About Risk: The value of investments held by the Fund may increase or decrease in response to economic, and financial events (whether real, expected or perceived) in the U.S. and global markets. The Fund's performance may not match or correlate to that of its Index, either on a daily or aggregate basis due to factors such as Fund expenses, imperfect correlation, rounding of share prices, changes to the composition of the Index, regulatory policies, high portfolio turnover and the use of leverage (if any). The Fund expects to hold the common stock of each company in the index it is designed to track, regardless of market conditions or individual investment performance, which could cause the Fund to underperform funds that employ an active strategy. The value of equity securities is sensitive to stock market volatility. Investments in foreign instruments or currencies can involve greater risk and volatility than U.S. investments because of adverse market, economic, political, regulatory, geopolitical, currency exchange rates or other conditions. Investing primarily in responsible investments carries the risk that, under certain market conditions, the Fund may underperform funds that do not utilize a responsible investment strategy. The Fund is exposed to liquidity risk when trading volume, lack of a market maker or trading partner, large position size, market conditions, or legal restrictions impair its ability to sell particular investments or to sell them at advantageous market prices. The impact of the coronavirus on global markets could last for an extended period and could adversely affect the Fund's performance. No fund is a complete investment program and you may lose money investing in a fund. The Fund may engage in other investment practices that may involve additional risks and you should review the Fund prospectus for a complete description.
