Enhancements Made to Proprietary Quantitative Model during the 12-Month Period Ended October 31, 2021

We continuously look for ways to improve our investment process. Accordingly, we introduced a number of enhancements to our proprietary quantitative model during the 12-month period ended October 31, 2021 (the "Reporting Period").

During the last months of 2020, we introduced new signals within our High Quality Business Models investment theme. The first signal evaluates the overlap in the tenure of a company's C-suite executives as well as other management positions, as we believe companies that exhibit less turnover in their senior-most management teams are likely to outperform in the long run. The second signal seeks to identify a company's exposure to U.S. states based on search engine activity, as we believe that companies can be impacted by the economic conditions of regions beyond where their subsidiaries, offices or otherwise general businesses are physically located. We also introduced a strategic climate-aware tilt with longer-term return expectations within our overall portfolio construction process that is designed to reduce exposure to carbon transition risk using two proprietary measures of emissions intensity. We believe that the transition to a low-carbon economy is likely to become even more important in determining the attractiveness of companies in the future.

During the first half of 2021, we introduced new signals within our Sentiment Analysis investment theme, which we rolled out across the majority of regions, including the U.S., emerging markets, Japan and Europe. These signals are an extension to our existing suite of signals that focus on institutional positioning and capture sentiment associated with outstanding short-interest for specific names. The new signals focus on short positions by institutional investors and seek to identify which ones may have been covered prematurely or maintained beyond their optimal duration. Additionally, within our High Quality Business Models investment theme, we introduced another signal to our existing suite of alternative growth signals across multiple regions, including the U.S., emerging markets, Japan and Europe. The new signal seeks to identify companies that exhibit elevated levels of demand for their products and services based on trends identified from consumer Internet activity data. While we believe that these types of trends can help provide additional insight on the global demand for certain products and services, we have also closely focused on developing our own process to identify which individual companies are most highly exposed to specific trends.

Goldman Sachs International Equity Insights Funds

Market Review

During the 12-month period ended October 31, 2021 (the "Reporting Period"), emerging markets equities and international equities broadly recorded gains, with the major influences being an economic recovery from the depths of the COVID-19 pandemic as well as continued fiscal stimulus and ongoing accommodative monetary policies from central banks and governments around the world.

Emerging Markets Equities

Emerging markets equities, as represented by the MSCI Emerging Markets Standard Index (Net, USD, Unhedged) (the "MSCI EM Index"), generated a positive absolute return of 16.96%.¹

As the Reporting Period began in the last two months of 2020, emerging markets equities advanced in the wake of U.S. elections and the release of successful COVID-19 vaccine results by multiple companies. There was additional positive news, as COVID-19 vaccines started being distributed across the world. Emerging markets equity funds experienced strong investment inflows. However, toward the end of calendar year 2020, the emergence of a new, more contagious strain of COVID-19 slightly dampened investor sentiment and caused several countries to reinstate some restrictions. South Korea and Brazil were among the top performing countries in the MSCI EM Index during the last two months of 2020. South Korea was at the forefront of COVID-19 testing and, as a result, was able to keep cases low. Brazil showed a strong rebound in its consumption of fuel, which recovered to higher than pre-pandemic levels. India also performed well. India, which was struggling to recover from the fallout of the COVID-19 pandemic, launched a massive vaccination drive. China was among the weakest performers in the MSCI EM Index, as tensions between China and the U.S. flared up after the U.S. announced plans to delist some Chinese stocks from the New York Stock Exchange. In Europe, Greece was a weak performer though it posted positive absolute returns. Greece's equity market was pressured by the country entering another lockdown as it struggled to contain the spread of COVID-19.

Emerging markets equities were up modestly for the first quarter of 2021 overall but fell in March, as COVID-19 vaccine rollouts slowed in some countries. Investor optimism and risk tolerance waned during the quarter, as consensus expectations of higher inflation and rising yields caused heightened volatility in equities across regions. Emerging markets equity fund investment flows remained positive, but momentum slowed. Earnings estimates for the MSCI EM Index were revised down slightly in March 2021. Saudi Arabia and Mexico were among the top performing countries in the MSCI EM Index during the first calendar quarter. Oil prices rose given the Organization of the Petroleum Exporting Countries' ("OPEC") agreements for countries, including Saudi Arabia, to maintain lower levels of production. Mexico benefited from the new United States-Mexico-Canada ("USMCA") trade deal and also reaped benefits from the U.S. government's \$1.9 trillion stimulus plan, both of which led economic growth estimates for Mexico to increase for calendar year 2021. China was among the weakest performers in the MSCI EM Index, as investor sentiment was dampened by rising inflation as well as by early signs of the government tightening its stimulus policies. Egypt and Turkey were also weak performers. Egypt in particular suffered amid the fallout of the Suez Canal blockage that resulted in a stall in global shipping.

Emerging markets equities markets rose more solidly in the second quarter of 2021, as both COVID-19 vaccine availability and distribution continued to increase, though the global spread of the Delta variant slightly dampened recovery optimism. Still, favorable investor sentiment around a return to normalcy outweighed both these concerns and worries about rising interest rates and the possibility of tightening fiscal policies. Brazil was one of the top performing countries in the MSCI EM Index during the quarter, driven by an acceleration in the COVID-19 vaccine rollout. Russia and Saudi Arabia were also strong performers, as their economies and domestic businesses benefited from higher crude oil prices. India also performed well, as the nation's daily COVID-19 infections seemed to have peaked and were steadily decreasing. China's equity market was only slightly positive during the second calendar quarter, as regulatory concerns, mainly in the technology sector, continued to weigh on investor sentiment.

In the third quarter of 2021, emerging markets equities declined, as the global spread of the Delta variant dampened economic recovery optimism and investor concerns grew over regulations in China. Though they rose slightly in August 2021 on reassurances by the U.S. Federal Reserve (the "Fed"), accommodative monetary policy in India and declining infection rates in Asia, emerging markets equities experienced significant sell-offs in July and September, as investors focused on concerns around

¹ All Index returns are expressed in U.S. dollar terms.

rising interest rates and the possibility of tightening fiscal policies. China was among the weakest markets in the MSCI EM Index during the quarter, as regulatory concerns, mainly in the technology sector, continued to weigh on sentiment. Investors were confronted with increased regulatory scrutiny on companies focused on e-commerce, online education and cybersecurity. India was one of the top performing countries in the MSCI EM Index, driven by steady government spending and company valuations. Also, positively, the nation's daily COVID-19 infections continued to decline. Russia and Saudi Arabia were also strong performers during the quarter, as their economies and domestic businesses continued to benefit from higher crude oil prices.

Emerging markets equities rose slightly in October 2021, as COVID-19 vaccination rates increased and the global spread of the Delta variant slowed in most regions. Also, emerging markets equities were expected by the consensus to see a strong earnings recovery through the end of 2021. Asia's factory activity stepped up a gear in October, as emerging economies saw COVID-19 infections subside, but rising input costs, material shortages and slowing Chinese economic growth clouded the outlook. China's factory activity expanded at its fastest pace in four months during October, but a sub-index for output showed that production shrank for the third straight month due to power shortages and rising costs. India's equity market posted a negative return for the month, driven by investor concerns about steep valuations and liquidity normalization signals by the country's central bank. Brazil's equity market also fell in October, mostly due to inflation concerns and doubts about the economic policy of the nation's government and its intention to relax fiscal rules to increase social spending. Russia was a strong performer during the month, again benefiting from higher crude oil prices.

For the Reporting Period as a whole, energy, materials and financials were the strongest sectors in the MSCI EM Index, each posting a robust double-digit positive absolute return. Consumer discretionary, real estate and communication services were the weakest performing sectors in the MSCI EM Index, each generating a negative absolute return during the Reporting Period.

From a country perspective, the Czech Republic, Russia, Hungary, Argentina and Poland were the best performing individual constituents of the MSCI EM Index for the Reporting Period, each of which posted a robust double-digit absolute gain. Conversely, the only constituents of the MSCI EM Index to post negative absolute returns for the Reporting Period overall were China and Pakistan. Egypt, Malaysia and Peru were also among the weakest performers but posted modestly positive absolute returns during the Reporting Period.

International Equities

International equities, as represented by the MSCI Europe, Australasia, Far East ("EAFE") Standard Index (Net, USD, Unhedged) (the "MSCI EAFE Index"), recorded a positive absolute return of 34.18%.

As the Reporting Period began in November 2020, international equities rebounded following two months of declines in September and October 2020, with cyclical and value-oriented stocks outperforming growth-oriented stocks. Equity markets rallied early in the month as U.S. election results brought some clarity. The announcement of promising data from multiple COVID-19 vaccine developers gave further boost to investor sentiment in the last two months of 2020 as did the prospects of a global economic recovery. While European equities faced some headwinds from increasing COVID-19 cases and heightened lockdown restrictions, spillover optimism from the U.S. elections boosted European stocks. In the U.K., third quarter Gross Domestic Product ("GDP") rose in its sharpest quarterly expansion on record. The Japanese equity market rallied, driven by global cues, particularly around COVID-19 vaccine and U.S. Presidential election news.

International equity markets overcame bouts of volatility during the first quarter of 2021 to surge to new highs in March, driven by two key themes — the accelerating rollout of the COVID-19 vaccines globally and the ongoing commitment from central banks around the world to support the economic recovery. Accelerating economic growth, normalizing inflation and steepening yield curves laid the foundation for the "reflation trade," as investors started to price in a brighter future. (Reflation is the inflation that typically comes immediately after a low-point in the economic cycle, often after economic stimulus, and the reflation trade is the purchase of specific stocks or sectors believed to outperform in that type of environment.) Investors took a sharp turn away from momentum stocks and favored cyclical sectors, many of which tend to be more value oriented. European equities were less impacted by inflation fears, as reopening progress pushed travel and leisure stocks higher, and U.K. equities were additionally buoyed by gains in energy prices. Markets welcomed the European Central Bank's ("ECB") decision to increase the pace of its

¹ All Index returns are expressed in U.S. dollar terms.

Pandemic Emergency Purchase Programme asset purchases in response to the bond sell-off there. Markets also overcame pressure as AstraZeneca vaccine safety concerns and new local lockdown measures in France dampened near-term recovery prospects. March's Euro-area Manufacturing Purchasing Managers Index posted a historical high. Japanese equities rose during the first calendar quarter, rallying on the back of a sharp rotation from growth to value stocks. Investor sentiment was also supported by the consistent weakness of the Japanese yen against the U.S. dollar and by a rally in U.S. equities.

The rotation from growth to value stocks took a breather in April 2021, with international growth stocks outperforming their value counterparts. Starting in May 2021, international equities were impacted by rising commodity prices, which stoked investor fears of earlier than consensus expected interest rate hikes from central banks, particularly the U.S. Fed. In June, international equities rallied following a weaker than consensus expected U.S. payrolls report that eased concerns of a shift to tighter monetary policy. Overall, discussions during the quarter centered on central bank liquidity tailwinds, fiscal stimulus, COVID-19 vaccine progress, economic reopening momentum, strong corporate profits and robust equity inflows. While inflation concerns were fairly pervasive, the Fed remained consistent in its messaging around expectations that price pressures would be transitory. European equities advanced for the fifth straight quarter amid a sharp rebound in economic growth, an accelerating COVID-19 vaccine rollout and significantly better than consensus expected first quarter 2021 corporate earnings. Cyclical stocks generated the best returns, although sector performance was broadly positive. The ECB maintained its accommodative monetary policy stance, while also upgrading its GDP growth forecast and raising its inflation forecast for both 2021 and 2022. In the U.K., the Bank of England ("BOE") raised its economic growth forecast for 2021 and tapered its pace of asset purchases. In Japan, state of emergency measures following a third wave of COVID-19 cases that had begun in March 2021 and slowing COVID-19 vaccine rollouts weighed on investor sentiment for the majority of the second calendar quarter. However, the Japanese equity market rallied strongly during the first half of June, likely driven by the increased pace of inoculations. This exuberance was short-lived, however, as the direction of the Japanese equity market again turned sharply down in the middle of June in step with U.S. equity markets.

International equities fell during the third quarter of 2021 for the first time in six calendar quarters. During the first half of the quarter, the international equity markets delivered strong returns, continuing the trend from the second calendar quarter along with additional focus on positive corporate earnings and the accommodative monetary policies of global central banks. Pandemic-related pressures appeared to be easing, and economic activity appeared to be increasing. However, the markets receded in the second half of the third calendar quarter, primarily due to the U.S. Fed's announcements about its plans to taper monthly asset purchase plans but also because of heightened investor worries around an increase in interest rates, global supply chain concerns, COVID-19 Delta variant cases and Chinese government regulations on Chinese stocks. Then, a debt crisis at one of China's largest property developers further unsettled investors. All that said, European equities advanced for the sixth straight calendar quarter, as investor risk sentiment was bolstered by robust corporate earnings, solid economic growth and an accommodative policy environment. The ECB signaled it would maintain interest rates at record lows for a longer period to support the economic recovery and unveiled a new flexible inflation policy framework. In the U.K., the BOE left monetary policy unchanged but signaled it was moving closer to raising its interest rates. Japanese equities also advanced during the quarter, rebounding largely on the Tokyo Olympics that began in July 2021 and on the appointment of a new prime minister, who is widely expected to compile a sizable fiscal package to shore up the Japanese economy. Bringing the MSCI EAFE Index into negative territory for the quarter were the equity markets of Germany and the Pacific Basin ex-Japan, which declined.

Many of the concerns that dominated the international equity markets in September 2021 ebbed somewhat in October, and the MSCI EAFE Index returned to positive territory, supported in Europe and the U.K. particularly by favorable third calendar quarter corporate earnings reports. The Japanese equity market declined in October ahead of the general election that took place on October 31. Global news flow was generally negative in the first half of October, especially from China, but the sustained strength of U.S. equity markets provided some support for Japan. Equity markets in the Pacific Basin ex-Japan rose, rallying on both positive corporate earnings guidance and a continuing decline in the number of new COVID-19 cases in many countries in the region. However, shares were weaker toward the end of the month with continued concerns around rising energy prices, higher inflation and ongoing tensions between the U.S. and China weighing on investor sentiment.

For the Reporting Period as a whole, energy, financials and information technology were the strongest performing sectors in the MSCI EAFE Index, each producing a robust double-digit positive absolute return. The weakest performing sectors in the MSCI

EAFE Index were communication services, utilities and consumer staples, with each still generating a double-digit positive absolute return during the Reporting Period, albeit more modest.

From a country perspective, Austria, Norway and the Netherlands were the strongest performing constituents of the MSCI EAFE Index during the Reporting Period, each posting a strong gain. New Zealand was the only constituent of the MSCI EAFE Index to post a negative absolute return during the Reporting Period. Hong Kong and Japan generated positive double-digit absolute gains but were also among the weakest relative performers, significantly underperforming the MSCI EAFE Index during the Reporting Period.

