

Calvert Equity Fund

Strategy Overview

The investment team applies a fundamental approach to investing, primarily in established large-cap growth stocks with a history of sustained earnings growth at a favorable price.

Investment Philosophy

We believe that high-quality companies, those with a demonstrated history of consistent growth and stability in earnings, can more likely provide attractive returns with moderate risk over the long term.

Past performance is no guarantee of future results. Investment return and principal value will fluctuate so that shares, when redeemed, may be worth more or less than their original cost. Performance is for the stated time period only; due to market volatility, the Fund's current performance may be lower or higher than quoted. For the Fund's performance as of the most recent month-end, please refer to eatonvance.com. Returns are historical and are calculated by determining the percentage change in net asset value (NAV) with all distributions reinvested. Returns for other classes of shares offered by the Fund are different. Performance less than or equal to one year is cumulative. Performance prior to December 31, 2016 reflects the performance of the Fund's former adviser, Calvert Investment Management, Inc. The minimum investment is \$1,000 for A Shares and \$1,000,000 for I Shares. Minimums may be waived in certain situations. Please see the prospectus for additional information.

²Sources: Zephyr, Morningstar and Calvert. For illustrative purposes only. Total return prior to commencement of I Shares reflects the total return of another class. The chart above illustrates the average (annualized) return of Calvert Equity Fund I Shares during both rising and declining markets since 10/01/1998 when Atlanta Capital was retained as subadvisor. Results for other time periods may differ from the long-term trend shown above. Rising markets are defined as quarters where the return of the Russell 1000® Growth index was positive. Declining markets are defined as quarters where the return of the Russell 1000® Growth index was negative. These positive and negative quarters are separated out from the intervening quarters, cumulated across the period and annualized. Returns are historical and are calculated by determining the percentage change in net asset value (NAV) with all distributions reinvested. Inception date for Class I Shares is 11/01/1999. Performance during certain periods reflects strong stock market performance that is not typical and may not be repeated.

³**Russell 1000® Growth Index** is an unmanaged index of U.S. large-cap growth stocks. It is not possible to invest directly in an index. Unless otherwise stated, index returns do not reflect the effect of any applicable sales charges, commissions, expenses, taxes or leverage, as applicable. Historical performance of the index illustrates market trends and does not represent the past or future performance of the fund.

DEFINITIONS

Excess Return or value added (positive or negative) is the portfolio's return relative to the return of the benchmark. **Alpha** measures risk-adjusted performance, showing excess return delivered at the same risk level as the benchmark. **Beta** measures the volatility of a fund relative to the overall market. **Sharpe Ratio** uses standard deviation and excess return to determine reward per unit of risk. **Information Ratio** is the portfolio's alpha or excess return per unit of risk, as measured by tracking error, versus the portfolio's benchmark. **Standard Deviation** measures how widely individual performance returns, within a performance series, are dispersed from the average or mean value. **Tracking Error** is the amount by which the performance of the portfolio differs from that of the benchmark. **Upside Market Capture** measures the percentage of the benchmark's returns that was captured by the manager, in periods defined by positive returns for the benchmark. **Downside Market Capture** measures the percentage of the benchmark's returns that was captured by the manager, in periods defined by negative returns for the benchmark.

RISK CONSIDERATIONS

The value of investments held by the Fund may increase or decrease in response to economic, and financial events (whether real, expected or perceived) in the U.S. and global markets. The value of equity securities is sensitive to stock market volatility. Investing primarily in responsible investments carries the risk that, under certain market conditions, the Fund may underperform funds that do not utilize a responsible investment strategy. The Fund is exposed to liquidity risk when trading volume, lack of a market maker or trading partner, large position size, market conditions, or legal restrictions impair its ability to sell particular
