OVERALL RATING (as of 3/31/22)

Overall Morningstar rating 4 stars; 360 funds. Three year rating 4 stars; 360 funds. Five year rating 4 stars; 318 funds. The Overall Morningstar Rating™ for a fund is derived from a weighted average of the performance figures associated with its three-, five-, and 10-year (if applicable). Morningstar ratings are based on risk-adjusted performance. Source: Morningstar, Inc. Ratings/ranking are historical and do not guarantee future results.

Objective and strategy

Prior to 1/28/21, Xtrackers Russell US Multifactor ETF was known as Xtrackers Russell 1000 Comprehensive Factor ETF. See the prospectus for details. Xtrackers Russell US Multifactor ETF seeks investment results that correspond generally to the performance, before fees and expenses, of the Russell 1000 Comprehensive Factor Index. The index is designed to capture exposure to large-cap U.S. equities using five factors – Quality, Value, Momentum, Low Volatility and Size. These factors represent common stock characteristics, for which there is a broad academic consensus, that explain a stock's risk and performance.

Performance quoted represents past performance and does not guarantee future results. Investment returns and principal value of an investment will fluctuate so that an investor's shares, when redeemed, may be worth more or less than their original cost. Current performance may be lower or higher than the performance data quoted. Shares are bought and sold at market price (closing price) not net asset value (NAV) and are not individually redeemed from the Fund. Market price returns are based on the midpoint of the bid/ask spread at 4:00 pm Eastern Time (when NAV is normally determined) and do not represent the return you would receive if you traded at other times. To obtain the most recent month-end performance data visit www.Xtrackers.com or call 855-329-3837.

Indexes are unmanaged; you cannot invest in an index. Index performance is gross of fees and assumes dividend reinvestment. Inclusion of fees would have reduced returns.

Neither Morningstar nor its content providers are responsible for any damages or losses arising from any use of this information. Past performance is no guarantee of future results. The Morningstar Analyst Rating™ is not a credit or risk rating. It is a subjective evaluation performed by the manager research analysts of Morningstar. Morningstar evaluates funds based on five key pillars, which are process, performance, people, parent, and price. Analysts use this five pillar evaluation to determine how they believe funds are likely to perform relative to a benchmark, or in the case of exchange-traded funds and index mutual funds, a relevant peer group, over the long term on a risk-adjusted basis. They consider quantitative and qualitative factors in their research, and the weight of each pillar may vary. The Analyst Rating scale is Gold, Silver, Bronze, Neutral, and Negative. A Morningstar Analyst Rating of Gold, Silver, or Bronze reflects an analyst's conviction in a fund's prospects for outperformance. Analyst Ratings are continuously monitored and reevaluated at least every 14 months. For more detailed information about Morningstar's Analyst Rating, including its methodology, please go to: [https://s21.q4cdn.com/198919461/files/doc_downloads/2019/11/Morningstar_Analyst_Rating_for_Funds_Methodology_062019-\(1\)-\(2\).pdf](https://s21.q4cdn.com/198919461/files/doc_downloads/2019/11/Morningstar_Analyst_Rating_for_Funds_Methodology_062019-(1)-(2).pdf). **The Morningstar Analyst Rating (i) should not be used as the sole basis in evaluating a fund, (ii) involves unknown risks and uncertainties which may cause the Manager Research Group's expectations not to occur or to differ significantly from what they expected, and (iii) should not be considered an offer or solicitation to buy or sell the fund.**

Neither Morningstar nor its content providers are responsible for any damages or losses arising from any use of this information. Past performance is no guarantee of future results. The Morningstar Rating™ for funds, or 'star rating', is calculated for managed products (including mutual funds, variable annuity and variable life subaccounts, exchange-traded funds, closed end funds and separate accounts) with at least a three-year history. Exchange-traded funds and open-ended mutual funds are considered a single population for comparative purposes. It is calculated based on a Morningstar Risk-Adjusted Return measure that accounts for variation in a managed product's monthly excess performance, placing more emphasis on downward variations and rewarding consistent performance. The Morningstar Rating does not include any adjustment for sales loads. The top 10% of products in each product category receive 5 stars, the next 22.5% receive 4 stars, the next 35% receive 3 stars the next 22.5% receive 2 stars, and the bottom 10% receive 1 star. The Overall Morningstar Rating for a managed product is derived from a weighted average of the performance figures associated with its three-, five-, and 10 year (if applicable) Morningstar Rating metrics. The weights are 100% three-year rating for 36-59 months of total returns, 60% five-year rating/40% three-year rating for 60-119 months of total returns, and 50% 10-year rating/30% five-year rating/20% three-year rating for 120 or more months of total returns. While the 10-year overall rating formula seems to give the most weight to the 10-year period, the most recent three-year period actually has the greatest impact because it is included in all three rating periods.

³ Price-to-book ratio is a valuation ratio of a stock's market value compared to its book value.

⁴ Price-to-earnings ratio (P/E) is a stock's current price divided by the company's trailing 12-month earnings per share from continuous operations.

⁵ Dividend yield is a weighted-sum of the annualized dividends of the index components divided by the most recent index value. Annualized dividends are determined using a sum of all dividend announcements during the previous 12 months.

Xtrackers ETFs ("ETFs") are managed by DBX Advisors LLC (the "Adviser"), and distributed by ALPS Distributors, Inc. ("ALPS"). The Adviser is a subsidiary of DWS Group GmbH & Co. KGaA, and is not affiliated with ALPS. Shares are not individually redeemable, and owners of Shares may acquire those Shares from the Fund, or tender such Shares for redemption to the Fund, in Creation Units only. The brand DWS represents DWS Group GmbH & Co. KGaA and any of its subsidiaries such as DWS Distributors, Inc., which offers investment products, or DWS Investment Management Americas, Inc. and RREEF America L.L.C., which offer advisory services.

The Funds (the "Funds") have been developed solely by DBX Advisors LLC. Carefully consider the fund's investment objectives, risk factors, and charges and expenses before investing. This and other information can be found in the fund's prospectus, which may be obtained by calling 1-855-DBX-ETFs (1-855-329-3837), or by viewing or downloading a prospectus from www.Xtrackers.com. Read the prospectus carefully before investing.

War, terrorism, sanctions, economic uncertainty, trade disputes, public health crises and related geopolitical events have led and, in the future, may lead to significant disruptions in U.S. and world economies and markets, which may lead to increased market volatility and may have significant adverse effects on the fund and its investments.

Risk: Investing involves risk, including possible loss of principal. Stocks may decline in value. Funds investing in a single industry, country or in a limited geographic region generally are more volatile than more diversified funds. Because the fund seeks to provide exposure to stocks based on the following multifactors – value, momentum, quality, low volatility and size – it is expected exposure to such investment factors will detract from performance in some market environments, as more fully explained in the fund's prospectus. Performance of the Fund may diverge from that of the Underlying Index due to operating expenses, transaction costs, cash flows, use of sampling strategies or operational inefficiencies. An investment in any fund should be considered only as a supplement to a complete investment program for those investors willing to accept the risks associated with that fund. Please read the prospectus for more information.
