

RODI

Barclays Return on Disability ETN

The Barclays Return on Disability Exchange Traded Notes (the "ETNs") are linked to the performance of the Return on Disability US LargeCap ETN Total Return USD Index (the "Index"). The ETNs are riskier than ordinary unsecured debt securities and have no principal protection. The ETNs are unsecured debt obligations of the issuer, Barclays Bank PLC, and are not, either directly or indirectly, an obligation of or guaranteed by any third party. Any payment to be made on the ETNs, including any payment at maturity or upon redemption, depends on the ability of Barclays Bank PLC to satisfy its obligations as they come due. The ETN performance is linked to the performance of the Index less an investor fee. If the increase in the level of the Index is insufficient to offset the negative effect of the investor fee, or if the Index level decreases, you will receive less than the principal amount of your ETNs at maturity or upon early redemption. An investment in the ETNs involves significant risks and may not be suitable for all investors. **An investment in the ETNs involves significant risks, including possible loss of principal, and may not be suitable for all investors.**

The Index uses a quantitative ranking methodology to measure a company's publicly observable activities relating to people with disabilities across three key areas: talent, customer and productivity. This ranking methodology focuses on elements that have the potential to increase shareholder value in a company, such as using best practices for attracting and hiring candidates with disabilities, focusing on 'ease of use' features in products and services, and implementing productivity-focused process improvements driven by people with disabilities. The phrase "disability market" refers to the 1.3 billion people globally who face challenges across three general areas – dexterity, cognition or sensory abilities – as well as their friends and family. The Index notionally tracks the returns that may be available from investing in a basket of up to 100 stocks that are selected pursuant to the Return on Disability® Binary Ranking (the "RoD Ranking"), and meet certain market capitalization, trading volume and financial viability thresholds. The index was launched in September, 2014 and very limited historical performance data for the Index exists. Owning the ETNs is not the same as owning interest in the Index Constituents or a security directly linked to the performance of the Index. For more information on the risks associated with the ETNs, please see "Selected Risk Considerations" below and the risk factors included in the relevant prospectus.

Summary

Primary Exchange	Cboe
ETN Ticker	RODI
Intraday Indicative Value Ticker	RODI.IV
Bloomberg ETN Keystroke	RODI.IV<Equity><Go>
Bloomberg Index Ticker	RODITR
Investor Fee Rate	0.45% per annum
CUSIP	06740D830
ISIN	US06740D8305
Issue Date	September 10, 2014
Maturity Date	September 17, 2024

Market Indicators (as of 06/30/2022)

Closing Indicative Note Value	\$104.14
Market Capitalization ³	\$2,280,666
ETNs outstanding	21,900

The performance quoted represents past performance and does not guarantee future results. Investment return and principal value of an investment will fluctuate so that an investment, when sold or redeemed may be worth more or less than the original cost. Current performance may be lower or higher than the performance quoted. See additional information below for how return figures are calculated. **PAST PERFORMANCE IS NOT INDICATIVE OF FUTURE RESULTS**

