (Unaudited)

Eight of eleven sectors within the MSCI Emerging Markets Index (Net) posted positive returns during the period. The Energy (+56%), Materials (+45%), and Financials (+36%) sectors rose the most, while the Consumer Discretionary (-15%), Real Estate (-11%), and Communication Services (-1%) sectors declined most during the period.

Within the Fund, security selection within the Consumer Discretionary, Financials, and Information Technology sectors were the largest contributors to returns relative to the MSCI Emerging Markets Index (Net). This was partially offset by weaker selection within the Energy and Healthcare sectors. Sector allocation, a result of our quantitative security selection process, also contributed positively to relative performance. An underweight to the Consumer Discretionary and Materials sectors contributed the most to relative performance, while an underweight to the Information Technology sector detracted from relative performance. From a country perspective, security selection within China, Taiwan, and Brazil contributed positively to relative performance, while security selection in Malaysia, Turkey, and Mexico detracted from returns. Allocation within countries detracted from relative performance, as the Fund's underweights to Saudi Arabia, India, and no exposure to Kuwait detracted from relative performance. offsetting positive performance from the Fund's overweights to the United Arab Emirates, Taiwan, and Poland.

Fubon Financial Holdings (Financials), Alibaba (Consumer Discretionary), and Sberbank Russia (Financials) were the largest contributors to relative performance during the period. The Fund's overweight to Fubon Financial Holdings, a consumer insurance company in China, contributed positively to performance, as the company experienced strong growth on the back of increased demand for wealth and financial products domestically. Shares of Alibaba, China's e-commerce leader and the holder of a 30% stake in Ant Financial, which operates the country's largest digital payments platform, declined sharply for the period. The company has found itself in the crosshairs of local regulators, first with the forced postponement of the highly anticipated initial public offering (IPO) of Ant Financial, and more recently as the target of a government investigation into monopolistic behavior. The Fund's overweight to Sberbank Russia, a commercial banking and financial services company, also contributed to relative performance during the period. Shares of Sberbank outperformed during the period as the bank consistently beat consensus earnings estimates and revised its full-year earnings guidance upward.

Gazprom (Energy), ANTA Sports Products (Consumer Discretionary), and Sinotruk Hong Kong (Industrials) were the top detractors from performance relative to the MSCI Emerging Markets Index (Net) during the period. An underweight to Gazprom, a Russian based gas exploration and production company, detracted from relative performance as shares surged on a rebound in commodity prices. Shares of ANTA Sports Products, a China-based sportswear designer, developer and manufacturer, declined as a rise in Delta variant cases and the country's regulator crackdown created challenges for the company. Shares of Sinotruk, a heavy truck manufacturer in China, declined as year-over-year demand for trucks weakened due to lower than expected infrastructure and development spending.

Derivatives were not used in a significant manner in the Fund during the period and did not have a material impact on performance during the period.

What is the outlook as of the end of the period?

We plan to continue to seek to add value by utilizing proprietary quantitative research and investment tools in a highly disciplined framework. Stock selection is intended to be the key driver of the Fund's returns.

At the end of the period, the Fund had the largest overweights to South Korea and Russia, and the largest underweights to Indonesia and India relative to the MSCI Emerging Markets Index (Net). On a sector basis, the Fund had its largest overweights to the Financials, Energy, and Healthcare sectors, and the largest underweights to the Materials, Communication Services, and Industrials sectors relative to the MSCI Emerging Markets Index (Net).

Important Risks

Investing involves risk, including the possible loss of principal. Security prices fluctuate in value depending on general market and economic conditions and the prospects of individual companies. • Foreign investments may be more volatile and less liquid than U.S. investments and are subject to the risk of currency fluctuations and adverse political, economic and regulatory developments. These risks may be greater, and include additional risks, for investments in emerging markets or if the Fund focuses in a particular geographic region or country, such as China. • Risks associated with investments in China include currency fluctuation, political, economic, social, environmental, regulatory and other risks, including risks associated with differing legal standards. • Small- and mid-cap securities can have greater risks and volatility than large-cap securities. • To the extent the Fund focuses on one or more sectors, the Fund may be subject to increased volatility and risk of loss if adverse developments occur. • The Fund may have high portfolio turnover, which could increase its transaction costs and an investor's tax liability.

Senior Managing Director and Equity Portfolio Manager
Wellington Management Company LLP

Manager Discussion

How did the Fund perform during the period?

The Class A shares of the Hartford Global Impact Fund returned 35.64%, before sales charge, for the twelve-month period ended October 31, 2021, underperforming the Fund's benchmark, the MSCI ACWI Index (Net), which returned 37.28% for the same period. For the same period, the Class A shares of the Fund, before sales charges, also underperformed the 47.07% average return of the Lipper Global Small-/Mid-Cap Funds peer group, a group of funds with investment strategies similar to those of the Fund in terms of market cap distribution and global exposure, but not necessarily similar in terms of investment focus.

Why did the Fund perform this way?

For the twelve-month period ended October 31, 2021, global equities rose, as measured by the MSCI ACWI Index (Net). Towards the end of 2020, global equities rebounded sharply after two coronavirus vaccines demonstrated high efficacy rates in Phase 3 trials, fueling optimism that the pandemic could be alleviated in the near term. Despite this favorable development, the logistical challenges of distributing and administering the vaccines were significant, and high coronavirus case counts threatened to undermine the global economic recovery.

In the first quarter of 2021, global markets continued to advance amid the accelerating global rollout of coronavirus vaccines, a favorable outlook for global economic growth, and substantial support from governments and central banks. Massive stimulus measures combined with pent-up savings and significant supply-chain disruptions throughout the global economy fueled expectations for higher inflation. As a result, there were heightened concerns that central banks may have to tighten monetary policy to an extent that could impair equity markets.

In the second quarter of 2021, global equities were bolstered by improving global economic data, fiscal and monetary stimulus, strong corporate earnings, and higher vaccination rates. A combination of surging commodity prices, pent-up demand, global supply-chain disruptions, and stimulus-powered economic growth continued to drive inflation expectations higher, prompting some central banks to raise interest rates or consider tighter monetary policy.

In the third quarter of 2021, global markets contended with pandemic uncertainty, moderating economic growth, the imminent prospect of reduced quantitative easing and policy tightening, and persistent supply-chain dislocations that amplified the risk of more sustained inflation. In Asia, the spread of the coronavirus Delta variant shuttered

factories and snarled traffic at several major ports, exacerbating supply-chain disruptions and driving shipping costs and goods prices even higher.

In the final month of the period, global equities rebounded strongly, as risk sentiment was bolstered by strong corporate earnings, robust global equity inflows, and improving trends regarding the coronavirus pandemic and vaccine coverage. However, persistent supply-chain disruptions and uncertainty about the inflation outlook triggered anxiety about the global economic recovery.

All of the eleven sectors in the MSCI ACWI Index (Net) posted positive returns during the period. The Energy (+87%) and Financials (+60%) sectors rose the most, while the Utilities (+14%) and Consumer Staples (+19%) sectors rose the least during the period.

Sector allocation, a result of the bottom-up stock selection process, was the primary driver of the Fund's underperformance relative to the MSCI ACWI Index (Net), primarily due to an underweight to the Financials sector and not holding equities in the Energy sector. On the other hand, underweights to the Consumer Staples and Consumer Discretionary sectors contributed positively to relative returns over the period.

Security selection also contributed positively to the Fund's performance relative to the MSCI ACWI Index (Net). Strong selection in the Industrials, Consumer Discretionary, and Utilities sectors were the largest contributors to relative results. This was partially offset by weaker stock selection in the Healthcare and Financials sectors, which detracted from performance. On a regional basis, security selection in Emerging Markets was the primary contributor to relative performance, which was partially offset by weaker selection in Europe and the United Kingdom, which detracted from performance.

Top detractors from relative performance included Amedisys (Healthcare), StoneCo (Information Technology), and Tesla (Consumer Discretionary). Shares of Amedisys, a provider of home health and hospice care services, fell sharply in August 2021 on weakness within the hospice segment of the company's business, as new patient development has been negatively affected by high turnover and labor shortages in their salesforce during the coronavirus pandemic. We added to the Fund's position on the company's stock-price weakness during the period, believing that the labor challenges would prove transient, management's plans would address these staffing challenges, and that home health solutions would take market share from skilled nursing facilities. Shares of StoneCo, a Brazil-based payment solutions provider, declined during the period after the company reported weak second-quarter 2021 earnings impacted by its credit business. The Brazilian financial technology

Hartford Global Impact Fund

Fund Overview – (continued) October 31, 2021 (Unaudited)

(fintech) company recognized more provisions for losses in light of problems related to collections in the new receivables system. Political instability and a higher inflation rate in Brazil also created additional challenges for the stock. Not owning Tesla, an electric vehicle and clean Energy company and constituent of the MSCI ACWI Index (Net), was also a top detractor from the Fund's relative performance. The Fund did not own Tesla as of the end of the period due to expensive valuation and ongoing governance concerns in our view.

Top contributors to relative performance for the period included Upwork (Industrials), Etsy (Consumer Discretionary), and Mimecast (Information Technology). Shares of Upwork, a United States (U.S.)-based freelancing platform, rose in the first quarter of 2021 following sell-side upgrades which focused on Upwork's better-than-expected results in multiple quarters and strategic changes brought about by the new management. We trimmed the Fund's position during the period. Shares of Etsy, a U.S.-based company that helps drive critical connectivity for artisans and small businesses, rose in February 2021 following strong fourth-quarter results in 2020 that topped consensus revenue and earnings estimates, prompting several upgrades from sell-side coverage. Shares rose again in June 2021 following the announcement that the company would be acquiring Depop and Elo7. The Fund continued to hold the position as of the end of the period. Shares of Mimecast, a vendor of cloud-based email security solutions, rose over the period after the company reported several consecutive quarterly results that exceeded consensus expectations across the board, leading to a rising share price. During the period, the company saw accelerating revenue growth as well as increasing new customer additions and net retention rates for the first time since the start of the coronavirus pandemic. We trimmed the Fund's position on the share price strength towards the end of the period.

Derivatives were not used in a significant manner in the Fund during the period and did not have a material impact on performance during the period.

What is the outlook as of the end of the period?

As of the end of the period, we are mindful that there are increased uncertainties on the horizon. We are monitoring progress on the U.S. infrastructure bill, which will have implications for growth and, depending on the size of the bill, could lend support to some of the Fund's alternative energy holdings. In addition, it is likely that the U.S. Federal Reserve (Fed) will begin to taper its bond buying in the near term, which we believe may be positive for interest-rate-sensitive names and could have implications for market multiples overall. Finally, the progress of gross domestic product (GDP) growth in China, which has slowed recently, and the trajectory of current high energy prices will likely have implications for global growth. We remain mindful of the valuations of the companies held by the Fund and will look to adjust the Fund's investments according to our assessment of shifting risk/rewards.

Due to the Fund's focus on impact companies and sustainability, the Fund has natural underweights in certain sectors, such as the Financials, Consumer Discretionary, and Communication Services sectors, and overweights to the Industrials, Healthcare, and Real Estate sectors. Within our impact themes, the Fund's largest absolute

weights at the end of the period were in health and resource efficiency. On a regional basis, the Fund ended the period with its largest overweight in Developed Europe ex United Kingdom and its largest underweight in Japan relative to the MSCI ACWI Index (Net).

Important Risks

Investing involves risk, including the possible loss of principal. Security prices fluctuate in value depending on general market and economic conditions and the prospects of individual companies. • Small- and mid-cap securities can have greater risks and volatility than large-cap securities. • Foreign investments may be more volatile and less liquid than U.S. investments and are subject to the risk of currency fluctuations and adverse political, economic and regulatory developments. These risks may be greater, and include additional risks, for investments in emerging markets. • Investing in companies that seek to address major social and environmental challenges may cause the Fund to forego certain investment opportunities and underperform funds that do not have a similar focus. The exclusion of certain issuers for reasons other than performance may negatively impact the Fund's performance.

Manager Discussion

How did the Fund perform during the period?

The Class A shares of the Hartford International Equity Fund returned 26.93%, before sales charge, for the twelve-month period ended October 31, 2021, underperforming the Fund's benchmark, the MSCI ACWI ex USA Index (Net), which returned 29.66% for the same period. For the same period, the Class A shares of the Fund, before sales charges, underperformed the 32.14% average return of the Lipper International Multi-Cap Core peer group, a group of funds with investment strategies similar to those of the Fund.

Why did the Fund perform this way?

For the twelve-month period ended October 31, 2021, international equities rose, as measured by the MSCI ACWI ex USA Index (Net). Early in the period, markets rebounded sharply after two coronavirus vaccines demonstrated high efficacy rates in Phase 3 trials. Markets continued to advance early in 2021 amid the accelerating global rollout of vaccines, a favorable outlook for global economic growth, and substantial support from governments and central banks. The combination of surging commodity prices, pent-up demand, global supply-chain disruptions, and stimulus-powered economic growth drove inflation expectations higher, prompting some central banks to raise interest rates or consider tighter monetary policy. The global decline in coronavirus cases came to a halt during the second quarter, as the rapid spread of the highly infectious Delta variant disrupted plans to lift lockdowns in many countries and reopen economies.

In the third quarter of 2021, international equities fell as markets contended with pandemic uncertainty, moderating economic growth, the imminent prospect of reduced quantitative easing and policy tightening, and persistent supply-chain dislocations that amplified the

risk of more sustained inflation. In Asia, the spread of the coronavirus Delta variant shuttered factories and snarled traffic at several major ports, exacerbating supply-chain disruptions and driving shipping costs and goods prices even higher. Then, a debt crisis at one of China's largest real estate developers, Evergrande, destabilized financial markets and fueled concerns about lasting damage to China's credit conditions and its economy. At the end of the period, international equities rebounded strongly, as risk sentiment was bolstered by strong corporate earnings, robust global equity inflows, and improving trends regarding the coronavirus pandemic and vaccine coverage. However, optimism was tempered by persistent supply chain disruptions and uncertainty about the inflation outlook.

All eleven sectors within the MSCI ACWI ex USA Index (Net) posted positive returns for the twelve months ending October 31, 2021. The Energy (+73.37%), Financials (+49.82%), and Information Technology (+43.07%) sectors posted the largest gains during the period, while the Communication Services (+5.98%), Consumer Discretionary (+13.34%), and Utilities (+17.12%) sectors posted the smallest gains for the period.

Sector allocation, a residual of the underlying portfolio managers' bottom-up stock selection processes, detracted from the Fund's returns relative to the MSCI ACWI ex USA Index (Net) over the period. Underweight exposure to the Financials sector was the largest detractor from relative performance during the period, while underweight exposure to the Utilities sector was the largest contributor.

Fund Overview – (continued) October 31, 2021 (Unaudited)

Security selection contributed positively to the Fund's relative performance during the period. Strong selection in the Communication Services, Industrials, and Financials sectors was only partially offset by weaker selection in the Healthcare, Consumer Staples, and Real Estate sectors, which detracted from performance.

Our investment process includes the use of factor-based strategies, which involve targeting certain company characteristics, or factors, that we believe impact returns across asset classes. Factor impact overall on the Fund was positive during the period. The Fund's exposure to higher-beta names and its smaller cap footprint contributed positively to performance. The Fund's slightly lower exposure to higher-leverage and higher-momentum names relative to the MSCI ACWI ex USA Index (Net) detracted from performance. From a top-down perspective, the Fund's country and currency exposure detracted from relative results; Emerging Markets (Brazil, Russia) and North America (Canada) detracted most.

The largest detractors from the Fund's relative performance were Vipshop (Consumer Discretionary), Sands China (Consumer Discretionary), and New Oriental Education (Consumer Discretionary). Vipshop is a Chinese e-commerce company. Shares fell over the period on weak second-quarter 2021 earnings. Management also announced lower-than-expected third-quarter 2021 guidance as a resurgence in coronavirus cases and seasonal weakness had impacted apparel demand. The Fund continued to hold this name as of the end of the period. Sands China is an operator of casinos in Macau. Shares ended the period lower after government officials announced plans to tighten gambling restrictions. The casino also released mixed earnings in the first half of 2021 as the company's path to recovery continued to be challenged by coronavirus restrictions. We reduced the Fund's position during the period. New Oriental Education is a provider of private education services in China. Shares plummeted after the Chinese regulator decided to convert after-school tutoring (AST) companies to non-profits. We increased the Fund's position during the period.

Top contributors to the Fund's relative performance during the period included Alibaba (Consumer Discretionary), Coupang (Consumer Discretionary), and Tencent (Communication Services). Alibaba is a Chinese technology conglomerate. Shares ended the period lower as Chinese tech companies faced challenges from new regulations proposed by Beijing aiming to stop unfair competition, particularly concerning companies' use of data. The Fund's underweight exposure to this stock contributed positively to performance. We reduced the Fund's position during the period. The fair valuation of legacy private placement Coupang, a South Korea based e-commerce company, rose during the period following the company's initial public offering (IPO). We eliminated the Fund's position during the period following the company's public listing. Shares of Chinese technology conglomerate Tencent, in which the Fund was underweight, fell during the period. China's sprawling crackdown on technology companies, including new regulation to limit online gaming by minors to three hours per week, weighed on shares.

At times during the period, the Fund used equity index futures to equitize cash or efficiently manage risks. During the period, the use of equity index futures had a slightly positive contribution to relative performance.

What is the outlook as of the end of the period?

As of the end of the period, we observed that while company earnings have been improving during 2021 relative to 2020, risks have continued to evolve. This includes the potential economic ramifications following the spread of the coronavirus Delta variant and the reemergence of pandemic-related restrictions in some regions, potential broad market disruption from political gridlock surrounding publicly listed equities in China and the government debt ceiling in the United States (U.S.), and the potential impact to company fundamentals as central banks begin to roll back stimulus programs. Against this backdrop, we expect continued volatility as investors balance long-term opportunities and near-term risks. As ever, we remain vigilant in managing risks in the Fund and seek to deliver performance that is driven by security selection.

Looking across markets, we are mindful of the ever-evolving risks of different equity factors and seek to create a portfolio of differentiated investment styles and philosophies. As of the end of the period, we are maintaining the Fund's exposure to cyclical areas of the market through our allocations to mean-reversion (e.g. value and contrarian) underlying portfolio managers. These underlying portfolio managers look to invest in undervalued companies and use their security selection expertise to seek to identify companies with solid fundamentals and to avoid businesses that they believe are unlikely to mean-revert in the future. We look to our trend-following (e.g. growth and momentum) underlying portfolio managers to seek to provide capital appreciation by seeking attractive companies with favorable growth prospects. As with value equities, we look for the underlying portfolio managers' fundamental security selection processes to help identify companies with better long-term growth fundamentals versus those that are more speculative and driven by investor exuberance. We aim to balance these exposures with risk-aversion (e.g. quality and low volatility) allocations, which seek to provide a more defensive weight to the Fund by investing in companies with more stable businesses in our view. We believe these characteristics add beneficial exposure to the Fund in the event of an unexpected shock to the economy or markets. As of the end of the period, we believe these equities continue to trade at attractive valuations relative to history. To that end, we expect the market backdrop to benefit fundamental portfolio managers looking to differentiate between companies that can succeed in the current climate from those that cannot.

Important Risks

Investing involves risk, including the possible loss of principal. Security prices fluctuate in value depending on general market and economic conditions and the prospects of individual companies. • Foreign investments may be more volatile and less liquid than U.S. investments and are subject to the risk of currency fluctuations and adverse political, economic and regulatory developments. These risks may be greater, and include additional risks, for investments in emerging markets or if the Fund focuses in a particular geographic region or

Fund Overview – (continued) October 31, 2021 (Unaudited)

country. • Small- and mid-cap securities can have greater risks and volatility than large-cap securities. • The Fund's strategy for allocating assets among portfolio management teams may not work as intended.