Looking Ahead

At the end of the Reporting Period, we continued to believe that less expensive stocks should outpace more expensive stocks. In addition, we expected stocks with good momentum to outperform those with poor momentum. We plan to focus on seeking companies about which fundamental research analysts are becoming more positive as well as profitable companies with what we view as sustainable earnings and a track record of using their capital to enhance shareholder value. As such, we anticipate remaining fully invested, with long-term performance likely to be the result of stock selection rather than sector or capitalization allocations.

We stand behind our investment philosophy that sound economic investment principles, coupled with a disciplined quantitative approach, can provide strong, uncorrelated returns over the long term. Our research agenda is robust, and we continue to enhance our existing models, add new proprietary forecasting signals and improve our trading execution as we seek to provide the most value to our shareholders.

Goldman Sachs Emerging Markets Equity Insights Fund

Investment Objective

The Fund seeks long-term growth of capital.

Portfolio Management Discussion and Analysis

Below, the Goldman Sachs Quantitative Investment Strategies Team discusses the Goldman Sachs Emerging Markets Equity Insights Fund's (the "Fund") performance and positioning for the 12-month period ended October 31, 2021 (the "Reporting Period").

Q How did the Fund perform during the Reporting Period?

A During the Reporting Period, the Fund's Class A, Class C, Institutional, Investor, Class R6, Class R and Class P Shares generated average annual total returns, without sales charges, of 16.60%, 15.74%, 17.07%, 16.96%, 17.10%, 16.43% and 17.10%, respectively. These returns compare to the 16.96% average annual total return of the Fund's benchmark, the MSCI Emerging Markets Standard Index (Net, USD, Unhedged) (the "Index"), during the same period.

Q What key factors were most responsible for the Fund's performance during the Reporting Period?

A The Fund uses a quantitative style of management, in combination with a qualitative overlay, that emphasizes fundamentally-based stock and country/currency selection, careful portfolio construction and efficient implementation. To manage the Fund, we use two distinct strategies — a bottom-up stock selection strategy and a top-down country/currency selection strategy. These strategies are uncorrelated, that is, they tend to perform independently of each other over time, which enables us to greater diversify the portfolio.

During the Reporting Period, the Fund generated mixed results versus the Index, with some share classes underperforming and others outperforming. Within our stock selection strategy, certain individual investments detracted from relative performance. Our country/currency strategy contributed positively.

Q Which investment themes helped and which hurt within the Team's stock selection strategy?

A In keeping with our investment approach, we use our quantitative model and four investment themes to take a long-term view of market patterns and look for inefficiencies, selecting stocks for the Fund and overweighting or underweighting the ones chosen by the

model. Over time and by design, the performance of any one of the model's investment themes tends to have a low correlation with the model's other themes, demonstrating the diversification benefit of the Fund's theme-driven quantitative model. The variance in performance supports our research indicating that the diversification provided by our different investment themes is a significant investment advantage over the long term, even though the Fund may experience underperformance in the short term. Of course, diversification does not protect an investor from market risk nor does it ensure a profit.

During the Reporting Period, two of our investment themes hurt the Fund's relative performance. Fundamental Mispricings was our worst performing investment theme, followed at some distance by High Quality Business Models. Fundamental Mispricings seeks to identify high quality businesses trading at a fair price, which we believe may lead to strong performance over the long run. High Quality Business Models seeks to identify companies that are generating high quality revenues with sustainable business models and aligned management incentives.

The Fund benefited from our Market Themes & Trends investment theme during the Reporting Period. Market Themes & Trends seeks to identify companies positively positioned to benefit from themes and trends in the market and macroeconomic environment.

The impact of our Sentiment Analysis investment theme was rather neutral during the Reporting Period. Sentiment Analysis seeks to identify stocks experiencing improvements in their overall market sentiment.

Q How did the Fund's sector and industry allocations affect relative performance?

A In constructing the Fund's portfolio, our quantitative model focuses on stock selection rather than on making sector or

industry bets. Consequently, the Fund is similar to the Index in terms of its sector and industry allocations and style. Relative performance is primarily driven by stock selection, not by sector or industry allocations.

Q Did stock selection help or hurt Fund performance during the Reporting Period?

A We seek to outpace the Index by overweighting stocks we expect to outperform and underweighting those we think may lag. At the same time, we strive to maintain a risk profile similar to the Index. The Fund's investments are selected using fundamental research and a variety of quantitative techniques based on our investment themes. For example, the Fund aims to hold a basket of stocks with better Fundamental Mispricings characteristics than the Index.

During the Reporting Period, certain individual stock positions detracted from the Fund's relative returns. Investments in the financials and energy sectors hampered performance. On the positive side, the Fund was helped by stock selection in the industrials and materials sectors.

Q Which individual stock positions detracted most from the Fund's relative returns during the Reporting Period?

A In terms of individual stock positions, the Fund was hindered by its underweight positions relative to the Index in Gazprom, a Russian state-owned energy company; OTP Bank, a Hungary-based financial services firm serving customers in central and eastern Europe; and CEZ, a Czech Republic-based company engaged in the production and distribution of electricity. All three underweights were largely the result of our Market Themes & Trends and High Quality Business Models investment themes.

Q Which individual stock positions contributed most to the Fund's relative returns during the Reporting Period?

A Compared to the Index, the Fund was aided during the Reporting Period by overweight positions in COSCO Shipping, a China-based provider of international shipping, shipbuilding and repair, and terminal operations; Wan Hai Lines, a Taiwan-based transportation and logistics company; and Evergreen Marine, a Taiwanese container transportation and shipping company. Our Market Themes & Trends investment theme and, to a lesser extent, our High Quality Business Models investment theme led to the Fund's overweights in all three stocks.

Q What impact did the Team's country/currency selection strategy have on the Fund's relative performance during the Reporting Period?

A Our country/currency strategy added to the Fund's relative returns. During the Reporting Period, the Fund benefited from its slight overweight compared to the Index in China and from its underweight in Taiwan. These positive results were partly offset by the Fund's overweight in Brazil and its underweight in Saudi Arabia, which detracted from relative performance.

We made our picks using our proprietary models, which, during the Reporting Period, were based on three investment themes specific to our country/currency strategy — Valuation, Risk Premium and Macro. Valuation favors equity and currency markets that appear cheap relative to accounting measures of value and purchasing power. Risk Premium evaluates whether a country is overcompensating investors for various types of risk. Macro assesses a market's macroeconomic environment and growth prospects.

Q How did the Fund use derivatives and similar instruments during the Reporting Period?

A During the Reporting Period, we used futures contracts to equitize the Fund's cash holdings. In other words, we put the Fund's cash holdings to work by using them as collateral for the purchase of futures contracts. The use of these derivatives did not have a material impact on Fund results during the Reporting Period.

Q What changes did you make to the Fund's country weightings during the Reporting Period?

A During the Reporting Period, we shifted the Fund from an underweight position versus the Index in China to an overweight position. We also increased the size of the Fund's overweight position in South Korea. Compared to the Index, we changed within the Fund from rather neutral positions in Mexico, Brazil and Thailand to overweight positions. We moved the Fund from overweight positions in Indonesia and Peru to relatively neutral positions. In addition, during the Reporting Period, we increased the Fund's underweight in Saudi Arabia and reduced its underweight in Malaysia. We also shifted the Fund from overweight positions versus the Index in Taiwan and India to underweight positions during the Reporting Period.

Q What were the Fund's sector and country weightings at the end of the Reporting Period?

A At the end of the Reporting Period, the Fund was overweight relative to the Index in the industrials, materials, utilities and information technology sectors. Compared to the Index, the Fund was underweight the consumer staples, consumer discretionary, communication services, real estate and energy sectors. It was rather neutral versus the Index in the health care and financials sectors at the conclusion of the Reporting Period.

In terms of countries, the Fund was overweight relative to the Index in South Korea, China, Brazil, Mexico and Thailand at the end of the Reporting Period. Compared to the Index, the Fund was underweight Saudi Arabia, Taiwan, India, South Africa and Malaysia. The Fund was relatively neutral in Qatar, Turkey, United Arab Emirates, Chile, Indonesia, Peru, Russia, Hungary, Greece, Pakistan, Egypt, Czech Republic, Argentina, Colombia, Poland and the Philippines at the end of the Reporting Period.

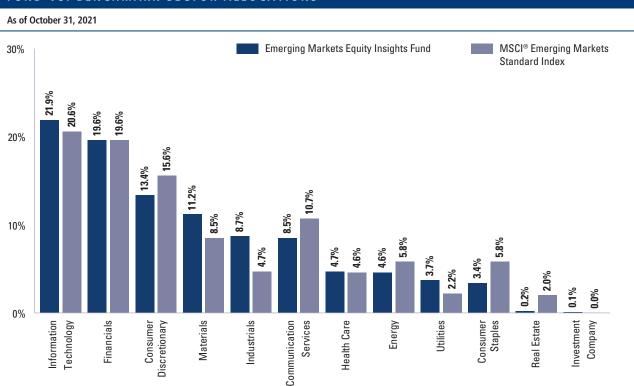

Emerging Markets Equity Insights Fund

as of October 31, 2021

FUND VS. BENCHMARK SECTOR ALLOCATIONS²

The Fund is actively managed and, as such, its composition may differ over time. Consequently, the Fund's overall sector allocations may differ from percentages contained in the graph above. The graph categorizes investments using Global Industry Classification Standard ("GICS"); however, the sector classifications used by the portfolio management team may differ from GICS. The percentage shown for each investment category reflects the value of investments in that category as a percentage of market value (excluding investments in the securities lending reinvestment vehicle, if any). Investments in the securities lending reinvestment vehicle represented 0.8% of the Fund's net assets at October 31, 2021. The graph depicts the Fund's investments but may not represent the Fund's market exposure due to the exclusion of certain derivatives, if any, as listed in the Additional Investment Information section of the Schedule of Investments. Percentages may not sum to 100% due to rounding.

For more information about your Fund, please refer to www.GSAMFUNDS.com. There, you can learn more about your Fund's investment strategies, holdings, and performance.

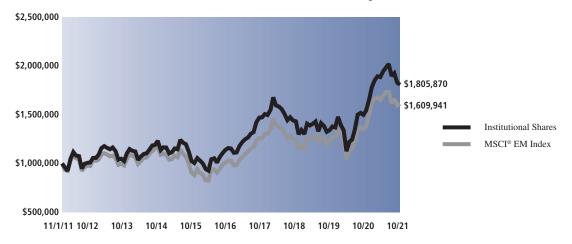

Performance Summary

October 31, 2021

The following graph shows the value, as of October 31, 2021, of a \$1,000,000 investment made on November 1, 2011 in Institutional Shares at NAV. For comparative purposes, the performance of the Fund's benchmark, the MSCI® Emerging Markets Standard Index (the "MSCI® EM Index") (Net, USD, unhedged), is shown. Performance reflects applicable fee waivers and/or expense limitations in effect during the periods shown and in their absence, performance would be reduced. Returns do not reflect the deduction of taxes that a shareholder would pay on Fund distributions or the redemption of Fund shares. The returns set forth below represent past performance. Past performance does not guarantee future results. The Fund's investment return and principal value will fluctuate so that an investor's shares, when redeemed, may be worth more or less than their original cost. Current performance may be lower or higher than the performance quoted below. Please visit our web site at www.GSAMFUNDS.com to obtain the most recent month-end returns.

Emerging Markets Equity Insights Fund's 10 Year Performance

Performance of a \$1,000,000 Investment, with distributions reinvested, from November 1, 2011 through October 31, 2021.

Average Annual Total Return through October 31, 2021*	One Year	Five Years	Ten Years	Since Inception
Class A				
Excluding sales charges	16.60%	8.98%	5.68%	_
Including sales charges	10.15%	7.75%	5.09%	_
Class C				
Excluding contingent deferred sales charges	15.74%	8.18%	4.89%	_
Including contingent deferred sales charges	14.74%	8.18%	4.89%	_
Institutional	17.07%	9.39%	6.08%	_
Investor	16.96%	9.26%	5.95%	_
Class R6 (Commenced July 31, 2015)	17.10%	9.42%	N/A	7.95%
Class R (Commenced February 28, 2014)	16.43%	8.73%	N/A	6.37%
Class P (Commenced April 16, 2018)	17.10%	N/A	N/A	4.11%

^{*} These returns assume reinvestment of all distributions at NAV and reflect a maximum initial sales charge of 5.50% for Class A and the assumed contingent deferred sales charge for Class C Shares (1% if redeemed within 12 months of purchase). Because Institutional, Investor, Class R6, Class R and Class P Shares do not involve a sales charge, such a charge is not applied to their Average Annual Total Returns.

Goldman Sachs International Equity Insights Fund

Investment Objective

The Fund seeks long-term growth of capital.

Portfolio Management Discussion and Analysis

Below, the Goldman Sachs Quantitative Investment Strategies Team discusses the Goldman Sachs International Equity Insights Fund's (the "Fund") performance and positioning for the 12-month period ended October 31, 2021 (the "Reporting Period").

Q How did the Fund perform during the Reporting Period?

A During the Reporting Period, the Fund's Class A, Class C, Institutional, Service, Investor, Class R6, Class R and Class P Shares generated average annual total returns, without sales charges, of 31.50%, 30.53%, 31.93%, 31.25%, 31.90%, 31.97%, 31.19% and 32.00%, respectively. These returns compare to the 34.18% average annual total return of the Fund's benchmark, the MSCI EAFE Standard Index (Net, USD, Unhedged) (the "Index"), during the same period.

Q What key factors were most responsible for the Fund's performance during the Reporting Period?

A The Fund uses a quantitative style of management, in combination with a qualitative overlay, that emphasizes fundamentally-based stock and country/currency selection, careful portfolio construction and efficient implementation. To manage the Fund, we use two distinct strategies — a bottom-up stock selection strategy and a top-down country/currency selection strategy. These strategies are uncorrelated, that is, they tend to perform independently of each other over time, which enables us to greater diversify the portfolio.

During the Reporting Period, the Fund underperformed the Index, with certain individual investments detracting from relative performance. Our country/currency strategy also hurt relative performance.

Q Which investment themes helped and which hurt within the Team's stock selection strategy?

A In keeping with our investment approach, we use our quantitative model and four investment themes to take a long-term view of market patterns and look for inefficiencies, selecting stocks for the Fund and overweighting or underweighting the ones chosen by the

model. Over time and by design, the performance of any one of the model's investment themes tends to have a low correlation with the model's other themes, demonstrating the diversification benefit of the Fund's theme-driven quantitative model. The variance in performance supports our research indicating that the diversification provided by our different investment themes is a significant investment advantage over the long term, even though the Fund may experience underperformance in the short term. Of course, diversification does not protect an investor from market risk nor does it ensure a profit.