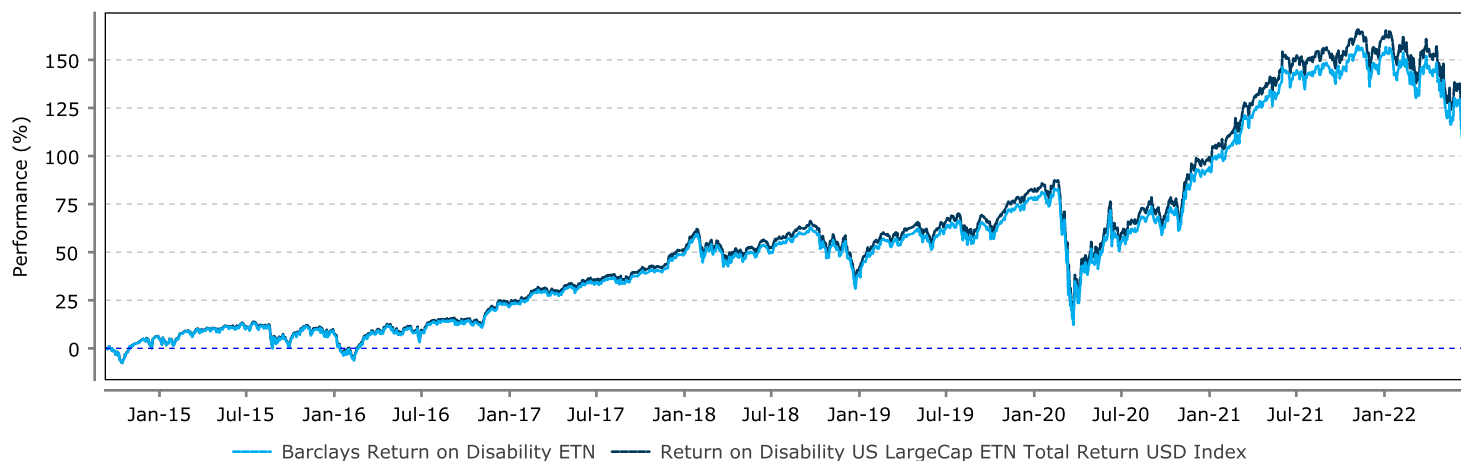

1. **Market Capitalization** = Closing Indicative Note Value x ETNs Outstanding.

2. **The investor fee rate** per ETN is 0.45% per year. The investor fee on the inception date was zero. On each subsequent calendar day until maturity or early redemption, the investor fee will be equal to (1) the investor fee rate *times* (2) the closing indicative note value on the immediately preceding calendar day *times* (3) the daily index factor on that day (or, if such day is not an index business day, one) *divided by* (4) 365. Because the investor fee is calculated and subtracted from the closing indicative note value on a daily basis, the net effect of the investor fee accumulates over time and is subtracted at the rate of approximately 0.45% per year. Because the net effect of the investor fee is a fixed percentage of the value of each ETN, the aggregate effect of the investor fee will increase or decrease in a manner directly proportional to the value of each ETN and the amount of the ETNs that are held, as applicable.

3. **Intraday Indicative Value.** The "intraday indicative value" meant to approximate the value of the ETNs during the current trading day by reference to the underlying index is calculated and published during the course of each trading day. The intraday indicative value is intended to provide investors with an approximation of the effect that intraday changes in the level of the underlying index would have on the closing indicative value of the ETNs. The intraday indicative value only reflects the accrued investor fee and other applicable costs at the close of business on the preceding day, but does not include any adjustment for the investor fee or applicable costs accruing during the course of the current day. For more information on how the intraday indicative value is calculated, please see the section "Valuation of the ETNs" in the prospectus relating to the ETNs.

The intraday indicative value is provided for reference purposes only. It is not intended as a price or quotation, or as an offer or solicitation for the purchase, sale, redemption or termination of the ETNs, nor does it reflect hedging or transaction costs, credit considerations, market liquidity, or bid-offer spreads. Published index levels from the sponsors of the indices underlying the ETNs may occasionally be subject to delay or postponement. Any such delays or postponements will affect the level of the index and therefore the intraday indicative value of the ETNs. Index levels provided by the sponsors of the indices underlying the ETNs do not necessarily reflect the depth and liquidity of the underlying markets for the index components. For this reason and others, the actual trading price of the ETNs may be different from their intraday indicative value.

ETN and Index Historical Performance

The performance quoted represents past performance and does not guarantee future results. Investment return and principal value of an investment will fluctuate so that an investment, when sold or redeemed may be worth more or less than the original cost. Current performance may be lower or higher than the performance quoted. See additional information below for how return figures are calculated. **PAST PERFORMANCE IS NOT INDICATIVE OF FUTURE RESULTS.**

Index Returns

Index returns show the change in the level of the index underlying the ETNs over the relevant period, expressed as a percentage. Index returns are calculated using the closing index level from the beginning of the relevant period to the end of the relevant period. For any historical period of one year or longer, index returns are shown on an annualized basis. Index returns are for illustrative purposes only and do not represent actual ETN performance. Index returns do not reflect any management fees, transaction costs, or expenses which would reduce your actual return, including the investor fee and applicable costs of the ETNs. Indexes are unmanaged and one cannot invest directly in an index.

ETN Closing Indicative Note Value Returns

ETN closing indicative note value returns show the change in the closing indicative value of the ETNs over the relevant period, expressed as a percentage. For any historical period of one year or longer, closing indicative note value returns are shown on an annualized basis. The closing indicative note value of an ETN is an amount per ETN calculated on each valuation date that reflects the change in value of the ETN from the previous valuation date due to the daily change in the index level and the daily accrual of the investor fee and other applicable costs. The closing indicative note value of an ETN may differ from the actual trading price of the ETN at any time due to hedging or transaction costs, credit considerations, market liquidity, bid-offer spreads or other factors affecting the trading price of the ETN. For more information on how the closing indicative note value is calculated, please see the section "Specific Terms of the ETNs" in the prospectus relating to the ETNs.