Manager Discussion

How did the Fund perform during the period?

The Class A shares of The Hartford International Growth Fund returned 24.68%, before sales charges, for the twelve-month period ended October 31, 2021, outperforming the Fund's primary benchmark, the MSCI ACWI ex USA Growth Index (Net), which returned 22.73% for the same period, and underperforming the Fund's secondary benchmark, the MSCI ACWI ex USA Index (Net), which returned 29.66% for the same period. For the same period, the Class A shares of the Fund, before sales charges, underperformed the 29.48% average return of the Lipper International Large-Cap Growth Funds peer group, a group of funds with investment strategies similar to those of the Fund.

Why did the Fund perform this way?

For the twelve-month period ended October 31, 2021, international equities rose as measured by the MSCI ACWI ex USA Index (Net). In the fourth quarter of 2020, markets rebounded sharply after two coronavirus vaccines demonstrated high efficacy rates in Phase 3 trials. Despite this favorable development, the logistical challenges of distributing and administering the vaccines were significant, and high coronavirus case counts threatened to undermine the global economic recovery.

International equities rose during the first quarter of 2021. Markets continued to advance amid the accelerating global rollout of coronavirus vaccines, a favorable outlook for global economic growth, and substantial support from governments and central banks. Massive stimulus measures combined with pent-up savings and significant supply chain disruptions throughout the global economy fueled investor expectations for higher inflation. As a result, there were heightened concerns that central banks may have to tighten monetary policy to an extent that could impair equity markets. Despite a broadening rollout of vaccines, global coronavirus pandemic trends remained volatile. Europe experienced a sharp rise in coronavirus infections, extended lockdowns, and a slow vaccine rollout. The European Parliament approved the Recovery and Resilience Facility, which will provide €672.5 billion in grants and loans to help European Union (EU) countries to alleviate the social and economic effects of the coronavirus pandemic.

In the second quarter of 2021, international equities rose as markets were bolstered by improving global economic data, fiscal and monetary stimulus, strong corporate earnings, and higher vaccination rates. A combination of surging commodity prices, pent-up demand, global supply-chain disruptions, and stimulus-powered economic growth continued to drive inflation expectations higher, prompting some central banks to raise interest rates or consider tighter monetary

policy. The global decline in coronavirus cases since mid-April 2021 came to a halt, and the rapid spread of the highly infectious Delta variant of the coronavirus disrupted plans to lift lockdowns in many countries and reopen economies.

In the third quarter of 2021, international equities fell as markets contended with pandemic uncertainty, moderating economic growth, the imminent prospect of reduced quantitative easing and policy tightening, and persistent supply-chain dislocations that amplified the risk of more sustained inflation. In Asia, the spread of the coronavirus Delta variant shuttered factories and snarled traffic at several major ports, exacerbating supply-chain disruptions and driving shipping costs and goods prices even higher. Mounting inflation forced many emerging-markets countries to raise interest rates, while other central banks assessed plans for curbing their accommodative policies. China's regulatory crackdown on private education businesses and companies that handle large quantities of data pummeled the shares of Chinese technology stocks, sparking fears of more regulations for private companies. Then, a debt crisis at one of China's largest real estate developers, Evergrande, destabilized financial markets and fueled concerns about lasting damage to China's credit conditions and its economy.

At the end of the period, international equities rebounded strongly, as risk sentiment was bolstered by strong corporate earnings, robust global equity inflows, and improving trends regarding the coronavirus pandemic and vaccine coverage. However, persistent supply-chain disruptions and uncertainty about the inflation outlook triggered anxiety about the global economic recovery. A combination of strong demand and depleted supplies drove oil, gas, and coal prices sharply higher. In Europe, gas prices jumped by 60% in a week, before steadying after Russian President Vladimir Putin directed the country's major gas producer to increase European supplies. China's central bank governor indicated that the Chinese government could contain the risks that Evergrande's debt woes posed to the country's economy, as liabilities were spread across hundreds of entities in the financial system.

Ten out of the eleven sectors in the MSCI ACWI ex USA Growth Index (Net) rose during the period. Within the index, the Energy (+59%), Information Technology (+45%), and Financials (+45%) sectors performed best.

Security selection was a significant contributor to the Fund's outperformance relative to the MSCI ACWI ex USA Index (Net). Strong selection in the Consumer Discretionary, Industrials, and Financials sectors contributed positively to the Fund's outperformance. This was partially offset by weak selection within the Consumer Staples, Healthcare, and Communication Services sectors. Sector

The Hartford International Growth Fund

Fund Overview – (continued) October 31, 2021 (Unaudited)

allocation, a residual of our bottom-up stock selection, detracted from relative performance. The Fund's overweight to the Communication Services and Consumer Discretionary sectors detracted most from performance, while an overweight to the Information Technology sector and an underweight to the Consumer Staples sector contributed positively. On a regional basis, security selection in Europe ex U.K. and North America contributed positively to relative performance, while security selection in Emerging Markets and the U.K. detracted from performance.

Partners Group (Financials), Moncler (Consumer Discretionary), and Julius Baer (Financials) were the top contributors to the Fund's performance relative to the MSCI ACWI ex USA Growth Index (Net) during the period. Partners Group, a Swiss-based private equity firm, outperformed during the period given continued investor demand for private assets resulting in a favorable fundraising environment. Moncler, an Italian luxury fashion brand, outperformed during the period. During the period, the company benefited from its international footprint, with strong demand in both Europe and China as the regions continue to recover from the coronavirus pandemic and resulting travel restrictions. Julius Baer, a Swiss-based private banking corporation, outperformed during the period. The company experienced a strong third guarter of 2021, and continued to excel through the end of the period, primarily due to accelerated growth of new assets under management. Additionally, as of the end of the period, efforts by management to reduce costs have begun to flow through to results.

Among the top detractors to relative performance during the period were Yatsen (Consumer Staples), Worldline (Information Technology), and Cellnex Telecom (Communication Services). Shares of Yatsen, a Chinese cosmetics company, fell over the period following weak earnings reports. Shares have also been pressured lower as regulatory uncertainty in China continues to intensify with plans to tighten rules for Chinese equities listed abroad. We eliminated the Fund's position during the period. Shares of Worldline, a French payment and transactional service company, underperformed during the period after the company reported disappointing results during the first half of 2021. We eliminated the Fund's position during the period. Shares of Cellnex Telecom, a Spain-based cell tower operator and consolidator, underperformed during the period. Shares of the company, which was largely viewed as a beneficiary of the conditions created by the coronavirus pandemic, lagged the broader markets as economies began to re-open. However, we continued to own the position within the Fund as of the end of the period.

Derivatives were not used in a significant manner in the Fund during the period and did not have a material impact on performance.

What is the outlook as of the end of the period?

As of the end of the period, macroeconomic considerations continue to dominate the investment landscape, while company fundamentals have been largely over-shadowed. In the U.S., the 10-year Treasury yield spiked given increasing expectations that the U.S. Federal Reserve (Fed) will begin to reduce its unprecedented levels of stimulus in order to combat rising inflation. Further, policy concerns over a potential government shutdown and uncertainty related to the outcome of the proposed infrastructure bill weighed on broader investor sentiment.

As of the end of the period, the Fund remained balanced between companies benefiting from structural growth opportunities and companies likely to benefit from continued re-opening of the economy and resumption of pre-pandemic activities. Given the multitude of macroeconomic factors that are currently impacting stock prices, we continued to maintain a dynamic balance in the Fund's portfolio until we gain more clarity around the future environment. Lastly, we remained cognizant of potential supply chain issues and the possible near-term implications for companies' inventory levels.

From a regional perspective, we have decreased our earnings and growth estimates for Chinese companies given an increasingly uncertain regulatory environment, and ultimately reduced the Fund's exposure to China toward the end of the period. As of the end of the period, we continued to find what we consider to be attractive opportunities within our investable universe in Europe and North America.

Important Risks

Investing involves risk, including the possible loss of principal. Security prices fluctuate in value depending on general market and economic conditions and the prospects of individual companies. • Foreign investments may be more volatile and less liquid than U.S. investments and are subject to the risk of currency fluctuations and adverse political, economic and regulatory developments. These risks may be greater, and include additional risks, for investments in emerging markets. • Small- and mid-cap securities can have greater risks and volatility than large-cap securities. • The Fund may focus on investments in particular sectors, geographic regions or countries, so it may be more exposed to risks and volatility than a fund holding more geographically diverse investments. • Different investment styles may go in and out favor, which may cause the Fund to underperform the broader stock market. • The Fund may have high portfolio turnover, which could increase its transaction costs and an investor's tax liability.

Composition by Sector⁽¹⁾ as of 10/31/2021

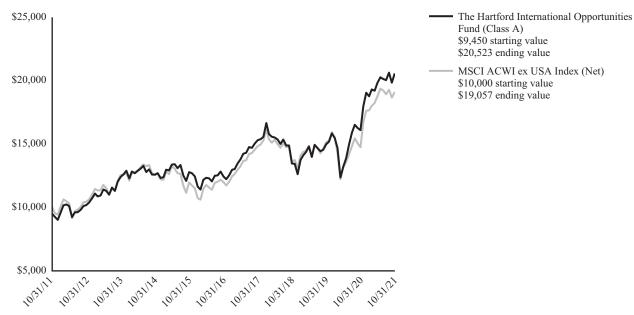

| Sector | Percentage of Net Assets |

Manager Discussion

How did the Fund perform during the period?

The Class A shares of The Hartford International Opportunities Fund returned 27.91%, before sales charges, for the twelve-month period ended October 31, 2021, underperforming the Fund's benchmark, the MSCI ACWI ex USA Index (Net), which returned 29.66% for the same period. For the same period, the Class A shares of the Fund, before sales charges, underperformed the 29.48% average return of the Lipper International Large-Cap Growth Funds peer group, a group of funds with investment strategies similar to those of the Fund.

Why did the Fund perform this way?

For the twelve-month period ended October 31, 2021, international equities rose as measured by the MSCI ACWI ex USA Index (Net). In the fourth quarter of 2020, markets rebounded sharply after two COVID-19 vaccines demonstrated high efficacy rates in Phase 3 trials. Despite this favorable development, the logistical challenges of distributing and administering the vaccines were significant, and high coronavirus case counts threatened to undermine the global economic recovery.

International equities rose during the first quarter of 2021. Markets continued to advance amid the accelerating global rollout of coronavirus vaccines, a favorable outlook for global economic growth, and substantial support from governments and central banks. Massive stimulus measures combined with pent-up savings and significant supply chain disruptions throughout the global economy fueled

investor expectations for higher inflation. This led to increased concerns that central banks may have to tighten monetary policy to an extent that could impair equity markets. Despite a broadening rollout of vaccines, global coronavirus trends remained volatile. Europe experienced a sharp rise in COVID-19 infections, extended lockdowns, and a slow vaccine rollout. The European Parliament approved the Recovery and Resilience Facility, which will provide €672.5 billion in grants and loans to help European Union (EU) countries to alleviate the social and economic effects of the pandemic.

In the second quarter of 2021, international equities rose as markets were bolstered by improving global economic data, fiscal and monetary stimulus, strong corporate earnings, and higher vaccination rates. A combination of surging commodity prices, pent-up demand, global supply-chain disruptions, and stimulus-powered economic growth continued to drive inflation expectations higher, prompting some central banks to raise interest rates or consider tighter monetary policy. The global decline in COVID-19 cases since mid-April 2021 came to a halt. The rapid spread of the highly infectious Delta variant of the coronavirus disrupted plans to lift lockdowns and reopen economies in many countries.

In the third quarter of 2021, international equities fell as markets encountered pandemic uncertainty, moderating economic growth, the imminent prospect of reduced quantitative easing and policy tightening, and persistent supply-chain dislocations that amplified the risk of more sustained inflation. In Asia, the spread of the COVID-19 Delta variant shuttered factories and snarled traffic at several major ports, exacerbating supply-chain disruptions and driving shipping

Fund Overview – (continued) October 31, 2021 (Unaudited)

costs and goods prices even higher. Mounting inflation forced many emerging markets countries to raise interest rates, while other central banks assessed plans for curbing their accommodative policies. China's regulatory crackdown on private education businesses and companies that handle large quantities of data pummeled share prices of Chinese technology equities, sparking fears of more regulations for private companies. Next, a debt crisis at one of China's largest property developers, Evergrande, destabilized financial markets and fueled concerns about lasting damage to China's credit conditions and its economy.

At the end of the period, international equities rebounded strongly, as risk sentiment was bolstered by strong corporate earnings, robust global equity inflows, improving coronavirus trends, and wider vaccine coverage. However, persistent supply-chain disruptions and an uncertain inflation outlook triggered anxiety about the global economic recovery. A combination of strong demand and depleted supplies drove oil, gas, and coal prices sharply higher. In Europe, gas prices jumped by 60% in a week, before steadying after Russian President Vladimir Putin directed the country's major gas producer to increase European supplies. China's central bank governor indicated that the Chinese government could contain the risks that Evergrande's debt woes posed to the country's economy, as liabilities were spread across hundreds of entities in the financial system.

Within the MSCI ACWI ex USA Index (Net), all eleven sectors posted positive returns for the twelve months ending October 31, 2021. The Energy (+73.37%), Financials (+49.82%), and Information Technology (+43.07%) sectors posted the largest gains over the period, while the Communication Services (+5.98%), Consumer Discretionary (+13.34%), and Utilities (+17.12%) sectors lagged.

Security selection detracted from the Fund's relative performance over the period, led by weak selection within the Consumer Discretionary, Industrials, and Energy sectors. Conversely, strong selection within the Materials, Utilities, and Communication Services sectors contributed positively, partially offsetting the negative relative results. Sector allocation, a result of the bottom-up stock selection process, contributed positively to relative results. The Fund's relative overweight to the Information Technology sector and underweights to the Consumer Staples and Communication Services sectors proved beneficial to performance, while a relative underweight to the Financials sector and a slight overweight to the Energy sector detracted from performance, partially offsetting results.

Top detractors from the Fund's performance relative to the MSCI ACWI ex USA Index (Net) during the period included Alibaba Group (Consumer Discretionary), Iberdrola (Utilities), and Localiza (Industrials). Shares of Alibaba ended the period lower. Chinese tech companies faced challenges from new regulations proposed by Beijing aiming to stop unfair competition, particularly concerning companies' use of data. Shares of Spanish multinational electric utility company Iberdrola fell during the period after the Spanish government announced a number of measures aimed at reducing electricity bills, including a tax on hydro and nuclear plants tied to European gas prices. The new tax will ultimately cost Iberdrola a large one-time expense in the first quarter of 2022 as gas prices continue to skyrocket in the region. Shares of Localiza, a Brazilian rental car

company, fell during the period, despite reporting positive second-quarter 2021 earnings led by higher used car prices. Net revenue increased 72% year-over-year. However, a second COVID-19 wave led to lower volumes, and the company held off on used car sales in an effort to support demand in the rent-a-car business segment. Koninklijke Philips (Healthcare) was a top absolute detractor from performance during the period.

Anglo American (Materials), BNP Paribas (Financials), and Suncor Energy (Energy) were among the top contributors to the Fund's relative performance during the period. Shares of British mining company Anglo American rose during the period. The company delivered strong first-half 2021 results with earnings of \$12.1 billion, signaling a rebound in consumer demand. Results were driven by the platinum group metals, copper, and premium quality iron ore. Shares of BNP Paribas increased during the period. Share price performance was particularly strong after the French international banking group reported its third-quarter results in February 2021. Earnings exceeded expectations, led by a rise in equity trading and lower provisions for pandemic-related loan losses. Shares of Suncor rose during the period after the Canadian integrated energy company reported upbeat third-quarter 2021 earnings. During the period, downstream demand returned to near 2019 levels and the board approved a 100% increase in the firm's quarterly dividend. ASML (Information Technology) was a top absolute contributor to performance during the period.

Derivatives were not used in a significant manner in the Fund during the period and did not have a material impact on performance during the period.

What is the outlook as of the end of the period?

As of the end of the period, we have seen continued volatility driven by inflation and interest rate concerns, slowing growth and the regulatory cycle in China, and a non-linear and uneven economic recovery as regions experience resurgences in the coronavirus and face new variants. As the world adjusts to this new normal of rolling bouts of volatility across regions, industries, and end markets, we remain focused on seeking to identify compelling bottom-up opportunities where future returns on capital are mispriced. In addition, given the drastic stock price moves, we remain focused on maintaining a balanced Fund as markets remain very macro-driven and the range of global economic outcomes remains wide.

We continue to track economic data and the direction of fiscal and monetary policy globally, paying particular attention to the impact of China on the broader global economy and demand. We believe that economic activity should pick up over the next few quarters if the bottlenecks we have seen in the labor market subside. We believe the market is not pricing in this economic recovery and, as such, as of the end of the period, we continued to find what we consider to be compelling opportunities in parts of the market geared to economic recovery. We expect volatility to persist in the coming months driven by the continued ebb and flow of the uneven global recovery, the pace and magnitude of changes in interest rates, expectations around the outlook for inflation, and regulatory risk. We aim to take advantage of volatility and market dislocations where appropriate to invest in companies across sectors and geographies that we believe have an underappreciated ability to improve or sustain returns on capital.

Fund Overview – (continued) October 31, 2021 (Unaudited)

At the end of the period, the Fund's largest overweight positions were in the Information Technology, Energy, and Healthcare sectors, while the Fund had the largest underweights to the Consumer Staples and Materials sectors, relative to the MSCI ACWI ex USA Index (Net). From a regional perspective, the Fund had the largest overweights to Developed Europe and Middle East ex-UK and the largest underweight to emerging markets, relative to the MSCI ACWI ex USA Index (Net), at the end of the period.

Important Risks

Investing involves risk, including the possible loss of principal. Security prices fluctuate in value depending on general market and economic conditions and the prospects of individual companies. • Foreign investments may be more volatile and less liquid than U.S. investments and are subject to the risk of currency fluctuations and adverse political, economic and regulatory developments. These risks may be greater, and include additional risks, for investments in emerging markets. • Mid-cap securities can have greater risks and volatility than large-cap securities. • To the extent the Fund focuses on one or more sectors, geographic regions or countries, the Fund may be subject to increased volatility and risk of loss if adverse developments occur. • Integration of environmental, social, and/or governance (ESG) factors into the investment process may not work as intended. • The Fund may have high portfolio turnover, which could increase its transaction costs and an investor's tax liability.

Composition by Sector⁽¹⁾ as of 10/31/2021

| Sector | Percentage of Net Assets |

PERFORMANCE DATA QUOTED REPRESENTS PAST PERFORMANCE AND DOES NOT GUARANTEE FUTURE RESULTS. The investment return and principal value of the investment will fluctuate so that investors' shares, when redeemed, may be worth more or less than their original cost. The chart and table do not reflect the deductions of taxes that a shareholder would pay on Fund distributions or the redemption of Fund shares. Current performance may be lower or higher than the performance data quoted. To obtain performance data current to the most recent month-end, please visit our website hartfordfunds.com.

Total returns presented above were calculated using the applicable class' net asset value available to shareholders for sale or redemption of Fund shares on 10/31/2021, which may exclude investment transactions as of this date. All share class returns assume the reinvestment of all distributions at net asset value and the deduction of all fund expenses. The total returns presented in the Financial Highlights section of the report are calculated in the same manner, but also take into account certain

adjustments that are necessary under generally accepted accounting principles. As a result, the total returns in the Financial Highlights section may differ from the total returns presented above.

