The performance data quoted represents past performance, which is no guarantee of future results. Share price and investment return fluctuate, and an investor's shares may be worth more or less than original cost upon redemption. Current performance may be lower or higher than the performance quoted. Performance for periods less than 1 year is not annualized. Go to [im.bnymellon.com](http://im.bnymellon.com) for the fund's most recent month-end returns. The net expense ratio reflects a contractual expense reduction agreement, without which, the returns would have been lower. The agreement may not be amended without the approval of the fund's shareholders. Total Expense Ratios: Investor Shares 0.51%, Class I 0.26%. Net Expense Ratios: Investor Shares 0.50%, Class I 0.25%. Not all classes of shares may be available to all investors or through all broker-dealer platforms.

<sup>1</sup>The total return performance figures for Class I shares of the fund represent the performance of the fund's Investor shares, for periods prior to 8/31/16, the inception date for Class I shares, and the performance of Class I from that inception date. Performance reflects the applicable class's distribution/servicing fees since the inception date. Investors should consider, when deciding whether to purchase a particular class of shares, the investment amount, class restrictions, anticipated holding period and other relevant factors. <sup>2</sup>Portfolio composition is as of 3/31/2022 and is subject to change at any time. Asset Exposure percentages include any exposure through long futures positions but do not include any short positions or currency transactions. <sup>3</sup>Performance figures may reflect reimbursements or fee waivers, without which the performance would have been lower. <sup>4</sup>Source: FactSet. The S&P SmallCap 600® Index measures the small-cap segment of the U.S. equity market. ## Goal/Approach

The fund seeks to match the performance of the Standard & Poor's SmallCap 600 Index (the "Index"). To pursue its goal, the fund generally is fully invested in all of the stocks that comprise the S&P SmallCap 600® Index and in futures whose performance is tied to the index. The fund generally invests in all 600 stocks in the index in proportion to their weighting in the index; however, at times, the fund may invest in a representative sample of stocks included in the index and in futures whose performance is tied to the index. Under these circumstances, the fund expects to invest in approximately 500 or more of the stocks in the index.

## Portfolio Management

The fund's investment adviser is BNY Mellon Investment Adviser, Inc. (BNYM Investment Adviser). David France, CFA, Todd Frysinger, CFA, Vlasta Sheremeta, CFA, Michael Stoll and Marlene Walker Smith are the fund's primary portfolio managers, positions they have held since October 2020. Messrs. France, Frysinger and Stoll and Ms. Sheremeta are each a vice president and senior portfolio manager at Mellon Investments Corporation (Mellon), an affiliate of BNYM Investment Adviser. Ms. Walker Smith is a director and head of equity index portfolio management at Mellon. Messrs. France, Frysinger, Stoll and Ms. Sheremeta and Walker Smith also are employees of BNYM Investment Adviser.

\*Source: Morningstar. The Morningstar Rating™ for funds, or "star rating," is calculated for managed products with at least a 3-year history. It is calculated based on a Morningstar Risk-Adjusted Return measure that accounts for variation in a managed product's monthly excess performance (not including the effects of sales charges, loads and redemption fees if applicable), placing more emphasis on downward variations and rewarding consistent performance. Managed products, including open-end mutual funds, closed-end funds and exchange-traded funds, are considered a single population for comparative purposes. The top 10% of products in each product category receive 5 stars, the next 22.5% receive 4 stars, the next 35% receive 3 stars, the next 22.5% receive 2 stars, and the bottom 10% receive 1 star. The Overall Morningstar Rating for a managed product is derived from a weighted average of the performance figures associated with its 3-, 5-, and 10-year (if applicable) Morningstar Rating metrics. ©2022 Morningstar, Inc. All rights reserved. The information contained herein: (1) is proprietary to Morningstar and/or its content providers; (2) may not be copied or distributed; and (3) is not warranted to be accurate, complete, or timely. Neither Morningstar nor its content providers are responsible for any damages or losses arising from any use of this information. **Past performance is no guarantee of future results.** The fund represents a single portfolio with multiple share classes that have different expense structures. Other share classes may have achieved different results. Ratings do not reduce investment risk and are subject to change. The Morningstar Extended Performance Rating is calculated by adjusting the performance of the fund's oldest share class to reflect the fee structure of the younger share class, and then compounding the adjusted plus actual monthly returns into the extended performance Risk-Adjusted Return for the 3-, 5- and 10-year time periods.

<sup>1</sup>Portfolio composition is as of 3/31/2022 and is subject to change at any time. Asset Exposure percentages include any exposure through long futures positions but do not include any short positions or currency transactions.

**Risks:** Equities are subject to market, market sector, market liquidity, issuer, and investment style risks, among other factors, to varying degrees. The fund uses an **indexing strategy**. It does not attempt to manage market volatility, use defensive strategies or reduce the effects of any long-term periods of poor stock performance. **Small and midsized company stocks** tend to be more volatile and less liquid than larger company stocks as these companies are less established and have more volatile earnings histories. *Recent market risks include pandemic risks related to COVID-19. The effects of COVID-19 have contributed to increased volatility in global markets and will likely affect certain countries, companies, industries and market sectors more dramatically than others. To the extent the fund may overweight its investments in certain countries, companies, industries or market sectors, such positions will increase the fund's exposure to risk of loss from adverse developments affecting those countries, companies, industries or sectors.*
