Share Class: A | TOLLX C | TOLCX S | TOLSX INST | TOLIX R6 | TOLZX

## Morningstar® Rating<sup>3</sup>

Morningstar Infrastructure Category

Overall rating (as of 6/30/22)

Class S ★ ★ ★ ★

Overall Morningstar ratings 4 stars; 89 funds. Three year rating 4 stars; 89 funds. Five year rating 4 stars; 76 funds. Ten year rating 4 stars; 33 funds. Morningstar ratings are based on risk-adjusted performance. Source: Morningstar, Inc. **Ratings are historical and do not guarantee future results. Ratings for other share classes may vary.**

## Objective

The fund seeks total return from both capital appreciation and current income.

## Strategy

Global infrastructure—the framework that society requires to function on a day-to-day basis—is essential to world economic growth and may also be in increasing demand. DWS RREEF Global Infrastructure Fund seeks to take advantage of the opportunities these changes present by investing in the securities of global companies that own and operate physical infrastructure assets as their core business. The team believes this type of investing best replicates the unique investment characteristics of the infrastructure asset class.

## Expense ratio (as of latest prospectus)

Class	Net	Gross	Contractual Waiver
A	1.28%	1.38%	04/30/2023
C	2.03%	2.15%	04/30/2023
S	1.13%	1.21%	04/30/2023
INST	1.03%	1.13%	04/30/2023
R6	1.03%	1.03%	04/30/2023

Without a waiver, returns would have been lower and any rankings/ratings might have been less favorable.

## Average annual total returns (as of 6/30/22)

S	20.28%	-2.10%	29.16%	-11.06%	13.45%	8.33%	-14.22%	18.19%	18.28%	16.44%

**Performance is historical and does not guarantee future results. Investment returns and principal fluctuate so your shares may be worth more or less when redeemed. Current performance may differ from the data shown. Please visit [www.dws.com](http://www.dws.com) for the fund's most recent month-end performance. Performance includes reinvestment of all distributions. Index returns assume reinvestment of all distributions and do not reflect fees or expenses. It is not possible to invest directly in an index. Not all share classes are available to all investors. A minimum investment of \$1 million is required to open an account for Institutional shares.**

\* This fund began operations on 6/24/08 with Institutional shares. Returns prior to inception reflect the original share class performance, adjusted for higher operating expenses and/or the maximum sales charge.

Holdings-based data is subject to change.

<sup>1</sup> The MSCI World Index tracks the performance of stocks in select developed markets around the world, including the United States.

<sup>2</sup> The Dow Jones Brookfield Global Infrastructure Index measures the stock performance of companies that exhibit strong infrastructure characteristics. Index components are required to have more than 70% of cash flows derived from infrastructure lines of business. The index intends to measure all sectors of the infrastructure market.

<sup>3</sup> ©2022 Morningstar. All Rights Reserved. The information contained herein: (1) is proprietary to Morningstar and/or its content providers; (2) may not be copied or distributed; and (3) is not warranted to be accurate, complete or timely. Neither Morningstar nor its content providers are responsible for any damages or losses arising from any use of this information. Past performance is no guarantee of future results. The Morningstar Rating™ for funds, or 'star rating', is calculated for managed products (including mutual funds, variable annuity and variable life subaccounts, exchange-traded funds, closed end funds, and separate accounts) with at least a three-year history. Exchange-traded funds and open-ended mutual funds are considered a single population for comparative purposes. It is calculated based on a Morningstar Risk-Adjusted Return measure that accounts for variation in a managed product's monthly excess performance, placing more emphasis on downward variations and rewarding consistent performance. The Morningstar Rating does not include any adjustment for sales loads. The top 10% of products in each product category receive 5 stars, the next 22.5% receive 4 stars, the next 35% receive 3 stars the next 22.5% receive 2 stars, and the bottom 10% receive 1 star. The Overall Morningstar Rating for a managed product is derived from a weighted average of the performance figures associated with its three-, five-, and 10 year (if applicable) Morningstar Rating metrics. The weights are 100% three-year rating for 36-59 months of total returns, 60% five-year rating/40% three-year rating for 60-119 months of total returns, and 50% 10-year rating/30% five-year rating/20% three-year rating for 120 or more months of total returns. While the 10-year overall rating formula seems to give the most weight to the 10-year period, the most recent three-year period actually has the greatest impact because it is included in all three rating periods.

<sup>4</sup> Beta is a historical measurement of a fund's sensitivity to the movements of the fund's benchmark index. A fund with a beta greater than one is more volatile than the benchmark. A fund with a beta less than one is less volatile. Beta is based on a three-year period relative to the index. Sharpe ratio is a measure of returns reward per unit of risk for a given period. A high sharpe ratio reflects a strong historical risk-adjusted performance. <sup>5</sup>Source: Morningstar, Inc. as of 05/31/2022.

**War, terrorism, sanctions, economic uncertainty, trade disputes, public health crises and related geopolitical events have led and, in the future, may lead to significant disruptions in U.S. and world economies and markets, which may lead to increased market volatility and may have significant adverse effects on the fund and its investments.**

**Fund risk:** Stocks may decline in value. Investing in foreign securities presents certain risks, such as currency fluctuations, political and economic changes, and market risks. Emerging markets tend to be more volatile and less liquid than the markets of more mature economies, and generally have less diverse and less mature economic structures and less stable political systems than those of developed countries. Any fund that concentrates in a particular segment of the market will generally be more volatile than a fund that invests more broadly. The fund may lend securities to approved institutions. Companies in the infrastructure, transportation, energy and utility industries may be affected by a variety of factors, including, but not limited to, high interest costs, energy prices, high degrees of leverage, environmental and other government regulations, the level of government spending on infrastructure projects, intense competition and other factors. This fund is non-diversified and can take larger positions in fewer issues, increasing its potential risk. Please read the prospectus for details.