Class R6 shares commenced operations on 02/28/2019. Performance prior to that date is that of the Fund's Class Y shares. Class F shares commenced operations on 02/28/2017. Performance prior to that date is that of the Fund's Class I shares.

To the extent a share class has adopted the prior performance of another share class that had different operating expenses, such performance has not been adjusted to reflect the different operating expenses. If the performance were adjusted, it may have been higher or lower.

You cannot invest directly in an index.

See "Benchmark Glossary" for benchmark descriptions.

Performance information may reflect expense waivers/reimbursements without which performance would have been lower. For information on current expense waivers/reimbursements, please see the prospectus.

Fund Overview – (continued) October 31, 2021 (Unaudited)

| Operating Expenses* | Gross | Net | |
|---------------------|-------|-------|--|
| Class A | 1.23% | 1.23% | |
| Class C | 1.99% | 1.99% | |
| Class I | 0.93% | 0.93% | |
| Class R3 | 1.58% | 1.58% | |
| Class R4 | 1.28% | 1.28% | |
| Class R5 | 0.95% | 0.95% | |
| Class R6 | 0.86% | 0.86% | |
| Class Y | 0.93% | 0.92% | |
| Class F | 0.86% | 0.86% | |

Expenses as shown in the Fund's most recent prospectus. Gross expenses do not reflect contractual fee waivers or expense reimbursement arrangements. Net expenses reflect such arrangements only with respect to Class Y. These arrangements remain in effect until 02/28/2022 unless the Fund's Board of Directors approves an earlier termination. Actual expenses may be higher or lower. Please see accompanying Financial Highlights for expense ratios for the period ended 10/31/2021.

Manager Discussion

How did the Fund perform during the period?

The Class A shares of The Hartford International Value Fund returned 49.38%, before sales charge, for the twelve-month period ended October 31, 2021, outperforming the Fund's benchmarks, the MSCI EAFE Value Index (Net), which returned 38.31% for the same period, and the MSCI EAFE Index (Net), which returned 34.18% for the same period. For the same period, the Class A shares of the Fund, before sales charges, also outperformed the 37.40% average return of the Lipper International Multi-Cap Value Funds peer group, a group of funds with investment strategies similar to those of the Fund.

Why did the Fund perform this way?

For the twelve-month period ended October 31, 2021, international equities rose, as measured by the MSCI ACWI ex USA Index (Net). In the fourth quarter of 2020, markets rebounded sharply after two COVID-19 vaccines demonstrated high efficacy rates in Phase 3 trials. Despite this favorable development, the logistical challenges of distributing and administering the vaccines were significant, and high coronavirus case counts threatened to undermine the global economic recovery.

International equities rose during the first quarter of 2021. Markets continued to advance amid the accelerating global rollout of coronavirus vaccines, a favorable outlook for global economic growth, and substantial support from governments and central banks. Massive stimulus measures combined with pent-up savings and significant

supply chain disruptions throughout the global economy fueled investor expectations for higher inflation. This led to increased concerns that central banks may have to tighten monetary policy to an extent that could impair equity markets. Despite a broadening rollout of vaccines, global coronavirus trends remained volatile. Europe experienced a sharp rise in COVID-19 infections, extended lockdowns, and a slow vaccine rollout. The European Parliament approved the Recovery and Resilience Facility, which will provide €672.5 billion in grants and loans to help European Union (EU) countries to alleviate the social and economic effects of the pandemic.

In the second quarter of 2021, international equities rose as markets were bolstered by improving global economic data, fiscal and monetary stimulus, strong corporate earnings, and higher vaccination rates. A combination of surging commodity prices, pent-up demand, global supply-chain disruptions, and stimulus-powered economic growth continued to drive inflation expectations higher, prompting some central banks to raise interest rates or consider tighter monetary policy. The global decline in COVID-19 cases since mid-April 2021 came to a halt. The rapid spread of the highly infectious coronavirus Delta variant disrupted plans to lift lockdowns and reopen economies in many countries.

In the third quarter of 2021, international equities fell as markets encountered pandemic uncertainty, moderating economic growth, the imminent prospect of reduced quantitative easing and policy tightening, and persistent supply-chain dislocations that amplified the risk of more sustained inflation. In Asia, the spread of the COVID-19 Delta variant shuttered factories and snarled traffic at several major

Fund Overview – (continued) October 31, 2021 (Unaudited)

ports, exacerbating supply-chain disruptions and driving shipping costs and goods prices even higher. Mounting inflation forced many emerging markets countries to raise interest rates, while other central banks assessed plans for curbing their accommodative policies. China's regulatory crackdown on private education businesses and companies that handle large quantities of data pummeled share prices of Chinese technology equities, sparking fears of more regulations for private companies. Next, a debt crisis at one of China's largest property developers, Evergrande, destabilized financial markets and fueled concerns about lasting damage to China's credit conditions and its economy.

At the end of the period, international equities rebounded strongly, as risk sentiment was bolstered by strong corporate earnings, robust global equity inflows, improving coronavirus trends, and wider vaccine coverage. However, persistent supply-chain disruptions and an uncertain inflation outlook triggered anxiety about the global economic recovery. A combination of strong demand and depleted supplies drove oil, gas, and coal prices sharply higher. In Europe, gas prices jumped by 60% in a week, before steadying after Russian President Vladimir Putin directed the country's major gas producer to increase European supplies. China's central bank governor indicated that the Chinese government could contain the risks that Evergrande's debt woes posed to the country's economy, as liabilities were spread across hundreds of entities in the financial system.

All eleven sectors in the MSCI EAFE Value Index (Net) posted positive returns for the twelve months ending October 31, 2021. The Energy (+85.3%), Financials (+59.6%), and Consumer Discretionary (+42.3%) sectors gained the most during the period.

The primary driver of the Fund's outperformance relative to the MSCI EAFE Value Index (Net) over the period was strong security selection. Selection in the Industrials, Communication Services, and Financials sectors were the largest positive contributors. This was partially offset by selection in the Materials and Healthcare sectors. Sector allocation, a result of bottom-up stock selection decisions, also contributed positively to relative performance, driven by the Fund's overweight to the Energy sector and underweights to the Utilities and Healthcare sectors. On a regional basis, security selection in Europe ex-U.K., the U.K., and North America contributed most to relative returns. The Fund's overweight to North America and underweight to Japan detracted from relative returns during the period.

The largest contributors to performance relative to the MSCI EAFE Value Index (Net) over the period were Norsk Hydro (Materials), Novartis (Healthcare), and Pacific Basin Shipping (Industrials). Share prices of Norsk Hydro, a Norwegian alumina and aluminum producer, rose during the period after the company reported multiple strong earnings. Novartis is a Switzerland-based pharmaceuticals company. The Fund initiated a position at the end of the period after the shares were weighed down by the Biden administration's plan to cut prescription drug prices for Medicare. The stock rebounded partially after the company released strong third-quarter earnings. Shares of Pacific Basin Shipping, a Hong Kong-based maritime transportation services company, benefited from strong grain trade and high United States (U.S.) soybean and corn exports. Near the end of the

period, the company's confirmed third quarter 2021 profits continued to be supported by tighter capacity and a shortage of containers, which drove up shipping prices.

The largest detractors from performance relative to the MSCI EAFE Value Index (Net) over the period were Barrick Gold (Materials), Shimamura (Consumer Discretionary), and not owning Commonwealth Bank of Australia (Financials). Shares of Canada-based Barrick Gold, a large gold miner, declined during the period despite posting multiple strong earnings. Shares were weighed down by market sentiment as gold prices fell below \$1800 per ounce during the period. Shares of Shimamura, a Japanese apparel and textile company, were weighed down from a slow vaccine rollout in Japan. Shares of Commonwealth Bank of Australia outperformed over the period; because the Fund did not have a position in the stock during the period, this detracted from relative performance.

Derivatives were not used in a significant manner in the Fund during the period and did not have a material impact on performance during the period.

What is the outlook as of the end of the period?

We continue to focus on opportunities which fit into our framework of looking for equities with low relative price, low expectations, and low valuations that generally feature strong balance sheets and significant potential upside.

At the end of the period, the Energy and Communication Services sectors were the Fund's largest overweight exposures, while the Utilities and Consumer Staples sectors were the Fund's largest underweight exposures relative to the MSCI EAFE Value Index (Net). On a regional basis, the Fund ended the period with the largest overweights to Emerging Markets and Japan and the largest underweights to Europe and Developed Asia ex Japan, relative to the MSCI EAFE Value Index (Net).

Important Risks

of loss if adverse developments occur.

Investing involves risk, including the possible loss of principal. Security prices fluctuate in value depending on general market and economic conditions and the prospects of individual companies. • Foreign investments may be more volatile and less liquid than U.S. investments and are subject to the risk of currency fluctuations and adverse political, economic and regulatory developments. These risks may be greater, and include additional risks, for investments in emerging markets. These risks may also be greater, and there may be additional risks, if the Fund focuses in a particular geographic region or country, such as Japan. • Different investment styles may go in and out favor, which may cause the Fund to underperform the broader stock market. • Small- and mid-cap securities can have greater risks and volatility than large-cap securities. • To the extent the Fund focuses on one or more sectors, the Fund may be subject to increased volatility and risk

MSCI Emerging Markets Index (Net) (reflects reinvested dividends net of withholding taxes but reflects no deduction for fees, expenses or other taxes) is designed to capture large and mid cap representation across emerging market countries.

Expense Examples (Unaudited)

Your Fund's Expenses

As a shareholder of a Fund, you incur two types of costs: (1) transaction costs, including sales charges (loads) on purchase payments, if any, and contingent deferred sales charges (CDSC), if any, and (2) ongoing costs, including investment management fees, distribution and/or service (12b-1) fees, if any, and other fund expenses. This example is intended to help you understand your ongoing costs (in dollars) of investing in a Fund and to compare these costs with the ongoing costs of investing in other mutual funds. The example is based on an investment of \$1,000 invested at the beginning of the period and held for the entire period of May 1, 2021 through October 31, 2021. To the extent a Fund was subject to acquired fund fees and expenses during the period, acquired fund fees and expenses are not included in the annualized expense ratios below.

Actual Expenses

The first set of columns of the table below provides information about actual account values and actual expenses. You may use this information, together with the amount you invested, to estimate the expenses that you paid over the period. Simply divide your account value by \$1,000 (for example, an \$8,600 account value divided by \$1,000 = 8.6), then multiply the result by the number in the line under the heading entitled "Expenses Paid During The Period" to estimate the expenses you paid on your account during this period.

Hypothetical Example for Comparison Purposes

The second set of columns of the table below provides information about hypothetical account values and hypothetical expenses based on a Fund's actual expense ratio and an assumed rate of return of 5% per year before expenses, which is not the Fund's actual return. The hypothetical account values and expenses may not be used to estimate the actual ending account balance or expenses you paid for the period. You may use this information to compare the ongoing costs of investing in a Fund and other funds. To do so, compare this 5% hypothetical example with the 5% hypothetical examples that appear in the shareholder reports of the other funds.

Please note that the expenses shown in the table are meant to highlight your ongoing costs only and do not reflect any transactional costs, such as sales charges (loads and CDSC). Therefore, the second set of columns of the table is useful in comparing ongoing costs only, and will not help you determine the relative total costs of owning different funds. In addition, if these transactional costs were included, your costs would be higher. Expenses for a class of a Fund are equal to the class' annualized expense ratio multiplied by average account value over the period, multiplied by 184/365 (to reflect the one-half year period).

⁽¹⁾ The annualized expense ratio is representative of the period from May 1, 2021 through October 31, 2021. The annualized expense ratio does not fully reflect the contractual expense limitation arrangement as this arrangement is based on the entire fiscal year and not the six-month period. As such, the annualized expense ratio exceeds the amount of the contractual expense limitation arrangement for this share class of the Fund for purposes of the hypothetical example. Please see the accompanying Financial Highlights for the expense ratio for the year ended October 31, 2021.

⁽¹⁾ Security was purchased pursuant to Rule 144A under the Securities Act of 1933 and may be sold in transactions that are exempt from registration (typically only to qualified institutional buyers) or in a public offering registered under the Securities Act of 1933. At October 31, 2021, the aggregate value of these securities was \$14,042,022, representing 2.8% of net assets.

Hartford Emerging Markets Equity Fund

Schedule of Investments – (continued) October 31, 2021

- (2) Represents entire or partial securities on loan. See Note 8 in the accompanying Notes to Financial Statements for securities lending information.
- (3) This security is valued in good faith at fair value as determined under policies and procedures established by and under the supervision of the Board of Directors. At October 31, 2021, the aggregate fair value of this security was \$2,560,752, which represented 0.5% of total net assets. This amount excludes securities that are principally traded in certain foreign markets and whose prices are adjusted pursuant to a third party pricing service methodology approved by the Board of Directors.
- (4) Investment valued using significant unobservable inputs.
- (5) Current yield as of period end.

⁽¹⁾ For the year ended October 31, 2021, investments valued at \$5,424,214 were transferred into Level 3 due to the unavailability of active market pricing, and investments valued at \$491,031 were transferred out of Level 3 due to the availability of significant observable inputs.

Level 3 investments at the beginning and/or end of the period in relation to net assets were not significant and accordingly, a reconciliation of Level 3 assets for the year ended October 31, 2021 is not presented.

²⁾ Derivative instruments (excluding purchased and written options, if applicable) are valued at the unrealized appreciation/(depreciation) on the investments.

FINANCIAL HIGHLIGHTS FOOTNOTES

- (1) Information presented relates to a share outstanding throughout the indicated period. Net investment income (loss) per share amounts are calculated based on average shares outstanding unless otherwise noted.
- (2) Assumes initial investment at net asset value at the beginning of each period, reinvestment of all distributions, the complete redemption of the investment at net asset value at the end of each period and no sales charge. Total return would be reduced if sales charges were taken into account.
- (3) Adjustments include waivers and reimbursements, if applicable. Ratios do not include fees paid indirectly (see Expenses in the accompanying Notes to Financial Statements).
- (4) Commenced operations on February 28, 2017.
- (5) Not annualized.
- (6) Annualized.
- (7) Commenced operations on February 28, 2018.
- (8) Includes the Fund's share of the Master Portfolio's allocated expenses.
- (9) Effective October 7, 2019, the Global Impact Fund commenced operations as a stand-alone fund. The portfolio turnover is reflective of the activity from October 7, 2019 to October 31, 2019. The blended portfolio turnover rate of the Global Impact Fund and its former master portfolio, the Global Impact Master Portfolio (the "Master Portfolio"), is 108% which reflects the portfolio turnover of the Master Portfolio from November 1, 2018 through October 4, 2019 and the Global Impact Fund from October 7, 2019 to October 31, 2019.
- (10) The portfolio turnover of the Fund is reflective of the portfolio turnover of the Master Portfolio.
- (11) Amount is less than \$0.01 per share.
- (12) Amount is less than 0.01%.
- (13) Commenced operations on February 28, 2019.

Notes to Financial Statements October 31, 2021

1. Organization:

The Hartford Mutual Funds, Inc. (the "Company") is an open-end registered management investment company comprised of thirty-six series, as of October 31, 2021. Financial statements for the series of the Company listed below (each, a "Fund" and collectively, the "Funds") are included in this report.

The Hartford Mutual Funds, Inc.:

Hartford Climate Opportunities Fund (the "Climate Opportunities Fund")

Hartford Emerging Markets Equity Fund (the "Emerging Markets Equity Fund")

Hartford Global Impact Fund (the "Global Impact Fund")

Hartford International Equity Fund (the "International Equity Fund")

The Hartford International Growth Fund (the "International Growth Fund")

The Hartford International Opportunities Fund (the "International Opportunities Fund")

The Hartford International Value Fund (the "International Value Fund")

The assets of each Fund are separate, and a shareholder's interest is limited to the Fund in which shares are held. The Company is organized under the laws of the State of Maryland and is registered with the Securities and Exchange Commission (the "SEC") under the Investment Company Act of 1940, as amended (the "1940 Act"). Each Fund is a diversified open-end management investment company. Each Fund applies specialized accounting and reporting standards under Accounting Standards Codification Topic 946, "Financial Services – Investment Companies".

Each Fund has registered for sale Class A, Class C, Class I, Class R3, Class R4, Class R5, Class R6, Class R6, Class F shares. Class A shares of each Fund are sold with a front-end sales charge of up to 5.50%. Class C shares of each Fund are sold with a contingent deferred sales charge of up to 1.00% on shares redeemed within twelve months of purchase. Effective April 1, 2021, Class C shares automatically convert to Class A shares of the same Fund after eight years provided that the Fund or the financial intermediary has records verifying that the Class C shares have been held for at least eight years. Classes I, R3, R4, R5, R6, Y and F shares do not have a sales charge. Certain classes of the International Equity Fund are closed to new investors, subject to certain exceptions. For more information, please see the Funds' prospectus.

2. Significant Accounting Policies:

The following is a summary of significant accounting policies of each Fund used in the preparation of its financial statements, which are in accordance with United States Generally Accepted Accounting Principles ("U.S. GAAP"). The preparation of financial statements in accordance with U.S. GAAP may require management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of increases and decreases in net assets from operations during the reporting period. Actual results could differ from those estimates.

- a) Determination of Net Asset Value The net asset value ("NAV") of each class of each Fund's shares is determined as of the close of regular trading on the New York Stock Exchange (the "Exchange") (normally 4:00 p.m. Eastern Time) (the "NYSE Close") on each day that the Exchange is open ("Valuation Date"). If the Exchange is closed due to weather or other extraordinary circumstances on a day it would typically be open for business, each Fund may treat such day as a typical business day and accept purchase and redemption orders and calculate each Fund's NAV in accordance with applicable law. The NAV of each class of each Fund's shares is determined by dividing the value of the Fund's net assets attributable to the class of shares by the number of shares outstanding for that class. Information that becomes known to the Funds after the NAV has been calculated on a particular day will not generally be used to retroactively adjust the NAV determined earlier that day.
- b) Investment Valuation and Fair Value Measurements For purposes of calculating the NAV of each class of each Fund, portfolio securities and other assets held in the Fund's portfolio for which market prices are readily available are valued at market value. Market value is generally determined on the basis of official close price or last reported trade price. If no trades were reported, market value is based on prices obtained from a quotation reporting system, established market makers (including evaluated prices), or independent pricing services. Pricing vendors may use matrix pricing or valuation models that utilize certain inputs and assumptions to derive values, including transaction data, credit quality information, general market conditions, news, and other factors and assumptions.

If market prices are not readily available or are deemed unreliable, a Fund will use the fair value of the security or other instrument as determined in good faith under policies and procedures established by and under the supervision of the Board of Directors of the Company (the "Board of Directors") ("Valuation Procedures"). Market prices are considered not readily available where there is an absence of current or reliable market-based data (e.g., trade information or broker quotes), including where events occur after the close of the relevant market, but prior to the NYSE Close, that materially affect the values of a Fund's portfolio holdings or assets. In addition, market prices are considered not readily available when, due to extraordinary circumstances, the exchanges or markets on which the securities or other

Notes to Financial Statements – (continued) October 31, 2021

instruments trade do not open for trading for the entire day and no other market prices are available. Fair value pricing is subjective in nature and the use of fair value pricing by a Fund may cause the NAV of its shares to differ significantly from the NAV that would have been calculated using market prices at the close of the exchange on which a portfolio holding is primarily traded. There can be no assurance that a Fund could obtain the fair value assigned to an investment if the Fund were to sell the investment at approximately the time at which the Fund determines its NAV.