During the Reporting Period, two of our investment themes — High Quality Business Models and Market Themes & Trends — detracted from the Fund's relative returns. High Quality Business Models seeks to identify companies that are generating high quality revenues with sustainable business models and aligned management incentives. Market Themes & Trends seeks to identify companies positively positioned to benefit from themes and trends in the market and macroeconomic environment.

The Fund was helped by our Sentiment Analysis and Fundamental Mispricings investment themes during the Reporting Period. Sentiment Analysis seeks to identify stocks experiencing improvements in their overall market sentiment. Fundamental Mispricings seeks to identify high quality businesses trading at a fair price, which we believe may lead to strong performance over the long run.

Q How did the Fund's sector and industry allocations affect relative performance?

A In constructing the Fund's portfolio, our quantitative model focuses on stock selection rather than on making sector or industry bets. Consequently, the Fund is similar to the Index in terms of its sector and industry allocations and style. Relative performance is primarily driven by stock selection, not by sector or industry allocations.

Q Did stock selection help or hurt Fund performance during the Reporting Period?

A We seek to outpace the Index by overweighting stocks we expect to outperform and underweighting those we think may lag. At the same time, we strive to maintain a risk profile similar to the Index. The Fund's investments are selected using fundamental research and a variety of quantitative techniques based on our investment themes. For example, the Fund aims to hold a basket of stocks with better Fundamental Mispricings characteristics than the Index.

During the Reporting Period, certain individual stock positions detracted from the Fund's relative returns. Specifically, the Fund was hurt by stock selection in the consumer discretionary sector and, to a lesser extent, by stock selection in the energy and communication services sectors. On the positive side, the Fund benefited from stock selection in the information technology and industrials sectors.

Q Which individual stock positions detracted most from the Fund's relative returns during the Reporting Period?

A In terms of individual stock positions, the Fund was hampered by its overweight positions relative to the Index in Luxembourg-based laboratory services company Eurofin Scientific and Japan-based electronic commerce and settlement finance services provider Z Holdings. An underweight in Swiss nutrition, health and wellness company Nestle also detracted from relative returns. Our Sentiment Analysis investment theme led to the Fund's overweight in Eurofin Scientific. The Fund was overweight Z Holdings primarily because of our Market Themes & Trends investment theme. The underweight in Nestle was largely due to our High Quality Business Models investment theme.

Q Which individual stock positions contributed most to the Fund's relative returns during the Reporting Period?

A During the Reporting Period, the Fund was aided by overweight positions versus the Index in ASM International, a Netherlands-headquartered supplier of semiconductor process equipment; Nippon Yusen, a Japan-based transportation and logistics company; and Norsk Hydro, a Norwegian supplier of aluminum and aluminum products. The Fund's overweights in ASM International and Nippon Yusen were mainly the result of our Market Themes & Trends and Sentiment Analysis investment themes. The overweight in Norsk Hydro was based mostly on our Market Themes & Trends investment theme.

Q What impact did the Team's country/currency selection strategy have on the Fund's relative performance during the Reporting Period?

A Our country/currency selection strategy detracted from the Fund's relative performance during the Reporting Period.

Compared to the Index, the Fund was hindered by underweight positions in Switzerland and the U.K. and by an overweight position in Japan. On the positive side, the Fund benefited from an overweight versus the Index in the Netherlands.

We made our picks using our proprietary models, which, during the Reporting Period, were based on five investment themes specific to our country/currency strategy — Valuation, Momentum, Risk Premium, Fund Flows and Macro. Valuation favors equity and currency markets that appear cheap relative to accounting measures of value and purchasing power. Momentum favors countries and currencies that have had strong recent outperformance. Risk Premium evaluates whether a country is overcompensating investors for various types of risk, while Fund Flows evaluates the strength of capital market inflows. Finally, Macro assesses a market's macroeconomic environment and growth prospects.

Q How did the Fund use derivatives and similar instruments during the Reporting Period?

A During the Reporting Period, we used futures contracts to equitize the Fund's cash holdings. In other words, we put the Fund's cash holdings to work by using them as collateral for the purchase of futures contracts. We also used forward foreign currency exchange contracts to avoid unintended local currency exposure when buying and selling stocks. The use of these derivatives did not have a material impact on Fund results during the Reporting Period.

Q What changes did you make to the Fund's country weightings during the Reporting Period?

A During the Reporting Period, we increased the Fund's overweight positions relative to the Index in Japan and Norway. We shifted the Fund from an overweight in Switzerland to an underweight position and from an underweight position in France to an overweight. Compared to the Index, we increased the Fund's underweight positions in the U.K. and Spain. We changed the Fund from rather neutral positions in Germany and Sweden to overweight positions. Additionally, we shifted the Fund from overweights in the Netherlands and Italy to rather neutral positions. We also moved the Fund from a rather neutral position versus the Index in Australia to an underweight during the Reporting Period.

Q What were the Fund's sector and country weightings at the end of the Reporting Period?

A the end of the Reporting Period, the Fund was overweight relative to the Index in the information technology, materials and industrials sectors. Compared to the Index, the Fund was underweight the consumer staples, real estate and utilities sectors. The Fund was relatively neutral versus the Index in the energy, consumer discretionary, financials, health care and communication services sectors at the end of the Reporting Period.

In terms of countries, the Fund was overweight relative to the Index in Japan, Germany, France, Sweden and Norway at the end of the Reporting Period. Compared to the Index, the Fund was underweight the U.K., Switzerland, Australia and Spain. The Fund was relatively neutral versus the Index in Austria, Finland, Denmark, Portugal, New Zealand, the Netherlands, Ireland, Israel, Belgium, Italy, Singapore and Hong Kong at the end of the Reporting Period.

International Equity Insights Fund

FUND VS. BENCHMARK SECTOR ALLOCATIONS³

The Fund is actively managed and, as such, its composition may differ over time. Consequently, the Fund's overall sector allocations may differ from percentages contained in the graph above. The graph categorizes investments using Global Industry Classification Standard ("GICS"), however, the sector classifications used by the portfolio management team may differ from GICS. The percentage shown for each investment category reflects the value of investments in that category as a percentage of market value (excluding investments in the securities lending reinvestment vehicle, if any). Investments in the securities lending reinvestment vehicle represented 1.2% of the Fund's net assets at October 31, 2021. The graph depicts the Fund's investments but may not represent the Fund's market exposure due to the exclusion of certain derivatives, if any, as listed in the Additional Investment Information section of the Schedule of Investments. Percentages may not sum to 100% due to rounding.

For more information about your Fund, please refer to www.GSAMFUNDS.com. There, you can learn more about your Fund's investment strategies, holdings, and performance.

² The Fund's overall top 10 holdings differ from the table above due to the exclusion of the Goldman Sachs Financial Square Government Fund (a short-term investment fund), which represents approximately 1.2% of the Fund's net assets as of 10/31/21.

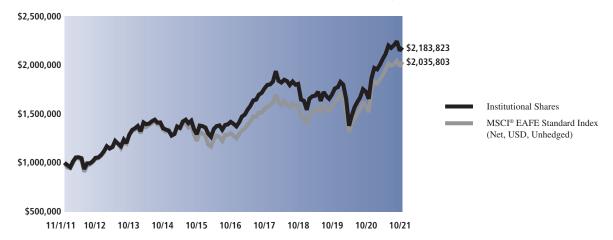

Performance Summary

October 31, 2021

The following graph shows the value, as of October 31, 2021, of a \$1,000,000 investment made on November 1, 2011 in Institutional Shares at NAV. For comparative purposes, the performance of the Fund's benchmark, the MSCI® EAFE Standard Index (Net, USD, Unhedged), is shown. Performance reflects applicable fee waivers and/or expense limitations in effect during the periods shown and in their absence, performance would be reduced. Returns do not reflect the deduction of taxes that a shareholder would pay on Fund distributions or the redemption of Fund shares. The returns set forth below represent past performance. Past performance does not guarantee future results. The Fund's investment return and principal value will fluctuate so that an investor's shares, when redeemed, may be worth more or less than their original cost. Current performance may be lower or higher than the performance quoted below. Please visit our web site at www.GSAMFUNDS.com to obtain the most recent month-end returns.

International Equity Insights Fund's 10 Year Performance

Performance of a \$1,000,000 Investment, with distributions reinvested, from November 1, 2011 through October 31, 2021.

Average Annual Total Return through October 31, 2021*	One Year	Five Years	Ten Years	Since Inception
Class A				
Excluding sales charges	31.50%	8.91%	7.70%	_
Including sales charges	24.30%	7.69%	7.10%	_
Class C				
Excluding contingent deferred sales charges	30.53%	8.10%	6.90%	_
Including contingent deferred sales charges	29.52%	8.10%	6.90%	_
Institutional	31.93%	9.31%	8.12%	
Service	31.25%	8.75%	7.57%	_
Investor	31.90%	9.20%	7.97%	_
Class R6 (Commenced July 31, 2015)	31.97%	9.32%	N/A	6.99%
Class R	31.19%	8.64%	7.44%	_
Class P (Commenced April 16, 2018)	32.00%	N/A	N/A	4.65%

^{*} These returns assume reinvestment of all distributions at NAV and reflect a maximum initial sales charge of 5.50% for Class A and the assumed contingent deferred sales charge for Class C Shares (1% if redeemed within 12 months of purchase). Because Institutional, Service, Investor, Class R6, Class R and Class P Shares do not involve a sales charge, such a charge is not applied to their Average Annual Total Returns.

Goldman Sachs International Small Cap Insights Fund

Investment Objective

The Fund seeks long-term growth of capital.

Portfolio Management Discussion and Analysis

Below, the Goldman Sachs Quantitative Investment Strategies Team discusses the Goldman Sachs International Small Cap Insights Fund's (the "Fund") performance and positioning for the 12-month period ended October 31, 2021 (the "Reporting Period").

Q How did the Fund perform during the Reporting Period?

A During the Reporting Period, the Fund's Class A, Class C, Institutional, Investor, Class R6 and Class P Shares generated average annual total returns, without sales charges, of 32.65%, 31.67%, 33.11%, 32.88%, 33.12% and 33.15%, respectively. These returns compare to the 35.77% average annual total return of the Fund's benchmark, the MSCI EAFE Small Cap Index (Net, USD, Unhedged) (the "Index"), during the same period.

Q What key factors were most responsible for the Fund's performance during the Reporting Period?

A The Fund uses a quantitative style of management, in combination with a qualitative overlay, that emphasizes fundamentally-based stock selection, careful portfolio construction and efficient implementation. The Fund's investments are selected using fundamental research and a variety of quantitative techniques based on certain investment themes, including Fundamental Mispricings, High Quality Business Models, Sentiment Analysis and Market Themes & Trends.

During the Reporting Period, the Fund underperformed the Index, with two of our quantitative model's four investment themes detracting from results. Stock selection driven by these investment themes hindered relative returns.

Q What impact did the Fund's investment themes have on performance during the Reporting Period?

A In keeping with our investment approach, we use our quantitative model and four investment themes to take a long-term view of market patterns and look for inefficiencies, selecting stocks for the Fund and overweighting or underweighting the ones chosen by the model. Over time and by design, the performance of any one of the model's investment themes tends to have a low correlation with the model's other themes, demonstrating the

diversification benefit of the Fund's theme-driven quantitative model. The variance in performance supports our research indicating that the diversification provided by our different investment themes is a significant investment advantage over the long term, even though the Fund may experience underperformance in the short term. Of course, diversification does not protect an investor from market risk nor does it ensure a profit.

During the Reporting Period, two of our investment themes — High Quality Business Models and Fundamental Mispricings — diminished the Fund's relative performance. High Quality Business Models seeks to identify companies that are generating high quality revenues with sustainable business models and aligned management incentives. Fundamental Mispricings seeks to identify high quality businesses trading at a fair price, which we believe may lead to strong performance over the long run.

The impact of our Sentiment Analysis and Market Themes & Trends investment themes was rather neutral during the Reporting Period. Sentiment Analysis seeks to identify stocks experiencing improvements in their overall market sentiment. Market Themes and Trends seeks to identify companies positively positioned to benefit from themes and trends in the market and macroeconomic environment.

Q How did the Fund's sector and industry allocations affect relative performance?

A In constructing the Fund's portfolio, our quantitative model focuses on stock selection rather than on making sector or industry bets. Consequently, the Fund is similar to the Index in terms of its sector and industry allocations and style. Relative performance is primarily driven by stock selection, not by sector or industry allocations.

Q Did stock selection help or hurt Fund performance during the Reporting Period?

A We seek to outpace the Index by overweighting stocks we expect to outperform and underweighting those we think may

lag. At the same time, we strive to maintain a risk profile similar to the Index. The Fund's investments are selected using fundamental research and a variety of quantitative techniques based on our investment themes. For example, the Fund aims to hold a basket of stocks with better Fundamental Mispricings characteristics than the Index.

During the Reporting Period, stock selection had a negative impact on the Fund's relative performance. Investments in the consumer discretionary sector detracted most from returns, followed by holdings in the communication services and financials sectors. The Fund benefited from stock selection in the health care, information technology and industrials sectors.

Q Which individual stock positions detracted most from the Fund's relative returns during the Reporting Period?

A In terms of individual stock positions, the Fund was hurt during the Reporting Period by overweight positions relative to the Index in Kohnan Shoji, a Japanese home improvement center chain; PostNL, a Netherlands-based provider of postal and package services; and DCM Holdings, a Japan-based holding company that operates home center chain stores. Our Fundamental Mispricings and Market Themes & Trends investment themes were largely responsible for the Fund's overweights in Kohnan Shoji and DCM Holdings. The overweight in PostNL was primarily due to our Market Themes & Trends investment theme.

Q Which individual stock positions contributed most to the Fund's relative results during the Reporting Period?

A During the Reporting Period, overweight positions in SITC International, D'Ieteren Group and ASM International contributed positively to the Fund's relative performance. The overweight in SITC International, a Hong Kong-based provider of transportation and logistics solutions, was driven mainly by our Market Themes & Trends investment theme. The overweight in D'Ieteren Group, a Belgian vehicle importer and distributor, was based mostly on our Fundamental Mispricings and Market Themes & Trends investment themes. The Fund was overweight ASM International, a Netherlands-headquartered supplier of semiconductor process equipment, largely because of our Market Themes & Trends and Sentiment Analysis investment themes.

Q What impact did country selection have on the Fund's relative performance during the Reporting Period?

A To construct the Fund's portfolio, our quantitative model focuses on stock selection rather than on making country

bets. As a result, the Fund is similar to the Index in terms of its country allocations. Relative performance is primarily driven by stock selection, not by country allocations.

Q How did the Fund use derivatives and similar instruments during the Reporting Period?

A During the Reporting Period, we used futures contracts to equitize the Fund's cash holdings. In other words, we put the Fund's cash holdings to work by using them as collateral for the purchase of futures contracts. The use of these derivatives did not have a material impact on Fund results during the Reporting Period.

Q What changes did you make to the Fund's country weightings during the Reporting Period?

