

BNY Mellon International Fund

FACT SHEET
June 30, 2022

Class M **MPITX** Investor Shares **MIINX**

Goal/Approach

The fund seeks long-term capital growth. To pursue its goal, the fund normally invests at least 65% of its total assets in equity securities of foreign issuers. Foreign issuers are companies organized under the laws of a foreign country, whose principal trading market is in a foreign country or with a majority of their assets or business outside the United States. The fund invests principally in common stocks, but the fund's equity investments also may include preferred stocks and convertible securities, including those purchased in initial public offerings (IPOs) or shortly thereafter. The fund may invest in companies of any size and will limit its investments in any single company to no more than 5% of the fund's assets at the time of purchase.

¹Before the fund commenced operations on 10/2/00 (fund inception date), substantially all of the assets of a predecessor common trust fund (CTF) that, in all material respects, had the same investment objective, policies, guidelines and restrictions as the fund were transferred to the fund. The performance figures presented represent the performance of the predecessor CTF from its inception date (7/15/98) through 10/1/00, adjusted to reflect the fund's fees and expenses, by subtracting from the actual performance of the CTF the expenses of the fund's class M shares (net of any fee waivers and expense reimbursements), and the performance of the fund's Class M shares thereafter. The predecessor CTF was not registered under the Investment Company Act of 1940 and therefore was not subject to certain investment restrictions that might have adversely affected performance. ²Portfolio composition is as of 6/30/2022 and is subject to change at any time. ³Performance figures may reflect reimbursements or fee waivers, without which the performance would have been lower. ⁴Represents the CTF Inception ⁵Source: FactSet. The MSCI EAFE Index (Europe, Australasia, Far East) is a free float-adjusted, market capitalization-weighted index that is designed to measure the equity market performance of developed markets, excluding the U.S. and Canada. Reflects reinvestment of net dividends and, where applicable, capital gain distributions. Investors cannot invest directly in any index.

Risks: **Equities** are subject to market, market sector, market liquidity, issuer, and investment style risks, among other factors, to varying degrees. Investing in **foreign denominated and/or domiciled securities** involves special risks, including changes in currency exchange rates, political, economic, and social instability, limited company information, differing auditing and legal standards, and less market liquidity. These risks generally are greater with emerging market countries. *Recent market risks include pandemic risks related to COVID-19. The effects of COVID-19 have contributed to increased volatility in global markets and will likely affect certain countries, companies, industries and market sectors more dramatically than others. To the extent the fund may overweight its investments in certain countries, companies, industries or market sectors, such positions will increase the fund's exposure to risk of loss from adverse developments affecting those countries, companies, industries or sectors.*
