Morningstar Style Box™

reveals a fund's investment strategy by showing its investment style and market capitalization based on the portfolio holdings. As of 04/30/2022

Overall Rating:
(Class A, among 734
Diversified Emerging
Mkts funds, based on
Risk adjusted Returns)

Who We Are

Fred Alger Management, LLC is widely recognized as a pioneer of growth-style investment management. We have been an independent, privately owned firm since our founding in 1964. For more than 50 years, we have had **three leaders with one vision**: Maintaining the legacy and continuity of the Alger Investment Philosophy.

Philosophy

Experienced Global Investing Team

- The portfolio managers have been investing in global and international equities for an average of 30 years. Their approach emphasizes evaluating stocks from different and complementary perspectives through a collaborative dialogue.

Focused Portfolio with High Active Share

- This focused portfolio typically invests in fewer than 50 stocks. It is a "best ideas," high conviction portfolio with tracking error generally between 5% and 8%.

Opportunistic Growth Investors

- The portfolio managers are opportunistic investors who seek to find growth across the globe—both in international developed and emerging market countries—regardless of sector or market capitalization.

Process

NEW IDEAS

New ideas come from three sources and are then ranked based on quality and growth criteria for the EVQ Ranking: Earnings revisions (both positive and negative), Valuation, and Quality (Return on Equity).

ANALYSIS

In-depth analysis is performed to develop a view that differs from consensus. Each company is evaluated for its competitive advantage, growth prospects, growth catalysts, management team, valuation, and risks.

DIALOGUE

The portfolio managers have shared company research responsibilities. They regularly meet to review current holdings, evaluate the EVQ Ranking, and prioritize research.

CONSTRUCTION

The portfolios are constructed through a bottom-up, fundamentally driven approach within a macro country/sector/industry framework. The portfolios are made up of our highest conviction, best ideas.

MONITORING

Individual holdings and the collective portfolios are monitored to ensure the risk characteristics are consistent with our tolerance expectations.

Fred Alger Management, LLC has contractually agreed to waive fees or to reimburse Fund expenses (excluding acquired fund fees and expenses, dividend expense on short sales, borrowing costs, interest, taxes, brokerage and extraordinary expenses) through February 29, 2024 to the extent necessary to limit the total annual fund operating expenses of Class A to 1.55%, Class I to 1.45% and Class Z to 0.99% of the class's average daily net assets. This expense reimbursement may only be amended or terminated prior to its expiration date by agreement between Fred Alger Management, LLC and the Fund's Board of Trustees, and will terminate automatically in the event of termination of the Investment Advisory Agreement. Fred Alger Management, LLC may, during the term of the contract, recoup any fees waived or expenses reimbursed pursuant to the contract; however, the Fund will only make repayments to Fred Alger Management, LLC if such repayment does not cause the Fund's expense ratio after the repayment is taken into account, to exceed both (i) the expense cap in place at the time such amounts were waived or reimbursed, and (ii) the Fund's current expense cap. Such recoupment is limited to two years from the date the amount is initially waived or reimbursed.

Only periods greater than 12 months are annualized.

Prior to March 1, 2021, the Fund was co-managed by three portfolio managers. Prior to September 23, 2019, the Fund was managed by different portfolio managers.

The performance data quoted represents past performance, which is not an indication or a guarantee of future results. Investment return and principal value of an investment will fluctuate so that an investor's shares, when redeemed, may be worth more or less than their original cost. Current performance may be lower or higher than the performance quoted. Performance figures assume all distributions are reinvested. Returns with sales charges reflect a maximum front-end sales charge on Class A Shares of 5.25%. For performance current to the most recent month end, visit www.alger.com or call 800.992.3863.

■ Alger Emerging Markets Fund

■ MSCI Emerging Markets Index

Risk Disclosures - Investing in the stock market involves risks, including the potential loss of principal. Growth stocks may be more volatile than other stocks as their prices tend to be higher in relation to their companies' earnings and may be more sensitive to market, political, and economic developments. Local, regional or global events such as environmental or natural disasters, war, terrorism, pandemics, outbreaks of infectious diseases and similar public health threats, recessions, or other events could have a significant impact on investments. A significant portion of assets may be invested in securities of companies in related sectors, and may be similarly affected by economic, political, or market events and conditions and may be more vulnerable to unfavorable sector developments. Foreign securities, Frontier Markets, and Emerging Markets involve special risks including currency fluctuations, inefficient trading, political and economic instability, and increased volatility. Assets may be focused in a small number of holdings, making them susceptible to risks associated with a single economic, political or regulatory event than a more diversified portfolio. Investing in companies of small capitalizations involves the risk that such issuers may have limited product lines or financial resources, lack management depth, or have limited liquidity. Active trading may increase transaction costs, brokerage commissions, and taxes, which can lower the return on investment. This material is not meant to provide investment advice and should not be considered a recommendation to purchase or sell securities.

Class I shares are an investment vehicle for institutional investors, such as corporations, foundations, and trusts managing various types of employee benefit plans, as well as charitable, religious, and educational institutions. Investors may purchase or redeem Class I shares through a financial intermediary. There are no sales charges on purchases or redemptions.

