GROWTH OF \$10,000 (CLASS Z)

CALENDAR YEAR PERFORMANCE (CYP) REPRESENTS A FULL YEAR'S PERFORMANCE (%) (CLASS Z)

YEAR	2015	2016	2017	2018	2019	2020	2021
Fund	2.12	3.97	11.36	-4.09	34.06	3.64	28.83
FTSE EPRA/NAREIT Developed Index†							
Benchmark	-0.79	4.06	10.36	-5.63	21.91	-9.04	26.09

Past performance does not guarantee future results. Graph and CYP do not include the effects of sales charges and reflect reinvestment of all distributions. If sales charges were included, returns would have been lower. Holdings/allocation may vary. Largest holdings excludes cash, cash equivalents, money market funds and enhanced cash strategies. Totals may not sum due to rounding. This is not a recommendation to buy or sell any security listed.

Investing in **real estate** poses certain risks related to overall and specific economic conditions, as well as risks related to individual property, credit, and interest rate fluctuations. The Fund may have additional risks due to its **narrow focus**; is **nondiversified**, so a loss resulting from a particular security or sector will have a greater impact on the Fund's return; and in **foreign securities**, which are subject to currency fluctuation and political uncertainty. **Diversification** does not assure a profit or protect against loss in declining markets. These risks may result in greater share price volatility. There is no guarantee the Fund's objective will be achieved.

Past performance does not guarantee future results, and current performance may be lower or higher than the past performance data quoted. The investment return and principal value will fluctuate, and shares, when sold, may be worth more or less than the original cost. Maximum sales charges: Class A, 5.5%. Other share classes may be available. For the most recent month-end performance and complete information about performance, charges and expenses, visit our website at pgiminvestments.com.

Source: Benchmarks and statistics, Lipper Inc. All other data from PGIM, Inc. (PGIM). **Total return** describes the return to the investor after net operating expenses but before any sales charges are imposed. **SEC standardized return** describes the return to the investor after net operating expenses and maximum sales charges are imposed. All returns assume share price changes as well as the compounding effect of reinvested dividends and capital gains. Returns may reflect fee waivers and/or expense reimbursements. Without such, returns would be lower. All returns 1-year or less are cumulative. Class R6 and Z shares may be available to group retirement plans and institutional investors through certain retirement, mutual fund wrap and asset allocation programs. They may also be available to institutional investors. Class Z shares may be available through fee- or commission-based retail brokerage programs of certain financial intermediaries. Class A, C, and Z shares are generally closed to new retirement plans. Please see the prospectus for additional information about fees, expenses, and investor eligibility. All data is unaudited and subject to change.

[†]The **FTSE EPRA/NAREIT Developed Index** is unmanaged and reflects the stock performance of companies engaged in specific aspects of the major real estate markets/regions of the world. No further distribution of FTSE Data is permitted without FTSE's express written consent. An investment cannot be made directly in an index.

Enhanced cash strategies are variations on traditional money market vehicles. They are designed to provide liquidity and principal preservation, but with more of an emphasis on seeking returns that are superior to those of traditional money market offerings. **Average weighted market cap** is the average market capitalization of stocks in a fund, each weighted by its proportion of assets. **Beta** measures a fund's sensitivity to changes in the overall market relative to its benchmark. **Standard deviation** depicts how widely returns vary around its average and is used to understand the range of returns most likely for a given fund. A higher standard deviation generally implies greater volatility. **Turnover Ratio** is the rate of trading in a portfolio, higher values imply more frequent trading. Due to data availability, statistics may not be as of the current reporting period.

[‡]Source: Morningstar. The Morningstar Rating may be calculated based on its share class adjusted historical returns. If so, this investment's independent Morningstar Rating metric uses the fund's oldest share class to determine its hypothetical rating for certain time periods. The Fund's Overall, 3-, and 5-year Star Ratings/Funds in Category are as follows: Class A - 5/197, 5/197 and 5/177; Class Z - 5/197, 5/197 and 5/177; Class R6 - 5/197, 5/197 and 5/177, respectively.

The Morningstar Rating for funds, or "star rating", is calculated for managed products (including mutual funds, variable annuity and variable life subaccounts, exchange-traded funds, closed-end funds, and separate accounts) with at least a three-year history. Exchange-traded funds and open-ended mutual funds are considered a single population for comparative purposes. It is calculated based on a Morningstar Risk-Adjusted Return measure that accounts for variation in a managed product's monthly excess performance, placing more emphasis on downward variations and rewarding consistent performance. The Morningstar Rating does not include any adjustment for sales loads. The top 10% of products in each product category receive 5 stars, the next 22.5% receive 4 stars, the next 35% receive 3 stars, the next 22.5% receive 2 stars, and the bottom 10% receive 1 star. The Overall Morningstar Rating for a managed product is derived from a weighted average of the performance figures associated with its three-, five-, and 10-year (if applicable) Morningstar Rating metrics. The weights are: 100% three-year rating for 36-59 months of total returns, 60% five-year rating/40% three-year rating for 60-119 months of total returns, and 50% 10-year rating/30% five-year rating/20% three-year rating for 120 or more months of total returns. While the 10-year overall star rating formula seems to give the most weight to the 10-year period, the most recent three-year period actually has the greatest impact because it is included in all three rating periods.