As mentioned previously, changes in the Fund's country weightings are generally the result of our quantitative model's stock selection. During the Reporting Period, the Fund's overweight relative to the Index in Japan increased and its overweight in Italy decreased. Its overweight in the Netherlands changed to a rather neutral position, while its neutral positions in Spain and Australia became overweight positions. Compared to the Index, the Fund's underweight positions in Israel, the U.K. and Singapore increased. Its underweights in Sweden, Denmark and New Zealand changed to rather neutral positions during the Reporting Period.

Q What were the Fund's sector and country weightings at the end of the Reporting Period?

A the end of the Reporting Period, the Fund was overweight relative to the Index in the industrials, information technology, financials and materials sectors. Compared to the Index, the Fund was underweight the utilities, consumer staples, real estate, communication services and energy sectors. The Fund was relatively neutral compared to the Index in the consumer discretionary and health care sectors at the end of the Reporting Period.

In terms of countries, the Fund was overweight Japan, Spain, Italy and Australia at the end of the Reporting Period.

Compared to the Index, the Fund was underweight Israel, the U.K. and Singapore. It was relatively neutral compared to the Index in the Netherlands, Austria, Sweden, Ireland, New Zealand, Belgium, Denmark, Finland, Norway, Germany, Switzerland, France, Portugal and Hong Kong at the end of the Reporting Period.

International Small Cap Insights Fund's 10 Year Performance

Performance of a \$1,000,000 Investment, with distributions reinvested, from November 1, 2011 through October 31, 2021.

Average Annual Total Return through October 31, 2021*	One Year	Five Years	Ten Years	Since Inception
Class A				
Excluding sales charges	32.65%	9.40%	9.43%	_
Including sales charges	25.34%	8.18%	8.82%	_
Class C				
Excluding contingent deferred sales charges	31.67%	8.61%	8.62%	_
Including contingent deferred sales charges	30.67%	8.61%	8.62%	_
Institutional	33.11%	9.83%	9.86%	_
Investor	32.88%	9.68%	9.70%	_
Class R6 (Commenced July 31, 2015)	33.12%	9.84%	N/A	8.08%
Class P (Commenced April 16, 2018)	33.15%	N/A	N/A	4.73%

^{*} These returns assume reinvestment of all distributions at NAV and reflect a maximum initial sales charge of 5.50% for Class A and the assumed contingent deferred sales charge for Class C Shares (1% if redeemed within 12 months of purchase). Because Institutional, Investor, Class R6 and Class P Shares do not involve a sales charge, such a charge is not applied to their Average Annual Total Returns.

Index Definitions

The MSCI Emerging Markets Standard Index (Net, USD, Unhedged) is a free float-adjusted market capitalization index that is designed to measure equity market performance of emerging markets. As of November 30, 2021, the MSCI® Emerging Markets Standard Index (Net, USD, Unhedged) consists of the following 27 emerging market country indices: Argentina, Brazil, Chile, China, Colombia, Czech Republic, Egypt, Greece, Hungary, India, Indonesia, Korea, Kuwait, Malaysia, Mexico, Pakistan, Peru, Philippines, Poland, Qatar, Russia, Saudi Arabia, South Africa, Taiwan, Thailand, Turkey and United Arab Emirates. The MSCI® Emerging Markets Standard Index (Net, USD, Unhedged) figures do not reflect any deduction for fees, expenses or taxes. It is not possible to invest directly in an index.

The MSCI® EAFE Standard Index (Net, USD, Unhedged) is a market capitalization weighted composite of securities in 21 developed markets. As of November 30, 2021, the MSCI® EAFE Standard Index (Net, USD, Unhedged) consists of the following 21 developed countries: Australia, Austria, Belgium, Denmark, Finland, France, Germany, Hong Kong, Ireland, Israel, Italy, Japan, the Netherlands, New Zealand, Norway, Portugal, Singapore, Spain, Sweden, Switzerland and the United Kingdom. The MSCI® EAFE Standard Index (Net, USD, Unhedged) figures do not reflect any deduction for fees, expenses or taxes. It is not possible to invest directly in an index.

The MSCI® EAFE Small Cap Index (Net, USD, Unhedged) is a free float-adjusted market capitalization index that is designed to measure developed market equity performance, excluding the U.S. and Canada. The MSCI® EAFE Small Cap Index (Net, USD, Unhedged) selects the most liquid securities across developed markets relative to their market capitalization, and targets for index inclusion 40% of the full market capitalization of the eligible small cap universe within each industry group, within each country. Its returns include net reinvested dividends but, unlike Fund returns, do not reflect the payment of sales commissions or other expenses incurred in the purchase or sale of the securities included in the MSCI® EAFE Small Cap Index (Net, USD, Unhedged). It is not possible to invest directly in an index.

It is not possible to invest directly in an unmanaged index.

⁽a) Calculated based on the average shares outstanding methodology.

⁽b) Assumes investment at the net asset value at the beginning of the year, reinvestment of all distributions, a complete redemption of the investment at the net asset value at the end of the year and no sales or redemption charges (if any). Total returns would be reduced if a sales or redemption charge was taken into account. Returns do not reflect the impact of taxes to shareholders relating to Fund distributions or the redemption of Fund shares.

⁽c) The Fund's portfolio turnover rate is calculated in accordance with regulatory requirements, without regard to transactions involving short term investments and certain derivatives. If such transactions were included, the Fund's portfolio turnover rate may be higher.

Ratio of net expenses to average net assets	0.86%	0.86%	0.86%	0.85% ^(c)						
Ratio of total expenses to average net assets	0.92%	0.92%	0.94%	0.93% ^(c)						
Ratio of net investment income to average net assets	2.41%	1.08%	1.96%	1.20%						
Portfolio turnover rate ^(d)	185%	149%	131%	110%						

^{*} Commencement of operations.

⁽a) Calculated based on the average shares outstanding methodology.

⁽b) Assumes investment at the net asset value at the beginning of the period, reinvestment of all distributions, a complete redemption of the investment at the net asset value at the end of the period and no sales or redemption charges (if any). Total returns would be reduced if a sales or redemption charge was taken into account. Returns do not reflect the impact of taxes to shareholders relating to Fund distributions or the redemption of Fund shares. Total returns for periods less than one full year are not annualized.

⁽c) Annualized.

⁽d) The Fund's portfolio turnover rate is calculated in accordance with regulatory requirements, without regard to transactions involving short term investments and certain derivatives. If such transactions were included, the Fund's portfolio turnover rate may be higher.

Notes to Financial Statements

October 31, 2021

1. ORGANIZATION

Goldman Sachs Trust (the "Trust") is a Delaware statutory trust registered under the Investment Company Act of 1940, as amended (the "Act"), as an open-end management investment company. The following table lists those series of the Trust that are included in this report (collectively, the "Funds" or individually a "Fund"), along with their corresponding share classes and respective diversification status under the Act:

Fund	Share Classes Offered	Diversified/ Non-diversified
Emerging Markets Equity Insights	A, C, Institutional, Investor, R6, R and P	Non-diversified
International Equity Insights	A, C, Institutional, Service, Investor, R6, R and P	Diversified
International Small Cap Insights	A, C, Institutional, Investor, R6 and P	Diversified

Class A Shares are sold with a front-end sales charge of up to 5.50%. Class C Shares are sold with a contingent deferred sales charge ("CDSC") of 1.00%, which is imposed on redemptions made within 12 months of purchase. Institutional, Service, Investor, Class R6, Class R and Class P Shares are not subject to a sales charge.

Goldman Sachs Asset Management, L.P. ("GSAM"), an affiliate of Goldman Sachs & Co. LLC ("Goldman Sachs"), serves as investment adviser to the Funds pursuant to a management agreement (the "Agreement") with the Trust.

2. SIGNIFICANT ACCOUNTING POLICIES

The financial statements have been prepared in accordance with accounting principles generally accepted in the United States of America ("GAAP") and require management to make estimates and assumptions that may affect the reported amounts and disclosures. Actual results may differ from those estimates and assumptions. Each Fund is an investment company under GAAP and follows the accounting and reporting guidance applicable to investment companies.

- A. Investment Valuation The Funds' valuation policy is to value investments at fair value.
- B. Investment Income and Investments Investment income includes interest income, dividend income, and securities lending income, if any. Interest income is accrued daily and adjusted for amortization of premiums and accretion of discounts. Dividend income is recognized on ex-dividend date or, for certain foreign securities, as soon as such information is obtained subsequent to the ex-dividend date. Non-cash dividends, if any, are recorded at the fair market value of the securities received. Investment transactions are reflected on trade date. Realized gains and losses are calculated using identified cost. Investment transactions are recorded on the following business day for daily net asset value ("NAV") calculations. Investment income is recorded net of any foreign withholding taxes, less any amounts reclaimable. The Funds may file withholding tax reclaims in certain jurisdictions to recover a portion of amounts previously withheld. These reclaims, if any, are recorded when the amount is known and there are no significant uncertainties on collectability. Such amounts recovered, if any, are reflected as other income in the Statements of Operations. Any foreign capital gains tax is accrued daily based upon net unrealized gains, and is payable upon sale of such investments.

For derivative contracts, realized gains and losses are recorded upon settlement of the contract.

- C. Class Allocations and Expenses Investment income, realized and unrealized gain (loss), if any, and non-class specific expenses of each Fund are allocated daily based upon the proportion of net assets of each class. Non-class specific expenses directly incurred by a Fund are charged to that Fund, while such expenses incurred by the Trust are allocated across the applicable Funds on a straight-line and/or pro-rata basis depending upon the nature of the expenses. Class specific expenses, where applicable, are borne by the respective share classes and include Distribution and Service, Transfer Agency and Service and Shareholder Administration fees.
- D. Federal Taxes and Distributions to Shareholders It is each Fund's policy to comply with the requirements of the Internal Revenue Code of 1986, as amended (the "Code"), applicable to regulated investment companies and to distribute each

Notes to Financial Statements (continued)

October 31, 2021

2. SIGNIFICANT ACCOUNTING POLICIES (continued)

year substantially all of its investment company taxable income and capital gains to its shareholders. Accordingly, each Fund is not required to make any provisions for the payment of federal income tax. Distributions to shareholders are recorded on the ex-dividend date. Income and capital gains distributions, if any, are declared and paid at least annually.

Net capital losses, if any, are carried forward to future fiscal years and may be used to the extent allowed by the Code to offset any future capital gains. Losses that are carried forward will retain their character as either short-term or long-term capital losses. Utilization of capital loss carryforwards will reduce the requirement of future capital gains distributions.

The characterization of distributions to shareholders for financial reporting purposes is determined in accordance with federal income tax rules, which may differ from GAAP. The source of each Fund's distributions may be shown in the accompanying financial statements as either from distributable earnings or capital. Certain components of the Funds' net assets on the Statements of Assets and Liabilities reflect permanent GAAP/tax differences based on the appropriate tax character.

E. Foreign Currency Translation — The accounting records and reporting currency of a Fund are maintained in United States ("U.S.") dollars. Assets and liabilities denominated in foreign currencies are translated into U.S. dollars using the current exchange rates at the close of each business day. The effect of changes in foreign currency exchange rates on investments is included within net realized and unrealized gain (loss) on investments. Changes in the value of other assets and liabilities as a result of fluctuations in foreign exchange rates are included in the Statements of Operations within net change in unrealized gain (loss) on foreign currency translation. Transactions denominated in foreign currencies are translated into U.S. dollars on the date the transaction occurred, the effects of which are included within net realized gain (loss) on foreign currency transactions.

3. INVESTMENTS AND FAIR VALUE MEASUREMENTS

U.S. GAAP defines the fair value of a financial instrument as the amount that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date (i.e., the exit price); the Funds' policy is to use the market approach. GAAP establishes a fair value hierarchy that prioritizes the inputs to valuation techniques used to measure fair value. The hierarchy gives the highest priority to unadjusted quoted prices in active markets for identical assets or liabilities (Level 1 measurements) and the lowest priority to unobservable inputs (Level 3 measurements). The level in the fair value hierarchy within which the fair value measurement in its entirety falls shall be determined based on the lowest level input that is significant to the fair value measurement in its entirety. The levels used for classifying investments are not necessarily an indication of the risk associated with investing in these investments. The three levels of the fair value hierarchy are described below:

Level 1 — Unadjusted quoted prices in active markets that are accessible at the measurement date for identical, unrestricted assets or liabilities;

Level 2 — Quoted prices in markets that are not active or financial instruments for which significant inputs are observable (including, but not limited to, quoted prices for similar investments, interest rates, foreign exchange rates, volatility and credit spreads), either directly or indirectly;

Level 3 — Prices or valuations that require significant unobservable inputs (including GSAM's assumptions in determining fair value measurement).

The Board of Trustees ("Trustees") has approved Valuation Procedures that govern the valuation of the portfolio investments held by the Funds, including investments for which market quotations are not readily available. The Trustees have delegated to GSAM day-to-day responsibility for implementing and maintaining internal controls and procedures related to the valuation of the Funds' investments. To assess the continuing appropriateness of pricing sources and methodologies, GSAM regularly performs price verification procedures and issues challenges as necessary to third party pricing vendors or brokers, and any differences are reviewed in accordance with the Valuation Procedures.

3. INVESTMENTS AND FAIR VALUE MEASUREMENTS (continued)

A. Level 1 and Level 2 Fair Value Investments — The valuation techniques and significant inputs used in determining the fair values for investments classified as Level 1 and Level 2 are as follows:

Equity Securities — Equity securities traded on a U.S. securities exchange or the NASDAQ system, or those located on certain foreign exchanges, including but not limited to the Americas, are valued daily at their last sale price or official closing price on the principal exchange or system on which they are traded. If there is no sale or official closing price or such price is believed by GSAM to not represent fair value, equity securities will be valued at the valid closing bid price for long positions and at the valid closing ask price for short positions (i.e. where there is sufficient volume, during normal exchange trading hours). If no valid bid/ask price is available, the equity security will be valued pursuant to the Valuation Procedures approved by the Trustees and consistent with applicable regulatory guidance. To the extent these investments are actively traded, they are classified as Level 1 of the fair value hierarchy, otherwise they are generally classified as Level 2. Certain equity securities containing unique attributes may be classified as Level 2.

Unlisted equity securities for which market quotations are available are valued at the last sale price on the valuation date, or if no sale occurs, at the last bid price for long positions or the last ask price for short positions, and are generally classified as Level 2. Securities traded on certain foreign securities exchanges are valued daily at fair value determined by an independent fair value service (if available) under Fair Valuation Procedures approved by the Trustees and consistent with applicable regulatory guidance. The independent fair value service takes into account multiple factors including, but not limited to, movements in the securities markets, certain depositary receipts, futures contracts and foreign currency exchange rates that have occurred subsequent to the close of the foreign securities exchange. These investments are generally classified as Level 2 of the fair value hierarchy.

