Seeks long-term capital appreciation

Select Portfolio of Stocks

A focused portfolio of 20-40 high quality value businesses that represents the team's highest conviction investment ideas and is based on our disciplined strategy, which has a 19 year track record.

Attractive Price and Prospects

A stock's price is only half the equation. If a company's prospects are poor, its price may never increase. Our team seeks quality businesses at attractive prices with potential catalysts for positive change, such as improving balance sheets and strong management teams.

Team Structure

In-depth, comprehensive insight from the US Large/Mid Cap Team that is aligned by industry and conducts research across all market sizes.

Total Returns at NAV (%)

Average Annual Total Returns (%)

Below are the fund's average annual total returns with all distributions reinvested for periods ended 6.30.22:

(as of 06/30/22)	1 Year	5 Years	Since Inception
NAV	-6.52%	+7.50%	+7.40%

The returns represent past performance. Past performance does not guarantee future results. The Fund's investment return and principal value will fluctuate so that an investor's shares, when redeemed, may be worth more or less than their original cost. Current performance may be lower or higher than the performance quoted above. Please visit our Web site at www.GSAMFUNDS.com to obtain the most recent month-end returns.

The Standardized Total Returns are average annual total returns or cumulative total returns (only if the performance period is one year or less) as of the most recent calendar quarter-end. They assume reinvestment of all distributions at net asset value. Because Investor Shares do not involve a sales charge, such a charge is not applied to their Standardized Total Returns.

The expense ratios of the Fund, both current (net of any fee waivers or expense limitations) and before waivers (gross of any fee waivers or expense limitations) are as set forth above. Pursuant to a contractual arrangement, the Fund's waivers and/or expense limitations will remain in place through at least December 29, 2022, and prior to such date the Investment Adviser may not terminate the arrangements without the approval of the Fund's Board of Trustees.

Performance reflects cumulative total returns for periods of less than one year and average annual total returns for periods of greater than one year. Since inception returns for periods of less than one year are cumulative. All Fund performance data reflect the reinvestment of distributions.

The Net Asset Value (NAV) is the market value of one share of the Fund. Percentages may not sum to 100% due to rounding.

Assets Under Supervision (AUS) includes assets under management and other client assets for which Goldman Sachs does not have full discretion.

All or a portion of the Fund's distributions may be treated for tax purposes as a return of capital, however, the final characterization of such distributions will be reported annually on Form 1099-DIV. The final tax status of the distributions may differ substantially from the above dividend information. Distributions from net investment income and distributions from net capital gains, if any, are normally declared and paid annually.

The Goldman Sachs Focused Value Fund invests primarily in U.S. equity investments and invests, under normal circumstances, in approximately 20-40 companies that are considered value opportunities, which the Investment Adviser defines as companies with identifiable competitive advantages whose intrinsic value is not reflected in the stock price. The Fund's investments are subject to **market risk**, which means that the value of the securities in which it invests may go up or down in response to the prospects of individual companies, particular sectors or governments and/or general economic conditions. **Foreign and emerging markets investments** may be more volatile and less liquid than investments in U.S. securities and are subject to the risks of currency fluctuations and adverse economic, social or political developments. The securities of **mid- and small-capitalization companies** involve greater risks than those associated with larger, more established companies and may be subject to more abrupt or erratic price movements. **Different investment styles** (e.g., "quantitative") tend to shift in and out of favor, and at times the Fund may underperform other funds that invest in similar asset classes. The Fund may have a **high rate of portfolio turnover**, which involves correspondingly greater expenses which must be borne by the Fund, and is also likely to result in short-term capital gains taxable to shareholders. The Fund is "**non-diversified**" and may invest a larger percentage of its assets in fewer issuers than "diversified" mutual funds. Accordingly, the Fund may be more susceptible to adverse developments affecting any single issuer held in its portfolio and to greater losses resulting from these developments.

The Russell 1000 Value Index measures the performance of the large-cap value segment of the U.S. equity universe. The Index figures do not reflect any deduction for fees, expenses or taxes. It is not possible to invest directly in an unmanaged index.

The Global Industry Classification Standard (GICS) was developed by and is the exclusive property and a service mark of Morgan Stanley Capital International Inc. (MSCI) and Standard & Poor's, a division of The McGraw-Hill Companies, Inc. (S&P) and is licensed for use by Goldman Sachs. Neither MSCI, S&P nor any other party involved in making or compiling the GICS or any GICS classifications makes any express or implied warranties or representations with respect to such standard or classification (or the results to be obtained by the use thereof), and all such parties hereby expressly disclaim all warranties of originality, accuracy, completeness, merchantability or fitness for a particular purpose with respect to any of such standard or classification. Without limiting any of the foregoing, in no event shall MSCI, S&P, any of their affiliates or any third party involved in making or compiling the GICS or any GICS classifications have any liability for any direct, indirect, special, punitive, consequential or any other damages (including lost profits) even if notified of the possibility of such damages.

The Weighted Average Market Cap represents the average value of the companies in the index or portfolio. The Weighted Median Market Cap provides the middle market capitalization level in the index or portfolio. Companies with a larger market capitalization have a greater impact on both calculations.

Fund holdings and allocations shown are unaudited, and may not be representative of current or future investments. Fund holdings and allocations may not include the Fund's entire investment portfolio, which may change at any time. Fund holdings should not be relied on in making investment decisions and should not be construed as research or investment advice regarding particular securities. Current and future holdings are subject to risk.

Lipper Total Return Rankings - Lipper Analytical Services, Inc., an independent publisher of mutual fund rankings, records rankings for these and other GS Funds for one-year, three-year, five-year, and ten-year total returns periods. Lipper compares mutual funds within a universe of funds with similar investment objectives, including dividend reinvestment. Lipper rankings are based on **total return** at net asset value and do not reflect sales charges. Lipper rankings do not imply that the fund had a high total return. **Rankings for other share classes may vary.**

Correlation Measure - R-squared: Measures how closely the historical movement of a portfolio's returns relates to a particular market index over a specified time period. **Risk Measures** - Standard Deviation: Measures the historical total risk of a portfolio by assessing the probable range within which a portfolio's return could deviate from its average return over a defined historical period of time. Beta: Measures the historical market risk of a portfolio or the volatility of a portfolio relative to an underlying index over a defined historical period of time.

A summary prospectus, if available, or a Prospectus for the Fund containing more information may be obtained from your authorized dealer or from Goldman Sachs & Co. LLC by calling 1-800-526-7384. Please consider a fund's objectives, risks, and charges and expenses, and read the summary prospectus, if available, and the Prospectus carefully before investing. The summary prospectus, if available, and the Prospectus contains this and other information about the Fund.
