Morningstar® Rating³

Morningstar Global Real Estate Category

Overall rating (as of 6/30/22)

Class S ★ ★ ★ ★

Overall Morningstar ratings 4 stars; 188 funds. Three year rating 4 stars; 188 funds. Five year rating 4 stars; 172 funds. Ten year rating 4 stars; 109 funds. Morningstar ratings are based on risk-adjusted performance. Source: Morningstar, Inc. **Ratings are historical and do not guarantee future results. Ratings for other share classes may vary.**

Objective

The fund seeks total return through a combination of current income and long-term capital appreciation.

Strategy

Looking for an investment to complement a traditional portfolio? Consider a fund that invests in real estate investment trusts (REITs), which present a compelling opportunity to potentially capitalize on the global real estate market. Plus, because they tend to pay out nearly all of their rental income to shareholders, REITs can potentially provide attractive dividends. To access this market, consider DWS, an experienced real estate investor with a 50-year legacy, and DWS RREEF Global Real Estate Securities Fund.

Expense ratio (as of latest prospectus)

Class	Net	Gross	Contractual Waiver
A	1.20%	1.33%	04/30/2023
C	1.95%	2.03%	04/30/2023
S	1.05%	1.11%	04/30/2023
INST	0.95%	0.99%	04/30/2023
R6	0.79%	0.91%	--

Class R6 shares have a voluntary waiver that may be discontinued at any time. Without a waiver, returns would have been lower and any rankings/ratings might have been less favorable.

Performance is historical and does not guarantee future results. Investment returns and principal fluctuate so your shares may be worth more or less when redeemed. Current performance may differ from the data shown. Please visit www.dws.com for the fund's most recent month-end performance. Performance includes reinvestment of all distributions. Index returns assume reinvestment of all distributions and do not reflect fees or expenses. It is not possible to invest directly in an index. Not all share classes are available to all investors. A minimum investment of \$1 million is required to open an account for Institutional shares.

* This fund began operations on 7/3/06 with Institutional shares. Returns prior to inception reflect the original share class performance, adjusted for higher operating expenses and/or the maximum sales charge.

The information contained herein: (1) is proprietary to Morningstar and/or its content providers; (2) may not be copied or distributed; and (3) is not warranted to be accurate, complete or timely. Neither Morningstar nor its content providers are responsible for any damages or losses arising from any use of this information. Past performance is no guarantee of future results. The Morningstar Rating™ for funds, or 'star rating', is calculated for managed products (including mutual funds, variable annuity and variable life subaccounts, exchange-traded funds, closed end funds, and separate accounts) with at least a three-year history. Exchange-traded funds and open-ended mutual funds are considered a single population for comparative purposes. It is calculated based on a Morningstar Risk-Adjusted Return measure that accounts for variation in a managed product's monthly excess performance, placing more emphasis on downward variations and rewarding consistent performance. The Morningstar Rating does not include any adjustment for sales loads. The top 10% of products in each product category receive 5 stars, the next 22.5% receive 4 stars, the next 35% receive 3 stars the next 22.5% receive 2 stars, and the bottom 10% receive 1 star. The Overall Morningstar Rating for a managed product is derived from a weighted average of the performance figures associated with its three-, five-, and 10 year (if applicable) Morningstar Rating metrics. The weights are 100% three-year rating for 36-59 months of total returns, 60% five-year rating/40% three-year rating for 60-119 months of total returns, and 50% 10-year rating/30% five-year rating/20% three-year rating for 120 or more months of total returns. While the 10-year overall rating formula seems to give the most weight to the 10-year period, the most recent three-year period actually has the greatest impact because it is included in all three rating periods.

⁴ Average market capitalization measures the size of the companies in which the fund invests. Standard deviation is a three-year statistical measure of the volatility of a fund's returns. Generally, the greater the standard deviation, the greater the fund's volatility. ⁵Source: Morningstar, Inc. as of 05/31/2022.

War, terrorism, sanctions, economic uncertainty, trade disputes, public health crises and related geopolitical events have led and, in the future, may lead to significant disruptions in U.S. and world economies and markets, which may lead to increased market volatility and may have significant adverse effects on the fund and its investments.

Fund risk: Stocks may decline in value. Any fund that concentrates in a particular segment of the market will generally be more volatile than a fund that invests more broadly. There are special risks associated with an investment in real estate, including REITs. These risks include credit risk, interest rate fluctuations and the impact of varied economic conditions. Investing in foreign securities presents certain risks, such as currency fluctuations, political and economic changes, and market risks. Emerging markets tend to be more volatile and less liquid than the markets of more mature economies, and generally have less diverse and less mature economic structures and less stable political systems than those of developed countries. The fund may lend securities to approved institutions. Please read the prospectus for details.

Consider the investment objective, risks, charges and expenses carefully before investing. For a summary prospectus, or prospectus that contains this and other information, download one from www.dws.com or talk to your financial representative. Read the prospectus carefully before investing.
