

Wilshire Small Company Growth Portfolio

As of June 30, 2022 | Q2

Investment Strategy

The Wilshire Small Company Growth Portfolio (the “Fund”) focuses on the small company growth segment of the U.S. stock market. The Fund invests substantially all of its assets in the common stock of companies with smaller market capitalizations at the time of purchase. The Fund invests in companies that historically have above average earnings or sales growth and retention of earnings, often such companies have above average price-to-earnings ratios.

GROWTH OF A \$10,000 INVESTMENT (INSTITUTIONAL CLASS, SINCE INCEPTION)

A hypothetical \$10,000 investment in the Fund’s Class I shares on 7/15/96 would have been worth \$61,912 on 6/30/2022 net of fee. Assumes reinvestment of dividends and capital gains.

¹Returns for periods less than one year are aggregate and returns for periods more than one year are annualized. The performance quoted reflects fee waivers in effect, and would have been lower in their absence. The performance data quoted represents past performance and is not indicative of future results. Current performance may be lower or higher. Performance data current to the most recent month-end may be obtained at wilshire.com. The investment return and principal value of an investment will fluctuate so that shares, when redeemed, may be worth more or less than their original costs.

All funds may experience periods of negative performance.

⁴The Morningstar Rating™ for funds, or "star rating", is calculated for managed products (including mutual funds, variable annuity and variable life subaccounts, exchange-traded funds, closed-end funds, and separate accounts) with at least a three-year history. Exchange-traded funds and open-ended mutual funds are considered a single population for comparative purposes. It is calculated based on a Morningstar Risk-Adjusted Return measure that accounts for variation in a managed product's monthly excess performance, placing more emphasis on downward variations and rewarding consistent performance. The top 10% of products in each product category receive 5 stars, the next 22.5% receive 4 stars, the next 35% receive 3 stars, the next 22.5% receive 2 stars, and the bottom 10% receive 1 star. The Overall Morningstar Rating for a managed product is derived from a weighted average of the performance figures associated with its three-, five-, and 10-year (if applicable) Morningstar Rating metrics. The weights are: 100% three-year rating for 36-59 months of total returns, 60% five-year rating/40% three-year rating for 60-119 months of total returns, and 50% 10-year rating/30% five-year rating/20% three-year rating for 120 or more months of total returns. While the 10-year overall star rating formula seems to give the most weight to the 10-year period, the most recent three-year period actually has the greatest impact because it is included in all three rating periods.

There are risks involved with investing, including the possible loss of principal. Investments in small-cap stocks may be subject to a higher degree of market risk than large-cap stocks, or more established companies' securities. Furthermore, the illiquidity of the small-cap market may adversely affect the value of an investment so that shares, when redeemed, may be worth more or less than their original cost.

You should consider the Fund's investment objectives, risks, charges, and expenses carefully before you invest. The Fund's summary or full prospectus, which can be obtained by calling 1-866-591-1568, contains this and other information about the fund.

Read the prospectus carefully before you invest or send money.

Diversification does not ensure a profit or protect against loss. Past performance is not indicative of future results.

The Russell 2000® Growth Index measures the performance of the small-cap growth segment of the U.S. equity universe. It includes those Russell 2000 companies with higher price-to-book ratios and higher forecasted growth values. Index performance is presented for general comparative purposes. Unlike a mutual fund, the performance of an index assumes no taxes, transaction costs, management fees or other expenses. An individual cannot directly invest in any index.
