

Parametric Tax-Managed International Equity Fund

Diversified international equity fund focused on after-tax returns.

The Fund

The Fund's rules-based, top-down process seeks to take advantage of certain quantitative and behavioral characteristics of developed international markets. Emphasis is placed on small- and mid-sized countries and economic sectors.

The Approach

We invest in countries by tilting the portfolio away from the highest concentrations in the market. The portfolio is rebalanced as concentrations build by seeking to sell into strength and buy into weakness.

The Features

The Fund seeks to capture gains through systematic rebalancing, while providing diversified exposure to developed markets outside the U.S. The Fund also seeks to maintain exposure across key economic sectors.

Fund Facts

Class A Inception	4/22/1998

Benchmark: MSCI EAFE Index³

Past performance is no guarantee of future results. Investment return and principal value will fluctuate so that shares, when redeemed, may be worth more or less than their original cost. Performance is for the stated time period only; due to market volatility, the Fund's current performance may be lower or higher than quoted. For the Fund's performance as of the most recent month-end, please refer to eatonvance.com. Returns are historical and are calculated by determining the percentage change in net asset value (NAV) with all distributions reinvested. Returns for other classes of shares offered by the Fund are different. Performance less than or equal to one year is cumulative.

After-tax returns are calculated using certain assumptions, including using the highest individual federal income tax rates in effect at the time of the distributions and do not reflect the impact of state/local taxes. Actual after-tax returns depend on a shareholder's tax situation and the actual characterization of distributions and may differ from those shown. After-tax returns are not relevant to shareholders who hold shares in tax-deferred accounts or shares held by nontaxable entities. Return After Taxes on Distributions may be the same as Return Before Taxes for the same period because no taxable distributions were made during that period. Return After Taxes on Distributions and Sale of Fund Shares may be greater than or equal to Return After Taxes on Distributions for the same period because of losses realized on the sale of Fund shares. Before-tax and after-tax returns for other classes of shares offered by the Fund are different.

¹Total net assets equals the sum of the net assets of each of the Fund's share classes. Portfolio total net assets includes fund total net assets plus any additional assets invested in the Portfolio. ²Source: Fund prospectus. Net Expense Ratio reflects a contractual expense reimbursement that continues through 2/28/23. Without the reimbursement, if applicable, performance would have been lower. ³MSCI EAFE Index is an unmanaged index of equities in the developed markets, excluding the U.S. and Canada. MSCI indexes are net of foreign withholding taxes. Source: MSCI. MSCI data may not be reproduced or used for any other purpose. MSCI provides no warranties, has not prepared or approved this report, and has no liability hereunder. Unless otherwise stated, index returns do not reflect the effect of any applicable sales charges, commissions, expenses, taxes or leverage, as applicable. It is not possible to invest directly in an index. Historical performance of the index illustrates market trends and does not represent the past or future performance of the fund.

RISK CONSIDERATIONS The value of investments held by the Fund may increase or decrease in response to economic, and financial events (whether real, expected or perceived) in the U.S. and global markets. The value of equity securities is sensitive to stock market volatility. Investments in foreign instruments or currencies can involve greater risk and volatility than U.S. investments because of adverse market, economic, political, regulatory, geopolitical, currency exchange rates or other conditions. Smaller companies are generally subject to greater price fluctuations, limited liquidity, higher transaction costs and higher investment risk than larger, more established companies. Market conditions may limit the ability to generate tax losses or to generate dividend income taxed at favorable tax rates. The Fund's ability to utilize various tax-managed techniques may be curtailed or eliminated by tax legislation regulation or interpretation. The Fund is exposed to liquidity risk when trading volume, lack of a market maker or trading partner, large position size, market conditions, or legal restrictions impair its ability to sell particular investments or to sell them at advantageous market prices. The sub-adviser uses proprietary investment techniques and analyses in making investment decisions for the Fund. A systematic investment process is dependent on the sub-adviser's skill in developing and maintaining that process. The impact of the coronavirus on global markets could last for an extended period and could adversely affect the Fund's performance. No fund is a complete investment program and you may lose money investing in a fund. The Fund may engage in other investment practices that may involve additional risks and you should review the Fund prospectus for a complete description.
