FUND OBJECTIVE & STRATEGY

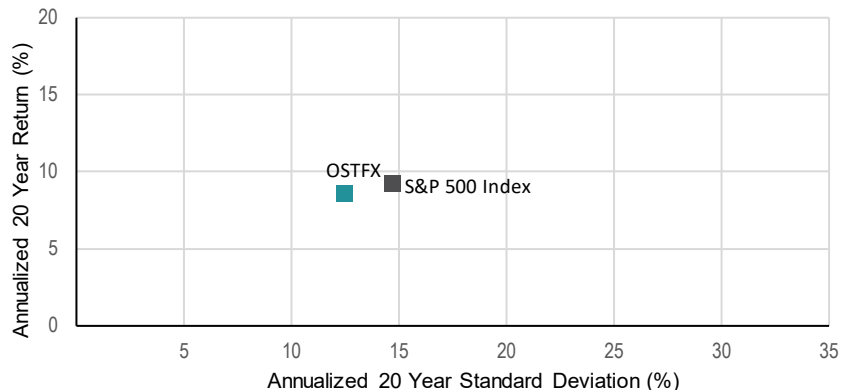

The Fund seeks to attain long-term total returns by investing primarily in common stocks of companies that the Adviser believes offer superior investment value. In selecting investments, the Adviser focuses on companies that it believes to be undervalued or otherwise out-of-favor in the market, but that have attractive growth prospects.

20 Year Risk and Return

The S&P 500 Index is an unmanaged index that is widely regarded as the standard for measuring large-cap U.S. stock market performance. The index does not incur expenses, is not available for investment, and includes the reinvestment of dividends.

Source for Active Share is Bloomberg. It is a measure of the percentage of holdings in a portfolio that differ from those of the benchmark. It is calculated by taking the sum of the absolute value of the differences of the weight of each holding in the portfolio versus the weight of each holding in the benchmark and dividing by two. Where the benchmark is the Russell 2000 Growth, the iShares Russell 2000 Growth ETF is used as a proxy.

Where the S&P 500 is the benchmark, the iShares S&P 500 ETF is used as a proxy.

The Osterweis Funds are available by prospectus only. The Funds' investment objectives, risks, charges and expenses must be considered carefully before investing. The summary and statutory prospectuses contain this and other important information about the Funds. You may obtain a summary or statutory prospectus by calling toll free at (866) 236-0050, or by visiting www.osterweis.com/statpro. Please read the prospectus carefully before investing to ensure the Fund is appropriate for your goals and risk tolerance.

Mutual fund investing involves risk. Principal loss is possible. The Osterweis Fund may invest in medium and smaller sized companies, which involve additional risks such as limited liquidity and greater volatility. The Fund may invest in foreign and emerging market securities, which involve greater volatility and political, economic and currency risks and differences in accounting methods. These risks may increase for emerging markets. The Fund may invest in Master Limited Partnerships, which involve risk related to energy prices, demand and changes in tax code. The Fund may invest in debt securities that are un-rated or rated below investment grade. Lower-rated securities may present an increased possibility of default, price volatility or illiquidity compared to higher-rated securities. Investments in debt securities typically decrease in value when interest rates rise. This risk is usually greater for longer-term debt securities.

Standard Deviation (Annualized): This measure of dispersion represents the degree to which an investment's returns vary around a mean. The greater the Standard Deviation, the more volatile an investment's returns were during the period measured. While the fund is no-load, management fees and other expenses still apply. Please refer to the prospectus for more information. Fund holdings and/or sector allocations are subject to change at any time and are not recommendations to buy or sell any security. Osterweis Capital Management is the adviser to the Osterweis Funds, which are distributed by Quasar Distributors, LLC. [OSTE-20210614-0238]