Prices of foreign equities that are principally traded on certain foreign markets will generally be adjusted daily pursuant to a fair value pricing service in order to reflect an adjustment for the factors occurring after the close of certain foreign markets but before the NYSE Close. Securities and other instruments that are primarily traded on foreign markets may trade on days that are not business days of the Funds. The value of the foreign securities or other instruments in which a Fund invests may change on days when a shareholder will not be able to purchase, redeem or exchange shares of the Fund.

Fixed income investments (other than short-term obligations) and non-exchange traded derivatives held by a Fund are normally valued at prices supplied by independent pricing services in accordance with the Valuation Procedures. Short-term investments maturing in 60 days or less are generally valued at amortized cost which approximates fair value.

Exchange-traded derivatives, such as options, futures and options on futures, are valued at the last sale price determined by the exchange where such instruments principally trade as of the close of such exchange ("Exchange Close"). If a last sale price is not available, the value will be the mean of the most recently quoted bid and ask prices as of the Exchange Close. If a mean of the bid and ask prices cannot be calculated for the day, the value will be the most recently quoted bid price as of the Exchange Close. Over-the-counter derivatives are normally valued based on prices supplied by independent pricing services in accordance with the Valuation Procedures.

Investments valued in currencies other than U.S. dollars are converted to U.S. dollars using the prevailing spot currency exchange rates obtained from independent pricing services for calculation of the NAV. As a result, the NAV of a Fund's shares may be affected by changes in the value of currencies in relation to the U.S. dollar. The value of securities or other instruments traded in markets outside the United States or denominated in currencies other than the U.S. dollar may be affected significantly on a day that the Exchange is closed and the market value may change on days when an investor is not able to purchase, redeem or exchange shares of a Fund.

Foreign currency contracts represent agreements to exchange currencies on specific future dates at predetermined rates. Foreign currency contracts are valued using foreign currency exchange rates and forward rates as provided by an independent pricing service on the Valuation Date.

Investments in investment companies that are not listed or traded on an exchange ("Non-Traded Funds"), if any, are valued at the respective NAV of each Non-Traded Fund on the Valuation Date. Shares of investment companies listed and traded on an exchange are valued in the same manner as any exchange-listed equity security. Such Non-Traded Funds and listed investment companies may use fair value pricing as disclosed in their prospectuses.

Financial instruments for which prices are not available from an independent pricing service may be valued using market quotations obtained from one or more dealers that make markets in the respective financial instrument in accordance with the Valuation Procedures.

U.S. GAAP defines fair value as the price that a Fund would receive to sell an asset or pay to transfer a liability in an orderly transaction between market participants. The U.S. GAAP fair value measurement standards require disclosure of a fair value hierarchy for each major category of assets and liabilities. Various inputs are used in determining the fair value of each Fund's investments. These inputs are summarized into three broad hierarchy levels. This hierarchy is based on whether the valuation inputs are observable or unobservable. These levels are:

- Level 1 Quoted prices in active markets for identical investments. Level 1 may include exchange traded instruments, such as domestic
 equities, some foreign equities, options, futures, mutual funds, exchange traded funds, rights and warrants.
- Level 2 Observable inputs other than Level 1 prices, such as quoted prices for similar investments; quoted prices in markets that are
 not active; or other inputs that are observable or can be corroborated by observable market data. Level 2 may include debt investments
 that are traded less frequently than exchange traded instruments and which are valued using independent pricing services; foreign
 equities, which are principally traded on certain foreign markets and are adjusted daily pursuant to a fair value pricing service in order
 to reflect an adjustment for the factors occurring after the close of certain foreign markets but before the NYSE Close; senior floating
 rate interests, which are valued using an aggregate of dealer bids; short-term investments, which are valued at amortized cost; and
 swaps, which are valued based upon the terms of each swap contract.
- Level 3 Significant unobservable inputs that are supported by limited or no market activity. Level 3 may include financial instruments
 whose values are determined using indicative market quotes or require significant management judgment or estimation. These
 unobservable valuation inputs may include estimates for current yields, maturity/duration, prepayment speed, and indicative market
 quotes for comparable investments along with other assumptions relating to credit quality, collateral value, complexity of the investment

Notes to Financial Statements – (continued) October 31, 2021

structure, general market conditions and liquidity. This category may include investments where trading has been halted or there are certain restrictions on trading. While these investments are priced using unobservable inputs, the valuation of these investments reflects the best available data and management believes the prices are a reasonable representation of exit price.

The Board of Directors has delegated the day-to-day responsibility for implementing the Valuation Procedures to the Valuation Committee. The Valuation Committee will consider all relevant factors in determining an investment's fair value, and may seek the advice of such Fund's sub-adviser(s), as applicable, knowledgeable brokers, and legal counsel in making such determination. The Valuation Committee reports to the Audit Committee of the Board of Directors.

Valuation levels are not necessarily indicative of the risk associated with investing in such investments. Individual investments within any of the above mentioned asset classes may be assigned a different hierarchical level than those presented above, as individual circumstances dictate.

For additional information, refer to the Fair Value Summary and the Level 3 roll-forward reconciliation, if applicable, which follows each Fund's Schedule of Investments.

c) Investment Transactions and Investment Income – Investment transactions are recorded as of the trade date (the date the order to buy or sell is executed) for financial reporting purposes. Investments purchased or sold on a when-issued or delayed-delivery basis may be settled a month or more after the trade date. Realized gains and losses are determined on the basis of identified cost.

Dividend income from domestic securities is accrued on the ex-dividend date. In general, dividend income from foreign securities is recorded on the ex-date; however, dividend notifications in certain foreign jurisdictions may not be available in a timely manner and as a result, a Fund will record the dividend as soon as the relevant details (i.e., rate per share, payment date, shareholders of record, etc.) are publicly available. Interest income, including amortization of premium, accretion of discounts and additional principal received in-kind in lieu of cash, is accrued on a daily basis.

Please refer to Note 8 for Securities Lending information.

- d) Taxes A Fund may be subject to taxes imposed on realized gains on securities of certain foreign countries in which such Fund invests. A Fund may also be subject to taxes withheld on foreign dividends from securities in which such Fund invests. The amount of any foreign taxes withheld and foreign tax expense is included on the accompanying Statements of Operations as a reduction to net investment income or net realized or unrealized gain (loss) on investments in these securities, if applicable.
- e) Foreign Currency Transactions Assets and liabilities denominated in currencies other than U.S. dollars are translated into U.S. dollars at the exchange rates in effect on the Valuation Date. Purchases and sales of investments, income and expenses are translated into U.S. dollars at the exchange rates on the dates of such transactions.

A Fund does not isolate that portion of portfolio investment valuation resulting from fluctuations in the foreign currency exchange rates from the fluctuations arising from changes in the market prices of investments held. Exchange rate fluctuations are included with the net realized and unrealized gain or loss on investments in the accompanying financial statements.

Net realized foreign exchange gains or losses arise from sales of foreign currencies and the difference between asset and liability amounts initially stated in foreign currencies and the U.S. dollar value of the amounts actually received or paid. Net unrealized foreign exchange gains or losses arise from changes in the value of other assets and liabilities at the end of the reporting period, resulting from changes in the exchange rates.

- f) Joint Trading Account A Fund may invest cash balances into a joint trading account that may be invested in one or more repurchase agreements.
- g) Fund Share Valuation and Dividend Distributions to Shareholders Orders for each class of each Fund's shares are executed in accordance with the investment instructions of the shareholders. The NAV of each class of each Fund's shares is determined as of the close of business on each business day of the Exchange (see Note 2(a)). The NAV is determined separately for each class of shares of a Fund by dividing the Fund's net assets attributable to that class by the number of shares of the class outstanding. Each class of shares offered by a Fund has equal rights as to assets and voting privileges (except that shareholders of a class have exclusive voting rights regarding any matter relating solely to that class of shares). Income and non-class specific expenses are allocated daily to each class on the basis of the relative net assets of the class of the Fund. Realized and unrealized gains and losses are allocated daily based on the relative net assets of each class of shares of each Fund.

Orders for the purchase of a Fund's shares received prior to the close of the Exchange on any day the Exchange is open for business are priced at the NAV determined as of the close of the Exchange. Orders received after the close of the Exchange, or on a day on which the Exchange and/or the Funds are not open for business, are priced at the next determined NAV.

Notes to Financial Statements – (continued) October 31, 2021

Dividends are declared pursuant to a policy adopted by the Company's Board of Directors. Dividends and/or distributions to shareholders are recorded on ex-date. The policy of each Fund is to pay dividends from net investment income, if any, annually and realized gains, if any, at least once a year.

Income dividends and capital gains distributions are determined in accordance with federal income tax regulations, which may differ from U.S. GAAP with respect to character and timing (see Federal Income Taxes: Distributions and Components of Distributable Earnings and Reclassification of Capital Accounts notes).

3. Securities and Other Investments:

- Restricted Securities Each Fund may invest in securities that are subject to legal or contractual restrictions on resale. These securities generally may be resold in transactions exempt from registration or to the public if the securities are registered. Disposal of these securities may involve time-consuming negotiations and expense, and prompt sale at an acceptable price may be difficult. Information regarding restricted securities, if applicable, is included at the end of each Fund's Schedule of Investments.
- b) Repurchase Agreements A repurchase agreement is an agreement between two parties whereby one party sells the other a security at a specified price with a commitment to repurchase the security later at an agreed-upon price, date and interest payment. Each Fund is permitted to enter into fully collateralized repurchase agreements. The Company's Board of Directors has delegated to the sub-adviser(s), as applicable, the responsibility of evaluating the creditworthiness of the banks and securities dealers with which the Funds will engage in repurchase agreements. The sub-adviser(s) will monitor such transactions to ensure that the value of underlying collateral will be at least equal to the total amount of the repurchase obligation as required by the valuation provision of the repurchase agreement, including the accrued interest. Repurchase agreements carry the risk that the market value of the securities declines below the repurchase price. A Fund could also lose money if it is unable to recover the securities and the value of any collateral held or assets segregated by the Fund to cover the transaction is less than the value of the securities. In the event the borrower commences bankruptcy proceedings, a court may characterize the transaction as a loan. If a Fund has not perfected a security interest in the underlying collateral, the Fund may be required to return the underlying collateral to the borrower's estate and be treated as an unsecured creditor. As an unsecured creditor, the Fund could lose some or all of the principal and interest involved in the transaction. See each Fund's Schedule of Investments, if applicable, for repurchase agreements as of October 31, 2021.

4. Financial Derivative Instruments:

The following disclosures contain information on how and why a Fund may use derivative instruments, the credit-risk-related contingent features in certain derivative instruments, and how derivative instruments affect a Fund's financial position and results of operations. The location and fair value amounts of these instruments on the Statements of Assets and Liabilities and the realized gains and losses and changes in unrealized gains and losses on the Statements of Operations, each categorized by type of derivative contract, are included in the following Additional Derivative Instrument Information footnote. The derivative instruments outstanding as of period-end are disclosed in the notes to the Schedules of Investments, if applicable. The amounts of realized gains and losses and changes in unrealized gains and losses on derivative instruments during the period are disclosed in the Statements of Operations.

- A Futures Contracts A Fund may enter into futures contracts. A futures contract is an agreement between two parties to buy or sell an asset at a set price on a future date. A Fund may use futures contracts to manage risk or obtain exposure to the investment markets, commodities, or movements in interest rates and currency values. The primary risks associated with the use of futures contracts are the imperfect correlation between the change in market value of the investments held by a Fund and the prices of futures contracts and the possibility of an illiquid market. Upon entering into a futures contract, a Fund is required to deposit with a futures commission merchant ("FCM") an amount of cash or U.S. Government or Agency Obligations in accordance with the initial margin requirements of the broker or exchange. Futures contracts are marked to market daily and an appropriate amount equal to the change in value ("variation margin") is paid or received by a Fund. Gains or losses are recognized but not considered realized until the contracts expire or are closed. Futures contracts involve, to varying degrees, risk of loss in excess of the variation margin disclosed on the Statements of Assets and Liabilities.
 - During the year ended October 31, 2021, each of Emerging Markets Equity Fund, International Equity Fund and International Value Fund had used Futures Contracts.
- b) Foreign Currency Contracts A Fund may enter into foreign currency contracts that obligate the Fund to purchase or sell currencies at specified future dates. Foreign currency contracts may be used in connection with settling purchases or sales of securities to hedge the currency exposure associated with some or all of a Fund's investments and/or as part of an investment strategy. Foreign currency contracts are marked to market daily and the change in value is recorded by a Fund as an unrealized gain or loss. A Fund will record a realized gain or loss when the foreign currency contract is settled.

Notes to Financial Statements – (continued) October 31, 2021

Foreign currency contracts involve elements of market risk in excess of the amounts reflected in the Statements of Assets and Liabilities. In addition, risks may arise upon entering into these contracts from the potential inability of the counterparties to meet the terms of the contracts and from unanticipated movements in the value of the foreign currencies relative to the U.S. dollar. Upon entering into a foreign currency contract, a Fund may be required to post margin equal to its outstanding exposure thereunder.

During the year ended October 31, 2021, the International Value Fund had used Foreign Currency Contracts.

c) Additional Derivative Instrument Information:

Emerging Markets Equity Fund

The Effect of Derivative Instruments on the Statement of Assets and Liabilities as of October 31, 2021:

| | Risk Exposure Category | | | | | | | | |
|---|-------------------------|----------------------------------|---|---------------------|------------------------|------------|--|--|--|
| | Interest Rate Contracts | Foreign Currency Contracts | Credit Contracts | Equity Contracts | Commodity Contracts | Total | | | |

| Foreign Currency Contracts Sold at Contract Amount | \$ 9,764,168 |

Notes to Financial Statements – (continued) October 31, 2021

Balance Sheet Offsetting Information - Set forth below are tables which disclose both gross information and net information about instruments and transactions eligible for offset in the financial statements, and instruments and transactions that are subject to a master netting arrangement, as well as amounts related to margin, reflected as financial collateral (including cash collateral), held at clearing brokers, counterparties and a Fund's custodian. The master netting arrangements allow the clearing brokers to net any collateral held in or on behalf of a Fund, or liabilities or payment obligations of the clearing brokers to a Fund, against any liabilities or payment obligations of a Fund to the clearing brokers. A Fund is required to deposit financial collateral (including cash collateral) at the Fund's custodian on behalf of clearing brokers and counterparties to continually meet the original and maintenance requirements established by the clearing brokers and counterparties. Such requirements are specific to the respective clearing broker or counterparty. Certain master netting arrangements may not be enforceable in a bankruptcy.

The following tables present a Fund's derivative assets and liabilities, presented on a gross basis as no amounts are netted within the Statements of Assets and Liabilities, by counterparty net of amounts available for offset under a master netting agreement or similar agreement ("MNA") and net of the related collateral received/pledged by a Fund as of October 31, 2021:

Principal Risks:

A Fund's investments expose it to various types of risks associated with financial instruments and the markets. A Fund may be exposed to the risks described below. Each Fund's prospectus provides details of its principal risks.

The market values of equity securities, such as common stocks and preferred stocks, or equity related derivative investments, such as futures and options, may decline due to general market conditions which are not specifically related to a particular company, such as real or perceived adverse economic conditions, changes in the general outlook for corporate earnings, changes in interest or currency rates or adverse investor sentiment generally. The market value of equity securities may also decline due to factors which affect a particular industry or industries, such as labor shortages or increased production costs and competitive conditions within an industry. Equity securities and equity related investments generally have greater market price volatility than fixed income securities. The extent of each Fund's exposure to market risk is the market value of the investments held as shown in the Fund's Schedule of Investments.

A widespread health crisis, such as a global pandemic, could cause substantial market volatility, exchange trading suspensions or restrictions and closures of securities exchanges and businesses, impact the ability to complete redemptions, and adversely impact Fund performance. The current ongoing outbreak of COVID-19, a respiratory disease caused by a novel coronavirus, has negatively affected the worldwide economy, created supply chain disruptions and labor shortages, and impacted the financial health of individual companies and the market in significant and unforeseen ways. The future impact of the ongoing COVID-19 pandemic remains unclear. The effects to public health, business and market conditions resulting from COVID-19 pandemic may have a significant negative impact on the performance of a Fund's investments, including exacerbating other pre-existing political, social and economic risks.

Notes to Financial Statements – (continued) October 31, 2021

Investing in the securities of non-U.S. issuers, whether directly or indirectly, involves certain considerations and risks not typically associated with securities of U.S. issuers. Such risks include, but are not limited to: generally less liquid and less efficient securities markets; generally greater price volatility; exchange rate fluctuations; imposition of restrictions on the expatriation of funds or other protectionist measures; less publicly available information about issuers; the imposition of withholding or other taxes; higher transaction and custody costs; settlement delays and risk of loss attendant in settlement procedures; difficulties in enforcing contractual obligations; less regulation of securities markets; different accounting, disclosure and reporting requirements; more substantial governmental involvement in the economy; higher inflation rates; and greater social, economic and political uncertainties. Non-U.S. issuers may also be affected by political, social, economic or diplomatic developments in a foreign country or region or the U.S. (including the imposition of sanctions, tariffs, or other governmental restrictions). These risks are heightened for investments in issuers from countries with less developed markets.

Securities lending involves the risk that a Fund may lose money because the borrower of the loaned securities fails to return the securities in a timely manner or at all. A Fund could also lose money in the event of a decline in the value of the collateral provided for the loaned securities or a decline in the value of any investments made with cash collateral. These events could also trigger adverse tax consequences for a Fund that lends its holdings.

6. Federal Income Taxes:

- a) Each Fund intends to continue to qualify as a Regulated Investment Company ("RIC") under Subchapter M of the Internal Revenue Code ("IRC") by distributing substantially all of its taxable net investment income and net realized capital gains to its shareholders each year. Each Fund has distributed substantially all of its income and capital gains in prior years, if applicable, and intends to distribute substantially all of its income and capital gains during the calendar year ending December 31, 2021. Accordingly, no provision for federal income or excise taxes has been made in the accompanying financial statements. Distributions from short-term capital gains are treated as ordinary income distributions for federal income tax purposes.
- b) Net Investment Income (Loss), Net Realized Gains (Losses) and Distributions Net investment income (loss) and net realized gains (losses) may differ for financial statement and tax purposes primarily because of losses deferred due to wash sale adjustments, foreign currency gains and losses, adjustments related to Passive Foreign Investment Companies ("PFICs"), Real Estate Investment Trusts ("REITs"), RICs, certain derivatives and partnerships. The character of distributions made during the year from net investment income or net realized gains may differ from their ultimate characterization for federal income tax purposes. Also, due to the timing of dividend distributions, the fiscal year in which amounts are distributed may differ from the year that the income or realized gains (losses) were recorded by each Fund.
- c) Distributions and Components of Distributable Earnings The tax character of distributions paid by each Fund for the years ended October 31, 2021 and October 31, 2020 are as follows:

| | Octobe | October 31, 2020 | | |
|----------------------------------|--------------------|---|--------------------|---|
| Fund | Ordinary Income | Long-Term Capital Gains ⁽¹⁾ | Ordinary Income | Long-Term Capital Gains ⁽¹⁾ |

⁽¹⁾ Differences between book-basis and tax basis unrealized appreciation (depreciation) may be attributable to the losses deferred due to wash sale adjustments, foreign currency gains and losses, adjustments related to PFICs, REITS, certain derivatives and partnerships.

d) Reclassification of Capital Accounts – The Funds may record reclassifications in their capital accounts. These reclassifications have no impact on the total net assets of the Funds. The reclassifications are a result of permanent differences between U.S. GAAP and tax accounting for such items as earnings and profits distributed to shareholders on the redemption of shares and non deductible expenses from partnership adjustments. Adjustments are made to reflect the impact these items have on the current and future earnings distributions to shareholders. Therefore, the source of the Funds' distributions may be shown in the accompanying Statements of Changes in Net Assets as from distributable earnings or from capital depending on the type of book and tax differences that exist. For the year ended October 31, 2021, the Funds recorded reclassifications to increase (decrease) the accounts listed below:

| | | Distributable |
|----------------------------------|-----------------|-----------------|
| <u>Fund</u> | Paid-in-Capital | Earnings (Loss) |
| International Equity Fund | \$ (695) | \$ 695 |
| International Opportunities Fund | 16,997,002 | (16,997,002) |

Dictributable

Long-Term

Short-Term

e) Capital Loss Carryforward – Under the Regulated Investment Company Modernization Act of 2010, funds are permitted to carry forward capital losses for an unlimited period.

