## Overall Morningstar Ratings™

Morningstar Category: Foreign Large Value

### Investor Class ★

Morningstar ratings vary among share classes and are based on historical risk-adjusted total returns, which are not indicative of future results.

## Goal and Strategy

Long-term capital appreciation by investing in non-U.S. companies believed to be trading at significant discounts to their intrinsic value.

## Distinguishing Characteristics

Employs a bottom-up, fundamentally based process to invest in a concentrated set of companies. Seeks to provide diversification within a non-U.S. equity allocation by investing in traditionally overlooked and mispriced securities.

## Morningstar Rating - Investor Class

## Morningstar Category - Foreign Large Value

	Overall	3 Year	5 Year	10 Year
Rating	★	★	-	-
# of Funds	316	316	-	-

The Morningstar Rating™ for funds, or star rating, is calculated for managed products (including mutual funds, variable annuity and variable life subaccounts, exchange-traded funds, closed-end funds, and separate accounts) with at least a three-year history. Exchange-traded funds and open-ended mutual funds are considered a single population for comparative purposes. It is calculated based on a Morningstar Risk-Adjusted Return measure that accounts for variation in a managed product's monthly excess performance, placing more emphasis on downward variations and rewarding consistent performance. The Morningstar Rating does not include any adjustment for sales loads. The top 10% of products in each product category receive 5 stars, the next 22.5% receive 4 stars, the next 35% receive 3 stars, the next 22.5% receive 2 stars, and the bottom 10% receive 1 star. The Overall Morningstar Rating for a managed product is derived from a weighted average of the performance figures associated with its three-, five-, and 10-year (if applicable) Morningstar Rating metrics. The weights are: 100% three-year rating for 36-59 months of total returns, 60% five-year rating/40% three-year rating for 60-119 months of total returns, and 50% 10-year rating/30% five-year rating/20% three-year rating for 120 or more months of total returns. While the 10-year overall star rating formula seems to give the most weight to the 10-year period, the most recent three-year period actually has the greatest impact because it is included in all three rating periods.