Sector allocations shown are exclusive of cash.

Portfolio Statistics are sourced from Morningstar, an independent source which we believe to be reliable and based on the fund share class referenced.

Active Share is a measure of the percentage of stock holdings in a portfolio that differs from the benchmark index. Alger follows MSCI's country classification system to determine country designation. As such, some companies classified as "United States" are not classified based on country of domicile. Characteristics and portfolio statistics are sourced from FactSet, an independent source which we believe to be reliable. Fred Alger Management, LLC, however, makes no representation that it is complete or accurate. Equity Holdings for the referenced product represents individual securities held, excluding private placements, private equity, rights, warrants, options, other derivatives, cash or cash equivalents and securities where the total market value in the portfolio is less than one dollar. A list of all holdings can be found at www.alger.com for the applicable fund or composite. P/E Ratios were calculated using a weighted harmonic average. Sales Growth and EPS Growth rates were calculated using a weighted median. Please note that alternative methodologies exist for calculating P/E Ratios, Sales Growth, and EPS Growth, and utilizing another methodology might produce materially different results than those shown. Earnings per share (EPS) is the portion of a company's earnings or profit allocated to each share of common stock. Sales Growth is a measure of the estimated sales growth rate of a company over the next 12-months.

Fred Alger Management, LLC uses the Global Industry Classification Standard (GICS®) for categorizing companies into sectors and industries. GICS® is used for all portfolio characteristics involving sector and industry data such as benchmark, active and relative weights and attribution. The Global Industry Classification Standard (GICS®) is the exclusive intellectual property of MSCI Inc. (MSCI) and Standard & Poor's Financial Services, LLC (S&P). Neither MSCI, S&P, their affiliates, nor any of their third party providers ("GICS Parties") makes any representations or warranties, express or implied, with respect to GICS or the results to be obtained by the use thereof, and expressly disclaim all warranties, including warranties of accuracy, completeness, merchantability and fitness for a particular purpose. The GICS Parties shall not have any liability for any direct, indirect, special, punitive, consequential or any other damages (including lost profits) even if notified of such damages. Sector and industry classifications are sourced from GICS. Historical classifications use GICS categories available as

of the date of this presentation.

Portfolio holdings may change and stocks of companies noted may or may not be held by one or more Alger portfolios from time to time. Investors should not consider references to individual securities as an endorsement or recommendation to purchase or sell such securities. Transactions in such securities may be made which seemingly contradict the references to them for a variety of reasons, including but not limited to, liquidity to meet redemptions or overall portfolio rebalancing.

The information contained herein: (1) is proprietary to Morningstar and/or its content providers; (2) may not be copied or distributed; and (3) is not warranted to be accurate, complete, or timely. Neither Morningstar nor its content providers are responsible for any damages or losses arising from any use of this information. **Past performance is no guarantee of future results.**

Morningstar percentile rankings are based on the total return percentile rank that includes reinvested dividends and capital gains (excluding sales charge) within each Morningstar Category. The highest (or most favorable) percentile rank is 1 and the lowest (or least favorable) percentile rank is 100. If sales charges were included, performance would be lower and the rank may be lower.

Morningstar calculates a Morningstar Rating™ based on a Morningstar Risk-Adjusted Return measure that accounts for variation in a fund's monthly performance, placing more emphasis on downward variations and rewarding consistent performance. The Morningstar Rating may differ among share classes of a mutual fund as a result of different sales loads and/or expense structures. It may be based in part, on the performance of a predecessor fund. The Morningstar Rating does not include any adjustment for sales loads. The top 10% of products in each product category receive 5 stars, the next 22.5% receive 4 stars, the next 35% receive 3 stars, the next 22.5% receive 2 stars, and the bottom 10% receive 1 star. The Overall Morningstar Rating for a managed product is derived from a weighted average of the performance figures associated with its three-, five-, and 10-year (if applicable) Morningstar Rating metrics.

Alger Emerging Markets Fund A was rated 4, 3, and 3 Star(s) for the 3-, 5-, and 10- year periods among 734, 635, and 364 Diversified Emerging Mkts funds as of 06/30/22.

Rankings and ratings may be based in part on the performance of a predecessor fund or share class and are calculated by Morningstar using a performance calculation methodology that differs from that used by Fred Alger Management, LLC's. Differences in the methodologies may lead to variances in calculating total performance returns, in some cases this variance may be significant, thereby potentially affecting the rating/ranking of the Fund(s). When an expense waiver is in effect, it may have a material effect on the total return or yield, and therefore the rating/ranking for the period.

The Morgan Stanley Capital International (MSCI) Emerging Markets Index (gross) is a free float-adjusted market capitalization index that is designed to measure equity market performance in the global emerging markets. MSCI Index (gross) Index performance does not reflect deductions for fees or expenses. Investors cannot invest directly in any index. Index performance does not reflect deductions for taxes. Note that comparing the performance to a different index might have materially different results than those shown. **The performance data quoted represents past performance, which is not an indication of a guarantee of future results.**