At October 31, 2021 (tax year end), each Fund's capital loss carryforwards for U.S. federal income tax purposes were as follows:

| Fund | Capital Loss Carryforward with No Expiration | Capital Loss Carryforward with No Expiration |
|------------------------------|--|--|
| Emerging Markets Equity Fund | \$ 8,014,081 | \$ — |
| Global Impact Fund | 1,929,144 | 16,676,281 |
| International Equity Fund* | 3,428,999 | 2,545,531 |
| International Value Fund | 30,092,636 | 323,433,337 |

Future utilization of losses are subject to limitation under current tax laws.

The Climate Opportunities Fund, International Growth Fund and International Opportunities Fund have no capital loss carryforwards for U.S. federal income tax purposes as of October 31, 2021.

During the year ended October 31, 2021 Emerging Markets Equity Fund utilized \$44,956,375, Global Impact Fund utilized \$7,678,446, International Equity Fund utilized \$49,948,045, International Opportunities Fund utilized \$402,676,050, International Value Fund utilized \$75,974,363 of prior year capital loss carryforwards.

f) Tax Basis of Investments – The aggregate cost of investments for federal income tax purposes at October 31, 2021 is different from book purposes primarily due to wash sale loss deferrals, partnerships and passive foreign investment company (PFIC) mark-to-market adjustments. The net unrealized appreciation/depreciation on investments for tax purposes, which consists of gross unrealized appreciation and depreciation, was also different from book purposes primarily due to wash sale loss deferrals, and market to market adjustments on futures, PFICs, partnership adjustments and non-taxable distributions from underlying investments. Both the cost and unrealized

Notes to Financial Statements – (continued) October 31, 2021

appreciation and depreciation for federal income tax purposes are disclosed below:

| <u>Fund</u> | Tax Cost | Gross Unrealized Appreciation | Gross Unrealized (Depreciation) | Appreciation (Depreciation) |
|----------------------------------|----------------|----------------------------------|---------------------------------|-----------------------------|
| Climate Opportunities Fund | \$ 122,027,150 | \$ 31,968,319 | \$ (1,432,704) | \$ 30,535,615 |
| Emerging Markets Equity Fund | 429,459,837 | 89,788,069 | (21,396,394) | 68,391,675 |
| Global Impact Fund | 107,805,192 | 35,966,111 | (2,108,013) | 33,858,098 |
| International Equity Fund | 765,363,108 | 174,030,850 | (35,894,614) | 138,136,236 |
| International Growth Fund | 498,846,642 | 182,886,274 | (7,865,730) | 175,020,544 |
| International Opportunities Fund | 3,873,865,179 | 948,534,125 | (58,722,574) | 889,811,551 |
| International Value Fund | 2,008,465,230 | 264,063,479 | (109,178,311) | 154,885,168 |

g) Accounting for Uncertainty in Income Taxes – Pursuant to provisions set forth by U.S. GAAP, Hartford Funds Management Company, LLC ("HFMC") reviews each Fund's tax positions for all open tax years. As of October 31, 2021, HFMC had reviewed the open tax years and concluded that there was no reason to record a liability for net unrecognized tax obligations relating to uncertain income tax positions. Each Fund files U.S. tax returns. Although the statute of limitations for examining a Fund's U.S. tax returns remains open for 3 years, no examination is currently in progress. The Funds recognize interest and penalties, if any, related to unrecognized tax benefits as income tax expense on the Statements of Operations. During the year ended October 31, 2021, the Funds did not incur any interest or penalties. HFMC is not aware of any tax positions for which it is reasonably possible that the total amounts of unrecognized tax obligations will significantly change in the next twelve months.

7. Expenses:

a) Investment Management Agreement – HFMC serves as each Fund's investment manager. The Company, on behalf of each Fund, has entered into an Investment Management Agreement with HFMC. HFMC is an indirect subsidiary of The Hartford Financial Services Group, Inc. ("The Hartford"). HFMC has overall investment supervisory responsibility for each Fund. In addition, HFMC provides administrative personnel, services, equipment, facilities and office space for proper operation of each Fund. HFMC has contracted with Wellington Management Company LLP ("Wellington Management") under a sub-advisory agreement and Wellington Management performs the daily investment of the assets of each Fund (or allocated portion of the assets in the case of Climate Opportunities Fund) in accordance with the Fund's investment objective and policies. With respect to the Climate Opportunities Fund, HFMC has also entered into a sub-advisory agreement with Schroder Investment Management North America Inc. ("SIMNA") and SIMNA has contracted with Schroder Investment Management North America Limited ("SIMNA Ltd.") under a sub-sub-advisory agreement. SIMNA performs the daily investment of the assets for a portion of the Climate Opportunities Fund in accordance with Climate Opportunities Fund's investment objectives and policies and SIMNA may allocate assets to or from SIMNA Ltd., an affiliate of SIMNA, in connection with the daily investment of the assets for such portion of the Climate Opportunities Fund. HFMC pays a sub-advisory fee to one or more sub-advisers out of its investment management fee. With respect to Climate Opportunities Fund, SIMNA pays a sub-sub-advisory fee to SIMNA Ltd. out of the sub-advisory fees received from HFMC for the Fund.

The schedule below reflects the rates of compensation paid to HFMC for investment management services rendered as of October 31, 2021; the rates are accrued daily and paid monthly based on each Fund's average daily net assets, at the following annual rates:

| <u>Fund</u> | Management Fee Rates |
|------------------------------|---|
| Climate Opportunities Fund | 0.6200% on first \$500 million and; 0.6000% on next \$500 million and; 0.5800% on next \$1.5 billion and; 0.5750% on next \$2.5 billion and; 0.5700% over \$5 billion |
| Emerging Markets Equity Fund | 0.9000% on first \$500 million and; 0.8500% on next \$500 million and; 0.8000% over \$1 billion |
| Global Impact Fund | 0.6200% on first \$500 million and; 0.6000% on next \$500 million and; 0.5800% on next \$1.5 billion and; 0.5750% on next \$2.5 billion and; 0.5700% over \$5 billion |
| International Equity Fund | 0.4600% on first \$1 billion and; 0.4500% on next \$1 billion and; 0.4400% on next \$3 billion and; 0.4300% over \$5 billion |

Notes to Financial Statements – (continued) October 31, 2021

| <u>Fund</u> | Management Fee Rates |
|----------------------------------|--|
| International Growth Fund | 0.8000% on first \$250 million and; 0.7500% on next \$250 million and; 0.7000% on next \$500 million and; 0.6500% over \$1 billion |
| International Opportunities Fund | 0.7500% on first \$500 million and; 0.6500% on next \$500 million and; 0.6400% on next \$1.5 billion and; 0.6350% on next \$2.5 billion and; 0.6300% on next \$5 billion and; 0.6250% over \$10 billion |
| International Value Fund | 0.8500% on first \$500 million and; 0.8000% on next \$500 million and; 0.7500% on next \$4 billion and; 0.7475% on next \$5 billion and; 0.7450% over \$10 billion |

- b) Accounting Services Agreement HFMC provides the Funds with accounting services pursuant to a fund accounting agreement by and between the Company, on behalf of each Fund, and HFMC. HFMC has delegated certain accounting and administrative service functions to State Street Bank and Trust Company ("State Street"). In consideration of services rendered and expenses assumed pursuant to the fund accounting agreement, each Fund pays HFMC a fee. Effective May 1, 2021, the fund accounting fee schedule as set forth in the fund accounting agreement by and between the Company, on behalf of the Funds, and HFMC, was revised. Effective May 1, 2021, the fund accounting fee for each Fund is equal to the greater of: (A) the sum of (i) the sub-accounting fee payable by HFMC with respect to the Fund; (ii) the fee payable for tax preparation services for the Fund; and (iii) the amount of expenses that HFMC allocates for providing the fund accounting services to the Fund; plus a target profit margin; or (B) \$40,000 per year; provided, however, that to the extent the annual amount of the fund accounting fee exceeds 0.02% of the Fund's average net assets (calculated during its current fiscal year), HFMC shall waive such portion of the fund accounting fee. For the period November 1, 2020 through April 30, 2021, HFMC received the following fee with respect to each Fund: any sub-accounting fee payable by HFMC plus the amount of expenses that HFMC allocates for providing the fund accounting services.
- c) Operating Expenses Allocable expenses incurred by the Company are allocated to each series within the Company, and allocated to classes within each such series, in proportion to the average daily net assets of such series and classes, except where allocation of certain expenses is more fairly made directly to a Fund or to specific classes within a Fund. As of October 31, 2021, HFMC contractually agreed to limit the total annual fund operating expenses (exclusive of taxes, interest expenses, brokerage commissions, acquired fund fees and expenses, and extraordinary expenses) through February 28, 2022 (unless the Board of Directors approves its earlier termination) as follows for each of the following Funds:

| | Expense Limit as a Percentage of Average Daily Net Assets | | | | | | | | | |
|------------------------------|---|---------|---------|----------|----------|----------|----------|---------|---------|--|
| Fund | Class A | Class C | Class I | Class R3 | Class R4 | Class R5 | Class R6 | Class Y | Class F | |
| Climate Opportunities Fund | 1.19% | 1.94% | 0.89% | 1.41% | 1.11% | 0.81% | 0.69% | 0.79% | 0.69% | |
| Emerging Markets Equity Fund | 1.45% | 2.20% | 1.20% | 1.70% | 1.45% | 1.15% | 0.98% | 1.10% | 0.98% | |
| Global Impact Fund | 1.19% | 1.94% | 0.89% | 1.41% | 1.11% | 0.81% | 0.69% | 0.79% | 0.69% | |
| International Growth Fund | 1.30% | 2.05% | 1.00% | 1.57% | 1.27% | 1.00% | 0.85% | 0.95% | 0.85% | |

d) Fees Paid Indirectly – Certain Funds have entered into agreements with State Street Global Markets, LLC and Russell Implementation Services, Inc. to partially recapture non-discounted trade commissions. Such rebates are used to pay a portion of a Fund's expenses. For the year ended October 31, 2021, these amounts, if any, are included in the Statements of Operations.

The ratio of expenses to average net assets in the accompanying financial highlights excludes the reduction in expenses related to fees paid indirectly. The annualized expense ratio after waivers reflecting the reduction for fees paid indirectly for the period is as follows:

| Fund | Class A | Class C | Class I | Class R3 | Class R4 | Class R5 | Class R6 | Class Y | Class F |
|----------------------------------|---------|---------|---------|----------|----------|----------|----------|---------|---------|
| Climate Opportunities Fund | 1.17% | 1.93% | 0.88% | 1.08% | 0.99% | 0.81% | 0.69% | 0.79% | 0.69% |
| Emerging Markets Equity Fund | 1.44% | 2.20% | 1.12% | 1.70% | 1.43% | 1.13% | 0.98% | 1.10% | 0.98% |
| Global Impact Fund | 1.18% | 1.93% | 0.87% | 1.40% | 1.10% | 0.80% | 0.69% | 0.79% | 0.69% |
| International Equity Fund | 0.94% | 1.72% | 0.61% | 1.23% | 0.94% | 0.63% | 0.53% | 0.63% | 0.52% |
| International Growth Fund | 1.26% | 2.05% | 1.00% | 1.55% | 1.26% | 0.94% | 0.84% | 0.95% | 0.84% |
| International Opportunities Fund | 1.07% | 1.85% | 0.77% | 1.40% | 1.10% | 0.79% | 0.69% | 0.75% | 0.68% |
| International Value Fund | 1.23% | 1.97% | 0.95% | 1.56% | 1.26% | 0.94% | 0.84% | 0.90% | 0.84% |

Notes to Financial Statements – (continued) October 31, 2021

e) Sales Charges and Distribution and Service Plan for Class A, C, R3 and R4 Shares – Hartford Funds Distributors, LLC ("HFD"), an indirect subsidiary of The Hartford, is the principal underwriter and distributor of each Fund. For the year ended October 31, 2021, HFD received front-end sales charges and contingent deferred sales charges for each Fund as follows:

| Fund | Front-End Sales Charges | Sales Charges |
|----------------------------------|----------------------------|---------------|
| Climate Opportunities Fund | \$ 363,836 | \$ 15 |
| Emerging Markets Equity Fund | 59,618 | 124 |
| Global Impact Fund | 101,176 | 81 |
| International Equity Fund | 169,170 | 1,303 |
| International Growth Fund | 206,492 | 3,045 |
| International Opportunities Fund | 569,176 | 1,582 |
| International Value Fund | 138,755 | 20 |

The Board of Directors of the Company has approved the adoption of a separate distribution plan (each a "Plan") pursuant to Rule 12b-1 under the 1940 Act for each of Class A, C, R3 and R4 shares. Under a Plan, Class A, Class C, Class R3 and Class R4 shares of a Fund, as applicable, bear distribution and/or service fees paid to HFD, some or all of which may be paid to select broker-dealers. Pursuant to the Class A Plan, a Fund may pay HFD a fee of up to 0.25% of the average daily net assets attributable to Class A shares for distribution financing activities and shareholder account servicing activities. The entire amount of the fee may be used for shareholder servicing expenses and/or distribution expenses. Pursuant to the Class C Plan, a Fund may pay HFD a fee of up to 1.00% of the average daily net assets attributable to Class C shares for distribution financing activities, and up to 0.25% may be used for shareholder account servicing activities. The Class C Plan also provides that HFD will receive all contingent deferred sales charges attributable to Class C shares. Pursuant to the Class R3 Plan, a Fund may pay HFD a fee of up to 0.50% of the average daily net assets attributable to Class R3 shares for distribution financing activities, and up to 0.25% may be used for shareholder account servicing activities. Pursuant to the Class R4 Plan, a Fund may pay HFD a fee of up to 0.25% of the average daily net assets attributable to Class R4 shares for distribution financing activities. The entire amount of the fee may be used for shareholder account servicing activities. Each Fund's 12b-1 fees are accrued daily and paid monthly or at such other intervals as the Company's Board of Directors may determine. Any 12b-1 fees attributable to assets held in an account held directly with the Funds' transfer agent for which there is not a third-party listed as the broker-dealer of record (or HFD does not otherwise have a payment obligation) are generally reimbursed to the applicable Fund. Such amounts are reflected as "Distribution fee reimbursements" on the Statements of Operations.

f) Other Related Party Transactions – Certain officers of the Company are directors and/or officers of HFMC and/or The Hartford or its subsidiaries. For the year ended October 31, 2021, a portion of the Company's Chief Compliance Officer's ("CCO") compensation was paid by all of the investment companies in the Hartford fund complex. The portion allocated to each Fund, as represented in other expenses on the Statements of Operations, is outlined in the table below.

| Fund | CCO Compensation Paid by Fund |
|----------------------------------|-------------------------------|
| Climate Opportunities Fund | \$ 231 |
| Emerging Markets Equity Fund | 844 |
| Global Impact Fund | 206 |
| International Equity Fund | 1,607 |
| International Growth Fund | 1,178 |
| International Opportunities Fund | 7,890 |
| International Value Fund | 3.357 |

Hartford Administrative Services Company ("HASCO"), an indirect subsidiary of The Hartford, provides transfer agent services to each Fund. Each Fund pays HASCO a transfer agency fee payable monthly based on the lesser of (i) the costs of providing or overseeing transfer agency services provided to each share class of such Fund plus a target profit margin or (ii) a Specified Amount (as defined in the table below). Such fee is intended to compensate HASCO for: (i) fees payable by HASCO to DST Asset Manager Solutions, Inc. ("DST") (and any other designated sub-agent) according to the agreed-upon fee schedule under the sub-transfer agency agreement between HASCO and DST (or between HASCO and any other designated sub-agent, as applicable); (ii) sub-transfer agency fees payable by HASCO to financial intermediaries, according to the agreed-upon terms between HASCO and the financial intermediaries, provided that such payments are

Notes to Financial Statements – (continued) October 31, 2021

within certain limits approved by the Company's Board of Directors; (iii) certain expenses that HASCO's parent company, Hartford Funds Management Group, Inc., allocates to HASCO that relate to HASCO's transfer agency services provided to the Fund; and (iv) a target profit margin.

Specified Amount

| Share Class | (as a percentage average daily net assets) |
|-------------|--|
| Class A | 0.25% |
| Class C | 0.25% |
| Class I | 0.20% |
| Class R3 | 0.22% |
| Class R4 | 0.17% |
| Class R5 | 0.12% |
| Class R6 | 0.004% |
| Class Y | 0.11% |
| Class F | 0.004% |

Effective March 1, 2021, HASCO has contractually agreed to waive its transfer agency fee and/or reimburse transfer agency-related expenses to the extent necessary to limit the transfer agency fee for the share classes of the Funds listed below through February 28, 2022, unless the Board of Directors approves its earlier termination as follows:

| Fund | Class Y |
|----------------------------------|---------|
| International Opportunities Fund | 0.07% |
| International Value Fund | 0.06% |

From November 1, 2020 through February 28, 2021, HASCO contractually agreed to waive its transfer agency fee and/or reimburse transfer agency-related expenses to the extent necessary to limit the transfer agency fee for the share classes of the Funds listed below as follows:

| <u>Fund</u> | Class Y |
|----------------------------------|---------|
| International Opportunities Fund | 0.07% |
| International Value Fund | 0.06% |

Pursuant to a sub-transfer agency agreement between HASCO and DST, HASCO has delegated certain transfer agent, dividend disbursing agent and shareholder servicing agent functions to DST. Each Fund does not pay any fee directly to DST; rather, HASCO makes all such payments to DST. The accrued amount shown in the Statements of Operations reflects the amounts charged by HASCO. These fees are accrued daily and paid monthly.

For the year ended October 31, 2021, the effective rate of compensation paid to HASCO for transfer agency services as a percentage of each Class' average daily net assets is as follows:

| Fund | Class A | Class C | Class I | Class R3 | Class R4 | Class R5 | Class R6 | Class Y | Class F |
|----------------------------------|---------|---------|---------|----------|----------|----------|----------|---------|---------|
| Climate Opportunities Fund | 0.14% | 0.23% | 0.13% | 0.22% | 0.17% | 0.12% | 0.00%* | 0.11% | 0.00%* |
| Emerging Markets Equity Fund | 0.18% | 0.25% | 0.11% | 0.22% | 0.17% | 0.12% | 0.00%* | 0.11% | 0.00%* |
| Global Impact Fund | 0.23% | 0.25% | 0.11% | 0.21% | 0.15% | 0.12% | 0.00%* | 0.06% | 0.00%* |
| International Equity Fund | 0.17% | 0.20% | 0.09% | 0.22% | 0.17% | 0.11% | 0.00%* | 0.11% | 0.00%* |
| International Growth Fund | 0.17% | 0.25% | 0.20% | 0.22% | 0.17% | 0.11% | 0.00%* | 0.11% | 0.00%* |
| International Opportunities Fund | 0.14% | 0.16% | 0.09% | 0.22% | 0.16% | 0.10% | 0.00%* | 0.07% | 0.00%* |
| International Value Fund | 0.13% | 0.13% | 0.11% | 0.22% | 0.17% | 0.10% | 0.00%* | 0.06% | 0.00%* |

^{*} Amount rounds to 0.00%.