Money Market Funds — Investments in the Goldman Sachs Financial Square Government Fund ("Underlying Money Market Fund") are valued at the NAV per share of the Institutional Share class on the day of valuation. These investments are generally classified as Level 1 of the fair value hierarchy. For information regarding the Underlying Money Market Fund's accounting policies and investment holdings, please see the Underlying Money Market Fund's shareholder report.

Derivative Contracts — A derivative is an instrument whose value is derived from underlying assets, indices, reference rates or a combination of these factors. A Fund enters into derivative transactions to hedge against changes in interest rates, securities prices, and/or currency exchange rates, to increase total return, or to gain access to certain markets or attain exposure to other underliers. For financial reporting purposes, cash collateral that has been pledged to cover obligations of a Fund and cash collateral received, if any, is reported separately on the Statements of Assets and Liabilities as receivables/payables for collateral on certain derivatives contracts. Non-cash collateral pledged by a Fund, if any, is noted in the Schedules of Investments.

Exchange-traded derivatives, including futures and options contracts, are generally valued at the last sale or settlement price on the exchange where they are principally traded. Exchange-traded options without settlement prices are generally valued at the midpoint of the bid and ask prices on the exchange where they are principally traded (or, in the absence of two-way trading, at the last bid price for long positions and the last ask price for short positions). Exchange-traded derivatives typically fall within Level 1 of the fair value hierarchy. Over-the-counter ("OTC") and centrally cleared derivatives are valued using market transactions and other market evidence, including market-based inputs to models, calibration to market-clearing transactions, broker or dealer quotations, or other alternative pricing sources. Where models are used, the selection of a particular model to value OTC and centrally cleared derivatives depends upon the contractual terms of, and specific risks inherent in, the instrument, as well as the availability of pricing information in the market. Valuation models require a variety of inputs, including contractual terms, market prices, yield curves, credit curves, measures of volatility, voluntary and involuntary prepayment rates, loss severity rates and correlations of such inputs. For OTC and centrally cleared derivatives that trade in liquid markets, model inputs can generally be verified and model selection does not involve significant management judgment. OTC and centrally cleared derivatives are classified within Level 2 of the fair value hierarchy when significant inputs are corroborated by market evidence.

i. Forward Contracts — A forward contract is a contract between two parties to buy or sell an asset at a specified price on a future date. A forward contract settlement can occur on a cash or delivery basis. Forward contracts are marked-to-market daily using independent vendor prices, and the change in value, if any, is recorded as an unrealized gain or loss. Cash and certain investments may be used to collateralize forward contracts.

Notes to Financial Statements (continued)

October 31, 2021

3. INVESTMENTS AND FAIR VALUE MEASUREMENTS (continued)

A forward foreign currency exchange contract is a forward contract in which a Fund agrees to receive or deliver a fixed quantity of one currency for another, at a pre-determined price at a future date. All forward foreign currency exchange contracts are marked to market daily by using the outright forward rates or interpolating based upon maturity dates, where available. Non-deliverable forward foreign currency exchange contracts are settled with the counterparty in cash without the delivery of foreign currency.

- ii. Futures Contracts Futures contracts are contracts to buy or sell a standardized quantity of a specified commodity or security. Upon entering into a futures contract, a Fund deposits cash or securities in an account on behalf of the broker in an amount sufficient to meet the initial margin requirement. Subsequent payments are made or received by a Fund equal to the daily change in the contract value and are recorded as variation margin receivable or payable with a corresponding offset to unrealized gains or losses.
- B. Level 3 Fair Value Investments To the extent that significant inputs to valuation models and other alternative pricing sources are unobservable, or if quotations are not readily available, or if GSAM believes that such quotations do not accurately reflect fair value, the fair value of a Fund's investments may be determined under Valuation Procedures approved by the Trustees. GSAM, consistent with its procedures and applicable regulatory guidance, may make an adjustment to the most recent valuation prices of either domestic or foreign securities in light of significant events to reflect what it believes to be the fair value of the securities at the time of determining a Fund's NAV. To the extent investments are valued using single source broker quotations obtained directly from the broker or passed through from third party pricing vendors, such investments are classified as Level 3 investments.
- C. Fair Value Hierarchy The following is a summary of the Funds' investments and derivatives classified in the fair value hierarchy as of October 31, 2021:

EMERGING MARKETS EQUITY INSIGHTS

Level 1	Level 2	Level 3
\$ 9,171,338	\$ 22,719,529	\$ —
176,470,570	1,446,900,443	_

4. INVESTMENTS IN DERIVATIVES

The following table sets forth, by certain risk types, the gross value of derivative contracts (not considered to be hedging instruments for accounting disclosure purposes) as of October 31, 2021. These instruments were used as part of the Funds' investment strategies and to obtain and/or manage exposure related to the risks below. The values in the tables below exclude the effects of cash collateral received or posted pursuant to these derivative contracts, and therefore are not representative of the Funds' net exposure:

Fund	Risk	Statements of Assets and Liabilities	Assets ^(a)	Statements of Assets and Liabilities	Liabilities ^(a)
Emerging Markets Equity Insights	Equity	Variation margin on futures contracts	\$ 367,755	ı	\$
International Equity Insights	Equity	Variation margin on futures contracts	522,450	Variation margin on futures contracts	(528,196)
International Small Cap Insights	Equity	Variation margin on futures contracts	1,978,847	Variation margin on futures contracts	(682,086)

⁽a) Includes unrealized gain (loss) on futures contracts described in the Additional Investment Information sections of the Schedules of Investments. Only the variation margin as of October 31, 2021 is reported within the Statements of Assets and Liabilities.

The following tables set forth, by certain risk types, the Funds' gains (losses) related to these derivatives and their indicative volumes for the fiscal year ended October 31, 2021. These gains (losses) should be considered in the context that these derivative contracts may have been executed to create investment opportunities and/or economically hedge certain investments, and accordingly, certain gains (losses) on such derivative contracts may offset certain (losses) gains attributable to investments. These gains (losses) are included in "Net realized gain (loss)" or "Net change in unrealized gain (loss)" on the Statements of Operations:

Fund	Risk	Statements of Operations	Net Realized Gain (Loss)	Net Change in Unrealized Gain (Loss)
Emerging Markets Equity Insights	Currency	Net realized gain (loss) from forward foreign currency contracts/Net change in unrealized gain (loss) on forward foreign currency contracts	\$ 67,105	\$ —
	Equity	Net realized gain (loss) from futures contracts/ Net change in unrealized gain (loss) on futures contracts	2,427,183	335,486
Total			\$2,494,288	\$335,486
Fund	Risk	Statements of Operations	Net Realized Gain (Loss)	Net Change in Unrealized Gain (Loss)
International Equity Insights	Equity	Net realized gain (loss) from futures contracts/ Net change in unrealized gain (loss) on futures contracts	\$5,666,529	\$ 12,675
International Small Cap Insights	Equity	Net realized gain (loss) from futures contracts/ Net change in unrealized gain (loss) on futures contracts	7,928,635	3,165,557

4. INVESTMENTS IN DERIVATIVES (continued)

For the fiscal year ended October 31, 2021, the relevant values for each derivative type were as follows:

	Average Number of Contr	Average Number of Contracts or Notional Amounts ⁽¹⁾			
Fund	Futures Contracts	Forward Contracts			
Emerging Markets Equity Insights	367	\$186,874			
International Equity Insights	444	_			
International Small Cap Insights	853	_			

⁽¹⁾ Amounts disclosed represent average number of contracts for futures or notional amounts for forward contracts, based on absolute values, which is indicative of volume of this derivative type, for the months that the Fund held such derivatives during the year ended October 31, 2021.

5. AGREEMENTS AND AFFILIATED TRANSACTIONS

A. Management Agreement — Under the Agreement, GSAM manages the Funds, subject to the general supervision of the Trustees.

As compensation for the services rendered pursuant to the Agreement, the assumption of the expenses related thereto and administration of the Funds' business affairs, including providing facilities, GSAM is entitled to a management fee, accrued daily and paid monthly, equal to an annual percentage rate of each Fund's average daily net assets.

For the fiscal year ended October 31, 2021, contractual and effective net management fees with GSAM were at the following rates:

		Contra			Effective Net		
Fund	First \$1 billion	Next \$1 billion	Next \$3 billion	Next \$3 billion	Over \$8 billion	Effective Rate	Management Rate [^]
Emerging Markets Equity Insights	1.00%	1.00%	0.90%	0.86%	0.84%	1.00%	1.00%
International Equity Insights	0.81	0.73	0.69	0.68	0.67	0.75	0.75
International Small Cap Insights	0.85	0.85	0.77	0.73	0.72	0.82	0.82

[^] Effective Net Management Rate includes the impact of management fee waivers of affiliated underlying funds, if any.

The Emerging Markets Equity Insights, International Equity Insights and International Small Cap Insights Funds invest in Institutional Shares of the Goldman Sachs Financial Square Government Fund, which is an affiliated Underlying Fund. GSAM has agreed to waive a portion of its management fee payable by the Funds in an amount equal to the management fee it earns as an investment adviser to the affiliated Underlying Fund in which the Funds invest, except those management fees it earns from the Funds' investments of cash collateral received in connection with securities lending transactions in the Goldman Sachs Financial Square Government Fund. For the fiscal year ended October 31, 2021, GSAM waived \$3,157, \$108 and \$1,194 of the Emerging Markets Equity Insights, International Equity Insights and International Small Cap Insights Funds' management fees, respectively.

B. Distribution and/or Service (12b-1) Plans — The Trust, on behalf of Class A and Class R Shares of each applicable Fund, has adopted Distribution and Service Plans subject to Rule 12b-1 under the Act. Under the Distribution and Service Plans, Goldman Sachs, which serves as distributor (the "Distributor"), is entitled to a fee accrued daily and paid monthly for distribution services and personal and account maintenance services, which may then be paid by Goldman Sachs to authorized dealers. These fees are equal to an annual percentage rate of the average daily net assets attributable to Class A or Class R Shares of the Funds, as applicable, as set forth below.

October 31, 2021

5. AGREEMENTS AND AFFILIATED TRANSACTIONS (continued)

The Trust, on behalf of Class C Shares of each applicable Fund, has adopted a Distribution Plan subject to Rule 12b-1 under the Act. Under the Distribution Plan, Goldman Sachs as Distributor is entitled to a fee accrued daily and paid monthly for distribution services, which may then be paid by Goldman Sachs to authorized dealers. These fees are equal to an annual percentage rate of the average daily net assets attributable to Class C Shares of the Funds, as set forth below.

The Trust, on behalf of Service Shares of each applicable Fund, has adopted a Service Plan subject to Rule 12b-1 under the Act to allow Service Shares to compensate service organizations (including Goldman Sachs) for providing personal and account maintenance services to their customers who are beneficial owners of such shares. The Service Plan provides for compensation to the service organizations equal to an annual percentage rate of the average daily net assets attributable to Service Shares of the Funds, as set forth below.

	Distribution and/or Service Plan Rates			
	Class A*	Class C	Service	Class R*
Distribution and/or Service Plan	0.25%	0.75%	0.25%	0.50%

^{*} With respect to Class A and Class R Shares, the Distributor at its discretion may use compensation for distribution services paid under the Distribution and Service Plans to compensate service organizations for personal and account maintenance services and expenses as long as such total compensation does not exceed the maximum cap on "service fees" imposed by the Financial Industry Regulatory Authority.

C. Distribution Agreement — Goldman Sachs, as Distributor of the shares of the Funds pursuant to a Distribution Agreement, may retain a portion of the Class A Shares' front-end sales charge and Class C Shares' CDSC. During the fiscal year ended October 31, 2021, Goldman Sachs retained the following amounts:

	Front End Sales Charge	Contingent Deferred Sales Charge Class C	
Fund	Class A		
Emerging Markets Equity Insights	\$23,368	\$	
International Equity Insights	4,400	_	
International Small Cap Insights	4,410		

- D. Service and Shareholder Administration Plans The Trust, on behalf of each applicable Fund, has adopted Service Plans to allow Class C Shares and Shareholder Administration Plans to allow Service Shares, respectively, to compensate service organizations (including Goldman Sachs) for providing varying levels of personal and account maintenance or shareholder administration services to their customers who are beneficial owners of such shares. The Service and Shareholder Administration Plans each provide for compensation to the service organizations equal to an annual percentage rate of 0.25% of the average daily net assets attributable to Class C and Service Shares of the Funds, respectively.
- E. Transfer Agency Agreement Goldman Sachs also serves as the transfer agent of the Funds for a fee pursuant to the Transfer Agency Agreement. The fees charged for such transfer agency services are accrued daily and paid monthly at annual rates as follows: 0.16% of the average daily net assets of Class A, Class C, Investor and Class R Shares; 0.03% of the average daily net assets of Class R6 and Class P Shares; and 0.04% of the average daily net assets of Institutional and Service Shares.
- F. Other Expense Agreements and Affiliated Transactions GSAM has agreed to reduce or limit certain "Other Expenses" of the Funds (excluding acquired fund fees and expenses, transfer agency fees and expenses, service fees and shareholder administration fees (as applicable), taxes, interest, brokerage fees, expenses of shareholder meetings, litigation and indemnification, and extraordinary expenses) to the extent such expenses exceed, on an annual basis, a percentage rate of the average daily net assets of each Fund. Such Other Expense reimbursements, if any, are accrued daily and paid monthly. In addition, the Funds are not obligated to reimburse GSAM for prior fiscal year expense reimbursements, if any. The Other Expense limitations as an annual percentage rate of average daily net assets for Emerging Markets Equity Insights, International Equity Insights and International Small Cap Insights Funds are 0.054%, 0.004% and 0.014%, respectively. These Other Expense

5. AGREEMENTS AND AFFILIATED TRANSACTIONS (continued)

limitations will remain in place through at least February 28, 2022, and prior to such date GSAM may not terminate the arrangements without the approval of the Trustees. In addition, the Funds have entered into certain offset arrangements with the custodian and the transfer agent, which may result in a reduction of the Funds' expenses and are received irrespective of the application of the "Other Expense" limitations described above.

For the fiscal year ended October 31, 2021, these expense reductions, including any fee waivers and Other Expense reimbursements, were as follows:

Fund	Management Fee Waiver	Other Expense Reimbursement	Total Expense Reductions
Emerging Markets Equity Insights	\$3,157	\$1,027,096	\$1,030,253
International Equity Insights	108	1,126,885	1,126,993
International Small Cap Insights	1,194	1,556,751	1,557,945

- G. Line of Credit Facility As of October 31, 2021, the Funds participated in a \$1,000,000,000 committed, unsecured revolving line of credit facility (the "facility") together with other funds of the Trust and certain registered investment companies having management agreements with GSAM or its affiliates. This facility is to be used for temporary emergency purposes, or to allow for an orderly liquidation of securities to meet redemption requests. The interest rate on borrowings is based on the federal funds rate. The facility also requires a fee to be paid by the Funds based on the amount of the commitment that has not been utilized. For the fiscal year ended October 31, 2021, the Funds did not have any borrowings under the facility. Prior to April 26, 2021 the facility was \$700,000,000.
- H. Other Transactions with Affiliates For the fiscal year ended October 31, 2021, Goldman Sachs earned \$162 in brokerage commissions from portfolio transactions, on behalf of the Emerging Markets Equity Insights Fund.

