## Fund description

The Fund seeks a favorable long-term total return, mainly through capital appreciation, by investing primarily in a portfolio of emerging market equity investments based on a market index. It normally invests at least 80% of its assets in equity securities within its benchmark index, the MSCI Emerging Markets Index, or in instruments with economic characteristics similar to all or a portion of this index. The Fund will invest in most, but not necessarily all, of the stocks within its benchmark, and will attempt to closely match the overall investment attributes of this index.