8. Securities Lending:

The Company has entered into a securities lending agency agreement ("lending agreement") with Citibank, N.A. ("Citibank"). A Fund may lend portfolio securities to certain borrowers in U.S. and non-U.S. markets in an amount not to exceed one-third (33 1/3%) of the value of its total assets. A Fund may lend portfolio securities, provided that the borrower provides collateral that is maintained in an amount at least equal to the current market value of the securities loaned. Cash collateral is invested for the benefit of a Fund by the Fund's lending agent pursuant to collateral investment guidelines. The collateral is marked to market daily, in an amount at least equal to the current market value of the securities loaned.

A Fund is subject to certain risks while its securities are on loan, including the following: (i) the risk that the borrower defaults on the loan and the collateral is inadequate to cover the Fund's loss; (ii) the risk that the earnings on the collateral invested are not sufficient to pay fees incurred in connection with the loan; (iii) the Fund could lose money in the event of a decline in the value of the collateral provided for loaned securities or a decline in the value of any investments made with cash collateral; (iv) the risk that the borrower may use the loaned securities to cover a short

Notes to Financial Statements – (continued) October 31, 2021

sale, which may in turn place downward pressure on the market prices of the loaned securities; (v) the risk that return of loaned securities could be delayed and interfere with portfolio management decisions; and (vi) the risk that any efforts to restrict or recall the securities for purposes of voting may not be effective. These events could also trigger adverse tax consequences for the Fund.

A Fund retains loan fees and the interest on cash collateral investments but is required to pay the borrower a rebate for the use of cash collateral. In cases where the lent security is of high value to borrowers, there may be a negative rebate (i.e., a net payment from the borrower to the applicable Fund). Upon termination of a loan, a Fund is required to return to the borrower an amount equal to the cash collateral, plus any rebate owed to the borrowers.

The net income earned on the securities lending (after payment of rebates and Citibank's fee) is included on the Statements of Operations as Investment Income from securities lending. A Fund also receives payments from the borrower during the period of the loan, equivalent to dividends and interest earned on the securities loaned, which are recorded as Investment Income from dividends or interest, respectively, on the Statements of Operations.

The following table presents for each Fund that lends its portfolio securities the market value of the securities on loan; the collateral posted by the borrower; and the net amount, if any, due from the borrower in the event of default as of October 31, 2021.

| Fund | Investment Securities on Loan, at market value, Presented on the Statements of Assets and Liabilities | Collateral Posted by Borrower ⁽¹⁾ | Net Amount ⁽²⁾ |
|----------------------------------|---|--|---------------------------|
| Climate Opportunities Fund | \$ 492,608 | \$ (492,608) | * — |
| Emerging Markets Equity Fund | 3,583,530 | $(3,583,530)^{(3)}$ | _ |
| Global Impact Fund | 537,135 | (537,135) | _ |
| International Equity Fund | 7,246,411 | $(7,246,411)^{(3)}$ | _ |
| International Growth Fund | _ | (3) | _ |
| International Opportunities Fund | 15,371,182 | (15,371,182) ⁽³⁾ | _ |
| International Value Fund | 3,789,943 | $(3,789,943)^{(3)}$ | _ |

It is each Fund's policy to obtain additional collateral from, or return excess collateral to, the borrower by the end of the next business day following the valuation date of the securities loaned. Therefore, the value of the collateral held may be temporarily less than that required under the lending contract due to timing. Pursuant to the lending agreement, the borrower will provide collateral in an amount at least equal to the current market value of securities loaned. Collateral received in excess or in deficit of the market value is not presented in this table.

(2) Net amount represents the net amount receivable due from the borrower in the event of default.

9. Secured Borrowings:

The following tables reflect a breakdown of transactions accounted for as secured borrowings, the gross obligation by the type of collateral pledged, and the remaining contractual maturity of those transactions as of October 31, 2021.

Certain Transfers Accounted For As Secured Borrowings

Remaining Contractual Maturity of the Agreements

| | Overnight and Continuous | < 30 days | Between 30 & 90 days | > 90 days | Total |
|--|------------------------------|----------------------------|----------------------------|----------------------------|--|
| Climate Opportunities Fund Securities Lending Transactions ⁽¹⁾ Common Stocks Total Borrowings | \$ 513,591 \$ 513,591 | <u>\$ —</u> \$ — | \$ <u>-</u> \$ - | <u>\$ —</u> \$ — | \$ 513,591 \$ 513,591 |
| Gross amount of recognized liabilities for securities lending transactions | · | <u>·</u> | <u> </u> | · | \$ 513,591 |

⁽¹⁾ Amount represents the payable for cash collateral received on securities on loan. This will generally be in the "Overnight and Continuous" column as the securities are typically callable on demand.

10. Affiliate Holdings:

As of October 31, 2021, affiliates of The Hartford had ownership of shares in each Fund as follows:

Percentage of a Class:

| Fund | Class A | Class C | Class I | Class R3 | Class R4 | Class R5 | Class R6 | Class Y | Class F |
|------------------------------|---------|---------|---------|----------|----------|----------|----------|---------|---------|
| Climate Opportunities Fund | _ | _ | _ | 80% | 58% | 100% | 64% | _ | 31% |
| Emerging Markets Equity Fund | _ | _ | _ | _ | _ | 19% | 9% | _ | _ |
| Percentage of Fund by Class: | | | | | | | | | |
| <u>Fund</u> | Class A | Class C | Class I | Class R3 | Class R4 | Class R5 | Class R6 | Class Y | Class F |
| Climate Opportunities Fund | | _ | | 0%* | 0%* | 0%* | 0%* | _ | 17% |
| Emerging Markets Equity Fund | _ | _ | _ | _ | _ | 0%* | 0%* | _ | _ |

Percentage rounds to zero.

As of October 31, 2021, affiliated funds of funds and the 529 plan for which HFMC serves as the program manager (the "529 plan") in the aggregate owned a portion of the Funds identified below. Therefore, these Funds may experience relatively large purchases or redemptions of their shares as a result of purchase and sale activity from these affiliated funds of funds and the 529 plan. Affiliated funds of funds and the 529 plan owned shares in the Funds listed below as follows:

| Fund | Percentage of Fund |
|----------------------------------|-----------------------|
| International Growth Fund | 6% |
| International Opportunities Fund | 5% |

^{*} As of October 31, 2021, affiliated funds of funds and the 529 plan were invested in Class F shares.

11. Investment Transactions:

For the year ended October 31, 2021, the cost of purchases and proceeds from sales of investment securities (excluding short-term investments) were as follows:

| Fund | Cost of Purchases Excluding U.S. Government Obligations | Sales Proceeds Excluding U.S. Government Obligations | Total Cost of Purchases | Total Sales Proceeds |
|----------------------------------|--|---|-------------------------|-------------------------|
| Climate Opportunities Fund | \$ 104,396,998 | \$ 38,933,874 | \$ 104,396,998 | \$ 38,933,874 |

Notes to Financial Statements – (continued) October 31, 2021

13. Fund Reorganization:

At a meeting held August 6-7, 2019, the Board of Directors of the Company approved an Agreement and Plan of Reorganization that provided for the reorganization of The Hartford International Small Company Fund (the "International Small Company Fund"), a series of the Company, with and into the Global Impact Fund, a separate series of the Company (the "Reorganization").

Pursuant to the terms of the Agreement and Plan of Reorganization, after the close of business on November 22, 2019, the International Small Company Fund transferred all of its assets to the Global Impact Fund, in exchange for shares of the Global Impact Fund and the assumption of all of the liabilities of the International Small Company Fund by the Global Impact Fund.

After the close of business on November 22, 2019, the consummation of the Reorganization was accomplished by a tax-free exchange of shares of the Global Impact Fund in the following amounts:

| Share Class | Net Assets of International Small Company Fund as of the close of business on November 22, 2019 ("Reorgnaization Date") | Shares of the International Small Company Fund as of the Reorganization Date | Value of Shares Issued by Global Impact Fund | Shares Issued by Global Impact Fund | Net Assets of the Global Impact Fund immediately after the Reorganization |
|-------------|---|---|---|--|--|
| Class A | \$ 40,870,135 | 3,497,018 | \$ 40,870,135 | 3,556,151 | \$ 41,662,028 |
| Class C | 2,726,961 | 265,134 | 2,726,961 | 241,538 | 2,765,829 |
| Class I | 5,256,190 | 453,959 | 5,256,190 | 458,167 | 19,495,626 |
| Class R3 | 6,439,177 | 545,236 | 6,439,177 | 569,209 | 6,743,012 |
| Class R4 | 3,142,747 | 264,884 | 3,142,747 | 274,255 | 3,170,337 |
| Class R5 | 574,188 | 48,210 | 574,188 | 50,594 | 690,320 |
| Class R6 | N/A | N/A | N/A | N/A | 986,093 |
| Class Y | 22,049,744 | 1,852,131 | 22,049,744 | 1,943,325 | 22,354,435 |
| Class F | 1,356,433 | 118,490 | 1,356,433 | 117,529 | 32,567,024 |
| | \$ 82,415,575 | 7,045,062 | \$ 82,415,575 | 7,210,768 | \$ 130,434,704 |
| | | | | | |

Each shareholder of a share class of International Small Company Fund received shares of the same share class of the Global Impact Fund with the same class designation and at the respective class NAV, as determined on the Reorganization Date.

Some of the investments held by International Small Company Fund may have been purchased or sold prior to the Reorganization for the purpose of complying with the anticipated investment policies or limitations of the Global Impact Fund after the Reorganization. The expenses associated with the Reorganization other than brokerage-related expenses, including stamp taxes and other similar transaction costs, were borne by HFMC or its affiliates.

As of the Reorganization Date, the International Small Company Fund had investments valued at \$82,029,834 with a cost basis of \$80,872,975. For financial reporting purposes, assets received, liabilities assumed and shares issued by the Global Impact Fund were recorded at fair value; however, the cost basis of the investments received by the Global Impact Fund from International Small Company Fund were carried forward to align ongoing reporting of the Global Impact Fund's realized and unrealized gains and losses with amounts distributable to shareholders for tax purposes.

The aggregate net assets of the Global Impact Fund immediately after the acquisition were \$130,434,704 which included \$1,156,859 of acquired unrealized appreciation.

Assuming the Reorganization had been completed on November 1, 2019, the Global Impact Fund's pro-forma results of operations for the year ended October 31, 2020 are as follows:

Net investment income\$ 578,299Net realized and unrealized gain (loss) on investments\$ 11,380,118Net increase (decrease) in net assets from operations\$ 11,958,417

14. Line of Credit:

Each Fund participates in a committed line of credit pursuant to a credit agreement dated March 4, 2021. Each Fund may borrow under the line of credit for temporary or emergency purposes. The Funds (together with certain other Hartford Funds) may borrow up to \$350 million in the aggregate, subject to asset coverage and other limitations specified in the credit agreement. The interest rate on borrowings varies depending on the nature of the loan. The facility also charges certain fees, such as an upfront fee and a commitment fee. From November 1, 2020 through March 4, 2021, the Funds (together with certain other Hartford Funds) had a similar agreement that enabled them to participate in a \$350 million

Notes to Financial Statements – (continued) October 31, 2021

committed line of credit. The fees incurred by the Funds in connection with the committed lines of credit during the period appear in the Statements of Operations under "Other expenses." During and as of the year ended October 31, 2021, none of the Funds had borrowings under this facility.

15. Indemnifications:

Under the Company's organizational documents, the Company shall indemnify its officers and directors to the full extent required or permitted under Maryland General Corporation Law and federal securities laws. In addition, the Company, on behalf of each Fund, may enter into contracts that contain a variety of indemnifications. The Company's maximum exposure under these arrangements is unknown. However, as of the date of these financial statements, the Company has not had prior claims or losses pursuant to these contracts and expects the risk of loss to be remote.

16. Recent Accounting Pronouncement:

In March 2020, FASB issued Accounting Standards Update ("ASU") No. 2020-04, Reference Rate Reform (Topic 848); Facilitation of the Effects of Reference Rate Reform on Financial Reporting, which provides optional guidance for a limited period of time to ease the potential burden in accounting for (or recognizing the effects of) reference rate reform. The guidance is applicable to contracts referencing LIBOR or another reference rate that is expected to be discontinued due to reference rate reform. The ASU is effective as of March 12, 2020 and generally can be applied through December 31, 2022. Management is evaluating the underlying securities referencing LIBOR or another reference rate that is expected to be discontinued over the period of time the ASU is effective.

17. Change in Independent Registered Public Accounting Firm:

On November 6, 2019, the Company, on behalf of the Funds, dismissed Ernst & Young LLP ("EY") as the Funds' independent registered public accounting firm effective upon the issuance of EY's report on the Funds' financial statements as of and for the fiscal year ended October 31, 2019. EY's report on the Funds' financial statements for the fiscal years October 31, 2018 and October 31, 2019 contained no adverse opinion or disclaimer of opinion nor was EY's report qualified or modified as to uncertainty, audit scope or accounting principles. During the Funds' fiscal periods ended on October 31, 2018 and October 31, 2019 and through December 30, 2019 (the "Covered Period"), (i) there were no disagreements with EY on any matter of accounting principles or practices, financial statement disclosure or auditing scope or procedure, which disagreements, if not resolved to the satisfaction of EY, would have caused it to make reference to the subject matter of the disagreements in connection with its reports on the Funds' financial statements for the Covered Period, and (ii) there were no "reportable events" of the kind described in Item 304(a)(1)(v) of Regulation S-K under the Securities Exchange Act of 1934, as amended.

On November 6, 2019, the Audit Committee of the Company's Board of Directors participated in and approved the decision to engage PricewaterhouseCoopers LLP ("PwC") as the independent registered public accounting firm for the Funds for the fiscal year ended October 31, 2020. The selection of PwC does not reflect any disagreements with or dissatisfaction by the Company or the Board of Directors with the performance of the Funds' prior independent registered public accounting firm, EY. During the Covered Period, neither the Funds, nor anyone on their behalf, consulted with PwC on items which: (i) concerned the application of accounting principles to a specified transaction, either completed or proposed, or the type of audit opinion that might be rendered on the Funds' financial statements; or (ii) concerned the subject of a disagreement (as defined in paragraph (a)(1)(iv) of Item 304 of Regulation S-K) or reportable events (as described in paragraph (a)(1)(v) of Item 304 of Regulation S-K).

18. Subsequent Events:

Management has evaluated all subsequent transactions and events through the date on which these financial statements were issued and has determined that no additional items require disclosure in these financial statements.

Report of Independent Registered Public Accounting Firm

To the Board of Directors of The Hartford Mutual Funds, Inc. and Shareholders of Hartford Climate Opportunities Fund, Hartford Emerging Markets Equity Fund, Hartford Global Impact Fund, Hartford International Equity Fund, The Hartford International Growth Fund, The Hartford International Opportunities Fund and The Hartford International Value Fund

Opinion on the Financial Statements

We have audited the accompanying statements of assets and liabilities, including the schedules of investments, of Hartford Climate Opportunities Fund, Hartford Emerging Markets Equity Fund, Hartford Global Impact Fund, Hartford International Equity Fund, The Hartford International Growth Fund, The Hartford International Opportunities Fund and The Hartford International Value Fund (seven of the funds constituting The Hartford Mutual Funds, Inc., hereafter collectively referred to as the "Funds") as of October 31, 2021, the related statements of operations for the year ended October 31, 2021, the statements of changes in net assets for each of the two years in the period ended October 31, 2021, including the related notes, and the financial highlights for each of the two years in the period ended October 31, 2021 (collectively referred to as the "financial statements"). In our opinion, the financial statements present fairly, in all material respects, the financial position of each of the Funds as of October 31, 2021, the results of each of their operations for the year then ended, the changes in each of their net assets for each of the two years in the period ended October 31, 2021 and each of the financial highlights for each of the two years in the period ended October 31, 2021 in conformity with accounting principles generally accepted in the United States of America.

The financial statements of the Funds as of and for the year ended October 31, 2019 and the financial highlights for each of the periods ended on or prior to October 31, 2019 (not presented herein, other than the financial highlights) were audited by other auditors whose report dated December 30, 2019 expressed an unqualified opinion on those financial statements and financial highlights.

Basis for Opinion

These financial statements are the responsibility of the Funds' management. Our responsibility is to express an opinion on the Funds' financial statements based on our audits. We are a public accounting firm registered with the Public Company Accounting Oversight Board (United States) (PCAOB) and are required to be independent with respect to the Funds in accordance with the U.S. federal securities laws and the applicable rules and regulations of the Securities and Exchange Commission and the PCAOB.

We conducted our audits of these financial statements in accordance with the standards of the PCAOB. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement, whether due to error or fraud

Our audits included performing procedures to assess the risks of material misstatement of the financial statements, whether due to error or fraud, and performing procedures that respond to those risks. Such procedures included examining, on a test basis, evidence regarding the amounts and disclosures in the financial statements. Our audits also included evaluating the accounting principles used and significant estimates made by management, as well as evaluating the overall presentation of the financial statements. Our procedures included confirmation of securities owned as of October 31, 2021 by correspondence with the custodian, transfer agent and brokers; when replies were not received from brokers, we performed other auditing procedures. We believe that our audits provide a reasonable basis for our opinions.

/s/ PricewaterhouseCoopers LLP Philadelphia, Pennsylvania December 28, 2021

We have served as the auditor of one or more investment companies in the Hartford Funds group of investment companies since 2020.

Operation of the Liquidity Risk Management Program (Unaudited)

This section describes the operation and effectiveness of the Liquidity Risk Management Program ("LRM Program") established in accordance with Rule 22e-4 under the Investment Company Act of 1940, as amended (the "Liquidity Rule"). The LRM Program seeks to assess and manage each Fund's liquidity risk. The Liquidity Rule generally defines liquidity risk as the risk that a Fund could not meet its obligation to redeem shares without significant dilution of the non-redeeming investors' interests in the Fund. The Board of Directors ("Board") of The Hartford Mutual Funds, Inc. has appointed Hartford Funds Management Company, LLC ("HFMC") to serve as the administrator of the LRM Program with respect to each of the Funds, subject to the oversight of the Board. In order to efficiently and effectively administer the LRM Program, HFMC established a Liquidity Risk Oversight Committee.

The LRM Program is comprised of various components designed to support the assessment and/or management of liquidity risk, including: (1) the assessment and periodic review (no less frequently than annually) of certain factors that influence each Fund's liquidity risk; (2) the classification and periodic review (no less frequently than monthly) of each Fund's investments into one of four liquidity categories that reflect an estimate of their liquidity under current market conditions; (3) a 15% limit on the acquisition of "illiquid investments" (as defined under the Liquidity Rule); (4) the determination of a minimum percentage of each Fund's assets that generally will be invested in highly liquid investments ("HLIM"); (5) the periodic review (no less frequently than annually) of the HLIM and the adoption and implementation of policies and procedures for responding to a shortfall of a Fund's highly liquid investments below its HLIM; and (6) periodic reporting to the Board.