The following table provides information about the Funds' investments in the Goldman Sachs Financial Square Government Fund as of and for the fiscal year ended October 31, 2021:

Fund	Beginnin Value as o October 31,	of	Purchases at Cost	Proceeds from Sales	Ending Value as of October 31, 2021	Shares as of October 31, 2021	Dividend Income
Emerging Markets Equity Insights	\$	_	\$546,693,040	\$(544,880,917)	\$1,812,123	1,812,123	\$1,810
International Equity Insights		_	48,420,399	(48,420,399)	_	_	63

As of October 31, 2021, the following Goldman Sachs Tax-Advantaged Global Equity Portfolio was a beneficial owner of 5% or more of total outstanding shares of the following Fund:

Fund	Goldman Sachs Tax-Advantaged Global Equity Portfolio
Emerging Markets Equity Insights	10%

October 31, 2021

6. PORTFOLIO SECURITIES TRANSACTIONS

The cost of purchases and proceeds from sales and maturities of long-term securities for the fiscal year ended October 31, 2021, were as follows:

Fund	Purchases	Sales and Maturities
Emerging Markets Equity Insights	\$3,670,173,911	\$3,757,934,438
International Equity Insights	3,924,900,143	4,245,411,846
International Small Cap Insights	5,753,552,892	5,587,180,846

7. SECURITIES LENDING

Pursuant to exemptive relief granted by the Securities and Exchange Commission ("SEC") and the terms and conditions contained therein, the Funds may lend their securities through a securities lending agent, Goldman Sachs Agency Lending ("GSAL"), a wholly-owned subsidiary of Goldman Sachs, to certain qualified borrowers including Goldman Sachs and affiliates. In accordance with the Funds' securities lending procedures, the Funds receive cash collateral at least equal to the market value of the securities on loan. The market value of the loaned securities is determined at the close of business of the Funds, at their last sale price or official closing price on the principal exchange or system on which they are traded, and any additional required collateral is delivered to the Funds on the next business day. As with other extensions of credit, the Funds may experience delay in the recovery of their securities or incur a loss should the borrower of the securities breach its agreement with the Funds or become insolvent at a time when the collateral is insufficient to cover the cost of repurchasing securities on loan. Dividend income received from securities on loan may not be subject to withholding taxes and therefore withholding taxes paid may differ from the amounts listed in the Statements of Operations. Loans of securities are terminable at any time and as such 1) the remaining contractual maturities of the outstanding securities lending transactions are considered to be overnight and continuous and 2) the borrower, after notice, is required to return borrowed securities within the standard time period for settlement of securities transactions.

The Funds invest the cash collateral received in connection with securities lending transactions in the Goldman Sachs Financial Square Government Fund ("Government Money Market Fund"), an affiliated series of the Goldman Sachs Trust. The Government Money Market Fund is registered under the Act as an open end investment company, is subject to Rule 2a-7 under the Act, and is managed by GSAM, for which GSAM may receive a management fee of up to 0.16% on an annualized basis of the average daily net assets of the Government Money Market Fund.

In the event of a default by a borrower with respect to any loan, GSAL will exercise any and all remedies provided under the applicable borrower agreement to make the Funds whole. These remedies include purchasing replacement securities by applying the collateral held from the defaulting broker against the purchase cost of the replacement securities. If GSAL is unable to purchase replacement securities, GSAL will indemnify the Funds by paying the Funds an amount equal to the market value of the securities loaned minus the value of cash collateral received from the borrower for the loan, subject to an exclusion for any shortfalls resulting from a loss of value in such cash collateral due to reinvestment risk. The Funds' master netting agreements with certain borrowers provide the right, in the event of a default (including bankruptcy or insolvency), for the non-defaulting party to liquidate the collateral and calculate net exposure to the defaulting party or request additional collateral. However, in the event of a default by a borrower, a resolution authority could determine that such rights are not enforceable due to the restrictions or prohibitions against the right of set-off that may be imposed in accordance with a particular jurisdiction's bankruptcy or insolvency laws. The Funds' loaned securities were all subject to enforceable Securities Lending Agreements and the value of the collateral was at least equal to the value of the cash received. The amounts of the Funds' overnight and continuous agreements, which represent the gross amounts of recognized liabilities for securities lending transactions outstanding as of October 31, 2021, are disclosed as "Payable upon return of securities loaned" on the Statements of Assets and Liabilities, where applicable.

Each of the Funds and GSAL received compensation relating to the lending of the Funds' securities. The amounts earned, if any, by the Funds for the fiscal year ended October 31, 2021, are reported under Investment Income on the Statements of Operations.

7. SECURITIES LENDING (continued)

The table below details securities lending activity with affiliates of Goldman Sachs:

	For the fiscal year e	nded October 31, 2021	Amount Payable to
Fund	Earnings of GSAL Relating to Securities Loaned	Amounts Received by the Funds from Lending to Goldman Sachs	Goldman Sachs upon Return of Securities Loaned as of October 31, 2021
Emerging Markets Equity Insights	\$24,502	\$53,201	\$1,673,540
International Equity Insights	39,608	804	_
International Small Cap Insights	74,871	60,850	_

The following table provides information about the Funds' investment in the Government Money Market Fund for the fiscal year ended October 31, 2021:

Fund	Beginning Value as of October 31, 2020	Purchases at Cost	Proceeds from Sales	Ending Value as of October 31, 2021
Emerging Markets Equity Insights	\$ 500,400	\$131,606,558	\$(115,835,159)	\$16,271,799
International Equity Insights	25,795,600	395,403,029	(390,553,829)	30,644,800
International Small Cap Insights	29,274,156	326,100,841	(350,414,864)	4,960,133

8. TAX INFORMATION

The tax character of distributions paid during the fiscal year ended October 31, 2021, was as follows:

	Emerging Markets Equity Insights	International Equity Insights	International Small Cap Insights
Distributions paid from:			
Ordinary income	\$21,785,690	\$42,051,564	\$50,976,292

The tax character of distributions paid during the fiscal year ended October 31, 2020, was as follows:

	Emerging Markets Equity Insights	International Equity Insights	International Small Cap Insights
Distributions paid from:			
Ordinary income	\$36,220,550	\$76,193,916	\$134,097,136

October 31, 2021

8. TAX INFORMATION (continued)

As of October 31, 2021, the components of accumulated earnings (losses) on a tax-basis were as follows:

	_	ng Markets Insights		national Insights		ational p Insights
Undistributed ordinary income — net	\$140,	098,209	\$ 73,	374,112	\$119,2	290,446
Undistributed long-term capital gains	191,	314,675	75,	614,604		_
Total undistributed earnings	\$331,	412,884	\$148,	988,716	\$119,2	290,446
Capital loss carryforwards: ⁽¹⁾						
Perpetual long-term	\$	_	\$	_	\$	_
Perpetual short-term		_		_	(43,1	99,247)
Total capital loss carryforwards	\$	_	\$	_	\$ (43,1	99,247)
Timing differences (Foreign Tax Reclaims Accrued but not Received)			1,	580,427		45,542
Unrealized gains — net	79,	574,122	246,	051,895	349,1	68,423
Total accumulated earnings — net	\$410,	987,006	\$396,	621,038	\$425,3	05,164

⁽¹⁾ The Emerging Markets Equity Insights, International Equity Insights and International Small Cap Insights Funds utilized \$235,390,403, \$361,819,691 and \$493,310,927 of capital losses in the current fiscal year, respectively.

As of October 31, 2021, the Funds' aggregate security unrealized gains and losses based on cost for U.S. federal income tax purposes were as follows:

	Emerging Markets	International	International
	Equity Insights	Equity Insights	Small Cap Insights
Tax cost	\$1,814,707,002	\$2,268,151,855	\$3,374,073,047
Gross unrealized gain Gross unrealized loss	198,180,462	327,866,227	471,566,828
	(118,606,340)	(81,814,332)	(122,398,405)
Net unrealized gain	\$ 79,574,122	\$ 246,051,895	\$ 349,168,423

The difference between GAAP-basis and tax-basis unrealized gains (losses) is attributable primarily to wash sales, net mark to market gains (losses) on regulated futures, net mark to market gains (losses) on foreign currency contracts and differences in the tax treatment of passive foreign investment company investments.

GSAM has reviewed the Funds' tax positions for all open tax years (the current and prior three years, as applicable) and has concluded that no provision for income tax is required in the Funds' financial statements. Such open tax years remain subject to examination and adjustment by tax authorities.

9. OTHER RISKS

The Funds' risks include, but are not limited to, the following:

Derivatives Risk — The Funds' use of derivatives may result in loss. Derivative instruments, which may pose risks in addition to and greater than those associated with investing directly in securities, currencies or other instruments, may be illiquid or less liquid, volatile, difficult to price and leveraged so that small changes in the value of the underlying instruments may produce disproportionate losses to the Funds. Derivatives are also subject to counterparty risk, which is the risk that the other party in the transaction will not fulfill its contractual obligation. The use of derivatives is a highly specialized activity that involves investment techniques and risks different from those associated with investments in more traditional securities and instruments. Losses from derivatives can also result from a lack of correlation between changes in the value of derivative instruments and the portfolio assets (if any) being hedged.

9. OTHER RISKS (continued)

Foreign and Emerging Countries Risk — Investing in foreign markets may involve special risks and considerations not typically associated with investing in the U.S. Foreign securities may be subject to risk of loss because of more or less foreign government regulation, less public information; less stringent investor protections; less stringent accounting, corporate governance, financial reporting and disclosure standards; and less economic, political and social stability in the countries in which a Fund invests. The imposition of exchange controls (including repatriation restrictions), confiscation of assets and property, trade restrictions (including tariffs) and other government restrictions by the U.S. or other governments, or problems with registration, settlement or custody, may also result in losses. Foreign risk also involves the risk of negative foreign currency rate fluctuations, which may cause the value of securities denominated in such foreign currency (or other instruments through which a Fund has exposure to foreign currencies) to decline in value. Currency exchange rates may fluctuate significantly over short periods of time. To the extent that a Fund also invests in securities of issuers located in, or economically tied to, emerging markets, these risks may be more pronounced.

Foreign Custody Risk — A Fund invests in foreign securities, and as such the Fund may hold such securities and cash with foreign banks, agents, and securities depositories appointed by the Fund's custodian (each a "Foreign Custodian"). Some foreign custodians may be recently organized or new to the foreign custody business. In some countries, Foreign Custodians may be subject to little or no regulatory oversight over, or independent evaluation of, their operations. Further, the laws of certain countries may place limitations on a Fund's ability to recover its assets if a Foreign Custodian enters bankruptcy. Investments in emerging markets may be subject to even greater custody risks than investments in more developed markets. Custody services in emerging market countries are very often undeveloped and may be considerably less well regulated than in more developed countries, and thus may not afford the same level of investor protection as would apply in developed countries.

Investments in Other Investment Companies Risk — As a shareholder of another investment company, a Fund will indirectly bear its proportionate share of any net management fees and other expenses paid by such other investment companies, in addition to the fees and expenses regularly borne by the Fund.

Large Shareholder Transactions Risk — A Fund may experience adverse effects when certain large shareholders, such as other funds, institutional investors (including those trading by use of non-discretionary mathematical formulas), financial intermediaries (who may make investment decisions on behalf of underlying clients and/or include a Fund in their investment model), individuals, accounts and Goldman Sachs affiliates, purchase or redeem large amounts of shares of a Fund. Such large shareholder redemptions, which may occur rapidly or unexpectedly, may cause a Fund to sell portfolio securities at times when it would not otherwise do so, which may negatively impact a Fund's NAV and liquidity. These transactions may also accelerate the realization of taxable income to shareholders if such sales of investments resulted in gains, and may also increase transaction costs. In addition, a large redemption could result in a Fund's current expenses being allocated over a smaller asset base, leading to an increase in the Fund's expense ratio. Similarly, large Fund share purchases may adversely affect a Fund's performance to the extent that the Fund is delayed in investing new cash or otherwise maintains a larger cash position than it ordinarily would.

Liquidity Risk — A Fund may make investments that are illiquid or that may become less liquid in response to market developments or adverse investor perceptions. Illiquid investments may be more difficult to value. Liquidity risk may also refer to the risk that a Fund will not be able to pay redemption proceeds within the allowable time period or without significant dilution to remaining investors' interests because of unusual market conditions, an unusually high volume of redemption requests, or other reasons. To meet redemption requests, a Fund may be forced to sell investments at an unfavorable time and/or under unfavorable conditions. If a Fund is forced to sell securities at an unfavorable time and/or under unfavorable conditions, such sales may adversely affect the Fund's NAV and dilute remaining investors' interests. These risks may be more pronounced in connection with the Funds' investments in securities of issuers located in emerging market countries. Redemptions by large shareholders may have a negative impact on a Fund's liquidity.

Market and Credit Risks — In the normal course of business, a Fund trades financial instruments and enters into financial transactions where risk of potential loss exists due to changes in the market (market risk). The value of the securities in which a Fund invests may go up or down in response to the prospects of individual companies, particular sectors or governments and/or

October 31, 2021

9. OTHER RISKS (continued)

general economic conditions throughout the world due to increasingly interconnected global economies and financial markets. Events such as war, acts of terrorism, social unrest, natural disasters, the spread of infectious illness or other public health threats could also significantly impact a Fund and its investments. Additionally, a Fund may also be exposed to credit risk in the event that an issuer or guarantor fails to perform or that an institution or entity with which the Fund has unsettled or open transactions defaults.

Non-Diversification Risk — Emerging Markets Equity Insights Fund is non-diversified, meaning that it is permitted to invest a larger percentage of its assets in fewer issuers than diversified mutual funds. Thus, the Fund may be more susceptible to adverse developments affecting any single issuer held in its portfolio, and may be more susceptible to greater losses because of these developments.

10. INDEMNIFICATIONS

Under the Trust's organizational documents, its Trustees, officers, employees and agents are indemnified, to the extent permitted by the Act and state law, against certain liabilities that may arise out of performance of their duties to the Funds. Additionally, in the course of business, the Funds enter into contracts that contain a variety of indemnification clauses. The Funds' maximum exposure under these arrangements is unknown, as this would involve future claims that may be made against the Funds that have not yet occurred. However, GSAM believes the risk of loss under these arrangements to be remote.

11. SUBSEQUENT EVENTS

Subsequent events after the Statements of Assets and Liabilities date have been evaluated, and GSAM has concluded that there is no impact requiring adjustment or disclosure in the financial statements.

