

## Investment Objective and Strategy

The fund seeks long-term growth of capital. The fund will, under normal circumstances, invest at least 80% of its net assets in equity securities of issuers economically tied to countries other than the U.S., including those in emerging markets. Equity securities may be represented by other investment instruments, including depositary receipts, derivatives, and exchange-traded funds that track the return of a broadly-based international securities index. The fund may have exposure to non-U.S. stocks across any market capitalization and style and the fund's exposure will vary from time to time across sectors.

## Fund Details

Adviser	Great-West Capital Management LLC	
Morningstar Category	US Fund Foreign Large Blend	
Fund Size (\$Mil)	\$313.43

## Volatility Measures

	<u>3 Years</u>	<u>5 Years</u>
Beta	1.07	-N/A
Standard Deviation	18.64	-N/A
Sharpe Ratio	0.45	-N/A

### Statistics are for Instl Class Shares

**Beta** measures a fund's sensitivity to market

movements. A beta of 1.0 indicates a fund has been exactly as volatile as the market.

**Standard Deviation** is the percentage by which a fund's performance has varied from its average performance in any given month during the period indicated. The higher the standard deviation, the more variable the returns.

**Sharpe Ratio** measures the fund's excess return compared to a risk-free investment. The higher the Sharpe ratio, the better the returns relative to the risk taken.

**P/E Ratio** is the price of a stock divided by its earnings per share. **Turnover Ratio** as of 12/31/2021

## Top Holdings (%)

Portfolio Date: 12/31/2021

CSL Ltd	0.73
Ferguson	0.72

*Please consider the investment objectives, risks, fees and expenses carefully before investing. For this and other important information, you may obtain mutual fund prospectuses from your registered representative or by visiting [greatwestfunds.com](http://greatwestfunds.com). Read them carefully before investing.*

*Current performance may be lower or higher than performance data shown. Performance data quoted represents past performance and is not a guarantee or prediction of future results. The investment return and principal of an investment will fluctuate so that, when redeemed, shares may be worth more or less than their original cost. The returns and fund operating expenses are expressed as percentages. 3, 5 and 10 Year/Since Inception returns shown are annualized. For 10 Year/Since Inception, if the fund was not in existence for 10 years, returns shown are since inception. The net expense ratio may reflect a fee waiver. Absent the waiver, the performance would have been lower. Performance current to the most recent month-end can be found at [www.greatwestfunds.com](http://www.greatwestfunds.com). Performance does not include any fees or expenses of variable insurance products, if applicable. If such fees or expenses were included, returns would be lower.*

*Extended performance is derived from the historical performance of the oldest share class, prior to the newer class' inception date. Extended performance is adjusted down when the newer class is more expensive but is not adjusted for cases where the newer share class is less expensive.*

No assurance investment objectives will be met. Foreign investments involve special risks, including currency fluctuations, taxation differences and political developments. These risks may be heightened in emerging markets, which may also experience liquidity risk. See the prospectus for a complete discussion of the Fund's risks.

Holdings subject to change and are not a recommendation to buy or sell a security.

The Fund's benchmark index is the MSCI EAFE® Index. The MSCI EAFE® Index (Europe, Australasia, Far East) is a free float-adjusted market capitalization index that is designed to measure the equity performance of developed markets, excluding the U.S. and Canada. As of December 31, 2021, the MSCI EAFE® Index consisted of 21 developed market country indices. MSCI EAFE® is a registered trademark of MSCI Inc.

Index performance does not reflect the expenses of managing a portfolio as an index is unmanaged, does not incur fees or expenses, and is not available for investment. Performance of an index fund will generally be less than its benchmark index.

Neither Morningstar and/or its content providers are responsible for any damages or losses arising from any use of this information.

Morningstar Rating: For each fund with at least a 3-year history, Morningstar calculates a Morningstar Rating™ based on a Morningstar Risk-Adjusted Return measure that accounts for variation in a fund's monthly performance (including the effects of sales charges, loads, and redemption fees), placing more emphasis on downward variations and rewarding consistent performance. The top 10% of funds in each category receive 5 stars, the next 22.5% receive 4 stars, the next 35% receive 3 stars, the next 22.5% receive 2 stars and the bottom 10% receive 1 star. (Each share class is counted as a fraction of one fund within this scale and rated separately, which may cause slight variations in the distribution percentages). The Overall Morningstar Rating for a fund is derived from a weighted average of the performance figures associated with its three-, five-, and ten-year (if applicable) Morningstar Rating metrics.

Rating information for share classes without a 3-, 5- or 10-year history, as applicable is based on extended performance.

Portfolio Date is the effective data for certain data. As-of-Date is the effective period run date for which the sheet is being produced.
