## INVESTMENT OBJECTIVE AND STRATEGY

The fund seeks long-term capital appreciation and growth of income with current income a secondary objective.

Diversifies its assets widely among a set of T. Rowe Price domestic and international equity mutual funds representing specific market segments and a money market fund.

By maintaining broad exposure, the fund attempts to reduce the impact of markets that are declining and benefit from good performance in particular market segments over time.

## BENEFITS AND RISKS

Offers a professionally managed allocation of assets among a broad range of underlying funds that invest across geography, market capitalization, and style.

Because it invests in a variety of strategies, the fund could benefit from diversification.

Share price can fall because of weakness in the broad market, a particular industry, or specific holdings.

Underlying funds that invest in smaller or foreign companies may experience greater price swings than those holding stocks of larger or U.S. companies.

## CUMULATIVE RETURNS

Growth of \$10,000