Voting Results of Special Meeting of Shareholders (Unaudited)

A Special Meeting (the "Meeting") of Goldman Sachs Trust ("GST") was held on January 8, 2021. At the Meeting, the shareholders of the Goldman Sachs Emerging Markets Equity Insights Fund approved a change to the Fund's sub-classification under the Act from "diversified" to "non-diversified." The Trust's shareholders voted as follows:

Proposal 1.			
To approve a change to each respective Fund's sub-classification under the Investment			
Company Act of 1940 from "diversified" to "non-diversified" and to eliminate any			
related fundamental investment restriction for each respective Fund.	For	Against	Abstain
Emerging Market Equity Insights Fund	89,845,427.283	3,294,805.500	675,070.372

Report of Independent Registered Public Accounting Firm

To the Board of Trustees of Goldman Sachs Trust and Shareholders of Goldman Sachs Emerging Markets Equity Insights Fund, Goldman Sachs International Equity Insights Fund, and Goldman Sachs International Small Cap Insights Fund

Opinions on the Financial Statements

We have audited the accompanying statements of assets and liabilities, including the schedules of investments, of Goldman Sachs Emerging Markets Equity Insights Fund, Goldman Sachs International Equity Insights Fund, and Goldman Sachs International Small Cap Insights Fund (three of the funds constituting Goldman Sachs Trust, hereafter collectively referred to as the "Funds") as of October 31, 2021, the related statements of operations for the year ended October 31, 2021, the statements of changes in net assets for each of the two years in the period ended October 31, 2021, including the related notes, and the financial highlights for each of the periods indicated therein (collectively referred to as the "financial statements"). In our opinion, the financial statements present fairly, in all material respects, the financial position of each of the Funds as of October 31, 2021, the results of each of their operations for the year then ended, the changes in each of their net assets for each of the two years in the period ended October 31, 2021 and each of the financial highlights for each of the periods indicated therein in conformity with accounting principles generally accepted in the United States of America.

Basis for Opinions

These financial statements are the responsibility of the Funds' management. Our responsibility is to express an opinion on the Funds' financial statements based on our audits. We are a public accounting firm registered with the Public Company Accounting Oversight Board (United States) (PCAOB) and are required to be independent with respect to the Funds in accordance with the U.S. federal securities laws and the applicable rules and regulations of the Securities and Exchange Commission and the PCAOB.

We conducted our audits of these financial statements in accordance with the standards of the PCAOB. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement, whether due to error or fraud.

Our audits included performing procedures to assess the risks of material misstatement of the financial statements, whether due to error or fraud, and performing procedures that respond to those risks. Such procedures included examining, on a test basis, evidence regarding the amounts and disclosures in the financial statements. Our audits also included evaluating the accounting principles used and significant estimates made by management, as well as evaluating the overall presentation of the financial statements. Our procedures included confirmation of securities owned as of October 31, 2021 by correspondence with the custodian, transfer agent and brokers; when replies were not received from brokers, we performed other auditing procedures. We believe that our audits provide a reasonable basis for our opinions.

/s/ PricewaterhouseCoopers LLP

Boston, Massachusetts December 23, 2021

We have served as the auditor of one or more investment companies in the Goldman Sachs fund complex since 2000.

Fund Expenses — Six Month Period Ended October 31, 2021 (Unaudited)

As a shareholder of Class A, Class C, Institutional, Service, Investor, Class R or Class P Shares of a Fund you incur two types of costs: (1) transaction costs, including sales charges on purchase payments (with respect to Class A Shares) and contingent deferred sales charges on redemptions (with respect to Class C Shares); and contingent deferred sales charges on redemptions (with respect to Class A, Class C, Service and Class R Shares); and other Fund expenses. This example is intended to help you understand your ongoing costs (in dollars) of investing in Class A, Class R and Class P Shares of the Funds and to compare these costs with the ongoing costs of investing in other mutual funds.

The example is based on an investment of \$1,000 invested at the beginning of the period and held for the entire period from May 01, 2021 through October 31, 2021, which represents a period of 184 days of a 365 day year. Actual Expenses — The first line under each share class in the table below provides information about actual account values and actual expenses. You may use the information in this line, together with the amount you invested, to estimate the expenses that you paid over the period. Simply divide your account value by \$1,000 (for example, an \$8,600 account value divided by \$1,000=8.6), then multiply the result by the number in the first line under the heading entitled "Expenses Paid" to estimate the expenses you paid on your account during this period. Hypothetical Example for Comparison Purposes — The second line under each share class in the table below provides information about hypothetical account values and hypothetical expenses based on the Funds' actual net expense ratio and an assumed rate of return of 5% per year before expenses, which is not the Funds' actual return. The hypothetical account values and expenses may not be used to estimate the actual ending account balance or expenses you paid for the period. You may use this information to compare the ongoing costs of investing in the Funds and other funds. To do so, compare this 5% hypothetical examples that appear in the shareholder reports of the other funds.

Please note that the expenses shown in the table are meant to highlight your ongoing costs only and do not reflect any transactional costs, such as sales charges, redemption fees or exchange fees. Therefore, the second line of the table is useful in comparing ongoing costs only, and will not help you determine the relative total costs of owning different funds. In addition, if these transactional costs were included, your costs would have been higher.

Background

The Goldman Sachs Emerging Markets Equity Insights Fund, Goldman Sachs International Equity Insights Fund, and Goldman Sachs International Small Cap Insights Fund (the "Funds") are investment portfolios of Goldman Sachs Trust (the "Trust"). The Board of Trustees oversees the management of the Trust and reviews the investment performance and expenses of the Funds at regularly scheduled meetings held throughout the year. In addition, the Board of Trustees determines annually whether to approve the continuance of the Trust's investment management agreement (the "Management Agreement") with Goldman Sachs Asset Management, L.P. (the "Investment Adviser") on behalf of the Funds.

The Management Agreement was most recently approved for continuation until June 30, 2022 by the Board of Trustees, including those Trustees who are not parties to the Management Agreement or "interested persons" (as defined in the Investment Company Act of 1940, as amended) of any party thereto (the "Independent Trustees"), at a meeting held on June 15-16, 2021 (the "Annual Meeting").

The review process undertaken by the Trustees spans the course of the year and culminates with the Annual Meeting. To assist the Trustees in their deliberations, the Trustees have established a Contract Review Committee (the "Committee"), comprised of the Independent Trustees. The Committee held two meetings over the course of the year since the Management Agreement was last approved. At those Committee meetings, regularly scheduled Board or other committee meetings, and/or the Annual Meeting, matters relevant to the renewal of the Management Agreement were considered by the Board, or the Independent Trustees, as applicable. With respect to each Fund, such matters included:

- (a) the nature and quality of the advisory, administrative, and other services provided to the Fund by the Investment Adviser and its affiliates, including information about:
 - (i) the structure, staff, and capabilities of the Investment Adviser and its portfolio management teams;
 - (ii) the groups within the Investment Adviser and its affiliates that support the portfolio management teams or provide other types of necessary services, including fund services groups (e.g., accounting and financial reporting, tax, shareholder services, and operations); controls and risk management groups (e.g., legal, compliance, valuation oversight, credit risk management, internal audit, compliance testing, market risk analysis, finance, and central funding); sales and distribution support groups, and others (e.g., information technology and training);
 - (iii) trends in employee headcount;
 - (iv) the Investment Adviser's financial resources and ability to hire and retain talented personnel and strengthen its operations; and
 - (v) the parent company's support of the Investment Adviser and its mutual fund business, as expressed by the firm's senior management;
- (b) information on the investment performance of the Fund, including comparisons to the performance of similar mutual funds, as provided by a third-party mutual fund data provider engaged as part of the contract review process (the "Outside Data Provider"), a benchmark performance index, and (in the case of the Emerging Markets Equity Insights Fund and International Small Cap Insights Fund) a composite of accounts with comparable investment strategies managed by the Investment Adviser; and information on general investment outlooks in the markets in which the Fund invests;
- (c) information provided by the Investment Adviser indicating the Investment Adviser's views on whether the Fund's peer group and/or benchmark index had high, medium, or low relevance given the Fund's particular investment strategy;
- (d) the terms of the Management Agreement and other agreements with affiliated service providers entered into by the Trust on behalf of the Fund;
- (e) fee and expense information for the Fund, including:
 - the relative management fee and expense levels of the Fund as compared to those of comparable funds managed by other advisers, as provided by the Outside Data Provider;
 - (ii) the Fund's expense trends over time; and
 - (iii) to the extent the Investment Adviser manages other types of accounts (such as bank collective trusts, private wealth management accounts, institutional separate accounts, sub-advised mutual funds, and non-U.S. funds) having investment objectives and policies similar to those of the Fund, comparative information on the advisory fees charged and services provided to those accounts by the Investment Adviser;
- (f) with respect to the extensive investment performance and expense comparison data provided by the Outside Data Provider, its processes in producing that data for the Fund;
- (g) the undertakings of the Investment Adviser and its affiliates to implement fee waivers and/or expense limitations;
- (h) information relating to the profitability of the Management Agreement and the transfer agency and distribution and service arrangements of the Fund to the Investment Adviser and its affiliates;

- (i) whether the Fund's existing management fee schedule adequately addressed any economies of scale;
- a summary of the "fall-out" benefits derived by the Investment Adviser and its affiliates from their relationships with the Fund, including the fees received by the Investment Adviser's affiliates from the Fund for transfer agency, securities lending, portfolio trading, distribution and other services;
- (k) a summary of potential benefits derived by the Fund as a result of its relationship with the Investment Adviser;
- (l) information regarding commissions paid by the Fund and broker oversight, other information regarding portfolio trading, and how the Investment Adviser carries out its duty to seek best execution;
- (m) portfolio manager ownership of Fund shares; the manner in which portfolio manager compensation is determined; and the number and types of accounts managed by the portfolio managers;
- (n) the nature and quality of the services provided to the Fund by its unaffiliated service providers, and the Investment Adviser's general oversight and evaluation (including reports on due diligence) of those service providers as part of the administrative services provided under the Management Agreement; and
- (o) the Investment Adviser's processes and policies addressing various types of potential conflicts of interest; its approach to risk management; the annual review of the effectiveness of the Fund's compliance program; and periodic compliance reports.

The Trustees also received an overview of the Funds' distribution arrangements. They received information regarding the Funds' assets, share purchase and redemption activity, and payment of distribution, service, and shareholder administration fees, as applicable. Information was also provided to the Trustees relating to revenue sharing payments made by and services provided by the Investment Adviser and its affiliates to intermediaries that promote the sale, distribution, and/or servicing of Fund shares. The Independent Trustees also discussed the broad range of other investment choices that are available to Fund investors, including the availability of comparable funds managed by other advisers.

The presentations made at the Board and Committee meetings and at the Annual Meeting encompassed the Funds and other mutual funds for which the Board of Trustees has responsibility. In evaluating the Management Agreement at the Annual Meeting, the Trustees relied upon their knowledge, resulting from their meetings and other interactions throughout the year, of the Investment Adviser and its affiliates, their services, and the Funds. In conjunction with these meetings, the Trustees received written materials and oral presentations on the topics covered, and the Investment Adviser addressed the questions and concerns of the Trustees, including concerns regarding the investment performance of certain of the funds they oversee. The Independent Trustees were advised by their independent legal counsel regarding their responsibilities and other regulatory requirements related to the approval and continuation of mutual fund investment management agreements under applicable law. In addition, the Investment Adviser and its affiliates provided the Independent Trustees with a written response to a formal request for information sent on behalf of the Independent Trustees by their independent legal counsel. During the course of their deliberations, the Independent Trustees met in executive sessions with their independent legal counsel, without representatives of the Investment Adviser or its affiliates present.

Nature, Extent, and Quality of the Services Provided Under the Management Agreement

As part of their review, the Trustees considered the nature, extent, and quality of the services provided to the Funds by the Investment Adviser. In this regard, the Trustees considered both the investment advisory services and non-advisory services that are provided by the Investment Adviser and its affiliates. The Trustees noted the transition in the leadership and changes in personnel of various of the Investment Adviser's portfolio management teams that had occurred in recent periods, and the ongoing recruitment efforts aimed at bringing high quality investment talent to the Investment Adviser. They also noted the Investment Adviser's commitment to maintaining high quality systems and expending substantial resources to respond to ongoing changes to the market, regulatory and control environment in which the Funds and their service providers operate, including changes associated with the COVID-19 pandemic, as well as the efforts of the Investment Adviser and its affiliates to combat cyber security risks. The Trustees also considered information regarding the Investment Adviser's business continuity planning and remote operations capabilities. The Trustees concluded that the Investment Adviser continued to commit substantial financial and operational resources to the Funds and expressed confidence that the Investment Adviser would continue to do so in the future. The Trustees also recognized that the Investment Adviser had made significant commitments to address regulatory compliance requirements applicable to the Funds and the Investment Adviser and its affiliates.

Investment Performance

The Trustees also considered the investment performance of the Funds. In this regard, they compared the investment performance of each Fund to its peers using rankings and ratings compiled by the Outside Data Provider as of December 31, 2020, and updated performance information prepared by the Investment Adviser using the peer group identified by the Outside Data

Provider as of March 31, 2021. The information on each Fund's investment performance was provided for the one-, three-, five-, and ten-year periods ending on the applicable dates. The Trustees also reviewed each Fund's investment performance relative to its performance benchmark. As part of this review, they considered the investment performance trends of the Funds over time, and reviewed the investment performance of each Fund in light of its investment objective and policies and market conditions. The Trustees also received information comparing the Emerging Markets Equity Insights Fund's and International Small Cap Insights Fund's performance to that of composites of accounts with comparable investment strategies managed by the Investment Adviser.

In addition, the Trustees considered materials prepared and presentations made by the Investment Adviser's senior management and portfolio management personnel in which Fund performance was assessed. The Trustees also considered the Investment Adviser's periodic reports with respect to the Funds' risk profiles, and how the Investment Adviser's approach to risk monitoring and management influences portfolio management. They noted the efforts of the Funds' portfolio management team to continue to enhance the investment models used in managing the Funds.

The Trustees observed that the Emerging Markets Equity Insights Fund's Institutional Shares had placed in the top half of the Fund's peer group for the one-, three-, five-, and ten-year periods, and had outperformed the Fund's benchmark index for the one-, five-, and ten-year periods and underperformed for the three-year period ended March 31, 2021. They noted that the International Equity Insights Fund's Institutional Shares had placed in the top half of the Fund's peer group for the one- and ten-year periods, in the third quartile for the five-year period, and in the fourth quartile for the three-year period, and had outperformed the Fund's benchmark index for the one-, five-, ten-year periods and underperformed for the three-year period ended March 31, 2021. The Trustees considered that the International Small Cap Insights Fund's Institutional Shares had placed in the top half of the Fund's peer group for the five- and ten-year periods and in the third quartile for the one- and three-year periods, and had underperformed the Fund's benchmark index for the one-, three-, five-, and ten-year periods ended March 31, 2021.