At a meeting of the Board held May 11-13, 2021, HFMC provided an annual written report to the Board covering the period from April 1, 2020 through March 31, 2021. The annual report addressed important aspects of the LRM Program, including, but not limited to:

- the operation of the LRM Program (and related policies and procedures utilized in connection with management of the Funds' liquidity risk);
- an assessment of the adequacy and effectiveness of the LRM Program's (and related policies and procedures') implementation;
- the operation, and assessment of the adequacy and effectiveness, of each Fund's HLIM;
- whether the third-party liquidity vendor's ("LRM Program Vendor") processes for determining preliminary liquidity classifications, including
 the particular methodologies or factors used and metrics analyzed by the LRM Program Vendor, are sufficient under the Liquidity Rule and
 appropriate in light of each Fund's specific circumstances; and
- · any material changes to the LRM Program.

In addition, HFMC provides a quarterly report on the LRM Program at each quarterly meeting of the Board's Compliance and Risk Oversight Committee. The quarterly report included information regarding the Funds' liquidity as measured by established parameters, a summary of developments within the capital markets that may impact liquidity, and other factors that may impact liquidity. Among other things, HFMC reports any changes to a Fund's HLIM.

From April 1, 2020 through March 31, 2021, HFMC did not increase or reduce the HLIM for any Fund.

Based on its review and assessment, HFMC has concluded that the LRM Program is operating effectively to assess and manage the liquidity risk of each Fund and that the LRM Program has been and continues to be adequately and effectively implemented with respect to each Fund. Because liquidity in the capital markets in which the Funds invest is beyond the control of the Funds, there can be no assurance that the LRM Program will ensure liquidity under all circumstances and does not protect against the risk of loss.

Directors and Officers of the Company (Unaudited)

The Hartford Mutual Funds, Inc. (the "Company") is governed by a Board of Directors (the "Directors"). The following tables present certain information regarding the Directors and officers of the Company as of October 31, 2021. For more information regarding the Directors and officers, please refer to the Statement of Additional Information, which is available, without charge, upon request by calling 1-888-843-7824.

| NAME, YEAR OF BIRTH AND ADDRESS ⁽¹⁾ | POSITION HELD WITH THE COMPANY | TERM OF OFFICE ⁽²⁾ AND LENGTH OF TIME SERVED | PRINCIPAL OCCUPATION(S) DURING PAST 5 YEARS | NUMBER OF PORTFOLIOS IN FUND COMPLEX ⁽³⁾ OVERSEEN BY DIRECTOR | OTHER DIRECTORSHIPS FOR PUBLIC COMPANIES AND OTHER REGISTERED INVESTMENT COMPANIES BY DIRECTOR |

| THOMAS R. PHILLIPS (1960) | Vice President and Secretary | Since 2017 | Mr. Phillips is Deputy General Counsel for HFMG and currently serves as a Senior Vice President (since June 2021) and Assistant Secretary (since June 2017) for HFMG. Mr. Phillips also serves as Vice President of HFMC (since June 2021). Prior to joining HFMG in 2017, Mr. Phillips was a Director and Chief Legal Officer of Saturna Capital Corporation from 2014–2016. Prior to that, Mr. Phillips was a Partner and Deputy General Counsel of Lord, Abbett & Co. LLC. | N/A | N/A |

Directors and Officers of the Company (Unaudited) - (continued)

- (1) The address for each officer and Director is c/o Hartford Funds 690 Lee Road, Wayne, Pennsylvania 19087.
- (2) Term of Office: Each Director holds an indefinite term until his or her retirement, resignation, removal, or death. Directors generally must retire no later than December 31 of the year in which the Director turns 75 years of age. Each Fund officer generally serves until his or her resignation, removal, or death.
- (3) The portfolios of the "Fund Complex" are operational series of The Hartford Mutual Funds, Inc., The Hartford Mutual Funds II, Inc., Hartford Series Fund, Inc., Hartford HLS Series Fund II, Inc., Lattice Strategies Trust, and Hartford Funds Exchange-Traded Trust.
- (4) Effective as of December 31, 2021, Messrs. Birdsong and Senbet will retire as Directors.
- (5) Mr. Birdsong will retire effective December 31, 2021. Anticipating Mr. Birdsong's retirement, the Board has elected Christine R. Detrick to serve as Chair of the Board effective November 4, 2021. Accordingly, effective November 4, 2021, Mr. Birdsong will no longer serve as Chair of the Board. Effective November 5, 2021, Ms. Detrick also will serve as a Director of Capital One Financial Corporation.
- (6) "Interested person," as defined in the 1940 Act, of the Company because of the person's affiliation with, or equity ownership of, HFMC, HFD or affiliated companies.

HOW TO OBTAIN A COPY OF EACH FUND'S PROXY VOTING POLICIES AND VOTING RECORDS (UNAUDITED)

A description of the policies and procedures that each Fund uses to determine how to vote proxies relating to portfolio securities and information about how each Fund voted proxies relating to portfolio securities during the most recent twelve-month period ended June 30 are available (1) without charge, upon request, by calling 888-843-7824 and (2) on the SEC's website at http://www.sec.gov.

QUARTERLY PORTFOLIO HOLDINGS INFORMATION (UNAUDITED)

Each Fund files its complete schedule of portfolio holdings with the SEC for the first and third quarters of each fiscal year as an exhibit to its reports on Form N-PORT. Each Fund's portfolio holdings filed as an exhibit to Form N-PORT for the most recent first and third quarter of the Fund's fiscal year are available (1) without charge, upon request, by calling 888-843-7824, (2) on the Funds' website, hartfordfunds.com, and (3) on the SEC's website at http://www.sec.gov.

Approval of Investment Management and Investment Sub-Advisory Agreements (Unaudited)

The Hartford Mutual Funds, Inc.

Hartford Climate Opportunities Fund
Hartford Emerging Markets Equity Fund
Hartford Global Impact Fund
Hartford International Equity Fund
The Hartford International Growth Fund
The Hartford International Opportunities Fund
The Hartford International Value Fund

(each, a "Fund" and collectively, the "Funds")

Section 15(c) of the Investment Company Act of 1940, as amended (the "1940 Act"), requires that each mutual fund's board of directors, including a majority of those directors who are not "interested persons" of the mutual fund, as defined in the 1940 Act (the "Independent Directors"), annually review and consider the continuation of the mutual fund's investment advisory and sub-advisory agreements. At its meeting held on August 3-4, 2021, the Board of Directors (the "Board") of The Hartford Mutual Funds, Inc. ("HMF"), including each of the Independent Directors, unanimously voted to approve (i) the continuation of an investment management agreement by and between Hartford Funds Management Company, LLC ("HFMC") and each of HMF, on behalf of the Hartford Climate Opportunities Fund, Hartford Emerging Markets Equity Fund, Hartford International Equity Fund, The Hartford International Growth Fund, The Hartford International Opportunities Fund and The Hartford International Value Fund, and The Hartford Mutual Funds II, Inc. ("HMF II"), on behalf of its series (the "Management Agreement"); (ii) the continuation of an investment management agreement by and between HFMC and HMF, on behalf of the Hartford Global Impact Fund (the "Global Impact Management Agreement" and together with the Management Agreement, the "Management Agreements"); (iii) the continuation of an investment sub-advisory agreement (the "Schroders Sub-Advisory Agreement") by and between HFMC and Schroder Investment Management North America Inc. ("SIMNA Inc.") with respect to the Hartford Climate Opportunities Fund; (iv) the continuation of an investment sub-sub-advisory agreement (the "Sub-Sub-Advisory Agreement" and together with the Schroders Sub-Advisory Agreement, the "Schroders Agreements") by and between SIMNA Inc. and Schroder Investment Management North America Limited ("SIMNA Ltd.," and together with SIMNA Inc., "Schroders") with respect to the Hartford Climate Opportunities Fund (the "Sub-Sub-Advised Fund"); and (v) the continuation of an investment sub-advisory agreement (the "Sub-Advisory Agreement," and together with the Schroders Sub-Advisory Agreement, the "Sub-Advisory Agreements" and together with the Management Agreements and the Sub-Sub-Advisory Agreement, the "Agreements") between HFMC and Wellington Management Company LLP ("Wellington," and together with Schroders, the "Sub-advisers," and collectively with HFMC, the "Advisers"), with respect to each Fund.

In the months preceding the August 3-4, 2021 meeting, the Board requested and reviewed written responses from the Advisers to questions posed to the Advisers on behalf of the Independent Directors and supporting materials relating to those questions and responses. In addition, the Board considered such additional information as it deemed reasonably necessary to evaluate the Agreements, as applicable, with respect to each Fund, which included information furnished to the Board and its committees at their meetings throughout the year and in between regularly scheduled meetings on particular matters as the need arose, as well as information specifically prepared in connection with the approval of the continuation of the Agreements that was presented at the Board's meetings held on June 15-16, 2021 and August 3-4, 2021. Information provided to the Board and its committees at their meetings throughout the year included, among other things, reports on Fund performance, legal, compliance and risk management matters, sales and marketing activity, shareholder services, and the other services provided to each Fund by the Advisers and their affiliates. The members of the Board also considered the materials and presentations by Fund officers and representatives of HFMC received at the Board's meetings on June 15-16, 2021 and August 3-4, 2021 concerning the Agreements and at the special meeting of the Board's Investment Committee on May 18, 2021 concerning Fund performance and other investment-related matters.

The Independent Directors, advised by independent legal counsel throughout the evaluation process, engaged service providers to assist them with evaluating the Agreements with respect to each Fund, as applicable. Broadridge Financial Solutions, Inc. ("Broadridge"), an independent provider of investment company data, was retained to provide the Board with reports on how each Fund's contractual management fees, actual management fees, total expense ratios and investment performance compared to those of comparable mutual funds with similar investment objectives. The Independent Directors also engaged an independent financial services consultant (the "Consultant") to assist them in evaluating each Fund's contractual management fees, actual management fees, total expense ratios and investment performance. In addition, the Consultant reviewed the profitability methodologies utilized by HFMC in connection with the continuation of the Management Agreements.

In determining whether to approve the continuation of the Agreements for a Fund, the members of the Board reviewed and evaluated information and factors they believed to be relevant and appropriate through the exercise of their reasonable business judgment. While individual members of the Board may have weighed certain factors differently, the Board's determination to approve the continuation of the Agreements was based on a comprehensive consideration of all information provided to the Board throughout the year and specifically with respect to the continuation of the

Approval of Investment Management and Investment Sub-Advisory Agreements (Unaudited) - (continued)

Agreements. The Board was also furnished with an analysis of its fiduciary obligations in connection with its evaluation of the Agreements. Throughout the evaluation process, the Board was assisted by counsel for the Funds and the Independent Directors were also separately assisted by independent legal counsel. In connection with their deliberations, the Independent Directors met separately with independent legal counsel and the Consultant on June 11, 2021 and in executive session on several occasions to consider their responsibilities under relevant laws and regulations and to discuss the materials presented and other matters deemed relevant to their consideration of the approval of the continuation of the Agreements. As a result of the discussions that occurred during the June 11, 2021 and June 15-16, 2021 meetings, the Independent Directors presented HFMC with requests for additional information on certain topics. HFMC responded to these requests with additional information in connection with the August 3-4, 2021 meeting. A more detailed summary of the important, but not necessarily all, factors the Board considered with respect to its approval of the continuation of the Agreements is provided below.

Nature, Extent and Quality of Services Provided by the Advisers

The Board requested and considered information concerning the nature, extent and quality of the services provided to each Fund by the Advisers. The Board considered, among other things, the terms of the Agreements and the range of services provided by the Advisers. The Board considered the Advisers' professional personnel who provide services to the Funds, including each Adviser's ability and experience in attracting and retaining qualified personnel to service the Funds. The Board considered each Adviser's reputation and overall financial strength, as well as each Adviser's willingness to consider and implement organizational and operational changes designed to enhance services to the funds managed by HFMC and its affiliates (the "Hartford funds"). In addition, the Board considered the quality of each Adviser's communications with the Board and responsiveness to Board inquiries and requests made from time to time with respect to the Funds and other Hartford funds. In this regard, the Board took into account the Advisers' communications with the Board in light of the coronavirus ("COVID-19") pandemic.

The Board also requested and evaluated information concerning each Adviser's regulatory and compliance environment. In this regard, the Board requested and reviewed information about each Adviser's compliance policies and procedures and compliance history, and a report from the Funds' Chief Compliance Officer about each Adviser's compliance with applicable laws and regulations, including responses to regulatory developments and any compliance or other issues raised by regulators. The Board also noted the Advisers' support of the Funds' compliance control structure, as applicable, including the resources devoted by the Advisers in support of the Funds' obligations pursuant to Rule 38a-1 under the 1940 Act and the Funds' liquidity risk management program, as well as the efforts of the Advisers to combat cybersecurity risks. The Board also considered HFMC's investments in business continuity planning designed to benefit the Funds, and the implementation of HFMC's business continuity plans due to the COVID-19 pandemic. The Board also noted HFMC's commitment to maintaining high quality systems and expending substantial resources to prepare for and respond to ongoing changes to the market, regulatory and control environments in which the Funds and their service providers operate, including changes associated with the COVID-19 pandemic.

With respect to HFMC, the Board noted that, under the Management Agreements, HFMC is responsible for the management of the Funds, including oversight of fund operations and service providers, and the provision of administrative and investment advisory services in connection with selecting, monitoring and supervising the Sub-advisers. In this regard, the Board evaluated information about the nature and extent of responsibilities retained and risks assumed by HFMC that were not delegated to or assumed by the Sub-advisers. The Board considered HFMC's ongoing monitoring of people, process and performance, including its quarterly reviews of each of the Hartford funds, semi-annual meetings with the leaders of each Fund's portfolio management team, and oversight of the Hartford funds' portfolio managers. The Board noted that HFMC has demonstrated a record of initiating changes to the portfolio management and/or investment strategies of the Hartford funds when warranted. The Board considered HFMC's periodic due diligence reviews of each Sub-adviser and ongoing oversight of each Sub-adviser's investment approach and results, process for monitoring best execution of portfolio trades and other trading operations by each Sub-adviser, and approach to risk management with respect to the Funds and the service providers to the Funds. The Board considered HFMC's oversight of the securities lending program for the Funds that engage in securities lending and noted the income earned by the Funds that participate in such program. The Board also considered HFMC's day-to-day oversight of each Fund's compliance with its investment objective and policies as well as with applicable laws and regulations, noting that regulatory and other developments had over time led to an increase in the scope of HFMC's oversight in this regard. Moreover, the Board considered HFMC's oversight of potential conflicts of interest between the Funds' investments and those of other funds or accounts managed by the Funds' portfolio management personnel.

In addition, the Board considered HFMC's ongoing commitment to review and rationalize the Hartford funds product line-up. The Board also considered the expenses that HFMC had incurred, as well as the risks HFMC had assumed, in connection with the launch of new funds and changes to existing Hartford funds in recent years. The Board considered that HFMC is responsible for providing the Funds' officers.

Approval of Investment Management and Investment Sub-Advisory Agreements (Unaudited) – (continued)

With respect to the Sub-advisers, which provide certain day-to-day portfolio management services for the Funds and the Sub-Sub-Advised Fund, respectively, subject to oversight by HFMC, the Board considered, among other things, each Sub-Adviser's investment personnel, investment philosophy and process, investment research capabilities and resources, performance record, trade execution capabilities and experience, including with respect to sustainable investing and environmental, social and/or governance (ESG) criteria. The Board considered the experience of each Fund's portfolio manager(s), the number of accounts managed by the portfolio manager(s), and each Sub-Adviser's method for compensating the portfolio manager(s). The Board also considered each Sub-adviser's succession planning practices to ensure continuity of portfolio management services provided to the Funds.

The Board considered the benefits to shareholders of being part of the family of Hartford funds, including, with respect to certain share classes, the right to exchange investments between the same class of shares without a sales charge, the ability to reinvest Fund dividends into other Hartford funds (excluding the Hartford funds that are exchange-traded funds or an interval fund), and the ability to combine holdings in a Fund with holdings in other Hartford funds (excluding the Hartford funds that are exchange-traded funds or an interval fund) and 529 plans for which HFMC serves as the program manager to obtain a reduced sales charge. The Board considered HFMC's efforts to provide investors in the Hartford funds with a broad range of investment styles and asset classes and the assumption of entrepreneurial and other risks by HFMC in sponsoring and providing ongoing services to new funds to expand these opportunities for shareholders. In addition, the Board observed that in the marketplace there are a range of investment options available to each Fund's shareholders and such shareholders, having had the opportunity to consider other investment options, have chosen to invest in the Fund.

Based on these considerations, the Board concluded that it was satisfied with the nature, extent and quality of the services provided to each Fund by HFMC and, as applicable, the Sub-advisers.

Performance of each Fund and the Advisers

The Board considered the investment performance of each Fund. In this regard, the Board reviewed the performance of each Fund over different time periods presented in the materials and evaluated HFMC's analysis of the Fund's performance for these time periods. The Board considered information and materials provided to the Board by the Advisers concerning Fund performance, as well as information from Broadridge comparing the investment performance of each Fund to an appropriate universe of peer funds. The Board noted that while it found the comparative data provided by Broadridge generally useful in evaluating a Hartford fund's investment performance, the Board recognized the limitations of such data, including that notable differences may exist between a Hartford fund and its peers. The Board also noted that, for the Hartford Climate Opportunities Fund and the Hartford Global Impact Fund, there existed no peer group with a strong correlation to the Fund's investment strategy. For each of these Funds, the Board considered that HFMC continues to monitor the competitive landscape and ways to enhance performance assessments. For details regarding each Fund's performance, see the Fund-by-Fund synopsis below.

The Board considered the detailed investment analytics reports provided by HFMC's Investment Advisory Group throughout the year, including in connection with the approval of the continuation of the Agreements. These reports included, among other things, information on each Fund's gross returns and net returns, the Fund's investment performance compared to one or more appropriate benchmarks and relevant groups or categories of peer funds, various statistics concerning the Fund's portfolio, a narrative summary of various factors affecting Fund performance, and commentary on the effect of market conditions. The Board also noted that, for the Hartford International Equity Fund, the Fund utilizes a multiple sleeve structure whereby each sleeve uses a different investment style and considered the performance attributions of the underlying managers. With respect to The Hartford International Growth Fund, the Board considered that effective September 1, 2020, the Fund no longer operated in a multiple sleeve structure. With respect to the Hartford Climate Opportunities Fund, the Board noted that each of Wellington and Schroders are responsible for the day-to-day portfolio management services for the allocated sleeve of the Fund and considered the performance attributions of each sleeve. The Board considered the Advisers' work with the Investment Committee, which assists the Board in evaluating the performance of each Fund at periodic meetings throughout the year and specifically with respect to the approval of the continuation of the Agreements. The Board considered that the Investment Committee, in its evaluation of investment performance at meetings throughout the year, focused particular attention on information indicating less favorable performance of certain Hartford funds for specific time periods and discussed with the Advisers the reasons for such performance as well as any specific actions that the Advisers had taken, or had agreed to take, to seek to enhance Fund investment performance and the results of those

Based on these considerations, the Board concluded that it had continued confidence in HFMC's and each Sub-adviser's overall capabilities to manage the Funds, as applicable.

