The SEC Yield reflects the rate at which the Fund is earning income on its current portfolio of securities while the Distribution Rate reflects the Fund's dividends paid to shareholders in the prior quarter. Accordingly, the Fund's SEC Yield and Distribution Rate may differ. Rate and Yield are as of 3/31/2022.

Risk Rating: LOW

Morningstar Risk is an assessment of the variations in a fund's monthly returns in comparison to similar funds. The greater the variation, the larger the risk score. Risk rating is for the 5-year period ended 3/31/2022 in the Large Value category among 1047 investments.

Beta: 0.75

Beta is a volatility measure of the percentage price change of the Fund given a one percent change in a representative market index. The Beta value is determined by comparing the weekly price movements of the Fund and the S&P 500 Index over the last five years.

Performance shown is before tax

The performance data represents past performance, which does not guarantee future results. The investment return and principal value of an investment will fluctuate so that an investor's shares, when redeemed, may be worth more or less than their original cost. Returns are for the period ended 3/31/2022 and reflect the deduction of the maximum sales load of 5.00%. Current performance may be lower or higher than the performance data quoted. To obtain performance data current to the most recent month-end, an investor may call toll free (800) 276-1262 or visit www.integrityvikingfunds.com.

This fact sheet must be preceded or accompanied by a prospectus. The Fund is sold by prospectus only. For more complete information an investor should consider the investment objectives, risks, and charges and expenses of the investment company carefully before investing. The prospectus contains this and other information about the investment company. You may obtain a prospectus at no cost from your financial adviser or from our website integrityvikingfunds.com. Please read the prospectus carefully before investing.

Because the Fund can only distribute what it earns, the Fund's distributions to shareholders could decline when dividend income from stocks in the Fund's portfolio declines. The Fund's emphasis on dividend-paying stocks involves the risk that such stocks may fall out of favor with investors and underperform the market. Also, a company may reduce or eliminate its dividend, which could affect the Fund's ability to generate income.

Preferred stocks are subject to the risks associated with other types of equity securities, such as potential volatility, as well as additional risks, such as risks related to deferral and omission of distributions; credit and subordination risk; interest rate risk; call, reinvestment and income risk; liquidity risk; risks related to limited voting rights; and risks related to special redemption rights.

The Fund may invest in securities of non-U.S. issuers, which have special risks. These risks include international economic and political developments, foreign government actions including restrictions on payments to non-domestic persons such as the Fund, less regulation, less information, currency fluctuations, and interruptions in currency flow. Investments in foreign securities also entail higher costs.

A fee level is designated as Below Average because it ranks in the second cheapest quintile when compared to its fee level comparison group, which consists of other funds' similar share classes that invest in a similar asset class and have similar expense structures. IDIVX is in the Large Cap Front Load comparison group.

Risks of Non-Diversification: Because a relatively high percentage of the Fund's assets may be invested in the securities of a limited number of issuers, the Fund's portfolio may be more susceptible to any single economic, technological, or regulatory occurrence than the portfolio of a diversified fund.

The Russell 1000 Index is an index of approximately 1,000 of the largest companies in the U.S. equity market. The Russell 1000 is a subset of the Russell 3000 Index. It represents the top companies by market capitalization. The Russell 1000 typically comprises approximately 90% of the total market capitalization of all listed U.S. stocks. It is considered a bellwether index for large-cap investing.

S&P 500® Index is a widely recognized, unmanaged index of 500 stock prices chosen for market size, liquidity, and industry group representation. It is a market-value weighted index (stock price times number of shares outstanding), with each stock's weight in the index proportionate to its market value.
