**Overall Morningstar Rating™ as of 3/31/22**  
(out of 1232 funds in the Large Blend Category)

Class A ★★★★★

Class Y ★★★★★

**Morningstar Sustainability Rating™ as of 2/28/22**

**Above Average** (out of 1446 funds in the Large Blend Category) Based on 100.00% of AUM.

**Ratings are based on past performance, which is no guarantee of future results.**

The Overall Morningstar Rating™ is based on a weighted average of the star ratings assigned to a fund's three-, five-, and ten year (as applicable) time periods. The Morningstar Category identifies funds based on their underlying portfolio holdings. Classifications are based on portfolio statistics and compositions over the past three years. For funds less than three years old, category classifications are based on life of the fund. Pioneer Core Equity Fund was rated exclusively against U.S.-domiciled Large Blend funds as follows: 4, 4 and 3 stars (Class A) and 5, 4 and 3 stars (Class Y) among 1232, 1116 and 818 funds for the three-, five-, and 10-year periods, respectively. Morningstar proprietary ratings reflect risk-adjusted performance. Ratings may vary among share classes. The Morningstar Sustainability Rating™ is a monthly measure of how well the holdings in a portfolio are managing their environmental, social, and governance, or ESG, risks and opportunities relative to their Morningstar Category peers. Globe icons depict the Morningstar Sustainability Rating as follows: 5 globes (High); 4 globes (Above Average); 3 globes (Average); 2 globes (Below Average) and 1 globe (Low).

## FUND STRATEGY

The Fund seeks long-term capital growth by investing primarily in U.S. large-cap equity securities and diversifying across a broad range of market sectors. It employs a valuation conscious approach, one that focuses on the quality and price of individual securities, while following a research-based investment strategy to select stocks with above average growth potential. *Diversification does not assure a profit or protect against loss.*

Call 1-800-225-6292 or visit [amundi.com/us/investors](http://amundi.com/us/investors) for the most recent month-end performance results. Current performance may be lower or higher than the performance data quoted. The performance data quoted represents past performance, which is no guarantee of future results. Investment return and principal value will fluctuate, and shares, when redeemed, may be worth more or less than their original cost.

Performance results reflect any applicable expense waivers in effect during the periods shown. Without such waivers, fund performance would be lower. Waivers may not be in effect for all funds. Certain fee waivers are contractual through a specified period. Otherwise, fee waivers can be rescinded at any time. See the prospectus and financial statements for more information.

## PERFORMANCE HIGHLIGHTS

Time Period: 3/31/12 through 3/31/22

**Initial Investment:** \$10,000 in Class A Shares at net asset value

Chart is for illustrative purposes. These results represent the percentage change in net asset value per share. Returns would have been lower had sales charges been reflected.

## AVERAGE ANNUAL TOTAL RETURNS (%) through March 31, 2022

	1-Year	3-Year	5-Year	10-Year	Since Inception
A Shares w/o sales charge	13.85	18.97	15.49	13.08	7.08
Y Shares	14.13	19.22	15.76	13.36	7.31
A Shares w/ sales charge	7.33	16.64	14.13	12.41	6.80
S&P 500 Index	15.65	18.92	15.99	14.64	7.33
Mstar Large Blend Cat. Avg.	12.10	16.78	14.09	13.04	6.08

Performance with sales charge reflects deduction of maximum 5.75% sales charge.

All returns are historical and assume the reinvestment of dividends and capital gains. Other share classes are available for which performance and expenses will differ.

Performance for periods prior to inception of Class A shares on 6/7/13 reflects performance of Class A shares of Pioneer Research Fund (the "predecessor fund"). The performance does not reflect differences in expenses, including the applicable 12b-1 fees. If performance reflected the difference in expenses, the performance shown for Class A shares of the Fund would be different. Performance prior to inception of Class Y shares on 6/7/13 reflects the performance of Class Y of the predecessor fund. Performance prior to Class Y shares of the predecessor fund on 8/11/04 reflects the NAV performance of Class A shares of the predecessor fund; this performance does not reflect differences in expenses, including the 12b-1 fees applicable to Class A shares. Since fees for Class A are generally higher than those of Class Y, the performance shown for the Class Y shares prior to inception would have been higher. Class Y shares are not subject to sales charges and are available for limited groups of investors, including institutional investors.

