

ClearBridge Small Cap Value Fund

Value | Fact Sheet as of June 30, 2022

Investment Overview

Invests primarily in small-cap equities with attractive valuations. Seeks long-term capital growth using both quantitative and fundamental methods to select stocks. Emphasizes individual security selection while diversifying among industries and sectors.

Performance data quoted represents past performance, which does not guarantee future results. Current performance may be lower or higher than the figures shown. Principal value and investment returns will fluctuate, and investors' shares, when redeemed, may be worth more or less than the original cost. Performance would have been lower if fees had not been waived in various periods. Total returns assume the reinvestment of all distributions and the deduction of all fund expenses. Returns with sales charge reflect a deduction of the stated maximum sales charge. An investor cannot invest directly in an index, and unmanaged index returns do not reflect any fees, expenses or sales charges. Returns for periods of less than one year are not annualized. All classes of shares may not be available to all investors or through all distribution channels. For current month-end performance, please visit www.franklintempleton.com.

Effective August 2, 2021, except as noted below, Class C [including Class C, Class C-1 & Class C-2] shares will automatically convert to Class A shares after the shares have been held for 8 years from their original purchase date. The initial conversion took place on August 16, 2021. Refer to the fund's prospectus or contact your Service Agent for more information.

Share Class Details

	CUSIP	Ticker	Sales Charges (%)		Expenses (%)	
			Max	CDSC	Gross	Net
Class A	52469G513	SBVAX	5.75	—	1.38	1.35
Class C	52469G489	SBVLX	0.00	1.00	2.14	2.10
Class I	52469G471	SMCYX	0.00	—	1.04	1.00
Class IS	52471R697	LCBIX	0.00	—	0.97	0.90

Gross expenses are the fund's total annual operating expenses for the share class(es) shown. Net expenses for Class(es) A, C, I & IS reflect contractual fee waivers and/or reimbursements, where these reductions reduce the fund's gross expenses, which cannot be terminated prior to December 31, 2023 without Board consent.

There is a 1% CDSC on any Class C shares you sell within 12 months of purchase.

With a legacy dating back over 60 years, ClearBridge Investments is a leading global equity manager committed to delivering differentiated long-term results through authentic active management.

What should I know before investing?

Equity securities are subject to price fluctuation and possible loss of principal. Small- and mid-cap stocks involve greater risks and volatility than large-cap stocks. International investments are subject to special risks, including currency fluctuations and social, economic and political uncertainties, which could increase volatility. Short selling is a speculative strategy. Unlike the possible loss on a security that is purchased, there is no limit on the amount of loss on an appreciating security that is sold short. Derivatives, such as options and futures, can be illiquid, may disproportionately increase losses, and have a potentially large impact on fund performance. The manager's investment style may become out of favor and/or the manager's selection process may prove incorrect, which may have a negative impact on the fund's performance. The manager's portfolio selection strategy is not solely based on ESG considerations, and therefore the issuers in which the fund invests may not be considered ESG-focused companies. Integrating ESG considerations into the investment process is not a guarantee that better performance will be achieved.

Glossary

Beta A measure of the fund's volatility relative to the market, as represented by the stated Index. A beta greater than 1.00 indicates volatility greater than the market. **R-squared** measures the strength of the linear relationship between the fund and its benchmark. R-squared at 1 implies perfect linear relationship and zero implies no relationship exists. **Sharpe Ratio** refers to a risk-adjusted measure calculated using standard deviation and excess returns to determine reward per unit of risk. The higher the ratio, the greater the risk-adjusted performance. **Standard Deviation** measure of the degree to which a fund's return varies from the average of its previous returns. The larger the standard deviation, the greater the likelihood (and risk) that a fund's performance will fluctuate from the average return. **Alpha** is the annualized percentage difference between a portfolio's actual returns and its expected performance given its level of market risk, as measured by beta. **Information Ratio** In investing terminology, the ratio of expected return to risk. Usually, this statistical technique is used to measure a manager's performance against a benchmark. This measure explicitly relates the degree by which an investment has beaten the benchmark to the consistency by which the investment has beaten the benchmark. **Tracking Error** measure of the deviation of the return of a fund compared to the return of a benchmark over a fixed period of time. Expressed as a percentage. The more passively the investment fund is managed, the smaller the tracking error. **Turnover** is a measure of the fund's trading activity which represents the portion of the fund's holdings that has changed over a twelve-month period through the fiscal year end. There is no assurance that the fund will maintain its current level of turnover. **Price to Book** The price per share of a stock divided by its book value (i.e., net worth) per share. For a portfolio, the value represents a weighted average of the stocks it holds. **Price to Earnings (12-Month Trailing)** is the share price of a stock, divided by its per-share earnings over the past year. For a portfolio, the value represents a weighted average of the stocks it holds.