Costs of Services Provided and Competitive Information

The Trustees considered the contractual terms of the Management Agreement and the fee rates payable by each Fund thereunder. In this regard, the Trustees considered information on the services rendered by the Investment Adviser to the Funds, which included both advisory and administrative services that were directed to the needs and operations of the Funds as registered mutual funds.

In particular, the Trustees reviewed analyses prepared by the Outside Data Provider regarding the expense rankings of the Funds. The analyses provided a comparison of each Fund's management fee and breakpoints to those of a relevant peer group and category universe; an expense analysis which compared each Fund's overall net and gross expenses to a peer group and a category universe; and data comparing each Fund's net expenses to the peer and category medians. The analyses also compared each Fund's other expenses and fee waivers/reimbursements to those of the peer group and category medians. The Trustees concluded that the comparisons provided by the Outside Data Provider were useful in evaluating the reasonableness of the management fees and total expenses paid by the Funds.

In addition, the Trustees considered the Investment Adviser's undertakings to implement fee waivers and/or expense limitations. They also considered, to the extent that the Investment Adviser manages other types of accounts having investment objectives and policies similar to those of the Funds, comparative fee information for services provided by the Investment Adviser to those accounts, and information that indicated that services provided to the Funds differed in various significant respects from the services provided to other types of accounts which, in many cases, operated under less stringent legal and regulatory structures, required fewer services from the Investment Adviser to a smaller number of client contact points, and were less time-intensive.

In addition, the Trustees noted that shareholders are able to redeem their Fund shares at any time if shareholders believe that the Fund fees and expenses are too high or if they are dissatisfied with the performance of the Fund.

Profitability

The Trustees reviewed each Fund's contribution to the Investment Adviser's revenues and pre-tax profit margins. In this regard the Trustees noted that they had received, among other things, profitability analyses and summaries, revenue and expense schedules by Fund and by function (*i.e.*, investment management, transfer agency and distribution and service), and information on the Investment Adviser's expense allocation methodology. They observed that the profitability and expense figures are substantially similar to those used by the Investment Adviser for many internal purposes, including compensation decisions among

various business groups, and are thus subject to a vigorous internal debate about how certain revenue and expenses should be allocated. The Trustees also noted that the internal audit group within the Goldman Sachs organization periodically audits the expense allocation methodology and that the internal audit group was satisfied with the reasonableness, consistency, and accuracy of the Investment Adviser's expense allocation methodology. Profitability data for each Fund was provided for 2020 and 2019, and the Trustees considered this information in relation to the Investment Adviser's overall profitability.

Economies of Scale

The Trustees considered the information that had been provided regarding whether there have been economies of scale with respect to the management of the Funds. The Trustees also considered the breakpoints in the fee rate payable under the Management Agreement for each of the Funds at the following annual percentage rates of the average daily net assets of the Funds:

	Emerging Markets Equity Insights Fund	International Equity Insights Fund	International Small Cap Insights Fund	
First \$1 billion	1.00%	0.81%	0.85%	
Next \$1 billion	1.00	0.73	0.85	
Next \$3 billion	0.90	0.69	0.77	
Next \$3 billion	0.86	0.68	0.73	
Over \$8 billion	0.84	0.67	0.72	

The Trustees noted that the breakpoints were designed to share potential economies of scale, if any, with the Funds and their shareholders as assets under management reach those asset levels. The Trustees considered the amounts of assets in the Funds; the Funds' recent share purchase and redemption activity; the information provided by the Investment Adviser relating to the costs of the services provided by the Investment Adviser and its affiliates and their realized profits; information comparing fee rates charged by the Investment Adviser with fee rates charged to other funds in the peer groups; and the Investment Adviser's undertaking to limit certain expenses of the Funds that exceed specified levels. Upon reviewing these matters at the Annual Meeting, the Trustees concluded that the fee breakpoints represented a means of assuring that benefits of scalability, if any, would be passed along to shareholders at the specified asset levels. They also noted that the Investment Adviser had passed along savings to shareholders of the International Equity Insights Fund and International Small Cap Insights Fund, each of which had asset levels above at least the first breakpoint during the prior fiscal year.

Other Benefits to the Investment Adviser and Its Affiliates

The Trustees also considered the other benefits derived by the Investment Adviser and its affiliates from their relationships with the Funds as stated above, including: (a) transfer agency fees received by Goldman Sachs & Co. LLC ("Goldman Sachs"); (b) brokerage and futures commissions earned by Goldman Sachs for executing securities and futures transactions on behalf of the Funds; (c) trading efficiencies resulting from aggregation of orders of the Funds with those for other funds or accounts managed by the Investment Adviser; (d) fees earned by Goldman Sachs Agency Lending ("GSAL"), an affiliate of the Investment Adviser, as securities lending agent (and fees earned by the Investment Adviser for managing the fund in which the Funds' cash collateral is invested); (e) the Investment Adviser's ability to leverage the infrastructure designed to service the Funds on behalf of its other clients; (f) the Investment Adviser's ability to cross-market other products and services to Fund shareholders; (g) Goldman Sachs' retention of certain fees as Fund Distributor; (h) the Investment Adviser's ability to negotiate better pricing with custodians on behalf of its other clients, as a result of the relationship with the Funds; (i) the investment of cash and cash collateral in money market funds managed by the Investment Adviser that will result in increased assets under management for those money market funds; (j) the investment in exchange-traded funds ("ETFs") managed by the Investment Adviser that will result in increased assets under management for those ETFs and may facilitate the development of the Investment Adviser's ETF advisory business; and (k) the possibility that the working relationship between the Investment Adviser and the Funds' third-party service providers may cause those service providers to be more likely to do business with other areas of Goldman Sachs. In the course of considering the foregoing, the Independent Trustees requested and received further information quantifying certain of these fall-out benefits.

Other Benefits to the Funds and Their Shareholders

The Trustees also noted that the Funds receive certain other potential benefits as a result of their relationship with the Investment Adviser, including: (a) trading efficiencies resulting from aggregation of orders of the Funds with those of other funds

or accounts managed by the Investment Adviser; (b) enhanced servicing from vendors due to the volume of business generated by the Investment Adviser and its affiliates; (c) enhanced servicing from broker-dealers due to the volume of business generated by the Investment Adviser and its affiliates; (d) the Investment Adviser's ability to negotiate favorable terms with derivatives counterparties on behalf of the Funds as a result of the size and reputation of the Goldman Sachs organization; (e) the advantages received from the Investment Adviser's knowledge and experience gained from managing other accounts and products; (f) the Investment Adviser's ability to hire and retain qualified personnel to provide services to the Funds because of the reputation of the Goldman Sachs organization; (g) the Funds' access, through the Investment Adviser, to certain firm-wide resources (e.g., proprietary risk management systems and databases), subject to certain restrictions; (h) the Funds' ability to participate in the securities lending program administered by GSAL, as measured by the revenue received by the Funds in connection with the program; and (i) the Funds' access to certain affiliated distribution channels. In addition, the Trustees noted the competitive nature of the mutual fund marketplace, and considered that many of the Funds' shareholders invested in the Funds in part because of the Funds' relationship with the Investment Adviser and that those shareholders have a general expectation that the relationship will continue.

Conclusion

In connection with their consideration of the Management Agreement, the Trustees gave weight to each of the factors described above, but did not identify any particular factor as controlling their decision. After deliberation and consideration of all of the information provided, including the factors described above, the Trustees concluded, in the exercise of their business judgment, that the management fees paid by each of the Funds were reasonable in light of the services provided to it by the Investment Adviser, the Investment Adviser's costs and each Fund's current and reasonably foreseeable asset levels. The Trustees unanimously concluded that the Investment Adviser's continued management likely would benefit each Fund and its shareholders and that the Management Agreement should be approved and continued with respect to each Fund until June 30, 2022.

Trustees and Officers (Unaudited) (continued) Interested Trustee*

Name, Address and Age ¹	Position(s) Held with the Trust	Term of Office and Length of Time Served ²	Principal Occupation(s) During Past 5 Years	Number of Portfolios in Fund Complex Overseen by Trustee ³	Other Directorships Held by Trustee ⁴
James A. McNamara Age: 59	Trustee and President	Since 2007	Advisory Director, Goldman Sachs (January 2018- Present); Managing Director, Goldman Sachs (January 2000-December 2017); Director of Institutional Fund Sales, GSAM (April 1998- December 2000); and Senior Vice President and Manager, Dreyfus Institutional Service Corporation (January 1993-April 1998).	168	None
			President and Trustee — Goldman Sachs Trust; Goldman Sachs Variable Insurance Trust; Goldman Sachs Trust II; Goldman Sachs MLP and Energy Renaissance Fund; Goldman Sachs ETF Trust; Goldman Sachs Credit Income Fund; and Goldman Sachs Real Estate Diversified Income Fund.		

^{*} Mr. McNamara is considered to be an "Interested Trustee" because he holds positions with Goldman Sachs and owns securities issued by The Goldman Sachs Group, Inc. Mr. McNamara holds comparable positions with certain other companies of which Goldman Sachs, GSAM or an affiliate thereof is the investment adviser, administrator and/or distributor.

Additional information about the Trustees is available in the Funds' Statement of Additional Information, which can be obtained from Goldman Sachs free of charge by calling this toll-free number (in the United States of America): 1-800-526-7384.

¹ Each Trustee may be contacted by writing to the Trustee, c/o Goldman Sachs, 200 West Street, New York, New York, 10282, Attn: Caroline Kraus. Information is provided as of October 31, 2021.

² Subject to such policies as may be adopted by the Board from time-to-time, each Trustee holds office for an indefinite term, until the earliest of: (a) the election of his or her successor; (b) the date the Trustee resigns or is removed by the Board or shareholders, in accordance with the Trust's Declaration of Trust; or (c) the termination of the Trust. The Board has adopted policies which provide that each Independent Trustee shall retire as of December 31st of the calendar year in which he or she reaches (a) his or her 75th birthday or (b) the 15th anniversary of the date he or she became a Trustee, whichever is earlier, unless a waiver of such requirements shall have been adopted by a majority of the other Trustees. These policies may be changed by the Trustees without shareholder vote.

³ The Goldman Sachs Fund Complex includes certain other companies listed above for each respective Trustee. As of October 31, 2021, Goldman Sachs Trust consisted of 92 portfolios (90 of which offered shares to the public); Goldman Sachs Variable Insurance Trust consisted of 17 portfolios (13 of which offered shares to the public); Goldman Sachs Trust II consisted of 18 portfolios (16 of which offered shares to the public); Goldman Sachs ETF Trust consisted of 38 portfolios (21 of which offered shares to the public); and Goldman Sachs MLP and Energy Renaissance Fund, Goldman Sachs Credit Income Fund and Goldman Sachs Real Estate Diversified Income Fund each consisted of one portfolio. Goldman Sachs Credit Income Fund did not offer shares to the public.

⁴ This column includes only directorships of companies required to report to the Securities and Exchange Commission under the Securities Exchange Act of 1934 (i.e., "public companies") or other investment companies registered under the Act.

Trustees and Officers (Unaudited) (continued) Officers of the Trust*

The reports concerning the Funds included in this shareholder report may contain certain forward-looking statements about the factors that may affect the performance of the Funds in the future. These statements are based on Fund management's predictions and expectations concerning certain future events and their expected impact on the Funds, such as performance of the economy as a whole and of specific industry sectors, changes in the levels of interest rates, the impact of developing world events, and other factors that may influence the future performance of the Funds. Management believes these forward-looking statements to be reasonable, although they are inherently uncertain and difficult to predict. Actual events may cause adjustments in portfolio management strategies from those currently expected to be employed.

A description of the policies and procedures that the Funds use to determine how to vote proxies relating to portfolio securities and information regarding how a Fund voted proxies relating to portfolio securities during the most recent 12-month period ended June 30 is available (i) without charge, upon request by calling 1-800-526-7384 (for Retail Shareholders) or 1-800-621-2550 (for Institutional Shareholders); and (ii) on the Securities and Exchange Commission web site at http://www.sec.gov.

Economic and market forecasts presented herein reflect a series of assumptions and judgments as of the date of this presentation and are subject to change without notice. These forecasts do not take into account the specific investment objectives, restrictions, tax and financial situation or other needs of any specific client. Actual data will vary and may not be reflected here. These forecasts are subject to high levels of uncertainty that may affect actual performance. Accordingly, these forecasts should be viewed as merely representative of a broad range of possible outcomes. These forecasts are estimated, based on assumptions, and are subject to significant revision and may change materially as economic and market conditions change. Goldman Sachs has no obligation to provide updates or changes to these forecasts. Case studies and examples are for illustrative purposes only.

The Global Industry Classification Standard (GICS) was developed by and is the exclusive property and a service mark of Morgan Stanley Capital International Inc. (MSCI) and Standard & Poor's, a division of The McGraw-Hill Companies, Inc. (S&P) and is licensed for use by Goldman Sachs. Neither MSCI, S&P nor any other party involved in making or compiling the GICS or any GICS classifications makes any express or implied warranties or representations with respect to such standard or classification (or the results to be obtained by the use thereof), and all such parties hereby expressly disclaim all warranties of originality, accuracy, completeness, merchantability or fitness for a particular purpose with respect to any of such standard or classification. Without limiting any of the foregoing, in no event shall MSCI, S&P, any of their affiliates or any third party involved in making or compiling the GICS or any GICS classifications have any liability for any direct, indirect, special, punitive, consequential or any other damages (including lost profits) even if notified of the possibility of such damages.

The Funds will file their portfolio holdings for each month in a fiscal quarter within 60 days after the end of the relevant fiscal quarter on Form N-PORT. Portfolio holdings information for the third month of each fiscal quarter will be made available on the SEC's web site at http://www.sec.gov. Portfolio holdings information may be obtained upon request and without charge by calling 1-800-526-7384 (for Retail Shareholders) or 1-800-621-2550 (for Institutional Shareholders).

Fund holdings and allocations shown are unaudited, and may not be representative of current or future investments. Fund holdings and allocations may not include the Fund's entire investment portfolio, which may change at any time. Fund holdings should not be relied on in making investment decisions and should not be construed as research or investment advice regarding particular securities. Current and future holdings are subject to risk.

The portfolio risk management process includes an effort to monitor and manage risk, but does not imply low risk. Diversification does not protect an investor from market risk and does not ensure a profit.

This material is not authorized for distribution to prospective investors unless preceded or accompanied by a current Prospectus or summary prospectus, if applicable. Investors should consider a Fund's objective, risks, and charges and expenses, and read the summary prospectus, if available, and/or the Prospectus carefully before investing or sending money. The summary prospectus, if available, and the Prospectus contain this and other information about a Fund and may be obtained from your authorized dealer or from Goldman Sachs & Co. LLC by calling (retail – 1-800-526-7384) (institutional – 1-800-621-2550).
