The performance shown above represents past performance and does not guarantee future results. Current performance may be lower or higher than the performance information shown. You may obtain performance information current to the most recent month-end by visiting www.abfunds.com. The investment return and principal value of an investment in the Portfolio will fluctuate, so that your shares, when redeemed, may be worth more or less than their original cost. Advisor Class shares have no front-end or contingent deferred sales charges, however when purchased through a financial advisor additional fees may apply. Returns for other share classes will vary due to different charges and expenses. Performance assumes reinvestment of distributions and does not account for taxes. If applicable, high double-digit returns are highly unusual and cannot be sustained; such returns are primarily achieved during favorable market conditions.

[†] The Fund's Advisor Class share inception date is 2/28/94 and is the date used to calculate since inception annualized performance.

[‡] If applicable, this reflects the Adviser's contractual waiver of a portion of its advisory fee and/or reimbursement of a portion of the Fund's operating expenses. Absent reimbursements or waivers, performance would have been lower.

Effective as of the close of business on February 28, 2014, the W.P. Stewart Growth Fund, Inc. (the "Predecessor Fund") was converted into the Fund and the Predecessor fund's shares were converted into Advisor Class shares of the Fund. The inception date of the Predecessor Fund is February 28, 1994.

Past performance does not guarantee future results. Morningstar ratings are specific metrics of performance and do not represent absolute performance of any fund. For each fund with at least a three-year history, Morningstar calculates a Morningstar Rating based on a Morningstar Risk-Adjusted Return measure that accounts for variation in a fund's monthly performance, placing more emphasis on downward variations and rewarding consistent performance. Exchange-traded funds and open-ended mutual funds are considered a single population for comparative purposes. The top 10% of funds in each category receive 5 stars, the next 22.5% receive 4 stars, the next 35% receive 3 stars, the next 22.5% receive 2 stars and the bottom 10% receive 1 star. The Overall Morningstar Rating for a fund is derived from a weighted average of the performance figures associated with its three-, five- and ten-year (if applicable) Morningstar Rating metrics. The Fund was rated 3, 3 and 4 stars against 1138, 1052 and 787 funds in the category for the three-, five- and ten- year periods, respectively. The Fund's other share classes may have different performance characteristics.

S&P (Standard & Poor's) 500 Index includes 500 US stocks and is a common representation of the performance of the overall US stock market.

Investors cannot invest directly in indices or averages, and their performance does not reflect fees and expenses or represent the performance of any AB fund.

A WORD ABOUT RISK

Market Risk: The market values of the portfolio's holdings rise and fall from day to day, so investments may lose value. **Focused Portfolio Risk:** Portfolios that hold a smaller number of securities may be more volatile than more diversified portfolios, since gains or losses from each security will have a greater impact on the portfolio's overall value. **Non-diversification Risk:** The Fund is a "non-diversified" investment company, which means that the Fund may invest a larger portion of its assets in fewer companies than a diversified investment company. This increases the risks of investing in the Fund since the performance of each stock has a greater impact on the Fund's performance. To the extent that the Fund invests a relatively high percentage of its assets in securities of a limited number of companies, the Fund may also be more susceptible than a diversified investment company to any single economic, political or regulatory occurrence. **Capitalization Risk:** Investments in mid-capitalization companies may be more volatile and less liquid than investments in large-capitalization companies.

Investors should consider the investment objectives, risks, charges and expenses of the Fund/Portfolio carefully before investing.