## CALENDAR YEAR RETURNS (%) through March 31, 2022

	YTD	2021	2020	2019	2018
A Shares w/o sales charge	-3.46	25.57	20.83	31.41	-8.70
Y Shares	-3.40	25.84	21.04	31.80	-8.53
S&P 500 Index	-4.60	28.71	18.40	31.49	-4.38
Mstar Large Blend Cat. Avg.	-5.23	25.37	15.12	28.62	-6.24

Performance without sales charge results represent the percent change in net asset value per share. Returns would have been lower had sales charges been reflected. The Standard & Poor's 500® Index (the S&P 500) (benchmark) is a commonly used measure of the broad U.S. stock market. The Morningstar Large Blend Category Average measures the performance of large blend funds within the Morningstar universe. Indices are unmanaged and their returns assume reinvestment of dividends and, unlike fund returns, do not reflect any fees or expenses. You cannot invest directly in an index. Periods less than one year are actual, not annualized.

## A WORD ABOUT RISK

The market prices of securities may go up or down, sometimes rapidly or unpredictably, due to general market conditions, such as real or perceived adverse economic, political, or regulatory conditions, recessions, inflation, changes in interest or currency rates, lack of liquidity in the bond markets, the spread of infectious illness or other public health issues or adverse investor sentiment. Investing in foreign and/or emerging market securities involves risks relating to interest rates, currency exchange rates, economic, and political conditions. At times, the Fund's investments may represent industries or industry sectors that are interrelated or have common risks, making it more susceptible to any economic, political, or regulatory developments or other risks affecting those industries and sectors.

Individuals are encouraged to seek advice from their financial, legal, tax and other appropriate professionals before making any investment or financial decisions or purchasing any financial, securities or investment-related product or service, including any product or service described in these materials. Amundi US does not provide investment advice or investment recommendations.

P/E refers to the price of a stock divided by its earnings per share. **Average P/E ratio (Trailing)** reflects weighted average of trailing 12-month price-to-earnings ratios of portfolio holdings. **Average P/E ratio (Estimated)** is the current price of a stock divided by the estimated one year projection of its earnings per share. **Market Capitalization** reflects the total U.S.-denominated portion of the portfolio. **Active Share** is a measure of the percentage of stock holdings in a manager's portfolio that differ from the benchmark index. **Turnover Ratio** is the percentage of a fund's assets that have changed over a given period, usually a year, based off of the Fund's fiscal year-end. Mutual funds with higher turnover ratios tend to have higher expenses.

**Ratings are based on past performance, which is no guarantee of future results.** Star ratings do not reflect the effect of any applicable sales load. The Morningstar Rating™ for funds, or "star rating", is calculated for managed products (including mutual funds, variable annuity and variable life subaccounts, exchange-traded funds, closed-end funds and separate accounts) with at least a three-year history. Exchange-traded funds and open-ended mutual funds are considered a single population for comparative purposes. It is calculated based on a Morningstar Risk-Adjusted Return measure that accounts for variation in a managed product's monthly excess performance, placing more emphasis on downward variations and rewarding consistent performance. The top 10% of products in each product category receive 5 stars, the next 22.5% receive 4 stars, the next 35% receive 3 stars, the next 22.5% receive 2 stars, and the bottom 10% receive 1 star. The Overall Morningstar Rating for a managed product is derived from a weighted average of the performance figures associated with its three-, five-, and 10-year (if applicable) Morningstar Rating metrics. The weights are: 100% three-year rating for 36-59 months of total returns, 60% five-year rating/40% three-year rating for 60-119 months of total returns, and 50% 10-year rating/30% five-year rating/20% three-year rating for 120 or more months of total returns. While the 10-year overall star rating formula seems to give the most weight to the 10-year period, the most recent three-year period actually has the greatest impact because it is included in all three rating periods.

Sustainalytics, a leading provider of ESG research, provides company-level analysis used in the calculation of Morningstar's Sustainability Score. The Morningstar Sustainability Rating calculation is a two-step process. First, each fund with at least 50% of assets covered by a company-level ESG score from Sustainalytics receives a Morningstar® Portfolio Sustainability Score™. The Morningstar Portfolio Sustainability Score is an asset-weighted average of normalized company-level ESG scores with deductions made for controversial incidents by the issuing companies, such as environmental accidents, fraud, or discriminatory behavior. The Morningstar Sustainability Rating is then assigned to all scored funds within Morningstar Categories in which at least ten (10) funds receive a Portfolio Sustainability Score and is determined by each fund's rank within the following distribution: High (highest 10%); Above Average (next 22.5%); Average (next 35%); Below Average (next 22.5%) and Low (lowest 10%). A Sustainability Rating is assigned to any fund that has more than half of its underlying assets rated by Sustainalytics and is within a Morningstar Category with at least 10 scored funds; therefore, the rating it is not limited to funds with explicit sustainable or responsible investment mandates.