ETN Market Price Returns

ETN Market price returns show the change in the end-of-day trading price of the ETNs on the exchange over the relevant period, expressed as a percentage. Market price returns are calculated using the midpoint of the bid/ask spread at 4:00 pm Eastern time (or the last midpoint of the bid/ask spread prior to 4:00 pm Eastern time) from the beginning of the relevant period to the end of the relevant period. For any historical period of one year or longer, market price returns are shown on an annualized basis. Market price returns do not represent the returns you would receive if you traded at a price or at a time on the exchange other than as described in this section. Market price returns do not account for brokerage commissions, which will reduce actual returns, and may not include the effect of any applicable fees and costs on the ETNs.

In the event that there is an absence of a bid/ask value at 4PM on the relevant month end, N/A will be displayed in place of a percentage value for ETN Market Price Returns.

Selected Risk Considerations

Selected risk considerations

An investment in the iPath ETNs described herein (the "ETNs") involves risks, including possible loss of principal, and may not be suitable for all investors. Selected risks are summarized here and select product specific risk factors are summarized under "Select Risk Considerations" on the relevant product pages, but we urge you to read the more detailed explanation of risks described under "Risk Factors" in the applicable product prospectus.

You May Lose Some or All of Your Principal: The ETNs are exposed to any change in the level of the underlying index, or the Volume Weighted Average Price ("VWAP") level, in the case of the iPath® S&P MLP ETN, between the inception date and the applicable valuation date. Additionally, if the level of the underlying index or the VWAP level, is insufficient to offset the negative effect of the investor fee and other applicable costs, you will lose some or all of your investment at maturity or upon redemption, even if the value of such index or the VWAP level has increased or decreased, as the case may be. Because the ETNs are subject to an investor fee and other applicable costs, the return on the ETNs will always be lower than the total return on a direct investment in the index components. **The ETNs are riskier than ordinary unsecured debt securities and have no principal protection.**

Credit of Barclays Bank PLC: The ETNs are unsecured debt obligations of the issuer, Barclays Bank PLC, and are not, either directly or indirectly, an obligation of or guaranteed by any third party. Any payment to be made on the ETNs, including any payment at maturity or upon redemption, depends on the ability of Barclays Bank PLC to satisfy its obligations as they come due. As a result, the actual and perceived creditworthiness of Barclays Bank PLC will affect the market value, if any, of the ETNs prior to maturity or redemption. In addition, in the event Barclays Bank PLC were to default on its obligations, you may not receive any amounts owed to you under the terms of the ETNs.

A Trading Market for the ETNs May Not Develop: Although the ETNs are listed on a U.S. national securities exchange, a trading market for the ETNs may not develop and the liquidity of the ETNs may be limited, as we are not required to maintain any listing of the ETNs.

No Interest Payments from the ETNs: You may not receive any interest payments on the ETNs.

Restrictions on the Minimum Number of ETNs and Date Restrictions for Redemptions: You must redeem at least 25,000 ETNs (unless specified otherwise in the pricing supplement for the ETNs) of the same series at one time in order to exercise your right to redeem your ETNs on any redemption date. You may only redeem your ETNs on a redemption date if we receive a notice of redemption from you by certain dates and times as set forth in the product prospectus.

Uncertain Tax Treatment: Significant aspects of the tax treatment of the ETNs are uncertain. You should consult your own tax advisor about your own tax situation.

The ETNs may be sold throughout the day on the exchange through any brokerage account. Commissions may apply and there are tax consequences in the event of sale, redemption or maturity of ETNs.

Issuer Redemption: Barclays Bank PLC has the right to redeem or "call" the ETNs (in whole but not in part) at our sole discretion without your consent on any business day on or after the inception date until and including maturity.

The Value of the ETNs Will Depend Upon the Success of the Index: There can be no assurance that the selection strategy of the index in identifying companies that meet certain criteria in the disability field will be successful or that the index will be able to outperform any stock index whose selection of constituent stocks is not based on the ranking criteria of the index.