Approval of Investment Management and Investment Sub-Advisory Agreements (Unaudited) - (continued)

Costs of the Services and Profitability of the Advisers

The Board reviewed information regarding HFMC's cost to provide investment management and related services to each Fund and HFMC's profitability, both overall and for each Fund, on a pre-tax basis without regard to distribution expenses. The Board also requested and reviewed information about the profitability to HFMC and its affiliates from all services provided to each Fund and all aspects of their relationship with the Fund, including information regarding profitability trends over time and information provided by Broadridge analyzing the profitability of managers to other fund complexes. The Board also requested and received information relating to the operations and profitability of the Sub-advisers. The Board considered representations from HFMC and each Sub-adviser that the Sub-adviser's fees were negotiated at arm's length on a Fund-by-Fund basis and that the sub-advisory fees are paid by HFMC and not the Funds. The Board also considered that SIMNA Ltd. is an affiliate of SIMNA Inc. and that SIMNA Ltd.'s sub-advisory fees would be paid by SIMNA Inc., not the Sub-Sub-Advised Fund. Accordingly, the Board concluded that the profitability of the Sub-advisers is a less relevant factor with respect to the Board's consideration of the Sub-Advisory Agreements and the Sub-Sub-Advisory Agreement.

The Board considered the Consultant's review of the methodologies and estimates used by HFMC in calculating profitability in connection with the continuation of the Management Agreements, including a description of the methodology used to allocate certain expenses. The Board noted the Consultant's view that HFMC's process for calculating and reporting Fund profitability is reasonable and consistent with the process previously reviewed by the Consultant. The Board noted that the Consultant had previously performed a full review of this process and reported that such process is reasonable, sound and consistent with common industry practice.

Based on these considerations, the Board concluded that the profits realized by the Advisers and their affiliates from their relationships with each Fund were not excessive.

Comparison of Fees and Services Provided by the Advisers

The Board considered comparative information with respect to the services rendered to and the management fees to be paid by each Fund to HFMC and the total expense ratios of the Fund. The Board also considered comparative information with respect to the sub-advisory fees to be paid by HFMC to the Sub-advisers with respect to each Fund. In this regard, the Board requested and reviewed information from HFMC and the Sub-advisers relating to the management and sub-advisory fees, including the sub-advisory fee schedule(s) for each Fund and the amount of the management fee retained by HFMC, and total operating expenses for each Fund. The Board also reviewed information from Broadridge comparing each Fund's contractual management fees, actual management fees and total expense ratios relative to an appropriate group of funds selected by Broadridge. The Board considered such information from Broadridge in consultation with the Consultant. For details regarding each Fund's expenses, see the Fund-by-Fund synopsis below.

The Board considered the methodology used by Broadridge to select the funds included in the expense groups. While the Board recognized that comparisons between a Fund and its peer funds may be imprecise given, among other differences, the different service levels and characteristics of mutual funds and the different business models and cost structures of the Advisers, the comparative information provided by Broadridge assisted the Board in evaluating the reasonableness of each Fund's fees and total operating expenses. In addition, the Board considered the analysis and views of the Consultant relating to each Fund's fees and total operating expenses and expense groups.

The Board also received information regarding fees charged by the Sub-advisers to any other clients with investment strategies similar to those of the Funds, including institutional separate account clients and registered fund clients for which a Sub-adviser serves as either primary investment adviser or sub-adviser. The Board considered the explanations provided by the Sub-advisers about any differences between a Sub-adviser's services to the Funds and the services a Sub-adviser provides to other types of clients. In this regard, the Board reviewed information about the generally broader scope of services and compliance, reporting and other legal burdens and risks of managing registered funds compared with those associated with managing assets of non-registered fund clients such as institutional separate accounts.

Based on these considerations, the Board concluded that each Fund's fees and total operating expenses, in conjunction with the information about quality of services, profitability, economies of scale, and other matters considered, were reasonable in light of the services provided.

Economies of Scale

The Board considered information regarding economies of scale, including the extent to which economies of scale may be realized as a Fund grows and whether fee levels reflect these economies of scale for the benefit of shareholders of the Fund. The Board reviewed the breakpoints in the management fee schedule for each Fund, if any, which reduce fee rates as the Fund's assets grow over time. The Board recognized that a Fund with

Approval of Investment Management and Investment Sub-Advisory Agreements (Unaudited) – (continued)

assets beyond the highest breakpoint level will continue to benefit from economies of scale because additional assets are charged the lowest breakpoint fee resulting in lower effective management fee rates. The Board also recognized that a fee schedule that reaches a breakpoint at a lower asset level provides shareholders with the benefit of anticipated or potential economies of scale. The Board considered that expense limitations and fee waivers that reduce a Fund's expenses at all asset levels can have the same effect as breakpoints in sharing economies of scale with shareholders and provide protection from an increase in expenses if the Fund's assets decline. In addition, the Board considered that initially setting competitive fee rates, pricing a Fund to scale at inception and making additional investments intended to enhance services available to shareholders are other means of sharing anticipated or potential economies of scale with shareholders. The Board also considered that HFMC has been active in managing expenses, which has resulted in benefits being realized by shareholders. The Board also noted that, for each of the Hartford Climate Opportunities Fund and Hartford Global Impact Fund, the Fund's current low asset levels have kept the Fund from fully realizing the benefits of anticipated or potential economies of scale.

The Board reviewed and evaluated materials from Broadridge and the Consultant showing how management fee schedules of peer funds reflect economies of scale for the benefit of shareholders as a peer fund's assets hypothetically increase over time. Based on information provided by HFMC, Broadridge, and the Consultant, the Board recognized that there is no uniform methodology for establishing breakpoints or uniform pattern in asset levels that trigger breakpoints or the amounts of breakpoints triggered.

After considering all of the information available to it, the Board concluded that it was satisfied with the extent to which economies of scale would be shared for the benefit of each Fund's shareholders based on currently available information and the effective management fees and total expense ratios for the Fund at its current and reasonably anticipated asset levels. The Board noted, however, that it would continue to monitor any future growth in each Fund's assets and the appropriateness of additional management fee breakpoints or other methods to share benefits from economies of scale as part of its future review of the Agreements.

Other Benefits

The Board considered other benefits to the Advisers and their affiliates from their relationships with the Funds.

The Board noted that HFMC receives fees for fund accounting and related services from the Funds, and the Board considered information on the profitability to HFMC from providing such services to the Funds. The Board also considered that each Fund pays a transfer agency fee to Hartford Administrative Services Company ("HASCO"), an affiliate of HFMC, equal to the lesser of: (i) the actual costs incurred by HASCO in connection with the provisions of transfer agency services, including payments made to sub-transfer agents, plus a reasonable target profit margin; or (ii) a specified amount as set forth in the Transfer Agency and Service Agreement by and between HMF, on behalf of its Funds, HMF II, on behalf of its series, and HASCO. The Board reviewed information about the profitability to HASCO of the Funds' transfer agency function. The Board considered information provided by HFMC indicating that the transfer agency fees charged by HASCO to the Funds were fair and reasonable based on available industry data about fees charged by transfer agents to other mutual funds. The Board also noted that HFMC and HASCO had delegated certain fund accounting services and transfer agency services, respectively, to external service providers.

The Board also considered that Hartford Funds Distributors, LLC ("HFD"), an affiliate of HFMC, serves as principal underwriter of the Funds. The Board noted that, as principal underwriter, HFD receives distribution and service fees from the Funds and receives all or a portion of the sales charges on sales or redemptions of certain classes of shares. The Board considered that HFD has entered into an agreement with SIMNA Inc. and SEI Trust Company to provide certain marketing support services in connection with four collective investment trust vehicles for which Schroders serve as investment adviser.

The Board considered the benefits, if any, to the Sub-advisers from any use of a Fund's brokerage commissions to obtain soft dollar research. The Board also considered that SIMNA Inc. has entered into a solicitation agreement with HFMC pursuant to which HFMC provides certain marketing support services with respect to investment strategy models offered by SIMNA Inc. through its managed account platforms.

Fund-by-Fund Factors

For purposes of the Fund-by-Fund discussion below, Fund performance is referred to as "in line with" a Fund's benchmark where it was 0.5% above or below the benchmark return, and each Fund's performance relative to its primary benchmark reflects the net performance of the Fund's Class I shares as of March 31, 2021.

Approval of Investment Management and Investment Sub-Advisory Agreements (Unaudited) – (continued)

Hartford Climate Opportunities Fund

- The Board noted that the Fund's performance was in the 1st quintile of its performance universe for the 1-, 3-, and 5-year periods. The Board also noted that the Fund's performance was above its benchmark for the 1-, 3-, and 5-year periods. The Board noted recent changes to the Fund's portfolio management team.
- The Board noted that the Fund's contractual management fee, actual management fee, and total expenses (less 12b-1 and shareholder service fees) were in the 1st quintile of its expense group. The Board noted that Class A shares of the Fund have a contractual expense cap of 1.19% through February 28, 2022, which resulted in HFMC reimbursing the Fund for certain expenses.

Hartford Emerging Markets Equity Fund

- The Board noted that the Fund's performance was in the 4th quintile of its performance universe for the 1- and 3-year periods and the 3rd quintile for the 5-year period. The Board also noted that the Fund's performance was in line with its benchmark for the 1- and 5-year periods and below its benchmark for the 3-year period.
- The Board noted that the Fund's contractual management fee was in the 2nd quintile of its expense group, while its actual management fee was in the 4th quintile and its total expenses (less 12b-1 and shareholder service fees) were in the 3rd quintile. The Board noted that Class A shares of the Fund have a contractual expense cap of 1.45% through February 28, 2022, which resulted in HFMC reimbursing the Fund for certain expenses.

Hartford Global Impact Fund

- The Board noted that the Fund's performance was in the 4th quintile of its performance universe for the 1-year period and the 3rd quintile for the 3-year period. The Board also noted that the Fund's performance was above its benchmark for the 1- and 3-year periods.
- The Board noted that the Fund's contractual management fee and actual management fee were in the 1st quintile of its expense group, while its total expenses (less 12b-1 and shareholder service fees) were in the 2nd quintile. The Board noted that Class A shares of the Fund have a contractual expense cap of 1.19% through February 28, 2022, which resulted in HFMC reimbursing the Fund for certain expenses.

Hartford International Equity Fund

- The Board noted that the Fund's performance was in the 3rd quintile of its performance universe for the 1-year period, the 5th quintile for the 3-year period, and the 4th quintile for the 5-year period. The Board also noted that the Fund's performance was above its benchmark for the 1-year period, below its benchmark for the 3-year period, and in line with its benchmark for the 5-year period.
- The Board noted that the Fund's contractual management fee, actual management fee, and total expenses (less 12b-1 and shareholder service fees) were in the 1st quintile of its expense group.

The Hartford International Growth Fund

- The Board noted that the Fund's performance was in the 2nd quintile of its performance universe for the 1-, 3-, and 5-year periods. The Board also noted that the Fund's performance was above its benchmark for the 1-, 3-, and 5-year periods. The Board noted recent changes to the Fund's portfolio management team. The Board also noted that certain changes had recently been made to the Fund's principal investment strategy.
- The Board noted that the Fund's contractual management fee was in the 2nd quintile of its expense group, while its actual management fee was in the 3rd quintile and its total expenses (less 12b-1 and shareholder service fees) were in the 4th quintile. The Board noted that Class A shares of the Fund have a contractual expense cap of 1.30% through February 28, 2022, which resulted in HFMC reimbursing the Fund for certain expenses.

The Hartford International Opportunities Fund

- The Board noted that the Fund's performance was in the 2nd quintile of its performance universe for the 1-year period and the 4th quintile for the 3- and 5-year periods. The Board also noted that the Fund's performance was above its benchmark for the 1- and 3-year periods and in line with its benchmark for the 5-year period.
- The Board noted that the Fund's contractual management fee, its actual management fee, and its total expenses (less 12b-1 and shareholder service fees) were in the 1st quintile of its expense group. The Board noted that Class Y shares of the Fund have a contractual transfer agency expense cap of 0.07% through February 28, 2022, which resulted in HFMC reimbursing the Fund for certain expenses.

Approval of Investment Management and Investment Sub-Advisory Agreements (Unaudited) – (continued)

The Hartford International Value Fund

- The Board noted that the Fund's performance was in the 1st quintile of its performance universe for the 1-year period, the 5th quintile for the 3-year period, and the 2nd quintile for the 5-year period. The Board also noted that the Fund's performance was above its benchmark for the 1- and 5-year periods and below its benchmark for the 3-year period.
- The Board noted that the Fund's contractual management fee and its total expenses (less 12b-1 and shareholder service fees) were in the 3rd quintile of its expense group, while its actual management fee was in the 5th quintile. The Board noted that Class Y shares of the Fund have a contractual transfer agency expense cap of 0.06% through February 28, 2022, which resulted in HFMC reimbursing the Fund for certain expenses.

* * * *

Based upon the review of the factors summarized above, among others, the Board concluded that it is in the best interests of each Fund and its shareholders for the Board to approve the continuation of the Agreements for an additional year. In reaching this decision, the Board did not assign relative weights to the factors discussed above or deem any one or group of them to be controlling in and of themselves.

CUSTOMER PRIVACY NOTICE

The Hartford Financial Services Group, Inc. and Affiliates*

(herein called "we, our, and us")

This Privacy Policy applies to our United States Operations

We value your trust. We are committed to the responsible:

- a) management;
- b) use: and
- c) protection;
- of Personal Information.

This notice describes how we collect, disclose, and protect **Personal Information.**

We collect **Personal Information** to:

- a) service your Transactions with us; and
- b) support our business functions.

We may obtain **Personal Information** from:

- a) You;
- b) your Transactions with us; and
- c) third parties such as a consumer-reporting agency.

Based on the type of product or service **You** apply for or get from us, **Personal Information** such as:

- a) your name;
- b) your address;
- c) your income;
- d) your payment; or
- e) your credit history;

may be gathered from sources such as applications, **Transactions**, and consumer reports.

To serve **You** and service our business, we may share certain **Personal Information**. We will share **Personal Information**, only as allowed by law, with affiliates such as:

- a) our insurance companies;
- b) our employee agents;
- c) our brokerage firms; and
- d) our administrators.

As allowed by law, we may share **Personal Financial Information** with our affiliates to:

- a) market our products; or
- b) market our services;
- to **You** without providing **You** with an option to prevent these disclosures.

We may also share **Personal Information**, only as allowed by law, with unaffiliated third parties including:

- a) independent agents;
- b) brokerage firms;
- c) insurance companies;
- d) administrators; and
- e) service providers;

who help us serve You and service our business.

When allowed by law, we may share certain **Personal Financial Information** with other unaffiliated third parties who assist us by performing services or functions such as:

- a) taking surveys;
- b) marketing our products or services; or
- c) offering financial products or services under a joint agreement between us and one or more financial institutions.

We, and third parties we partner with, may track some of the pages **You** visit through the use of:

- a) cookies;
- b) pixel tagging; or
- c) other technologies;

and currently do not process or comply with any web browser's "do not track" signal or other similar mechanism that indicates a request to disable online tracking of individual users who visit our websites or use our services.

For more information, our Online Privacy Policy, which governs information we collect on our website and our affiliate websites, is available at https://www.thehartford.com/online-privacy-policy.

We will not sell or share your **Personal Financial Information** with anyone for purposes unrelated to our business functions without offering **You** the opportunity to:

- a) "opt-out;" or
- b) "opt-in;"
- as required by law.

We only disclose **Personal Health Information** with:

- a) your authorization; or
- b) as otherwise allowed or required by law.

Our employees have access to **Personal Information** in the course of doing their jobs, such as:

- a) underwriting policies;
- b) paying claims;
- c) developing new products; or
- d) advising customers of our products and services.

We use manual and electronic security procedures to maintain:

- a) the confidentiality; and
- b) the integrity of:

Personal Information that we have. We use these procedures to guard against unauthorized access.

Some techniques we use to protect **Personal Information** include:

- a) secured files;
- b) user authentication;
- c) encryption;
- d) firewall technology; and
- e) the use of detection software.

We are responsible for and must:

- a) identify information to be protected;
- b) provide an adequate level of protection for that data; and
- c) grant access to protected data only to those people who must use it in the performance of their job-related duties.

Employees who violate our privacy policies and procedures may be subject to discipline, which may include termination of their employment with us.

We will continue to follow our Privacy Policy regarding **Personal Information** even when a business relationship no longer exists between us.

As used in this Privacy Notice:

Application means your request for our product or service.

Personal Financial Information means financial information such as:

- a) credit history;
- b) income;
- c) financial benefits; or
- d) policy or claim information.

Personal Financial Information may include Social Security Numbers, Driver's license numbers, or other government-issued identification numbers, or credit, debit card, or bank account numbers.

Personal Health Information means health information such as:

- a) your medical records; or
- b) information about your illness, disability or injury.

Personal Information means information that identifies **You** personally and is not otherwise available to the public. It includes:

- a) Personal Financial Information; and
- b) Personal Health Information.

Transaction means your business dealings with us, such as:

- a) your Application;
- b) your request for us to pay a claim; and
- c) your request for us to take an action on your account.

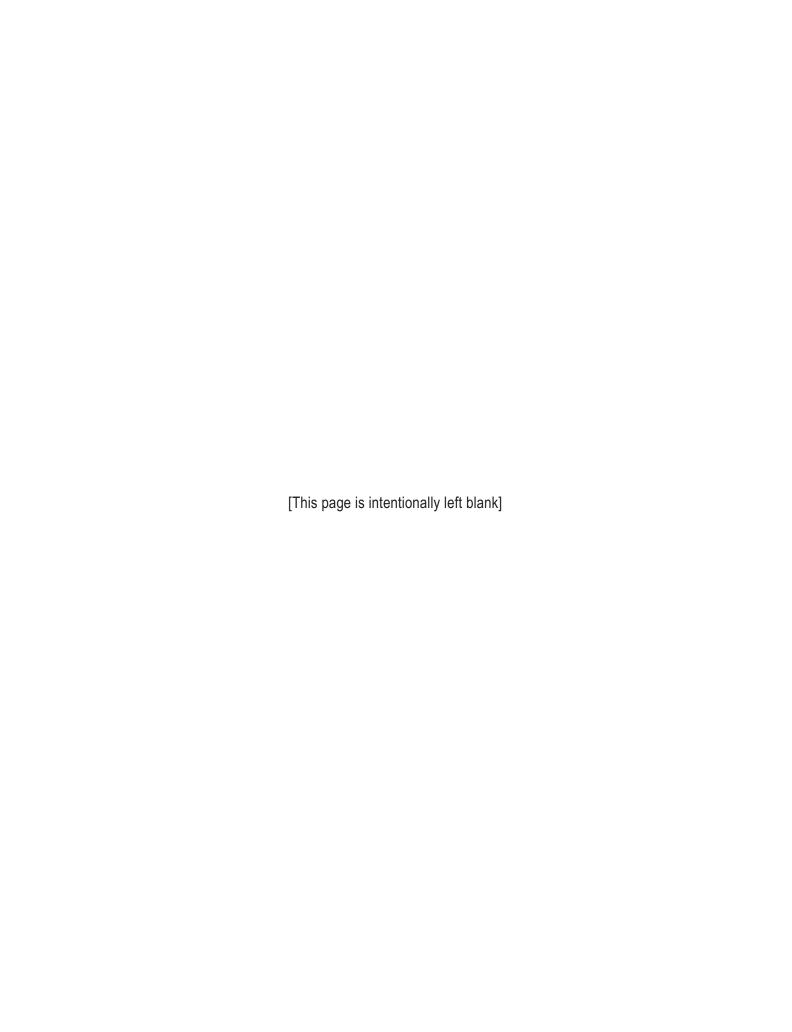

You means an individual who has given us **Personal Information** in conjunction with:

- a) asking about;
- b) applying for; or
- c) obtaining;
- a financial product or service from us if the product or service is used mainly for personal, family, or household purposes.
